land, anel 10 South.rn States. Callfornia took no action. Subsequenly it was rulified by the 10 Southern States.

\section*{ARTICLE XIV.}

Citizeriship Rishts Not to Be Abridged.
1. All persons born or haturallzed in the United States, and subject to the jurisdiction thareof, are citizens of the United Statos and of the State wherein they reside. No State shall make or enforce diny
law which shall abriage the privileges or immunitie of citizens of the United States; nor shall any State deprive any person of life, liberty, or property without due process of law, nor deny to any person within its jurisdiction the equal protection of the laws.
Apportionment of Representatives in Congress 2. Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State excluding Indians not taxed. But when the right to vote at any election for the choice of Electors for President and Vice-President of the United States Representaitives in Congress, the executive and judicial officers of a State, or the members of the Legislature thereof, is denled to any of the male mem bers of such State, being of twenty-one years of age and citizens of the United States, or in any way abridged, except for participation in rebellion or other crime, the basis of representation thereln slaall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.

Power of Congress to Remove Disabilities
of United States Officials for Rebellion.
3. No person shall be a Senator or Representative in Congress; or Elector of President and Vice-President or holding any office, clvil or milltary, under the United States, or under any State, who, having previously taken an oath, as a member of Congress or as an offlcer of the United States, or as a member of any State Legislature or as an executive or judicial officer of any State, to support the Constitution of the United States, shall have engaged in insurrection or rebelion against the same, or glven ald and comfort to the enemies thercof. But Congress may, by a vote of two-thirds of each House, remove such disabillty.

\section*{What Public Debts Are Valld.}
4. The validity of the public clebt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection and rebellion, shail not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in ald of insurrection or rebellion against the United states, or any claim for the loss or emancipation of any slave; but all such debts, obligations, and claims shall be held illegal and void.
5. The Collgress shall have power to enforce by appropriate legislation the provisions of this article.

The following amendment was proposed to the Legislatures of ehe several Slates by the Fortieth Congress on the 27th of February, 1869, and was declared to have been ratified in a proclamatlon by the Secretary of State, dated March 30, 1870. It was not acted on by Tennessec; it was rejected by California, Delaware, Kentucky, Maryland, and Oregon: ratified by the remaining so States. New York rescinded its ratificatlon January 5, 1870 . New Jersey rejccted it in 1870, but ratifled it in 1871 .

\section*{ARTICLE XV.}

Equal Rights for White and Colored Citizens.
1. The right of the citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.
2. The Congress shall have power to enforce the provisions of this article by appropriate icglslation.

The following amendment was proposed to the Legislatures of the several States by the Sixty-first Congress on the 12th day of July, 1909, and was declared to have been ratifled in a proclamation by the Secretary of State, dated February 25, 1913. The income tax amendment was ratified by all the States except Connccticut, Florida, Pennsylvania, Rhode Island, Utah, and Virginta.

\section*{ARTICLE XVI.}

\section*{Income Taxes Authorized.}

The Congress shall have power to lay and collect taxes on incomes, from whatever sources derived, wlthout apportionment among the several Statcs, and without regard to any census or enumeration.

The following amendment was proposed to the Leoislatures of the several States by the Sioty-second Congress on the \(16 i \mathrm{~h}\) day of May, 1912, and was declared to have been ratifled in a proclamation bv the Secretary of State, dated May 31, 1913. It got the vote of all the States except Alabama, Delaware, Florlda, Georgla, Kentucky, Loulsiana, Maryland, Mississippi, Rhode Island, South Carolina, Utah, and Virglnia. \\ \section*{ARTICLE XVII. \\ \section*{ARTICLE XVII. \\ United States Senators to.Be Elected by} Direct Popular Vote.
1. The Senate of the United States sliali be composed of two Senators from each State, elected by the people thereof, for six years: and ench Senator shall have one vote. The electors in each state shal have the qualifications requlsite for electors of the most numerous brinch of the State Legislatures.

\section*{224 U. S. Government-Constitution; Amendments; Whïte House.}

\section*{Vacancies in Senatorships, When Governor May Fill by Appointment.}
2. When vacancies happen in the representation of any State in the Senatc, the executive authority of such State shail issue writs of election to fill such vacancles: Provided, That the Legisiature of any State may empower the Executive thereof to make temporary appointment untii the peopie fili the vacancies by eleation as the Legisiature may direct.
3. This amendment shali not be so construed as to affect the election or term of any Senator chosen before it becomes vaiid as part of the Constitution.

The following amendment was proposed to the Legislatures of the several States by the Sixiy-fifth Congress, December 18, 1917; and on January 29, 1919, the United States Secretary of State proclaimed its adoption by 36 States, and declared it in effect on January 16, 1920.

Early in 1920, the validity of the Eighteenth Amendment was upheld by the Supreme Court of the United States, in suits to void, brought by the S ates of Rhode Island and-New Jersey, and by various brewers and distillers.

\section*{ARTICLE XVIII.}

Liquor Prohibition Amendment
1. Aftcr one year from the ratification of this article the manufacture, saie, or transportation of intoxicating liquors within, the importation thercof
into, or the exportation thereof from the United States and all territory subject to the jurisdiction thereof for beverage purposes is hereby prohibited.
2. The Congress and the several States shail have concurrent power to enforce this articie by appropriatc legislation.
3. This article'shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the Legislatures of the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the states by the Congress.

The following amendment was proposed to the Legislatures of the several States by the Sixty-ffth Congress, having been adopted by the House of Representatives, May 21, 1919, and by the Senate, I une 4, 1919. On August 26, 1920, the United States Secretary of State proclaimed it in effect, having been adopted (June 10, 1919-August 18, 1920), by three-quarters of the States. The Tennessee House, August 31, rescinded its ratiflcation, 47 to 224.

\section*{ARTICLE XIX:}

Giving Nation-Wide Suffrage to Women.
1. The right of citizens of the United States to vote shail not be denied or abridged by the United States or by any state on account of sex.
2. Congress shail have power, by appropriate legislation, to enforce the provisions of this articie.

\section*{THE FEDERAL SUFFRACE AMENDMENT.}

The United States House of Representatives, in January, 1918, adopted a resoiution submitting a Federai Suffrage Amendment to the States, but the United States Senate refused its consent. The House, May 21, 1919, readopted the resoiution;
and the Senate adopted it.:June 4, 1919. Then the resolution went to the Legislatures of the States, thirty-six of which-the necessary three-quarters of all-adopted Federal Suffrage for women in the foliowing order:

The Iilinois Legislature ratified on June 10, 1919, but an error in the State's certification caused a re-ratification on June 17.
Ratification was defeated in Ala. (Sept. 2, 1919)

Ga. (Juiy 24, 1919) ; Miss. (Jan. 21, 1920) ; S. C. (Jan. 24, 1920); Va. (Feb. 12, 1920) ; Md. (Feb. 17. 1920); Del. (June 2, 1920); La. (June 15, 1920)! N. C. (Aug. 17, 1920).

DATES OF RATIFICATION OF PROHIBITION AMENDMENT.

\section*{THE WHITE HOUSE.}

The site was selected by President Washington and Major Peter Charies L'Enfant when they laid out Washington, 1791; architect, James Hoban of Dub'in; plans chosen by competition ciosed Juiy 15, 1792. Cornerstone laid O'ctober 13,’1792. First occupation-President and Mrs. John Adams, November, 1800. Burned by British in 1814. Mr. Hoban superintended the restoration.. First. White House appropriation from the U. S. Treasury, April \(24,1800, \$ 15,000\), for furniture. The first appropriation for repairs, \(\$ 15,000\), March 3,1807 . Congress appropriated \(\$ 8,137\) for eniarging "the offces west of the President's House," 1819. , South Portico finished 1823; cost \(\$ 19,000\). East Room finished and furnished by appropriation made in 1826 . North Portico added; cost \(\$ 24,769.25\), 1829 . Original pians aiways foilowed. First heated by gas, 1848; system of heating and ventilation instalied, 1853.

A thorough overhauling and restoration was made under dircction of New York architects, McKim, Mead \& White, during incumbency of President Rooseveit June 20-September - \(29_{i}: 1902\). Congress
appropriated in ail \(\$ 475,445\); the architects returning an unexpended balance of \(\$ 7,906.10\).

The principai apartments in the White House:are offleiaily designatcd: the East Room, Red Room, Biue Room, Green Room, 'State Dining Room, Family Dining Room, and Usher's Lobby. There are a Family Fioor, a main stairway, and a private staircase and elevators.

The dimensions of the White House, in 1840, were length or frontage, 170 feet: depth or width, 86 feet. The mansion was buiit of gray sandstone, which Was painted white after the fre hence the name "the White House." Architect Hoban had modelled the structure after the palace of the Duke of Leinster. The original cost was defrayed out of the sale of lands donated by Maryland and Virginia.

The President's Offlce Building is looated at the West of the White House. It was bulit and occupied in 1902, and was enlarged later. The building contains the President's Room, the Cabinet Room, a room for the Président's Secretary, a telegraph room, a press room, and rooms for the clerical force.
U. S. CONSTITUTI'AL AMENDMENTS IN CONGRESS AND IN N. Y. STATE (Compiled by James Hodgson, Sub-Librarlan Legislative Reference Section, N. Y. State Library.)

Notes Tweive amendments were proposed in 1789, of which New York ratined 11, but only 10 were adopted by three-fourths of the States. An attempt was made to have the amendments ratlifed by resolution but the motion failed, 49 to 2 .
"Date recelved in N . Y,," means date on which received by the Legislature.
On February 4,1818 , the President reported to Congress that 12 States had ratlfied the amendment forbldding titles, whilie 3 had rejected it and 2 were undecided.

A resolution to ratify the amendment of 1865 passed the Senate on February 2, and the Assembly on February 3, 1865, 1 ln the Senate, 18 to 8 , and \(\ln\) the Assembly, 72 to 40.

The fourteenth amendment was the frst ratified in New York by resolutlon. Others were ratified by statute.

New York State, on Jan. 5, 1870, withdrew its approval of the Fifteenth Amendment.
NATIONAL STATUARY HALL.
The Natlonal Hall of Statuary, formerly a corridor of the United States House of Representatives in the Capitol at Washington, was establishcd by Congress July 2, 1864 . Each State was invited to contribute marbie or bronze statues of her two most distinguished deceased citizens. The foliowing is a list of statues presented by the States and the dates of the works:

For years 1800 to 1850 the figures for interestbearing debt include the total pubiic debt as of January 1.

Interest charges and interest per capita are for fiscal years

\section*{REDUCTION IN THE UNITED STATES PUBLIC DEBT.}

In a statement on Nov. 3 dealing with the status of the debt of the United States on Oct. 31, 1922, Secretary of the Treasury Melion shows that except for the temporary increase of \(\$ 265,000,000\) in the debt during October, uninterrupted progress has been made in reducing the debt from the peak registered on Aug. 31, 1919, viz., \(\$ 26,596,701,648\). The following is Secretary Meilon's statement:
"The preilminary statement of the pubile debt on Oct. 31,1922 , shows the resuits of the refunding issue of Treasury bonds on Oct. 16, 1922, and at the same time emphasizes the progress which has been made by the Treasury in the orderly funding and graduai liquidation of the pubilc debt, particulariy the short-dated debt.
"Ever slnce the war debt reached its peak, on Aug. 31, 1919, the Treasury has made almost uninterrupted progress in its reduction, though, necessarily, there are fluctuations from time to time as a result of borrowings for refunding purposes and temporary deficiencies in the current revenues. This was the case, for example, in October, when there was a temporary increase in the pubiic debt as a rcsuit of the refunding operations on Oct. 16 and the excess of current expenditures, arising chlefiy from heavy payments of interest on the public debt.
"Income and profits taxes, which constitute the Government's heaviest reccipts. are paid quarterly, in March, June, September and December of each year, while interest payments, which constitute the largest single item of Government expense, fail chiefly in March, April, May, June, September, October, November, December. In these circumstances one month's operations necessarily give a distorted picture, and it takes at least a fuil quarter, or even a fuii year, in order to get a correct view of the Government's finances.

The following table shows the gross public debt (cents omitted) on the basis of dally Treasury statements for each quarter from Aug. 31, 1919, when the debt reached its peak, to Oct. 31, 1922, and indicates how reguiariy the debt reduction has progressed:
\begin{tabular}{|c|c|c|}

\hline
\end{tabular}
dated debt has been still more striking. On April .30, 1921, When the Treasury first announced its refunding program, there was over \(\$ 7,500,000,000\) of debt maturing before the end of the present fiscai year. By Oct. 31, 1922, that is to say, eighteen months later, about \(\$ 4,500,000,000\) had already been retired or refunded, leaving about \(\$ 3,000,000\),000 to be refinanced during the baiance of the year.
"Treasury certificates, outstanding ail have tax maturities, and the total is now less than \(\$ 1,000\), 000,000 , the iowest figure for several years back.
"As for the Dec. 15 maturities of certificates and cailed Victory notes, the refunding operations have aiready reduced them to manageable proportions, and there wlii be further retirements between now and Dec. 15 out of existing Treasury balances. pursuant to general offers already made to redeem calied Victory notes and Dec. 15 certificates before maturity.
"Against its December maturities, the Treasury Wili receive, it is estimated, about \(\$ 275,000,000\) in income and profits taxes, which will stili further reduce the amount requiring to be refunded. There is every assurance that the refunding which remalns to be accompilshed wili be completed without strain on the country's financial miachinery and without disturbance of the market for outstanding securities.

The United States Treasury Department on Oct. 16, 1922, offered for pubilic subscription \(41 / 2\) per cent. United States Treasury bonds of 1947-52. The cash subscriptions totalied \(\$ 1,399,851,900\). Subscriptions aggregating \$252,060,900, were also recelved in the 10 rm of exchanges of \(43 / 4\) per cent. Victory notcs and Dec. 15 Treasury certificates, making the total subscription for the offering in excess of \(\$ 1,651,900,000\). The exchange subscriptions were allotted in fuil. All cash subscriptions for amounts not exceeding \(\$ 10,000\) were also ailiotted in fuli. The others were scaled; subscriptions for over \(\$ 10,000\) but not exceeding \(\$ 50,000,40\) per cent. ; over \(\$ 50,000\) but not exceeding \(\$ 100,000,30\) per cent. ; over \(\$ 100,000\) but not exceeding \(\$ 500,000\), 20 per cent.; over \(\$ 500,000\) but not exceeding \(\$ 1\) :\(000,000,15\) per cent.; over \(\$ 1,000,000,10\) per cent.

The successful consummation of this large financial operation marks the second phase in the execition of the loan refunding policy inauguratod in 1921 by the present Administration. The first phase may be said to cover the period irom April 30,1921 , when the Treasury first announced its refunding program to the close of September of the present year, during which the short-term debt, \&. e., the debt maturing within the next two years from the beginning of the period, was reduced from about \(\$ 7,500,000,000\) to about \(\$ 3,500,000,000\), through refunding of about \(\$ 2,743,000,000\) into Treasury notes, with maturitles spread over the period from June 15,1924 , to Sept. 15, 1926, and the retirement of the balance. The second phase of th; refunding program may be said to have been entered with the placing of the present long-term refunding loan. which matures in October, 1952 , but nay be redeemed on or after Oct. 15. 1947. on four months' notice.

\end{tabular}

In the foregoing table the figures for 1890 to 1908, inclusive, but not subsequently, include the number of depositors and the amount of deposits in the State banks of Illinois having savings depart-
ments but not the number of such banks, by reason of the fact that general returns from these institutions are incorporated in State banks' returns.

FEDERAL INCOME TAX CHART.
(Complled by the Guaranty Trust Co.; of N. Y., and based on the U. S. Revenue Act of Nov. 23, 1921.)
Chart shows the tax payable by a married person or head of a family, but does not take cognizance of any exemption for dependents.

Amount of surtax is the total of the instalments on individual income in exeess of \(\$ 200,000\) for the for the income considered.

In eomputing the tax in the above chart a personal exemption of \(\$ 2,500\) is allowed on ineomes not in exeess of \(\$ 5,000\). On incomes of \(\$ 6,000\) and over, \(\$ 2.000\) is allowed.

Many ehanges are made in the former law by this act, among which are the repeal of the exeess-profits tax and the taxes on transportation, as of Jan. 1 ,
1922 , and the reduction of the surtax to 50 per contum
year 1922 and thereafter.
For 1922 and thereafter an individual deriving gains from the sale or exchange of eapital assets, may eleet to have the gains taxed at the rate of \(12 \frac{1}{2}\) per eent., the remainder of his net ineome being taxed in the usual manner for normal tax and surtax. If he eleets to be so taxed, the total tax shall not be less than \(12 \frac{1}{2}\) per cent. of the total net income.
For 1922 and thereafter, eorporations are subject to ineome tax at the rate of \(121 / 2\) per cent.

* Not availabie.

SUMMARY OF RATIOS OF OPERATION-CLASS I. RAILWAYS.

STOCKS, BONDS, ETC., OF RAILROADS, INCLUDING AMOUNTS NOMINALLY OUTSTANDING.
(Excludes returns for switching and terminal companies.)

a Covers only roads of Class I. and II. and their non-operating subsidiaries. These two classes comprise over 98 per cent. of all the roads.

\section*{CAELE AND WIRELESS SYSTEMS IN UNITED STATES.}
(By the Bureau of the Census.)

Does not include statistics for the occan cable systems operated by the Western Unlon Telegraph Co.. as no segregation could be obtained of the inancial statistics for the cable business of this company.

BELL TELEPHONE STATISTICS.
(Complled by Chief Statistician, American Telephone and Telegraph Co., N. Y. City.)

"Bell Connected Statlons" 'are independently owned, but are connected wlth Bell lines and exchanges for the interchange of local and long distance service. "Average Dally Messages". represents the number of messages during the year preceding the Jan. 1 date shown, and includes local, toll and long distance messages. Figures for employees, mlles of wire, and average dally messages do not include statistles for the independently owned companies which connect with the Bell Telephone System.

Under date of 1919, figures for employees are as of July 31,1918 ; figures for messages are for the first seven months of 1918 . Under date of 1920 , figures for messages are for the last tive months of 1919. In the calendar year, 1915 and thereafter, all incomplete messages were rigidly excluded from the statistics.

The total number of telephones, wlthout regard to ownershlp, in use ln the Unlted States on Jan. 1, 1922, was \(13,847,752\)-one to every eight persons or every two famlles.

\section*{BEAUMONT AND PORT ARTHUR SHIP CHANNEL.}

\section*{(By Harvey W. Gilbert, member Waterway Committee.)}

The Beaumont and Port Arthur ship channel has now become one of the greatest in the United States, both in value of exports and imports, as well as tonnage produced. The Imports consist malnly of Mexican petroleure and a small amount of sisal. The first shipping done in this district was through the port of Sabine Pass, which was a natural outlet for the Neches and Sabine Rivers which passed into Sabline Lake and emptied into the Gult through Sabino Pass.

Seven years ago the channel from Port Arthur to Beaumont was completed, the citizens of Jefferson County putting un one-hal of the money to dig this
channel, and the U.S. Government furnishing the other haif, making a complete waterway from the Gulf up as far as Beaumont, thirty miles inland. The waterway has become the worid's greatest oil refining centre.

The bulk of the lumber from the great pine regions of Eastern Texas, and Western Loulsiana, as well as the sulphur production of Louisiana, use thls waterway. Most of the petroleum from. Kansas, Oklahoma, and Texas, is run through the Beaumont refineries. The late John W. Gates settied at and developed Port Arthur.

Approximately 300,000 barres of petroleum are handled daily on the channel.

\section*{TONNAGE EXPLAINED.}
(By the U. S. Shipping Board.)

Deadweight Tonnage expresses the number of tons of 2,240 pounds that a vessel can transport of cargo, stores and bunker fuel. It is, the difference between the number of tons of water a vessel displaces "ilight" and the number of tons it displaces when submerged to the "load water line." Deadweight tomnage is used interchangeably with deadwelght carrying eapacity. A vesscl's capacity for weight cargo is less than its total deadweight ton \({ }^{-}\) nage.

Cargo Tonnage is either "welght" or "measurement. \({ }^{\prime \prime}\) The weight ton in the United States and in British countries is the Engiish long or gross ton of 2,240 pounds. In France and other countrics having the metric system a weight ton is \(2,204.6\) pounds. A "measturement"' ton is usualiy 40 cubic feet, but in some instanees a larger number of cubie feet is taken for a ton. Most occan package frolght is taken at weight or measurement (W|M), ship's option.

Gross Tonnago applies to vessels, not to eargo. It is determined by dividing by 100 the contents,
in eubic fect, of the vessel's closed-in spaces. A vessel ton is 100 eubie feet. The register of a vessel states both gross and net tonnage.

Net Tonnage is a vessel's gross tonnage minus deductions of space occupied by accommodations for crew, for machinery for navigation, by the engine room and fuel. A vessel's net tonnage expresses the space avaliable for the accommodation of passengers and the stowage of cargo. A ton of cargo, in most instances, occuples less than 100 eubic feet henee the vessel's eargo tonnage may exeeed its net tonnage, and, indeed, the tonnage of cargo carried is usuaily greater chan the gross tomnage

Displacement of a vessel is the weight, in tons of 2,240 pounds; of the vessel and its contents. Dis placement "light" is the weight of the vessel without stores, bunker fuel, or'cargo Displacement "londed" is the weight of the vessel, plus cargo, fucl, and stores.
For a modern freight steamer the following rola tive tonnage figures would ordinarily be approximately eorrect net tonnage, 4,000; gross tonnage, 6,000; deadweight earying capaclty, 10,000; displacemont loaded, about 13.350 .

}

The extension of rail and water routes to the

Edst, West and South coastg of tho United States has transferred the export tratle to the great coast ports. The import figures at the Inierior points mostly .relate to parcel post and other mail, and express. matter.

\section*{CTHER NATIONALITIES, NOT INCLUDED IN TABLE.}

Number of farmers born in-Scotland, 7,605; Wales, 2,472; Holland, 15,589; Switzerland. 13,051; France, 6,119; Poland, 17,352; Finland, 14,988; Roumania, 693; Greece, 846; Portugal, 4,254; other European countries not in the table, 20,107; Mexico, 12,142; all other countries, 7.765 .

Note by the Census Bureau-The foreign countries which contributed the largest numbers to the total of 581,068 foreign-born white farmors in the United

States as reported for 1920, were as follows: Germany, 140,667; Sweden, 60,461; Norway, 51,599 Canada, 48,668; Russia, 32,388; Austria, 30,172 England, 26,614; and Denmark, 25,565 .
It should be noted that this order by no means corresponds to the order in which the various foreign countries have contributed to the total population of the United States.

The immigrants from certain countries, notably Italy, Poland, and Ireland, have gone chiefly into pursuits other than agricultural.

\section*{FOREIGN-BORN WHITE FARMERS IN 1910.}

The number of foreign-born white farmers in the United States in 1910, by the Federal Census of that year, by chief races, was as follows: Germany, 221,800; Sweden, 67,453; Canada, 61,878; Norway,

59,742; England, 39,728; Ireland, 33,480; Austria, 33,336; Denmark, 28,375; Russia, 25,788; Switzerand, 14,333; Holland, 13.790; Italy, 10.614; Scotland, 10,220; Poland, 7,228; France, 5,832; Wales, 4,110; Hungary, 3,827 .

\section*{FARM MIGRATIONS TO AND FROM CANADA.}

The number of Canadian farmers in the United States in \(1920(48,668)\) was offsct. approximately, by the number of farmers born in the United States who are now cultivating land in Canada. This migration across the international border is largely in the Northwest, and is dive to the gradual move-
ment north of the wheat-growing lands. There arc in the eastern provinces of the Dominton comparatively few farmers who were born in the United States, the migration having been chiefy by the French Canadians into this country, where they engaged in the intensive cultivation of small tracts in New England.

\title{
VALUE OF FARM PROPERTY IN THE U. S.-1850-1920.
}

\end{tabular}

The average value of iand and buildings per acre of land in farms in the United States in 1920 was \(\$ 69.38\), as compared with \(\$ 39.60\) in 1910

The average valuc of land and buildings per farm for the United States as a whole in 1920 was \(\$ 10,284\), as compared with \(\$ 5,471 \ln 1910\).

In the census reports a distinction is made between farmers operating their own land only and farmers who hire some land in addition to that which they own. The former are classlfied as "full owners" and the latter as "part owners." The value of farms operated by full owriers in 1920 was \(\$ 30,717,493,565\), and of those operated by part owners; \(\$ 9,156,810,001\).. The corresponding ngures for 1910 were: Fuli owners, \(\$ 17,310,639,016\), and part owners, \(\$ 5,056,295,262\).

\section*{MAJORITY OF INSECTS HELPFUL TO}

\section*{MAN.}

As against over 7,000 deatis per year due to raliroad accidents there are 97,200 dcaths each year in this country due to maiaria and intestinai diseascs, spread by inscet carricrs. And while in the whoie Spanish War oniy 300 men were kliled by Spanish bulicts, 5,000 dled of fly-borne discascs. Yet the
great majority of insects are either harmiess or benehcial to man.

Aithough we are abie to determlne the damage donc by insccts it is impossibie to caicuiate the beneflts they confer. Practicaily no fruits couid be formed without the blossom-poiiinating aid of insects, and in the production of a harvest, insects, especiaiiy bees, of course, dwarf into inslgnificance ail modern implements of husbandry.

It would be impossible to get a singie crop of red clover without the aid of insects, and the present scarcity of bumbie bees, who usuaily perform this service, is making itscif feit in the smaller crops and iower vitaility of tile ciover seed.

Their importancc in tilis connection was reailzed in Austraila and the Philppine Isiands, which imported bumbie bees for the sake of their ciover crops Figs couid not be successfully grown in thls country until a fig poilinating inscct was imported from the Meditcrranean countries

A great majority of the beautiful flowers depend n insects for the devciopment of their sced.

\section*{CENSUS BUREAU'S NOTE TO FARM MORTGAGE TABLE.}

While the flgures given above relative to the number of mortgaged farms in the United States include the farms operated by part owners-that is, farms whose owners hired some additional land-the figures representing the amount of the mortgage debt relate only to those farms. which consisted wholly of land owned by the operator.

This limitation was made necessary by the diflculty of ascertaining the value of that part of the tarm which was covered by the mortgage, where the farmer owned a part of the farm and hired a part of it.

OWNERSHIP OF MORTGAGED FARMS.
The total number of farms reportcd as mortgaged in \(1920(1,461,306)\) comprised \(1,217,234\) farms operated by full owners and 244,072 farms operated by part owners.
The number of farms operated by full owners for
which the amount of mortgage debt was reported in 1920 was \(1,193,047\), as compared with \(1,006,511\) in 1910.

The amount of the farm mortgage debt-reported was \(\$ 4,003,767,192\) in 1920, as against \(\$ 1,726,172 ; 851\) in 1910.

\section*{INCREASE IN MORTGAGE DEBT:}

The amount of debt thus increased \(\$ 2,277,594,341\); or 131.9 per cent. while the value of the mortgaged farms increased 117.6 per cent. during the decade. The valuc of the farms for which the amount of the mortgage debt was reported in 1920 was \(\$ 13\),775,500,013.

The debt therefore represented 29.1 per cent. of the value, as compared with 27.3 per cent. in 1910.

The average rate of interest paid on farm mort-
gages in the United States in 1920 was 6.1 Der cent.

\section*{IRRICATION IN THE UNITED STATES.}

The climatic conditions having the largest influence in determining the necessity for irrigation are the amount and seasonabie distribution of precipitation, particulariy rainfail, while wind movement and reiative humidity also have an influence.

In that part of the United States lying east of the arid and semi-arid States the normai annuai precipitation exceeds 25 inches and is so distributed throughout the year as to provide sufficient moisture for the growing of general farm crods. In this section short periods of drought occur sufficientiy often to make irrigation desirable for such crops as truck and smaii frults, which may be damaged to a large extent by iack of moisture for even short periods, although the irrigation of these crops is not generai. Seasons with too little rainfall for the proper growth of generai crops occur, but not sufficiently often to justify making provision for irrigation.

Arkansas, Louisiana, and Eastern Texas have a normal annual precipitation of from 40 to 50 inches, which is ample for ail crops except rice. It is necessary to keep water standing on rice fields during most of the growing period of this crop, and for this the rainfaii is not sufficient. Irrigation in this section is practically confined to the rice fields.

THE SGMI-ARID REGION.
The States of North and South Dakota, Nebraska, Kansas, Oklahoma, and Western Texas lie in the socaiied semi-arid region, and have a normal annual precipitation varying from about 15 inches at their western boundaries to about 25 or more inches at their eastern boundaries. In this section success in growing crops without irrigation varies from year to year according to the amount and distribution of the rainfail, and the practice of irrigation advances eastward and rccedes to the west with periods of deficient or excessive rainfaii.

The same condition exists on the plains in the eastern parts of Montana, Wyoming, Coiorado, and New Mexico. Here crops are grown on the high piains without irrigation, with varying success, whiie irrigation is generaily practised in the stream vaileys.
The main ranges of the Rocky Mountains extend through Montana, Wyoming, Colorado, and New

Mexico. On the high mountains the precipitation, particuiarly snowfali, is heavy, while in the vaileys between the ranges the precipitation is iight and irrigation is necessary for the growing of most crops. THE REAL ARID REGION
West of the Rocky Mountains and between tinem and the Sierra Nevada and Cascade Mountains and extending from the Mexican boundary to Central Idaho is the reai arid region of the United States. Here the normal annuai precipitation varies from about 2 inches in Southwestern Arizona and Southeastern California to about 8 inches in Southern eastern California to about 8 inches in southern
Idaho. In this section, comprising the iarger parts of Arizona, Nevada and Utah, and considera⿻i一 parts of California, Oregon, Washington and Idaho aimost no crops can be grown in the valieys withont irrigation. On the higher iands in Arizona, Utah Idaho, Oregon, and Washington the precipitation is greater and grain and forage crops are grown without irrigation. Northern Idain, Northwestern Montana, and Northeastern Washington receive sufficient precipitation for growing crops witiout irrigation.

West of the Sierra Nevada and Cascade Mountains there is a great variation in rainfall. The western coast of Washington and Oregon receives the heaviest precipitation of any part of the United States, but there is a dry period in the iate summer, during which irrigation is desirable for crops winich make their growth during this period. Irrigation is practiscd to a iimited extent for pastures, vegetables, and fruits.

IN CALIFORNIA
Throughout Caiifornia there is a weil-defined wet season in the winter months, and an equaiiy weiidefined dry season in summer. Most of the northern part of the State rcceives suffcieut rainfaii to mature crops if it were distributed thronghout the year, but the growing of crops in iate summer requires irrigathe growing of crops in iate summer requires irrigaof the State receives less moisture than is usualiy considered neccssary for crop growing, but the concentration of the year's precipitation in the winter and spring makes it possibie to mature crops wherc it would not be possibie were the rainfall more wideiy distributed throughout tile year.

\section*{MILK AND BUTTER PRODUCED AND USED IN THE U. S.}

\section*{(Data and estimates are by the U. S. Dept. of Agriculture.)}

The total production of milk in the United States was \(98,862,276,000\) lbs. in 1921. This shows \(\ln -\) ercase over 1920, when produetion was 89,658,\(000,000 \mathrm{lbs}\). On the basis of production per capita of population this amounted to an increase from 100 gals. ( 860 lbs .) In 1920 to 107 gals. in 1921

Milk cows on farms lnereased 341,000 head during 1921, there being 24,028,000 head: on Jan. 1. 1922, eompared with 23,594.000 head on Jan.' 1. 1921, wlth an average for the year of \(23,811,000\) head. In addition, the number of milk cows not on farms was estimated at \(1,250,000\).
A very great inerease \(\ln\) the quantity of ereamery butter manufaetured occurred during 1921, the total produetion for the year being \(1,054.938,000\) lbs., an lncrease over 1920 of \(191,360,000\) lbs. The total produetion of farm and factory butter, exclusive of whey butter, for the year 1921 ls estimated to have amounted to \(1,705,438,000 \mathrm{lbs}\), notwithstanding the regular deerease \(\ln\) production of farm butter. Thls increase of \(166,361,000\) lbs. in total butter production accounts for the utilization of an additional \(3,494,000,000\) lbs. of mllk during 1921 over the previous year.

Although there was a smail deerease in the total production of eheese from 362,431,000 lbs. in 1920 to \(355,838,000 \mathrm{lbs}\). in 1921 , the production of whole milk American checse alone increased from 254.\(684,000 \mathrm{lbs}\). to \(261,727,000 \mathrm{lbs}\). during this perlod.

Condensed and evaporated milk production decreased \(113,852,000 \mathrm{lbs}\). during 1921 , dropping from
\(1,578,015,000\) lbs. in 1920 to \(1,464,163,000\) lbs. Milk powder produetion also declined from 10, \(334,000 \mathrm{lbs}\). in 1920 to \(4,243,000 \mathrm{lbs}\). in 1921.

The increase in the amount of whole mllk used for household purposes during 1921, approximating \(5.000,000,000\) lbs., aecounts for the largest share of the total lnerease over 1920 in the consumption of milk. The average consumption of milk and cream in cities was obtained from reports from 300 cities wlth a total population of \(33,676,563\), nearly one-third of the populatlon of the United States. On the basis of this survey, the average quantity of whole milk consumed per person in the eities was estimated at 0.668 of a pint daily, and, in addition, the eonsumption of eream accounted for the utilization of 0167 of a pint of milk, máking a total equivalent to 0.835 of a pint of whole milk.

Combining the rural and urban eonsumption, the average per capita consumption of whole milk as milk and cream for household purposes was 1.08 pints daily. This ls equal to 49 gals. of milk annually, which is the largest annual per eapita consumption on recorc in this country.

Iee cream production, as lndicated by reports from manufacturers, decreased \(6 \%\) in 1921 coinpared with 1920. Applying this rate of decrease to the estimated total production of \(260,000,000\) gals. in 1920, the 1921 produetion is estimated at 244,000,000 gals.

The avcrage yield of the \(25,061,000 \mathrm{mllk}\) eows in the United States in 1921 was \(3,945 \mathrm{lbs}\). of milk.

Vegetables include potatoes and sweet potatoes. Hay and forage include \(\$ 206,934,650\) of corn cut for forage.

The 1919 figures include the value of corn cut for forage, which crop was not reported to any extent in 1909. The value of corn cut for forage in the United States in 1919 was \(\$ 206,934,650\), or 8.2 per cent. of the total value of hay and forage.

Forest Products of Farms-Value of in 1919: Sold, or cut and held for sale, \(\$ 217,716,046\); used on farm, \$176,605.782.

Nursery and Greenhouse Products-Value of in 1919: Nursery, \(\$ 20,434,389\); greenhouse, \(\$ 77,380\).230 , of which \(\$ 61,892,352\) was from flowers and flowering plants, and \(\$ 15,487,878\) from vegetables and vegctable plants.

In New York State, nursery products sold for \(\$ 2,310,253\); greenhouse products for \(\$ 8,689,325\).

\section*{INCREASE OF VALUE IN FARM CROPS.}

The total value of farm crops harvested in 1919 (excluding forest products and nursery and greenhouse products) was \(\$ 14,755,364,894\), as against \$5,231,850,683 in 1909. These figures represent an increase of \(\$ 9,523,514,211\), or 182 per cent., for the decade. This ncrease in the valuc of farm crops is due manily to the fact that the prices of crops were
unusually high in the year 1919. A tabulation of the quantities of all the important crops barvested in 1919, with values computed on the basis of 1909 prices, indicates an increase of 8.6 per cent. So much of the increase in value, therefore, may be attributed to increased production and the remainder to higher prices.

\section*{VALUE OF FARM CROPS IN 1909.}
(Flgures represent dollars.).

Cereals, total, \(2,655,539,714\); corn, \(1,438,553,919\) : wheat, \(657,656,801\); oats, \(414,697,422\); other cereals, 154.631,572.

Fiay and forage, excluding corn cut for forage, \(826.401,175\).

Vergetables, total, \(418,110,154\). Potatoes (white),
\(166,423,910\); sweet potatoes and yams, \(35,429,176\); other vegetables, 216,257,068.

Tobacco, 104,302,856.
Cotton (including cottonseed), \(824,696,287\).
All other crops, \(392,800,497\).
Total of all crons, \(5,231,850.683\).

\end{tabular}

Of the 1921 cotton crop, \(2,198,158\) bales ( \(500-1 \mathrm{bs}\).) were produced in Texas; 813,014 in Mississippi; 796,936 in Arkansas; 787,084 in Georgia; 776,222 \(\mathrm{in}_{58}\) North Carolina; 754,560 in South Carolina; 580,222 in Alabama; 481,286 in Oklahoma; 301,950 in Tennessee; 278,858 in Louisiana; 69,931 in Missouri
16,368 in Virginia: 10,905 in Florida; and 8,715 in other States, including Kentucky and New
Mexico, and the linter production of Arizona,

California, Florida, Illinois, and Missouri.
In 1921 the cotton mills in the United States consumed \(5,408,979\) bales of 500 Ibs. of which the Southern mills used \(3,151,954\) bales.

There are over \(36,000,000\) active cotton spindles in mills in the United States.

Production of cotton seed oil in 1921 was 123,815,000 gallons; cake and meal, 1,352,000 short tons. Loss of cotton, due to boll weevil insects in the felds, in 1921 was \(6,277,000\) bales.

\end{tabular}

Production figures exclude pulled wool, estimated at \(42,500,000 \mathrm{lbs}\). for 1922 .

The number of woollen mills in the United States exceeds 1,000 , and there are about 80,000 looms, over 8,000 of which are used in making carpets and
rugs. The number of active spinning spindles exceeds \(4,000,000\), pretty evenly divided between woollens and worsteds. There are usually from 250,000 to 500,000 idle spindles.

The 1922 U.S. cane sugar production flgures do not include Texas.

Sugar Consumption in the U. S.-(1921),
58.8 lbs. per capita. in 1900). The average net cash price of granulated sugar in 1921 was 6.2 cents a pound.

\section*{IMPORTS AND EXPORTS OF SUGAR, ETC., IN DETAIL.}
(For year ended June 30, 1922. . Values are in parentheses.)

Imports-Cane sugar (from Cuba), 7,720,255,237 lbs. ( \(\$ 171,300,590\) ) : cane sugar (from Philippines), \(538,468,567\) lbs. ( \(\$ 21,656,224\) ); cane sugar (from Dominica), \(93,067,270\) lbs. ( \(\$ 2,502,158\) ) ; cane sugar (from Central America), \(43,738,907\) lbs. ( \(\$ 1,219,396\) ); molasses, \(87,911,060\) gals. ( \(\$ 1,673,354\) ); beet sugar, 29,387 lbs. ( \(\$ 1,164\) ) : maple sugar and maple syrup, \(3,672,489 \mathrm{lbs}\). ( \(\$ 341,861\) ) : sugar candy and confectionery, 870,305 lbs. \((\$ 261,872)\).

Exports of domestic-sugar, 2,002,038,450 lbs ( \(\$ 77,447,331\) ) ; molasses, \(5,774.935\) gals. ( \(\$ 696,916\) ); confectionery, including sweet chocolate, \$1,718.665; chewing gum, \(\$ 824,186\); maple sugar and maple syrup (Jan. 1 to June 30, 1922), 242,056 lbs. ( \(\$ 46,214\) ) ; honey, \(2,406,922\) lbs. ( \(\$ 261,899\) ); glucose (corn syrup), \(258,447,893\) lbs. \((\$ 6,109,862)\); grape sugar (corn sugar), \(15,534,234\) lbs. ( \(\$ 448,244\) ) syrup,' \(6,717,062\) gals. ( \(\$ 1,808,758\) ).

THE SUGAR INDUSTRY IN THE U. S.
Practically all of the cane sugar is manufactured in La. Beet sugar is manufactur ed in Cal., Mich. Ohio, Utah and Wis., and other States, including Col., Idaho, Ill. and Neb.

The 1922 tobacco crop was estimated, Sept. 1, by the Dent. of Agriculture, at \(1,353,000,000\) pounds. Tobacco exports and imports are of the flscal years ending in year after year named in stub.

TOBACCO IMPORTS AND EXPORTS.
(For year ended June 30, 1922. Values are in parentheses.)
Imports-Phillippine leaf, \(503,840 \mathrm{lbs}\) ( \(\$ 56,954\) ); ( \(\$ 156,728,904\) ); stems, scrap, etc., \(11,242,130 \mathrm{lbs}\). cigar leat from other countries, \(5,211,021\) lbs. \((\$ 10,-\) 940,393 ) ; all other leaf, \(59,510,576\) lbs. ( \(\$ 46,052,498\) ); cigars; cheroots and cigarettes, \(1,894,913\) lbs. ( \(\$ 5\),940,906).

Exports of domestic-Leaf, 451,555,221 lbs. ( \(\$ 540,452\) ); cigars and cheroots, 1,096 thousand ( \(\$ 23,265\) ); cigarettes, \(9,601,781\) thousand ( \(\$ 20\),645,019 ) ; plug, \(3,021,907\) 1bs. ( \(\$ 1,503,359\) ) ; smoking tobacco, \(2,307,036\) lbs. ( \(\$ 943,579\) ); snuff (Jan. 1 to June 30, 1922), \(4,561 \mathrm{lbs}\). \((\$ 2,776)\); other tobacco manufactures \(\$ 445,383\).
TOBACCO MANUFACTURES IN THE UNITED SṬATES IN 1919.

Primary horsepower, 43,397.

\section*{TYPES OF AMERICAN TOBACCO.}

The leading types of tobacco held are "bright yellow," grown in Virginia, North Carolina, Sourh Carolina, and Georgia, and "burley," grown almost entirely in Kentucky, Indiana, Ohio, and West Virginia. The production of these types is greater than that of any others, and it is therefore to be expected that they would lead in the quantities held at the scveral report dates.

The type of tobacco ranking third,, so far as quantity is concerned, is "dark fired,", which is grown in the Clarksville, Hopkinsville, and Paducah districts.

Of the cigar" types, 'Pennsylvania' led in the quantity beld for the several report dates prior to January, 1921, being closely followed in this respect by the "Onio, "Wisconsin," and "New England" types. Since that date "Wisconsin" ranks first.

\section*{WHAT AMERICANS DRINK.}

The table does not include for any year withdrawals of distilled spirits for scientific purposes and for use of the United States, or since 1906 withdrawals for denaturation, free of tax.

Hudson River shad fishery (1920), 199,844 lbs. ( \(\$ 56.309\) ).
The Pacific Coast salmon pack in 1920 was \(6,289,321\) cases. Of the total pack \(4,395,937\) cases came rom Aiaska, 1,187,616 from British Columbia, 166,520 from Puget Sound, and 481,545 from Columbia

The U. S. Bureau of Fisheries, in 1921, distributed \(1,109,637,130\) fish eggs; \(3,626,262,730\) small fry, and \(226,589,545\) fingerlings and yearlings. Chief varieties were: flounder, cod, poliock, whitefish, haddock, pike, perch, buffalo fish and cisco.

\section*{FISH IMPORTS AND EXPORTS.}
(For the year ended June 30, 1922. Values in parentheses.)

Imports-Cod, haddock, hake, and pollock (cured or preserved), \(53,706,375\) lbs. ( \(\$ 3,241,824\) ) ; fish in oil, \(20,174,952\) lbs. ( \(\$ 3.848,400\) ) ; herrlng, \(64,073,724\) lbs. ( \(\$ 3,435,383\) ) ; mackerel, \(12,505,648\) lbs. ( \(\$ 988\).133 ) ; all other cured, \(12,240,690\) lbs. \((\$ 1,724,537)\); halibut (iresh), \(26,536,184\) lbs. ( \(\$ 3,165,740\) ) ; salmon (fresh), \(11,699,953\) lbs. ( \(\$ 1,113.902\) ) ; smelts (fresh), \(8,273,758\) lbs. ( \(\$ 1,057,916\) ); aii other, fresh, \(72,976,-\)

400 lbs. \((\$ 5,122,088)\) : crab meat, 3.677629 lbs ( \(\$ 1.600,484\) ); lobsters (canned), \(1,89 \pm, 896\) lbs. (\$991.608) ; lobsters (all other), 7,072,424 lbs. (\$1,234,611 ) ; shrimps and turtles, \(\$ 744,295\).

Exports of domestic-Salmon (canned), \(69,213,635\) lbs. \((\$ 9,239,217\) ) ; sardines (Jan. 1 to June 30, 1922), \(7,040,787\) lbs. \((\$ 594,849)\); oysters, \(\$ 529,016\); total fish, all kinds, \(\$ 16,846,314\).

\section*{BIRD COUNT IN THE UNITED STATES.}
(By the Chief of the Bureau of Biological Survey, Unlted States Department of Agrlculture.)

It has been ascertained through these counts that birds in the agricultural districts in the Northeastern United States average siightiy more than a pair to the acre, though in parts of the arid West and on the trecless plains this number dwindles to an average of half a pair, or even less, to the acre.

By far the most abundant blrds in the United States are the robin and the English sparrow, but severai others are common enough to make their total numbers run well Into the millions. The counts so far show that the most abundant blrd on farms in the Northeastern States is the robin: next to thls is the English sparrow, and following these are the catbird, brown thrasher, house wren, klngbird and
bluebird, in the order named. The densest bird population anywhere recorded is near Washington, D. C., where a careful count showed, in 1915 , one hundred and thirty-five palrs of forty specles on five acres. Two city blocks, well furnished with trees, in the city of Alken, S. C., harbored sixty-five pairs on ten acres.

Some specles of ducks and geese and other water birds, togetlier wlth certaln land birds, are decldedly on the lncrease, whlle others, some few, appear to be steadily decreasing; but as a whole the blrd population seems to be now on the increase. A few species, however, such as the trumpeter swan. Esklmo curlew, Carolina paroquet, and the ivory-blled woodpecker seem to be rapidly decreasing in numbers and may be on the verge of extinction.

Tlguras as to wage carners represent tho average number.
PrImary horsepower, total for the 14 groups-(1919) \(29,507,117\); (1914) \(22,470,872\); (1909) \(18,675,376\) (1904) \(13,487,707\), ( 1899 ) \(10,097,803\). The group, tron and steel and thelr products, 111919 used \(8,082,692\) horsepower, lumber and 1ts remanufactures, \(3,417,941\), textlles and thelr products. \(3,274,090\), food and klndred products, \(2,571.257\). paper and printing, \(2,351,224\); chemicals and allied products, \(2,043,525\), stone, clay, and glass products, \(1,500,719\).

Value added by manufacture. - The value of products is not always a satjfactory measure of elther the absolutc or the relatlve importance of a flven industry. The best measure of an mindustry, from a manufacturing standmoint, is the valuo created by the manufacturing operations carried on withon the industry. This vatue is ealculated oy deducting the cost of tho materials used from the value of the products and se termed 'value added by manufacture.'

MANUFACTURING IN THE U. S., BY INDUSTRIES, IN 1919 AND 1914.
(U. S. Census figures.)

NOTE.-The figures for some industries do not represent the total production because important establishments that manufacture the same class of products may be included in other industries.

ployed in the big establishments having over 1,000 wage earners each. More than half of the total number of wage earners ( 53.5 per cent.) were in establishments employing more than 250 wage earners each; 17.4 per cent. in establishments enploying 101 to 250 ; 9.8 per cent. in establishments employing 51 to 100 each; and 19.4 per cent. in establishments employing not over 50 wage earners. The number of wage earners employed in the smali establishments having from 1 to 5 wage earners each was only 3.4 per cent. of the total.

\section*{ELECTRIC POWER DEVELOPMENT IN THE U. \(S\).}

CENTRAL ELECTRIC STATIONS-COMPARISON OF HYDROELECTRIC AND ALL STATIONS.

\section*{ELECTRICAL UNITS AND THEIR POPULAR DEFINITIONS}

The watt is the unit expressing electrical power as horsepower (hp) represents power in mechanics; it is equal to the product of the voits (pressure) times amperes (rate of flow). Thus, 2 volts times 2 amperes would give in a direct current circuit 4 watts. Electrical energy is sold at so much per watt hour or more generally at a given amount per kilowatt hour-which means 1,000 watt hours. This may represent 1 watt for 1,000 hours or 1,000 watts for 1 hour. 746 watts are equal to one horsepower or inverseiy 1 kilowatt (kw) is equal to about \(11 / 3\) horsepower.

The horsepower represents the power required to lift a weight of 33,000 pounds 1 foot in 1 minute or 550 pounds 1 foot in 1 second.

The ohm is the unit of electrical resistance and represents the physical property of a conductor which offers a resistance to the flow of electricity, permitting just 1 ampere to flow at 1 volt of pressure. For example, 1,000 feet of copper wire of No. 10 B . and S . gauge has just 1 ohm of resistance and allows the flow of 1 ampere at 1 volt.

Custom mills and mills cutting less than 50 M feet not included in 1914.
Number of active sawmills (1919) 29,534 ; (1909) 46,584 .

\section*{BY-PRODUCTS OF THE FORESTS.}

Consumption of timber in 1919 in by-products was as follows in the United States:

Veneers, \(576,581 \mathrm{M}\) feet, worth \(\$ 25,104,164\), of which red gum supplied \(198,641 \mathrm{M}\) feet, worth 84,616,727; yellow pine, 67,071 M feet; birch, 54,079 M feet; Cottonwood, 36,739 M feet; tupelo, 34,175 M feet; yellow poplar, \(32,653 \mathrm{M}\) feet; and white oak, \(30,654 \mathrm{M}\) feet. Smaller quantities were used of maple, walnut, spruce, and other woods.

Dyestuffs, 950,275 tons of wood, worth \(\$ 12,133,-\) 799 , of which chestnut supplied 754,972 tons. The timber came mainly from Virginia, Tennessee and North Carolina.

Tanning, 609,130 tons of wood and bark, worth \(\$ 12,027,687\), mostly oak and hemlock.

Extracts, \(794,360,977\) pounds of wood, worth \(\$ 34,579,165\), mainly
spruce, and hemlock.
Wood used in distllation, 1,442,675 cords, of which hardwoods (mostly beech, birch and maple) supplled 1,186,477 cords. From hard woods are distilled wood alcohol, charcoal, acetates, tar and tar oils. Wood alcohol produced for sale in 1919 totalled 6,980,693 gallons. From soft woods are distilled rosin, turpentine, tar, tar oils, charcoal, and wood creosote.

Value of forest products of farms in 1919 -Sold. \(\$ 217,716,046\); used on farms, \(\$ 176,605,782\). Area of merchantable timber on farms (1920) \(35,270,527\) acres (on 946,871 farms).

\end{tabular}

\footnotetext{
Redwood is cut only in Cal. Sugar Pine almost all comes from Cal.; Lodge-pole Pine from Col. and Wyo.
In 1919 there were produced in the United States,
} 1,724,078,000 laths and 9,192,704,000 shingles.

Cordwood consumed on farms in U. S. averages \(70,000,000\) cords a year, worth \(\$ 350,000,000\).

Red oak, when first cut, weighs 5,800 lbs. a cord; chestnut 4,900; cottonwood, 4,200.
PAPER AND PULP PRODUCTION IN THE UNITED STATES.

Paper imports (1921) newsprint, \(1,584,962,674\) lbs. \((\$ 79,123,368)\); all other and total, value, \(\$ 92,462,472\). Paper exports (1921) newsprint, \(33,641,462 \mathrm{lbs}\). \((\$ 2,162,975)\); all other and total, value, \(\$ 49,494,822\). Wood pulp (1921) exports, 28,483 net tons; imports. 697,100 net tons.

\section*{Messengers do not include telegraph. Many clerks probabiy are salesmen.}

The "gainfuily occupicd" children consist mainiy (1) those working on their own account, such as levsboys, and (2) employees working for ghill. Tine totai number of eliildren gainfully oecupled vas on!y slightly more tilian hall hs large in 1020 ns \(!1910\), the decrease having been 46.7 per cent. Tor the several broud groups of occupations the ates of increase or denrease were as follows. Agriculure, forestry, and anlmal hushandry, decrease of
54.8 per cent.; extraction of minerais. decrease o 60.2 per cent., manulacturing ond mectanical industries, decrease of 29 ber cent.; transportation decrease of 9.1 per cent.; trade. decrease of 10.4 per cent., public servlee (not eisewhere ciassifed) Increase of 110.4 per cent.; professioual service decrease of 2.8 per cent.; domestic and persona service, decrease of 51.9 per cent.; clerlcai occupations increase of 12.9 Der cent.

OCCUPATIONS OF CHILDREN IN THE U. S.
(U. S. Census Data.)
\begin{tabular}{rl|r|r|r|r|r|r|r|r}
\hline \\
\hline
\end{tabular}

Of the maies in the U.S. 10 to 15 years of age 11.3 per cent. were gainfully occupied in 1920, as against 24.8 per cent. in 1910; 26.1 in 1900; 25.9 in 1890; and 24.4 in 1880. Of the females, 5.6 per cent. worked in 1920, as against 11.9 per cent. in \(1910 ; 10.2\) in \(1900 ; 10.0\) in 1890 ; and 9.0 in 1880.

Of the \(1,060,858\) persons 10 to 15 years old in 1920 earning wages, 647,309 were employed in agriculture, 7,191 in the extraction of minerals, 185,337 in manufacturing and mechanical industries, 18,912 in transportation, 63,368 in trade, 1,130 in public service, 3,465 in professional service, 54,006 in domestic and personal service, and 80,140 in clerical occupations.

Of the workers above enumerated, 527,176 were native white children of native parentage; 175,060 were native white children of foreign or mixed parentage; 38,692 were children born abroad; 317,231 were Negro children; 2,359 were Indians; 158 were Chinese; and 169 were Japanese.

Child workers in the large cities number as follows: New York, 18,341; Chicago, 10,461; Philadelphia, 5,996; Boston, 2,865; St. Louls, 4,074; Baltimore, 3,734 ; New Orleans, 2,862; Milwaukee, 2,540; Detroit, 1,900; San Francisco, 914. The highest percentage of child labor is in Fall River (19.4); New Bedford (18.6), and Atlanta (17.2). In New York City the percentage is 6.3 ; in Chicago, 8.0; in Philadelphia, 6.4.

\section*{NOTES ON THE ABOVE TABLE.}

For 1890 the rank of Arizona advances from 48 to 47 and that of Oklahoma advances from 46 tc 39 when the population specially entimerated in Indian Territory and on Indian̆ reservations is included.

North Dakota included in South Dakota in 1860 , 1870 , and 1880.

The ranking of Oklahoma in 1900 was 38 and Indian Territory 39. The present ranking for the same census is based on the combined population of Oklahoma and Indian Territory.

For 1890 the rank of South Dakota advances from 37 to 35 . when the population specially enumerated on Iudian reservations is included.
U. S. POPULATION GROWTH, IN PERCENTAGES.

The growth of the country's population, exclusive of the outlying possessions, is shown in the following table:

\end{tabular}

The total number of piaces of certain classes for the United States as a whole is iess than the sum of the numbers shown for the indlvidual states of the country, for the reason that each of three cities lies in two adjoining States, nameiy, Bristoi (Va. and Tenn.), Texarliand (Ark. and Tex.), and Union City (Ind. âñ Ohiob), and is coünted in each Stätē. Moreover, one of these citles, Bristoi, lies in two geographic dlvlsions (South Atiantic, and East South Central); and is counted \(\ln\) both. Each of these cities conislsts of two incorporated municipalities; but each is, from the statistlcal standpoint, one city and shouid be classed according to its total population. In each case that part of the population living in each state, whatever its number, is credlted to the group of cities to which, according to its total population, the city belongs. Classed
in this manner, Bristoi fell in 1920 and 1910 in the class of cities having 10,000 to 25,000 inhabitants and in 1900 and 1890 in the \(5,000-10,000\) class: Texdrkana feil, in 1920,1910 , and 1900 , in the 10,000-25,000 class and in 1890 in the \(5,000-10,000\) class: and Union City fell at each censtis from 1890 to 1920 in the \(2,500-5,000\) class.

The number of incorporated places caniñot be extctly determined from the returns of the 1890 census, at which incorporated piaces were not dlstlnguished from unlncorporated ones, and very small piaces, whether incorporated or not, were not enumerated separately. It hăs beeh assumed that those piaces were incorporated ln 1890 which were returned separateiy in that year and were returned in 1900 as incorporated

The item (1920) "incorporated places of less than 2,500" Inciudes 48 places not returned separately.

\section*{AGES OF MARRIED PERSONS: 1920 AND 1010.}

\section*{(By the U.S. Census Bureau.)}

The U. S. census figures of Jan. 1, 1920, establish |cent.; the number of married women 18 years of age beyond question the interesting fact that there has been a significant incrcase during recent years in the proportion of married persons among the younger element of the population. The number of married men 18 years of age increased from 13,321 , or 1.4 per cent. of the total male population at that age in 1910 , to 24,944 , or 2.7 per cent. of the corresponding total, in 1920; the number of marricd men-19 years of agc increased from 33,566 , or 3.8 per cent., to 58,909 , or 6.5 per cent.; the number of married men 20 years of age increascd from 77,658 , or 8.6 per cent., to 105,369 , or 12.5 per cent.; and the number of married men 21 years of age increased from 152,298 , or 16.2 per cent., to 193,663 , or 21 per cent

The number of married women 16 years of age increased from 34,829 , or 3.7 per cent. of the total fernale population at that age in 1910 , to 41,626 , or 4.2 per cent. of the corresponding total, in 1920 ; the number of married women 17 years of age increased for each specified age or age group, with comparative increased from 166,460 , or 17 per cent., to 186,645 , or 19.2 per cent.; and the number of married women 19 years of age increased from 224,976 , or 25.7 per cent., to 264,507 , or 28.6 per cent.

For each year of age from 15 to 34 the figures for 1920 show, without exception, in the case ol each sex, an increase in the proportion married as compared with 1910, the change being especially noticeable for the younger agcs. For the ages from 35 to 44 inclusive, considered as a group, there was also an increase during the decade in the proportion married, but this increase was less pronounced, especially in the case of women, than the increase shown for the younger ages. Among persons ai the ages of 45 and upward, considercd in three groups45 to 54,55 to 64 , and 65 and over-the proportion married was somewhat smaller in 1920 than for the corresponding groups in 1910.
The accompanying tables show the marital condifrom 76,683 , or 8.7 per cent., to 90,930 , or 9.8 per percentages for 1910 .

According to the above table a person born in Kidnsas has the best, chance for a long life.

\section*{U. S. POPULATION BY AGE GROUPS, 1880-1920.}
(Official revised U. S. Census figures.)

The total population according to the census, \(105,710,620\), included \(11,573,230\) children under 5 years of age, of whom \(2,257,255\) were infants under 1. The percentage for infants under 1 was 2.1 in 1920, as against 2.4 in 1910. The decrease in the proportions of young children and infants between 1910 and 1920 is doubtless due, in whole or in large part, to the decline in the birth rate

The projortion of persons at and above the age of 25 . has become larger from census to census since 1880, the increase between 1910 and 1920 having been especially noteworthy in the case of persons aged 45 and over.

The number of centenarians reported in 1920 was 4,267 , as against 3,555 in 1910 . Of the persons reported as centenarians in 1920, 1,561 were men and 2,706 were women. The greater longevity of women is also shown by the fact that, although the males outnumbered the females in the population as a whole, the women predominated in each of the 5-year age periods above 75, in both 1920 and 1910. The census takers had no means of verifying the ages of the persons enumerated by them, and consequently the age returns, especially for centenarians, are not absolutely accurate. It is probable that the number of centenarians has been somewhat overstated at every census.

\section*{DEFINITION OF THE TERM "CITIZEN."}

The total number of citizens, maie and female, in the äbove tăble, is \(54,421,832\). The citizens comprise all native persons and all naturalized loreign-born persons.

Under the provisions of the naturalization laws at the time the 1910 census was taken, the citizenship status of a married woman was the same as that of her husband (but if the husband had taken outt his fiaturalization papers oniy, his wife was elassined in the census returns as an ailen) for an unmarried woman the process of naturalization was the same as for a man; a foreign-born widow or foreign-born divorced wife of a citizen of the United States retained the citizenship status of her former husband so long as stie continued to reside in this country; ath f foreign-borh widow or foreign-born divorded wife of an ailen cóuld become naturalized in the same manner as a man.

\section*{WOMEN LEAD IN NATURALIZATION.}

In general, the citizenship returñs of 1920 show a greater proportion of women naturaiized than of men. The proportion of women showd as baving taken out first papers was very much smailer than the proportion shown for men. This is due to the fact that a foreign-born married woman whose husband has taken out his first papers is herself treated as an alien, so that this classlfication in the case of women reiates oniy to those who are not married.
U. S.-Population, Foreign-Born Whites of Voting Age.

\section*{COUNTRY OF BIRTH OF FOREIGN-BORN WHITE, 1920-Continued.}

\section*{COUNTRY OF ORIGIN OF FOREIGN WHITE STOCK IN U. S.}
(U. S. Census Returns, Jan. 1, 1920.)

By Foretgn White Stock is meant the foreign-born, plus the native white population having one or both parents foreign-born.

The total includes \(1,502,457\) whose parents were born in different foreign countries.
"All other Asia." means Asla other than Turkey. The classification by countries is pre-war. West Indies does not include Porto Rico.

Population of forelgn white stock in 1910 totalled 32,243,382.

\section*{INTERSTATE MIGRATION IN THE U. S.}

\section*{(By the Bureau of the Census.)}

The total population of continental United States (Jan. 1, 1920), 105,710,620, comprised 71,071,013 persons who were living in the States in which they were born, \(20,274,450\) who were living in other States than those in which born, \(13,920,692\) who werc born in forelgn countries, and a group of 444,465 natives consisting of persons for whom the State of birth was not reported, persons born in outlying possessions or at sea under the United States fiag, and American citizens born abroad. Of the total population, 67.2 per ceat. were living in the States in which born, 19.2 per cent. were living in other States, 13.2 per cent. were forcign born, and four-tenths of 1 per cent. were Inciuded in the group of 444,465 above mentioned. Of the total native population, 77.8 per cent. were iiving in the States in which born and 22.2 per cent. were living in other States.

These figures do not indicate the amount of interstate migration within any definite period. They simply show, as regards the popuiation of any State, the total net gain or loss up to the date of the census of 1920 resulting from the interstate migration of people ilving on that date.

On the basis of nativity the population of any State may be divided into three component parts. comprising natives of the State, natives of other States, and natives of foreign countries. The contrast between Eastern and Western States in this classifiration ls rather striking. Thus, whlle the population of NeN York State is 63.9 per cent. native of the State, 8.3 per cent native of other States, and 27.2 per cent foreign born, the population of Calfornia is only 37 per cent. native of that State but is 39.8 per cent. native of other States and 22.1 per cent. foreign born. In the cases of severai Western States besides California the population born in the State is less than the population born in other States.

The first of the accompanying tables shows, as regards any Statc, what proportion of the natives of that State have gone to other States to live, and also what proportion of the native American population resident in that State came from other States; the second lable shows the number and proportlon of the population of each State born in that State, in other States, and in foreign countries, respectiveiy.

NATIVE POPULATION BY STATE OF BIRTH AND STATE OF RESIDENCE: 1920.

THE LYNCHING RECORD FOR 1921.
According to the records compiled by Monroe N. Work, of the Department of Records and Research of the Tuskegee Instltute, there were 72 instances in which officers of the law prevented lynchings. Of these 8 were in Northern States and 64 were in Southern States. In \(1 y^{\prime} 20\) there were 56 such instances, 46 in Southern and 10 in Northern Statcs. In 66 of the cases, the prisoners were removed, or the guards were augmented, or other precautions taken. In 6 instances armed icree was used to repel the would-be lynchers. Concerning the cases of lynchings, there were 19 instances in which prisoners were taken from the jail and 16 instances in which, before reaching a jull, they were taken from officers of the law.

There were 64 persons lynched in 1921. Of these, 63 were in the South and 1 in the North. Thls is three more than the number, 61, for the year 1920. Of those lynched 59 were Negroes and 5 were. Whites.

Two of those put to death were Negro women. Ninetecn, or less than one-third, of those put to death wêre charged wlth rape or attempted rape. Four of the victims were burned to death. Three were put to death and then their bodies were burned. The charges agalnst those burned to death were: murder, 2; rape and murder, 2.

The offenses charged against the whites were: murder, 4; rape, 1. One of the women put to death was charged with assisting a man to escape who had killed an officer of the law. The other was charged with inciting racial troubles. The offenses charged against the Negro men were: murder, 11; attempted murder, 3 ; rape, 15 ; attempted rape, 3 ; killing men \(\ln\) altercation, 4 ; no special charge, 3; wounding men, 4; furnishing ammunition to man resisting arrest, 2; leaders in race clash, 2 ; charge not reported, 3 ; assisting man to escape who had killed officer of law, 1 ; making improper remarks to woman, 1 ; threatening to kill another, 1 ; entering young woman's room, 1 ; Insulting woman, 1 ; writing note to woman, 1 ; attacking a man and woman, 1 .

The states in which lynchings occurred and the number in each State are as follows: Alabama, 2; Arkansas, 6; Florida, 6; Georgia, 11; Kentucky, 1; Louisiana, 5; Misssisippi, 14; Missouri, 1; North Oarolina, 4; South Carolina, 5; Tennessee, 1; Texas, 7; Virginia, 1.

\section*{NEGRO MIGRATIONS}

The total number of Negroes for whom the State of birth was reported comprised at the U.S. Census of 1920 , as shown in the table above, \(8,288,492\), or 80.1 per cent., who were llving in the States in which born, and \(2,054,242\), or 19.9 per cent., who were living in other States. In 1910 the percentage living in other States was 16.6, and \(\ln 1900\) it was 15.6.

The total number of Negroes reported as born in the South (that part of the country lying south of the southern boundaries of New Jersey, Pennsylvania, Ohio, Indiana, Illinois, Missouri, and Kansas) was \(9,600,943\). Of these, \(7,751,301\), or 80.7 per cent.. were living in their native States in \(1920 ; 1,058,788\), or 11.1 per cent. Were living in other Southern States; and 780,794 , or 8.1 per cent \({ }_{\text {. }}\). Were living in the North or West. The total number of Negroes reported as born in the North or West was 741,791, of whom 537,131 , or 72.4 per cent., were llving in thelr native States in 1920; 157,437, or 21.2 per cent., were living in other Northern or Western States; and 47,223 , or 6.4 per cent.. Were llving in the South. Thus the proportion of Southern-born Negroes who migrated to the North or West, 8.1 per cent., was only about one-fourth larger than the proportion of the Negroes who were born in the North or West and migrated to the South, 6.4 per cent.

The number of Negroes born in the South and living in the North or West less the number born in the North or West and living in tLe South was 733,571. These may be termed the survivors of the net migration of Negroes from the South to the net migration of Negroes from the south to the North and west. The Number on South west Increased from 440,534 in 1910 to 780,794 in 1920, forming 40.9 per cent. of the total Negro population of the North and West in the earlier year and 50.3 per cent. in the later.

The mlgration of Southern Negroes to Northern and Western States undoubtedly took place to a
materialiy greater extent between 1910 and 1920 than durlng the preceding decade. While it is impossible to calculate exactiy the extent of this migration during the recent decade, the available data indicate that approximately 400,000 , or someWhat more than one-half, of the 733,571 survivors of the net Negro migration from the South to the North and West prior to Jan. 1, 1920, left the South subsequently to April 15, 1910.
In general, the Negroes born in the North and West and in the northern part of the South have migrated to a much greater extent than those born in the far South. Considering as one group all the Negroes born ln the Northern and Western States, the percentage living, in 1920, in other States than those In which born was 27.6 ; considering as another group those born in Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, Kentucky, Tennessee, Arkansas, and Okla-homa-i. e., the northern part of the South-the corresponding percentage was 24.8 ; but for the Negroes born in the iar Southern States of South, Carolina, Georgia, Florida, Alabama, Mississlppi Louislana, and Texas, the percentage living ln States other than those in which born was only 16.2 . Although migration to the North and West has not taken place among the far Southern Negroes to the same extent, relatively to their total numbers as among the Negroes in the northern part of the South, there was nevertheless a pronounced increase In auch migration from the far South during the past decade. For example: The Negroes who were born in South Carolina and had migrated from that State to Pennsylvania increased from 2,113 in 1910 to 11,624 in 1920; those from Georgia to Pennsylvania increased from 1,578 to 16,196 ; those from Florida to Pennsylvania, from 393 to 5.370 : those from Alabama to Ohio, from 781 to 17,588 ; those from Mississippi to Illinois, from 4,612 to 19,485 ; those from Louisiana to Illinois, from 1,609 to 8,078; and those from Texas to Missouri, from 1,907 to 4,344 .

\end{tabular}

The above table covers only immigrant aliens and does not include non-immigrant aliens.
In the year ending June 30,1922 , alien immigrants to the number of 13,731 were debarred, and 4,353 others were deported. Of those debarred 5,529 were paupers; 1,249 unable to read; 672 diseased; 176 criminals.

Of the immigrants deported, 434 were criminals.
ALIEN IMMIGRATION, BY CHIEF PORTS, SINCE 1907.

\hline
\end{tabular}

Births are exclusive of still births. The birth registration area was established in 1915.

The birth rate in 1920 among the general population in the birth registration area was, as shown in the above table, 23.7 per 1,000 population. The white birth rate was 23.5; colored, 27.0. The Negro birth rate in 1920 was 26.3 per 1,000 Negro population; the death rate, 18.4 per 1,000 negro population.
The Japanese birth rate in 1920 in the birth registration area of the United States was 65.0 per 1,000 Japanese population; the deauh rate was 13.9 per \(1,00 \mathrm{C}\) Japanese population.
"It is not to be expected," says the Census Bureau, "that this rate of natural increase will be maintained year after year by the Japanese in this country. At present he age constitution of the Japanese in this country is undoubtedly most favorable for a very rapid natural increase of population, but as the years go by and our Japanese grow older this rate will undoubtedly decrease, together with the birth rate, till the latter approximates the birth rate of Japan itself, where in 1917 the official rate is given as 32.4."

\section*{Rhode Isiand was dropped from the death registration area in 1919.}

In 1920, in the registration area. 82 whit3 babies and 132 colored babies out of 1,000 of cach color born died \(n\) their first year of life. In Vew York City the numbrr dving in the fir tyear of life was 83 white and 157 colored. The greatest white infant mortality was in Richmond Borough; the greatest colored, on the Bronx

\section*{ILLEGITIMATE BIRTHS.}

The percentage of iliegitimate births in 1920 in the United States was 2.27 per 100 births; percentage of white illegitimates, 1.42; percentage of native White illegitimates, 1.67; percentage of illegitimate births by foreign mothers, . 052 ; percentage of Negro illegitimate births, 12.56 .
The average number of chiidren ever born to mothers of 1920 was 3.3; the average number of these children living was 2.9. Italian, Austrian and \#ungarian mothers of 1920 had an average of 4.0
to 4.5 children each, of which 3.4 to 3.9 were still living.
The largest number of children are born to miners, metal mill workers, guards, watchmen, janitors and sextons; the smallest number to soldlers, sailors, marines, bookkeepers, policemen, designers, tenhnical engineers, chemists, actors, architects, artists, lawyers, doctors, druggists, teachers, authors, reporters, editors, bankers and brokers, chauffours and electricians.
One birth in every 100 is of twins or triplets, etc.

\section*{BIRTH RATES AMONG ALIEN WHITE MOTHERS IN U. S.}
(Per 1,000 enumerated female population, by country of birth in the registration area and each registrition State, 1920).
(Rates are shown in talacs when the number of births is less than 5.)

\section*{NATIONAL GEOCRAPHIC SOCIETY, WASHINCTON, D. C.}
(By the President, Gilbert Grosvenor:)

FOUNDED in 1899, "for the increase and dititusion of geographic knowledge," the National Geographic Society has flled such an important role in the encouragement of science and lts appllcation to the needs of mankind that its meribership now exceeds 750,000 . In the promotion of its work of increasing geographic knowledge the society pioneered in the study of Alaska and the encouragement of the opening up of that territory; supported Peary in his Polar work; investigated the problems of vulcanism and seisinology at Mont Pelee, Messina and in Alaska; explored the ruins of the Inca country of the high Andes, unearthing its holy city, Machu Plechu, and the staircase farms of the Incas, which far eclipse the Hanging Gardens of Babylon; studled the history of the Ice Age, as exemplified in the glaciers of Alaska; discovered the Valley of Ten Thousand Smokes. It is now engaged in a series of excavatons in chaco Canyon, with a vlew to reconstructing, as far as possible, the primitive history of the pre-Columbian pcople of that reglon.

In lts recognition of the services to mankint of those who labor to push back the horizons of geography, the soclety lias a warded the Hibbard Gold Medal to Peary for hls furthest North in 1906; to Amundsen for achieving the Northwest Passage and locat fig the North Maghetic Pole to Gilbert ior his phyisiographic researches; to Shackleton for his Antarctic explorations; and to Stefansson for his discovery of hundred thousend square thiles of territory in the Canadian Arctlc. It also abarded special gold medals to Pcary and Amilindsen for their attainment of the North and South Poles respectively; and to Gen. George W. Gocthais in recognition of his service to the world in the bullding of the Panama Canal. In its work of diffusing geographic knowiledge the society relles principally on its leading puiblicaton; the Natlonal Gcographic Magazine. The magazine contalns sothe 1,400 pages of text and illustratlons in the twelve numbers of cach year. Some of these numbers are monographic, and have become the recognized hahdbook on the subjects witli whlch they dell -like Nelson's "Larger and Smailer Mammals of Nortll America;" McCandless 4nd Grosvenor's "Flag Number," Fucrtes's "Dog Number," and Wyllle's "Romance of Military Insighia.'

Through the columns of more than 500 leading Amerlcan dafly newspapers and the large plate matter syndicates the society's geographic nows bullotins are reaching into more than half the homes of the Uuited States. These bulletins are furnished
gratis to the press, and through them the soclety is able to interpret the geographic and historical backgrounds that give significance to the noys despatches from every corner of the globe. The United States Bureau of Education, in its promotion of the inteiligent study of current events in the schools of the country, has co-operated with the society in placing illustrated editions of thege bulletins in the hands of the teachers of the United States. Many State Superintendents liave requested that they be furnished to every teacher ln their jurisdiction.

A further educational activity undertaken by the society in recent monthis is its Pictorial Geography. By means of a continuing series of loose-leaf geographic text and pictures, prepared in recognition of the fact that the average map and the technical phraseology of geographies mean little to children, the society ls aiming to bring them thental pletures of busy places, living peoples and beâutiful landscapes and to portray to them natire's moods and procesises in terms they understatid and formis they enjoy. Another activity of the society in the diffu sion of geographic knowledge is the publication of books, maps and monographs on subjects of first interest. its map of the war zone in France was readlly used by American officers at homé and abroad; and the War Départment has adopted its map of Mexico as the base for the army's military map of that turbulent country. It has recently published new maps of Europe, Africa, South America and of the world, In 1917 the society approprlated \(\$ 20,000\) and in \(1920 \$ 13,500\) out of its reserve fund the money hecessary to save form destruction the privately owned "Blg Trées" In Sequía National Park, Californla, and had the ground they occupy deeded in perpetuity to the United States for the benent of posterity. More recently the sodety and a group of its members ddacd a fund of nedrly \(\$ 100\); 000 for the preservation of another large group of these blg trees.

For a review of the society's scientinc work in the past ycar" reference is inade to the article on "Scientince Progress in 1921 " elscwhere in this ALMANAC Tlie omecrs and editorial staff are: Presldent and Editor; Gllbert Grosvenor; Vide-President, Henry Wh!tc; Vice-Dlrector and Assoclate Etlitor, John Ollỹer La Gorce; Secretary, O. P. Austln; Assoclate Secretary, Geolge W. Hutchison; Treasurcr, Joht Joy Edson; Assistant Editors, Willark J. Showalter and Ralpli A. Graves; Chlef of Iliustrations Division, Franklln I. Fisher: Chlef of School Betvice, J.ə R: Hildebrand.

\section*{CARNECIE FOUNDATION FOR THE ADVANCEMENT OF TEACHING.}

During the fifteen years of its existence the Carnegie Foundation has distributed (these data are from the annual report for the year ending June 30, 1922) \(\$ 9,929,066\) in retiring ailowances and pensions to 1,000 persons. Of this sum \(\$ 625,000\) has been paid to former teachèrs of Harvard, \$548,000 to former teachers of Yale, and \(\$ 464,000\) to former teachers of Columbia University. Sixteen other universities have each received between one and two hundred thousand dollars. The remainder has gone to eighty different institutions. There are now operative 511 retiring allowances and 98 widows' pensions, entailing an annual expenditure of \(\$ 1,008,000\). The average retiring allowance paid is \(\$ 1,649\).

The total resources of the Carnegie Foundation
amount to \(\$ 26,223,000\), of which \(\$ 15,192,000\) beiong to the permanent generai endowment; \(\$ 8,535,000\) to a reserve fund to be spent in the retirement, during the next sixty years, of teachers now in associated institutions; \(\$ 1,250,000\) to the endowment of the Division of Educational Enquiry, and \(\$ 612,000\) to a reserve fund to be expended in alding universities and colleges to adopt the new plan of contractual annuities.
The Teachers' Insurance and Annuity Association of America, which was established by the foundation through a gift of \(\$ 1,000,000\) to provide insurance and annuity protection for college teachers without overhead charges, has written 1,095 insurance policies covering \(\$ 5,578,000\) of insurance and 947 annuity contracts providing \(\$ 1,165,000\) annual income at retirement.

\section*{RUSSELL SACE FOUNDATION.}

\section*{(Official statement for The Aimanac, as of August 1, 1922.)}

The Russell Sage Foundation, 130 East 22d Street, New York City, was organized in 1907 for the improvement of social and living conditions in the United States. The endowment, about \(\$ 15,-\) 000,000 , was given by Mrs. Russell Sage in memory of her husband. The Foundation is primarily an educational institution. It docs not attempt to relieve individual or family need or to duplicate the work of existing social agencies. It studies and interprets facts with regard to social conditions and methods of social work, makes this information available by publications, conferences and other means of public education.

The work of the Foundation is carried on through a central office, through nine departments and through a limited number of subsidies to other organizations. The departments of the Foundation have been developed to meet the particu.ar sociai needs and opportunities or to give permanent form to investigations or undertakings begun experimentally.

The Department of Recreation has worked in co-
operation with the National Community Center Association, the Recreation Committee of New York City, the Boy Scouts, Giri Scouts, Camp Fire Girls, National University Extension Association and the New York Drama League to carry out its purpose, which is that of aiding in constructive social organization of leisure time. Assistance in promoting better motion pictures, both for commercial purposes and for school, club and army and navy service has been continued.

Advisory work has been given in many States, in Canada, China, India, Japan, Cuba, Russia, Sweden, Turkey, Serbia, Uruguay and Argentina.
A free public library containing about 20,000 books and 56,000 pamphlets on social problems, is maintained by the Foundation.

The trustees of the Foundation are: Robert W. de Forest, President; Mrs. William B. Rice, Vice President; Charles D. Norton. Treasurer; Jonn H. Finley, Louisa Lee Schuyler, Mrs. Finiey J. Shepard, John M. Glenn, who is also General Director of the Foundation, Frederick A. Delano, and Dwight Morrow.

\section*{NATIONAL SHORTHAND CONTEST.}
(New London, Conn., Aug. 24, 1922.)
Held under the auspices of the National Short- jury, and 280 a minute, court testimony. In the hand Reporters' Association, John R. Gregg, President.

To qualify for the World's Championship, the writers must qualify with at least \(95 \%\) accuracy in the three individual speeds- 200 words a minute, soiid matter; 240 a minute, judge's charge to the
contest held in 1922 only six writers qualified for the championship, which trophy was won by Nathan Behrin. Charles Lee Swem, former official reporter and personal stenographer to President Wilson, and Albert Schneider won second and third places respectively.

\section*{JOHN FRITZ MEDAL WINNERS.}

The John Fritz Medal Board of Award-Societies represented: Amer. Soc. of Civ. Engineers, Amer. Inst. of Mining and Metallurgical Engineers, Amer. Soc. of Mech. Engineers, Amer. Inst. of Electrical Engineers. Office, 29 West 39th St., New York.

The first award of the medai was made to John Fritz at a dinner given to him on his eightieth birthday. Aug. 21, 1902. The other awards have been as follows: 1905, to Lord Keivin, for work in cable telegraphy; 1906, to George Westinghouse for invention and development of airbrake; 1907, to Alexanuer Graham Bell, for invention and introdisction of telephone; 1908, to Thomas Alva Edison, for invention duplex and quadruplex telegraph, phonograph, development of a commercially practical incanoescent lamp, the development of a complete system of electric lighting, inciuding dynamos, regulating devices, und arground system protective devices and meters; 1909, to Charies T. Porter, for a dvancing knowledge of steam engineering and improvements in engine construction; 1910, to Alfred Nobie, for
notable achievements as a civil engineer; 1911, to Sir William H. White, for notabie achievements in naval architecture; 1912, to Robert W. Hunt, for contributions to eariy development of Bessemer steel process; 1913, no awaru; 1914, to Prof. John E. Sweet, for achievements in machine design, and pioneer work in construction and uevelopment of high-speed steam engine; 1915, to Dr. James Douglas, for achievements in mining metaliurgy, education, and industrial welfare; 1915, to Dr. Elihu Thomson, for achievement in electricai invention, in eiectrical engineering and industrial development \({ }_{2}\) and in scientific research; 1917, to Dr. Henry M. Howe, for his investigations in metallurgy; 1918, to J. Waldo Smitn, for providing New York with water; 1918, to Gen. George W. Goethails, as builder of the Panama Canal; 1920, to Orville Wright, tor deveiopment of the airpiane: 1921, to sir Robert Hadfield, for invention of manganese steel; 1922 , to Eugene Schneiuer, for deveiopment of ordnance ( \(75-\mathrm{m}\). gun) ; 1923 , to Guglielmo Marconi, for the invention of wireless telegraphy.

\section*{EDISON COLD MEDAL WINNERS.}

1909, to Elihu Thomson; 1910, to Frank J. Sprague; 1911, to George Westinghouse; 1912, to William Stanley; 1913, to Charies F. Brush; 1914, to Alexander Graham Bell; 1916, to Nikola Tesla; 1917,to

John J. Carty; 1918 to. Benjamin G. Lamme; 1919, to W. I. R. Emmet; 1920 to Michael I. Pupin; 1921, to Cummings C. Cnesney.

\section*{METROPOLITAN MUSEUM OF ART.}

THe Metropolitan Museum of Art, In Central Park, opposite East 80 th- 85 th, Streets, New York Clty, was incorporated April 13, 1870, "for the purpose of establishing and maintaining
a rauseum and a library of art, of encouraging and deveioping the study of the fine arts, and the application of arts to manufacture and practical life, of advancing the general knowiedge of kindred subjects, and, to that end, of furnishing popular instruction." After one-haif century of growth, it has to-day, through bequests, gifts, and purchases, coilections of incaiculable vaiue, embracing both fine and decorative arts. They comprise objccts in almost every material-marbie, stone, wood, pottery, porceiain, giass, metals, lace textiies, \&c.-and embody man's attempts throughout the ages to achieve his ideals of beauty. In date they range from \(3000 \mathrm{~B} . \mathrm{C}\). to the twentieth century and represent the ancient worid-Assyria, Babylonia, Cyprus, Egypt, Greece, and Rome; the Orient, inciuding China, Japan, Corea, India, Persia, and Asia Minor; Europe from the Eariy Christian and Byzantine Art through the Romanesque, Gothic. Renaissance, and iater periods; and our own country.

\section*{TOMBS AND ANTIQUITIES.}

These collections are housed in a building erected by the city, in Centrai Park, affording 280,000 square feet of exhlbition floor space. Among the more noteworthy individual objects or coilections are the mastaba tomb erected about 4,500 years ago in the Egyptian cemetery at Sakkara for a Theban dignitary named Perneb and re-erected here in its orlginai form, with its painted scenes in low relief still preserved; six large alabaster reliefs from the palace In Nimrod of Ashur-nasir-pal, who reigned over Assyria from 885 to 860 B. C.; an Etruscan bronze charlot of tile slxth century B. C., the oniy complete anclent bronze chariot knowl; the Cesnoia antiquities from Cyprus; a group of Roman fresco paintings from Boscoreaie, especially those on the walls of a reconstructed cubicuium (bedchamber), and a gathering of ancient giass, "one of the richest and most important in the world." In the accumulations of Near Eastern Art of speclal interest are the domed room from a Jain temple in India, recentiy lnstalled, the glft of Robert W. and Lockwood de Forest, which represcnts tile Nood carving of India and is suppiemented by an extensive collection of Indlan and Thibetan jewelry; the Indian minlatures in the Alexander Smlth Cochran Coiiection, and some remarkable examples of early Indian stonc carving; the Persian manuscripts and miniatures in the Cochran Collection;' twenty-four manuscripts and a number of singie sheets represent such masters of decoration as Behzad and Mirak, and some of the greatest names in Persian caligraphy from the fifteenth to the eighteenth century. The Far Eastern objects include the well-isnown Benjamin Altman gathering of Chinese porcelains and the Heber R. Blshop assemblage of jades.
The paintings, over twelve hundred in number, represent the Italian, Spanish, German, Dutch, Fiemish, French, English and American schoois. There is an unusual showing of the works by Rembrandt, twenty in all, thirteen reccived in the bequest of the late Benjamin Aitman. Through the glit of J Pierpont Morgan the Museum possesses a Raphael, the so-called Coionna Altarpiece. a Virgin and Chiid Enthroned with Saints. Groups of paintings kept together by the conditlons under which they were received are: the George A. Hearn Collection, prlncipaily American in character; the Benjamin Altman Collection, strongest in its Dutch paintings, but inciuding four Mcmiings, a Durer, a Giorgione, a Fra Angelico, two Velasquezes, and other works of rare excellence; the Mlchael Dreicer Collection
of Itailian and northern primitives, in which such artists as Memiling, Roger van der Weyden, Schongauer, and Plero di Cosimo are represented; and the Catherine Lorillard Woife Collection, consistlng largely of works by French artists of the early and middle years of the nineteenth century.

Others of speclal note are the William H. Riggs Collection of Arms and Armor, which in its scope and quaiity ranks with European national coilections and, wlth the Eilis and Dino Coliections, gives an opportunity to study the development of armor from the fifteenth to the eighteenth century; the Croshy Brown gatherlng of 3,600 speclmens, inciuding representative instruments of ail nations, among them the earlier of the two existing pianos by Bartoiommeo dl Francesco Cristofori, the Inventor of the pianoforte; the James F. Ballard Coilcetion of rugs, Turkish, Persian, Indian, and Spanish, of the sixteenth and seventcenth centuries; and the Wiliam H. Huntington assemblage of portralts of Washington, Frankiln, and Lafayette in ail materials.

\section*{THE MORGAN COLLECTION.}

The Pierpont Morgan Collection, the gift of J. Pierpont Morgan, fills an entlre wling and is a priceiess gathering of the decorative arts of Europe from Gallo-Roman and Merovinglan perlods to the end of tile eighteenth century. The rarest ana most precious section of the collectlon represents the supreme work of the goidsmlths, Byzantine and mediaeval enamellers, and ivory carvers. The most comprehensive gathering included in the Pierpont Morgan wing is that brougit together by Georges Hoentschei of Paris. the coilector, and consisting of two parts; sculpture, furniture, textiles, iyorles, woodwork, and architectural fragments of the Gothic period, chiefly of French, Fiemish, Dutch, German Spanish, and Itailan origin, and Frencli decorative arts of the seventeenth and eighteenth centuriesfurniture and woodwork, many samples from historic buildings, decorative paintings, and ormoiu fittings. Among the treasures of the Pierpont Morgan Coilection are also five Gothic tapestries, known as the Sacrament set because they picture in weaving the sacraments of the church; two sculptured groups, an Entombment and a Pieta, from the famous Chateau de Biron in southwestern France; superb examples of the goldsmith's craft from the fifteenth to the eighteenth century; a unique coliection of snuff boxes, vanity boxes, scent bottles, and dance programmes, signed by famous jeweilers of the eighteenth century; and a large coilection of watches representative of the work of the best craftsmen in Europe from the sixteenth to the nlnetcenth century. The Drelcer Collection aiso contalns vaiuable examples of Gothic and Renaissance scuipture and deoorative arts.

\section*{SERVICEABLE TO THE PUBLIO.}

To make the museum coliections servlceabie to the pubiic. to manufacturers and designers, to artists and art students, and to the pupils in the pubiic and private schools of New York City and vicinity is the constant effort of the members of the museum staff, working on behalf of the trustees.

A reference library and a collection of photographs are open to the pubiic and a large collection of lantern sides, photographs, post cards, etc. is available on easy terms for lectures given anywhere east of the Mississippi. Opportunity to copy the objects in the collections themseives is granted with reasonable restrictions. A study room of textiies has been fitted up with every facility for the use of the iarge collection of laces and textiles, and other study rooms in different, parts of the building are intended for the convenience of those who wish to study the various coilectlons at length.

\section*{THE FRANKLIN INSTITUTE OF THE STATE OF PENNSYLVANIA.}

\section*{(15 South Seventh Strcet, Phliadelphia, Pa.)}

Tee Franklin Instltute of the State of Pennsylvania for the Promotlon of the Mechanic Arts was organlzed in the year 1824 , to meet a demand in America for an instltution similar to that founded by Count Rumford in London in 1799. The founders Intended it not only as an approprlate memoriai to the name of Franklin, but as a means of continuing for ali time a work which throughout his long ilfe he perhaps regarded as his best, nameiy, tise discovery of pliysical and natural laws and their aijpllcation to fncrease the weli-bcing and comfort of mankind. Membershlp, 1,500.

Weckiy lectures on solentific and technicai subjects are glven throughout the winter season; th: Journal of the Franikiin Institute has been Dublished monthly
since 1826; monthiy meetlngs are held at whlch rediscoveries in physical scicnce and mportant engincering achlevements are discussed, and major inventions described. The Committce on Sclence and the Arts examines and makes reports upon all new and useful machines, inventlons and discoveries submitted to it. The membership is divided into the loiiowlng sections, each group devoting lts attention to the branch of technology for which it is organlzed: Ciemistry, Electriclty, Mlning, Metallurgy, Astronomy, Photography, Physlos, and Engincering.
Library.-75,912 volumes, 18,254 pamphlets, 2,292 maps and charts, and 1,349 plotograpins. Compiets sets of over 780 of the leading sclentific and technical publleations of tine worid.

\section*{AMERICAN MUSEUM OF NATURAL HISTORY.}

THe American Museum of Natural History, located at 77 th Street and Central Park West, N. Y. Clity, was founded and chartered in 1869 for the purpose of encouraging and developing the study of natural science, of advancing the general knowledge of kindred subjects, and to that end of furnishing popular instruction. It is open free every day in the year; on weekdays and holidays from \(9 \mathrm{~A} . \mathrm{M}\). to 5 . P M., on Sundays from 1 to 5 P . M.
The constitution provides for a self-perpetuating board of trustees, not to exceed twenty-five in number, Who hold office for terms of five years, with the Mayor, the Comptroller and the President of the Park Board serving as trustees ex-officio.
The building, which is the property of the city, is one of the largest municipal structures in the city, and has cost over \(\$ 5,000,000\). At present only eight sections of the building have been erected, which when completed will cover the entire area of Manhattan Square. The city makes an annual maintenance appropriation for heating, lighting, repair ing and supervising the building, caring for its collections, the construction of cases, and other maintenance work. All the collections, however, are the property of the corporation and are acquired by gift of the trustees and members and other friends and supporters. The funds from which the trustees purchase and prepare specimens, carry on explorations in all parts of the world, pubiish the results of its research work and enlarge its present library of natural history of over 70,000 volume 3 are raised by the museum and its friends, and derived from by the museum and its friends, and derived from
the income of an endowment amounting to \(\$ 9,603\),952.57 .

\section*{NOTEWORTHY EXHIBITS.}

The American Museum is famous as possessing the largest collection in the world of gems and gem material, the finest and most complete exhibits illustrating the evolution of the horse, the finest series of bird habitat groups, an extensive collection of meteorites, and the largest and best collections of fossil vertebrates and material showing all phases of the life of primitive man.

First Floor-Collections illustrating the life of the Indians of the North Pacific Coast, the Eskimo, Indlans of the woodlands, plains and Southwest. Two new and large groups (Hopi and Apache) in the Southwest Hall. Forestry Hall-Sections of trees, including one from a big tree of California which measures 16 feet in diameter and is 1,341 years old. Natural woods. with specimens of their leaves and flowers. and sections of the finished woods. Exhibits in food needs and economics (temporarily placed in this hall). Darwin Hall-Specimens, models and groups showing invertebrate life, the Nahant Tide-Pool and the Wharf-Pile Groups being particularly interesting. New exhibit representing a two-inch section of sea-bottom, with its characteristic microscopic plant and animal life, magnified more than 15,000 times.
Second Floor-Collections from Africa. Material illustrating the life of prehistoric man of Notial America. Ancient monuments of Mexico and Central America. Birds of the world. Recent fishes. Mammals of North America. Akeley group of Arrican elephants. Extensive reptile and amphiblan material, including a number of beautiful groups (Lower California Lizard, Bul'frog, Great Salamander and New England Spring Groups). The most recent, finest and largest of the groups is the Florida Group. This reproduces a portion of a cypress swamp, with a stretch of sandy lowlands, teeming with characteristlc animal life.
Third Floor-Shells. Collections from the living tribes of Asia. Including Chinese bamboos, porce-
lain, basketry inlaf work, embroidery, clolsonne enamel, agricultural implements, carvings in wood, ivory and stone and an especially valuable collection of ancient bronzes and pottery; material illustrating the mode of living, costumes and war implements of Siberia. Large and fine collections from the Indians of South America. Hall of Pri-mates-Monkeys, apes and primitive man. Mammals of the world, including whales. Insect life. Birds of North America (the famous habitat groups). Public health exhibits dealing with problems of water supply, disposal of wastes, bacteria, insects and diseases, military hygiene.

\section*{GEMS AND FOSSILS.}

Fourth Floor-Collections from the Philippine Islands and the South Seas. Mineral and Gem collections. Hall of Gems, the gift of J. Pierpont Morgan-Collections including practically every variety of known gem, cut and uncut, some of remarkable size and purity of color; largest perfect crystal in the world, mounted on bronze base supported by three Chinese figures; exceptionally fine cameos, carved jade, etc. Hall of Fossil Invertebrates and-Historical Geology-Large collections and models of caves and of Copper Queen Mine, showing cross sections and surrounding country. Halls of Fossil Vertebrates devoted to the great col ections of the remains of creatures which lived from 30,000 to \(20,000,000\) years ago. These collections, by right of extent, variety, quality and me hods of preparation and exhibition, are the finest in the world. The collections illustrating the evolution of the horse approach in importance and value the combined collections of thls sort to be found in all other institutions. Hall of the Age of Man-Casts of prehistoric men and skeletons of the animals of their time (mammoths, mastodons and giant ground sloths). In the adjoining hall are fossil camels, giant pigs, a pigmy hippopotamus and primitive rhinoceros-like animals; fossil lemurs and monkeys which have an important bearing on the ancestry of man. Dinosaur Hall-Remains of fossil reptiles and flshes which lived from three million to ten million years ago. "Mummy" of dinosaur (trachodon) in which the texture of the skin has been preserved. Fossil aquarium reproducing a number of the earliest known fishes, with typical marine surroundings-all prepared on the basis of recovered specimens illustrating the animal and plant life of the time.
Fifth Floor-Public reference library. Osborn library of Vertebrate Paleontology. Offices. Labratories. Studios.

\section*{EDUCATIONAL ACTIVITIES.}

In addition to its work in securing and exhibiting natural history specimens, the institution maintains a Department of Public Education, which works in conjunction with the city's public schools and institutions for the blind, giving lectures, and circulating loan collections, slides and motion picture films. In 1921, 869 natural history collec ions were served to 477 schools and 209,451 slides were circulated. For teaching the blind, special apparatus, including relief globes and maps, are used. On December 26, 1921, the City Administration appropriated \(\$ 1,500,000\) for the construction of the Southeast Wing on Central Park West, and the Southeast Court Building, and on April 21, 1922, it appropriated \(\$ 570,000\) for the construction of the School Service Building
While the institution is forced, through lack of building space, to keep the great majority of its collections in storage rooms, this material is available for study by persons interested.

\section*{BUFFALO FINE ARTS ACADEMY:}

The Buffalo Fine. Arts Academy was organized November 11, 1862, and incorporated December 4 same year. The building occupied by the organization was a gift from Mr. John Joseph Albright. It is a white marble structure two hundred and fifty feet long (north and south) and one hundred and fifty feet deep (east and west). Its central feature is based on the east porch of the Erectheum, on the Acropolis at Athens-perhaps the purest type of Ionic architecture The City of Buffalo has been contributing toward the support of the "institute since 1909, The permanent collection of the academy consists of 315 paintings, 803 cngravings and etchings, and 57 sculptures, including casts.

The total membership is 610. During each year several special exhibitions are given; a semi-annual art journal is published. Lectures are given. Special efforts are made to interest the public and the school children. Several for ign exhibits brought over by the director, Cornelia B. Sage Quinton, and passed on to other museums after being first shown at the Albright Art Galiery, have made Buffalo noted in art circles. They included: Exhibition of paintings and sculpture by the Societe Nouvelle of France, of which Rodin was President; exhibition of French textiles; exhibition of the work (sculpture) by Constantin Meunier; collections of the French artists G. La Touche and M. B. de Monvcl; the exhibition of American sculpture, held at Albright Art Gallery in 1916.

\section*{SMITHSONIAN INSTITUTION.}

THE Smithsonian Institution is legaliy an establishment having as its members the President of the United States, the Vlce President, the Chief Justice, and the President's Cabinet. It is governed by a Board of Regents consisting of the Vice President, the Chief Justice, three members of the United States Senale, three members of the House of Representatives, and six citizens of the United States appointed by joint resolution of Congress. The Secretary of the Smithsonian Institution is its executive officer and the director of its activities.

The institution at Washington, D. C., was estabIlshed by statute in 1846, under the terms of the wili of James Smithson, who bequeathed his fortune in 1826 to the United States to found an institution for the "increase and diffusion of knowledge among men." From the income of the fund a buiiding. known as the Smithsonian Building, was erected on land given by the United States. The institution malntains a library, numberlng about 300,000 volumes, which is deposited in the Library of Congress and which consists mainly of the transactions of learned societies, and scientific periodicais. While the body of the library is deposited in the Library of Congress and accessible to all its readers, a working library is maintained at the institution. The Regents are empowered to accept gifts without action of Congress in furtherance of the purposes of the inst1 tution, and to administer trusts in accord therewith.

The institution has charge of the National Mu seum, the National Gallery of Art, the Internatlonal Exchange Service, the Bureau of American Ethnology, the Nationai Zoological Park, the Astrophysical Observatory, and the United States Regionai Bureau for the International Cataiogue of Scientific Liters ature.

The United States National Museum is the depository of the nationai collections. It is rich in the
natural history, geoiogy, paieontology, archaeology and ethnology of America, and has collectlons of American history (including iarge war colcctions illustrative of the part taken by the United States in the recent conflict), as well as many series relating to the arts and the industrial arts. It is an educational and a rescarch museum, and issues scientific publications. The National Gallcry of Art consists of the collections of etchings and engravings of George \(P\). Marsh, the colicetions of Charles L. Freer, containing paintings and etchings by Whistler, and examples of Oriental art; the Harriet Lane Johnson collection, including works of a number of the greatest English portrait painters, and the collectlon of Whliam \(T\). Evans, of one hundred and fifty-one paintings, representing one hundred and six American artists. The National Museum occupies two speciai structures, built in 1881 and 1911, containing 650,000 square feet of floor space. There are 6,274 articles in the Freer coilection. The amount of the annuai appropriations made by Congress for the support of the museum for the fiscal year 1920 was \(\$ 307,500\). In addition there was appropriated for publications, binding of books, etc., \(\$ 37,500\). The buildings are opened to the public \(9 \mathrm{~A} . \mathrm{M}\). to 4.30 P . M., week days, and in addition the new building at the foot of Tenth Street is opened Sundays, 1.30 P. M. to 4.30 P. M.

Bureau of American Ethnology, for the study of the American Indlan; the Internatlonal Exchanges, for the exchange of governmental and scientinic pubileations between the Unlted States and foreign countries; the Astrophysical Observatoreign countries; the Astrophysical Observathe National Zooioglcai Park, at Washington, containing about 1,400 animais and the Regional Bureau of the International Catalogue of Scientific Llterature, for the preparation of a classitied index to the current scientific literature of the United States, are aiso branches of the institution.

\section*{NATIONAL. ACADEMY OF SCIENCES; WASHINGTON, D. C.}
- THERE are 186 living members, comprising investlgators in many departments of science. The geographical distribution of members covers the United States, but is not considered in their election. The Nationai Academy has often been calied Into the service of the Government. Committees appointed in accordance with acts of Congress at the request of joint commissions and committees of Congress, of the President of the United States, and of the various departments of the National Government, have reported on a great variety of subjects. Froin time to time trust funds have been established, the incomes of which are devoted to the award of medais or to
grants for research. The will of Alexander Dailas Bache, first President of the Academy, directed that the residue of his estate, after the death of hls wlfe, should be paid over to the Nationai Acaderiny of Sciences for the "prosecuition of researches in physlcal and natural science by assisting experimentaiists and observers." Other trusts have 'been left to the Academy. Several hundred thousand doilars have been disbursed by the academy from the income of trust funds in direct aid of scientific research. A recent gift was that of the Carnegle Corporation, \(\$ 5.000,000\), for a suitable bullding for the academy and the National Research Councii, and for the endowment of the council.

MOUNT VERNON MUSEUM, AND TOMB OF WASHINGTON,
"MOUNT VERNON," on the west shore of the Potomac River, 15 miles beiow Washington, belongs to the Mount Vernon Ladies' Association. It was built ln 1743 by Lawrence, half brother of George Washington. On the death of Lawrence and of his oniy daughter, George Washington inherited the estate and went there to iive soon after his marriage in 1759. He dled and was buried there in 1799. In 1855 John Augustine Washington offered it for sale. A patriotic daughter of South Caroilna, Ann Pamela Cunningham, devoted herseif to ralsing \(\$ 200,000\) required for the purpose. In 1858 the Mount Vernon Ladies' Association of the Union was organlzed, with Miss Cunningham as regent, and vice regents repre-
senting 12 States. Contributlons wére sollcited and popular support was enilsted. The full sum was in hand before the end of 1859 , and in 1860 Mount Vernon became the property of the association. A further fund, was provided for permanent care and maintenance. Portions of the orlginal estate that had been soid havc been acquired again; buildings Which had failen into ruin have been restored; the deer park under the hill has been restocked: the mansion has been repaired; many articies of furniture and adornment have been restored to the several rooms; numbers of valuabie relics and mementoes of George and Martha Washington and of their time have been deposited here.

\section*{CORCORAN CALLERY OF ART, WASHINCTON, D. C.}

THE Corcoran Galicry of Art, at Washington, D C., founded and endowed by the iate William Wilson Corooran in 1869 , solely for cneouraglng Amcrican genius in the fine arts, is a private corporation controlled by a self-perpetuating board of nlne trustees. The originai home of the institution was at Pennsylvania Avcnue and 17 th Street; but in 1897 its coilections werc transferred to the present building, designed by Ernest Flagg of Ncw York, and located at New York Avenue and 17 th Strcet, N. W. The value of the building and grounds connected therewith is \(\$ 1,000,000\), and the present vaiue of the col-
lectlons is estimated at \(\$ 1,500,000\). The endowment fund amounts to \(\$ 1,000,000\).

The collection of paintings is particularly representative of Anerican artists. In addition the gailery has examples of the French, Dutch, English, and other schoois. The sculptures include casts from the antique and the Renaissance, and modern works, as well as original works in marbie and bronze. There are over 100 original bronzes by Antoine-Louis Barye, French sculptor of animals. It is open to tine public: Mondays, 12 M . to \(4.30 \mathrm{P} . \mathrm{M}\). ; other wcek days, 9 A . M. to 4.30 P . M. ; Sunday's, 1.30 to 4.30 P. M.

\section*{THE HASKELL ORIENTAL MUSEUM}

The Haskeil Orientai Museum was erected through the generosity of Mrs. Caroline E. Hasieil. Its colfections, now excceding 16,000 orlginal objects, are intended to exhibit as systematleally as possibic the cariy civlizations of the Near East. Egypt is most largeiy represented. Both the Egyptian and the Assyro-babylonian sectlons have been augmented in part by cxpeditions of the university's Oricntai Expioration Fund in 1903-7 and by its

OF THE UNIVERSITY OF CHICACO.
Oriental Institute in 1919-20. The iatter organizatlon is a recent expression of the interest of Mr. John D. Rookefelier, Jr. It supplements the muscum not oniy by adding to its colicetions but by cataloguing and co-ordnating in research the materials there assembied, both originals and reproductions, wlth the library incllities of tho university. The museum houses aiso some materlals for the study of Paiestlne and of the rellgions of the Far East.

\section*{INDEPENDENCE HALL NATIONAL MUSEUM, PHILADELPHIA.}
(Data Supplied by Wilfred Jordan, the Curator.)

Independence Hall was at first called "The State House of Pennsyivania." It now comprises the main or central buiiding (Independence Hali), two arcades connecting it with two two-story buildings called the Wings or Province Halls, and two separate corner buildings, one Congress Hall, the other Oid City Hall, one on the corner of Fifth Street and the other on the corner of Sixth Street, facing on Chestnut Strect, Philadelphia. The State House group of buildings was designed and built by Andrew Hamilton, a Philadelphia lawyer, who bought the land, for which he created a trust. Congress and City IIalls were in Hamilton's original scheme of the State House group, but were not built until after the close of the Revolution. The group of buildings covers a frontage of 396 feet on Chestnut Street.

The original buliding (Independence Hall) in the group was bcgun in 1732 and was opened and first put to use in September, 1736 , when William Allen, Mayor and prominent merchant of Philadeiphia, gave a dinner to the citizens. In October, 1736, the Legislature, of which Benjamin Franklin was clerk, moved into the completed part of the structure, then known as the "East Room." In June, 1753, Pass \& Stow placed in position in the State House steeple the Liberty Bcli, weighing 2,080 pounds. In 1752 a clock was ordered, and in 1759 it was placed and paid for. The State House was practically completed in the latter year. Here are some of the historical cvents that have taken place in Independence Hall: June 15, 1775, Washington accepted his appointment as General of the Continental Army.

July 4, 1776, Colonies issued the Declaration of Independence.

July 15, 1776, convention to form a new Constitution for Pennsylvania met here.

September 11 and October 4, 1777, American offlcers captured ac the Battles of Brandywine and Germantown were held prisoners in the building by the British.

Congress, which had ieft Philadeiphia in September, 1777, and which convened in Independence Hall March 4, 1777, left again on September 18, 1777 ; returned Juiy 2, 1778 , and continued to sit there until the close of the Revolution.

July 9, 1778, the Articles of Federation and Union between the States were signed in Declaration Chamber by eight States. The flve remaining States signed later, the last, Maryland, on March 1, 1781.

May 14. 1787, the Federal Convention to frame a Constitution for the United States assembled, sitting until September.

December 13, 1787, the Pennsylvania Convention met to ratify the Philadelphia Constitution.

In 1824 Lafayette was given a reception there.
December 6, 1790 the Congress of the United States occupied the County Building, now known as Congress Hall, one of the Independence Hall group, and remained there until the seat of Government was removed to Washington in 1800.

March 4, 1793, George Washington was inaugurated in Congress Hall, at the beginning of his second term as President: and John Adams was inaugurated there March 4, 1797: The House of Representatives occupled the lower floor and the Senate the second floor.

February 7, 1791, the Supreme Court of the United States held its first session on the second floor of the City Building, now known as Old City Hall, one of the Independence Hali group, and stayed there until August 15, 1800. The Supreme Court of Pennsylvania sat on the second floor of the building aiso. The City Building was used as the municipal headquarters until March 27, 1895.
In 1816 the City of Philadelphia bought the entire property.

There are many historic oll portraits in the National Portrait Gallery, including. Washington and other early American public men.

Independence Hall was formaliy thrown open as a public historicai museum July 4, 1876, although parts of this building were used as a museum as early as 1790. Cost of its annual upkeep is \(\$ 25,000\). Its art collection, made up in the main of original pictures of celebrities of Coloniai and Revolutionary times, is worth over \(\$ 500,000\). The museum collection consists of furniture, manuscripts, musical instruments, water colors, missiles, maps, colns, currency, weapons, metals, prints, wearing apparei, utensils, and books.

There are no pay days. The National Museum is open to the public daily throughout the year, from 9 A. M. to 4 P M., Sundays, 1 to 4 P. M., except Christmas and Thanksgiving. The National Museum, Independece Hall group, is located on the south side of Chestnut Street, between Fifth and Sixth Streets, and can be reached from the central hotel district and the rallroad stations by trolleys or subway trains. A series of free bulletins are issued, which will be mailed upon request.

\section*{THE CLEVELAND MUSEUM OF ART.}

THE Cleveland Museum of Art. incorporated in 1913, was opened to the public on June 6, 1916. It is situated in Wade Park on iand given by J. H. Wade. The building cost about \(\$ 1,250.000\), was made possible through the wills of John Huntington and Horace Keliey, and the main income is derived from The John Huntington Art \& Polytechnic Trust and The Horace Kciley Art Foundation. The Museum is open free on Sundays, Wednesdays, Saturdays and holidays, an admission fee of twenty-flve cents being charged on other days. The hours on Sunday are 1 to 10 P . M., on Wedne day, 9 A . M. to 10 P. M., and on other week days and holidays, 9 A. M. to 5 P. M. The membership is approximateiy 5,0 30 .

Exhibition space comprises a central rotunda, opening on one side into the Court of Tapestries and Armor, and on the other into the Garden Court, and around these as a central axis are arranged fourtcen exhibition galieries. The collection of American Colonial art was instalied in a gallery directly oppositc the main entrance so that the first emphasis for the entering visitor might be on the artistic production of our own country. This has been of aid in developing in the foreign-born visitor the realization of America's traditional and cultural background. The Court of Tapestries and Armor houses an important and striking collection of arms and armor,
and a series of eight tapestries depicting the story of Dido and Aeneas. The museum is especially rich in its oriental collections, and has developed other important groups iliustrating the art of various countries from ancient to modern times.

The educational work of The Cleveland Museum of Art is being developed along various lines. The conference room is available at all times for clubs or groups desirous of studying art subjects or the museum's coliections. Lectures and museum talks are given on request by members of the staff. The Children's Museum is becoming an important factor of the museum's activities. An appeal is made to the child mind by exhibits of suitable works of art, including series of ethnologicai models and natural history groups. Drawing materials are placed at the disposal of the children and sympathetic assistance is glven them by the attendants, every effort being made to create an interest in and an appreciation of beauty and art. Classes of sixth, seventh and eighth grade public school children work in the museum each day under a supervisor empioyed by the Board of Education. Classes from the public and private schools and from the colleges come for general tours of the gaileries and for correlative study. A department of musical arts was established in 1920. The museum's reference ilbrary contains 5.000 books on art, etc., magazines, and over 7,000 lantern slides.

\section*{THE CITY ART MUSEUM OF ST. LOUIS.}

Tre City Art Museum of St. Louls was established in 1879, and became a municipal institution in 1909 . The building is in Forcst Park, 160x350 feet, with 44 gallerles on three floors. The collections include paintings, prints, sculpture, textiles, ceramics, metal work, furniture and other objects. The modern work, iurniture and other objects, The modern France, Holland, Spain, England, Russia, Sweden, Beiglum and other countries. There is a smail group of Old Masters. In the print department are etchings, engravings and woodcuts by old and modern masters. The sculptures are chlefly examples by

American artists, supplemented by collections of casts from the antique and from masterpieces of the Renaissance. Among the Chinese ceramics are specimens from the Han Dynasty downward, and examples of the Sung, Ming, and K'ang-Hsi periods. There are groups of Chinese paintings, bronzes, jades and other carved stones, lacquer, glass, textiles, \&cc., as well as objects iilustrative of the decorative arts of ancient Greece and Egypt, of Japan, Korea and Persia. The museum is open daily, except Christmas and New Year's Days, 10 A. M. to 5 P. M. Admis sion frea.

\section*{FIELD MUSEUM OF NATURAL HISTORेV, CHICACO.}

Freld Museim of Natural History, éstablistiêd 1893, at the elose of the World's Columblan Exposltion of 1893 , removed June 1,1920 , to its new bullding in Grant Park. The founding of a scientific Institution of this eharacter ln Chicago was made possible by a glft of \(\$ 1,000,000\) by Marshall Fleld, whose name the institutlon bears, and who on his deäth, January 6, 1906, bequeathed a further \(\$ 8,-\) 000,000 , of whlch \(\$ 4,000,000\) was for the erection of a permanent building, and \(\$ 4,000,000\) for endowment. The sum of \(\$ 1,200,000\) has been contributed by others, and there is an annual income from other sources than endowment of approxlmately \(\$ 120,000\).

\section*{FIVE MAIN DEPARTMENTS.}

The nuicleus of the exhlbltion material was gathered by gift and purchase at the World's Columblan Exposition. Several departments created at the organizatlon have been abandoned, until, after a lapse of twenty-seven years and expenditure of over \(\$ 7,000,000\), the museum is now divided lnto five departments: Anthropology, botany, geology, zoology, and the N. W. Harris Publie School Extension. Many expeditlons for the purpose of obtaining study, exhibition, and exchange material and data have been dlspatched to all parts of the world. The results have been published by the
múseum rom time to tlme. It has a working library of 78,000 titles, an extènsive excharge system, fully equipped departmental laboratories; an herbarlum of 560,000 sheets, study collectlons of mammals, birds, flshes, reptlles and insects reaching many thousand specimens, a large taxidermy section, a printling shop, illustration studio, assaylng and lapidary rooms, ete. In North America, Philipplne, Chinese and Tibetan ethnology, in meteorites, in the world's mineralogy, in economic botany, the museum is particularly prominent, while its series of mounted mammals and birds and plant reproduction furnish examples of advanced museum practice. The institution is open to the public on all days except Christmas and Thánksglving. A small admission fee is charged except on Thursday, Saturday, and Sunday, when it is free to all Students, scholars and teachers are admitted free at all times.

\section*{COVERS ELEVEN ACRES.}

The museum ls incorporated under Illinols State law, and the administrative control rests ln a board of twenty-one trustees. The building is 750 feet by 350 feet, but with the exterior outer lines, including entrances and terrace. the structure covers about eleven acres of ground. President, Stanley Field; Secretary and Director, D. C. Davles.

\section*{THE ART INSTITUTE OF CHICACO.}

THE institute is on the lake front at the loot of Adams Street, faclng Michigan Avenue. Building constructed of Bedford llmestone in Itallan Renaissance style, 320 feet long wlth 120,000 square feet of floor space. The institute has about 150 galleries, school rooms, offles and studios; also Fullerton (lecture) Hall, wlth seating capacity of 500 ; the Burnham Library of 3,000 volumes on architectural subjects, and the Ryerson Library, 14,500 volumes on art, one of the few llbrarles in the world devoted exclusively to art. During the fall, wlinter and spring months 80 to 100 lectures on art and related subjects are given in Fullerton Hall, also an orchestra eoncert each Sunday afternoon and evening, and occasionally a pageant or dramatlc presentation.

\section*{1,800 PAINTINGS; 1,100 SCULPTURES.}

The museum contalins more than 1,800 paintings, 1,000 casts of sculpture, 100 original marble statues and fragments of all periods, 3,500 prints, etchings engravings and lithographs, 1,500 textiles of anclent and modern times, Peruvian and Egyptian to the Elghteenth Century, and extensive collections of potteries, poreelains, china, etc., a great part of the last nained being asscmbled in Gunsaulus Hall among them the Blanxius collectlon of English potterles and porcelains, one of the finest extant The institute was incorporated in 1879 and aehleved International lmportance with the purchase of fifteen old Dutch Masters of the Demidoff collection, in 1890. These paintings, with other important canvases of their school, hang in the Charles Lawrence Hutchinson Gallery of Old Masters, named in honor of Mr: Hutchinson, who has been President of the instltute for over forty years. Rembrandt, Rubens,

Van Dyck, Hans Holbein, Hobbema, Von Ostade ter Borch, Jan Steen. Teniers, Ruysdael Van de Velde, are represented ln this gallery. The Henry Fleld, A. A. Munger and Nickerson memorläl collections include painters of the Barbizon school, the earlier American painters of landscape and figures, the Potter Palmer collections, paintings of modern European impressionists.

\section*{MODERN AMERICAN ART}

Modern American art is ehiefly represcnted in the collection now numbering over one hundred canvases and other works presented by The Frlends of American Art. One of the features of the institute is the serles of temporary exhibitions of paintings, sculpture, architecture and applied arts whlch are held during the year. Annual and speclal exhibitions and collections of various kinds from America and abroad to the number of slx to ten at a glven time keep the constituency of the Art Instltute aware of current achlevement in art Attendance (1921), 1,224,894. Free days for public-Wednesdays, Saturdays, Sundays and public holidays. The institute's sources of income are bequests, gifts, membership dues (total paid membership, Jan. 1, 1922), 18,196, income from 1ts endowment of about \(\$ 3,000,000\) both restricted and frec, and a small tax from the South Park Board of the Clty of Chlcago. The buildlng has a valie between a million and a half and two million dollars The collections have a commercial worth far beyond five million dollars. The art school of the institute has an annual attendance of about 4,600 students often referred to as the largest art school in the world. It has a faculby of about two score teachers and lnstructors.

\section*{THE CINCINNATI MUSEUM OF ART.}
(By the Director, J. H. Gest.)

The Cincinnati Museum Assoclatlon, organized In 1880, and lncorporated in 1881, gives exlibitions during the year, and has collections of modern Ainerican art which Include the pictures, sculpture and etchlngs of Frank Duveneck; paintings, studies, drawings and etchings by Robert Blum; as well as a representation of the other leading Ainorican painters and sculptors; and a considerable number of modern French paintings. Casts of Creek sculpture and of carved lvory from the Roman to the Renalssance perlod are installed in the Sclimiddlapp \({ }^{\circ}\) Building,
and there is a large group of American archaeology The decorative arts are represented, the department of metal work inicluding, besides the Elkingtoi reproductions, a group of original armor and the Conner collection of original sllver. The museunt holds also the Doane collection of musleal instruments, the Longworth historical exhibition of Indla shawls, and the exhibition of Rookwood pottery the Clnclnnati art industry with which the muscun and its school, the Art Acadeiny of Cincinnati, are closely connected. There is a reference library.

\section*{BROOKS MEMIORIAL ART GALLERY, MEMPHIS, TENN.}

The Brooks Memorlal Art Gailery, a gift to Momphis by Mrs. Samuei Hamilton Brooks, in memory of her husband, was dedleated May 25, 1916. It is of pure Grecian architccture, of Georgian marble, costing \$115,000. Situated in Overton Park It is under the supervlsion of the Park Commission, one of which body is chairinan of the Art Gallery

The extension work in the scliools is one of the injortant. activities of the Gallery, and is supported by the Memphls Art Association. There is inn annual exhibit of local artists' work and students from the schools and studlos, every spring. Prizes
are given by the Art Assoclation, including one for the best essay by any one from the Englisli classes The Junior Art Association is the centre of school Interest. Several of the schools have aready begut to buy good pletures. There are also garden clubs ote. Fach school has a branch of the Junior Art Assoclation with its own offlcers and plan of work There are three joint meetings a year, the chairmat of which makes a report to the Senior Art Association, thereby forming a circle of work around the Art Gallery. At statea times lecturers are brought to the clt:r.

\section*{TELFAIR ACADEMY OF ARTS AND SCIENCES, SAVANNAH, GA.}

Founded 1875, under will of Mary Teifair (daughter of Edward Telfair, revoiutionary patriot, signer of the Articics of Confederation, and eariy Governor of Georgia), and last of her name. She devised to a Trustce the Teifair residence and contents, and an endowment of \(\$ 100,000\). By additions and alterations, the residence was converted into an art gallery, containing: (1) Specimens of Coionial furniture and
furnishings of the Telfair family, displayed in the dining room, which is unchanged;' (2) Oid books and manuscripts found in the residence; (3), a collection of casts of classical statues; (4), about seventy modern paintings by artists of America, England, France, Germany, Holland, Beigium and Italy. Open seven days a week; no pay days. Gives miscellaneous art exhibitions, chiefly from American Federation of Arts, exhibitions of individual painters and etchers, and lectures.

\section*{ISAAC DELGADO MUSEUM}

The Isaac Delgado Museum of Art was dedicated on December 16, 1911. The building was the gift of Isaac Delgado to the City of New Orieans, and is malntalned by the city. The Museum is free to the pubilc; except Fridays, 25 cts. The Curator, C. W. Boyle. It is open on Sundays, but ciosed every Monday. Mr. Delgado was born in 1839, at KIngston, Jamaica, and came to New Orleans when a young man, and became associated with his uncle,

OF ART, NEW ORLEANS.
Samuei Delgado, in the sugar and molasses business. He died Jahuary 4, 1912. Permanent collection includes the Chapman H. Hyams collection of paint ings and statuary; the Morgan Whitney collection of lade and other hard stones; the Alvin Howard collection of Etruscan glassware and Greek pottery; the B. M. Harrod collection of paintings and old silverware; the John G. Agar coilection of paintings, bronzes and ceramics, and the Eugene Lacosst coilection of bronzes and ceramics.

\section*{UNIVERSITY OF PENNSYLVANIA MUSEUM.}

\section*{(At the University, Philadelphia.)}

Director, George Byron Gordon. The collections include Egyptlan, Babylonian, Graeco-Roman, Chinese, Mohammedan, Aboriginai America. Africa, the South Seas, Primitive Asia, Ancient Art, Industrial Art the Decorative Arts. There is a ilbrary of 10,000 volumes relating to subjects illustrated in the exhibits.

The most-important accessions during the ycar have been an ancient royal feather cloak and cape from Hawaii; a collection of South Sea Island carvings: a coll ction of ancient Benin carved eiephant tusks and bronzes; a Chinese gilt bronze statuette of the period of the Six Dynasties. The number of visitors during the year was 94,056 . The expenses of administration amounted to \(\$ 83,74203\) and the sum of \(\$ 151,092.95\) was spent for expeditions and coliections. The interest on the Eckley B. Coxe, Jr. Endowment of \(\$ 500,000\) is available for Egyptian explorations. The city ampropriated \(\$ 30,000\). The
entire income of the museum, including saies of photographs, publications, etc., was \(\$ 324,854.47\).
The museum maintains expeditions in Alaska, Central America, South America, Egypt and Palestine. Open daiiy throughout the ycar from \(10 \mathrm{~A} . \mathrm{M}\). until 5 P. M. Sundays 2 untii 6 . Organized 1889. First section of the museum opened in 1889, second section opened in 1916. Annual meeting in December. Board meets third Friday of each month, except July and August. Expert guidance is free to all visitors. The Museum Journal is published quarterly, giving accounts of expeditions In the field and of exhibits in the museum. Four series of pubications are issued containing studies and investigations in archaeology and ethnology: Anthropological Series, Babylonian Series, Egyptian Series, Mediterranean Scries. The pubilic schoois are especially looked after in the way of lectures at the institution.

MUSEUM OF HISTORIC ART
The Museum of Historic Art was founded in the year 1889. It contains the notable T umbuil-Prlme collection of pottery and porcelain, a few Assyrian, Greek and Roman scuiptures, Cypriote and later Greek pottery, and a quantity of Syrian glass from the Princeton expeditions. In the mediaval and Renaissance field there are sculptures and paintings, few but of good quality. The cast collection comprises the his ory of sculpture in epitome from early Egyptian times through the Italian Renais-

AT PRINCETON UNIVERSITY.
sance. A new hail of architectural casts is in preparation under the care of the School of Architecture.

A distinctive and probabiy unique exhibition is the series of full size arch tectural casts taken from Syrian buildings of late classical and eariy Christian periods by Prof. Howard Crosby Butier.

The museum, which for a year wili be in process of rearrangement, is regularly open to the pubiic from 2 to 5 P. M. Sunday afternoons, and generaliy on week days during the term on application to the custodian.

\section*{BOSTON MUSEUM OF FINE ARTS.}

The Museum of Fine Arts, Boston, was incorporated February 4, 1870. The first section of the Museum buiiding in Copley Square, was dedicated Juiy 3,1876 , and the next day it was opened to the public. The original building was twice enlarged. The first section of the present building on Huntington Avenue was opened November 15, 1909. The total cost of iand, buliding, and instaliation was \(\$ 2,900\),000 . The second section of the proposed completed building, the Robert Dawson Evans Galleries for Paintings, the gift of Mrs. Evans, was opened February 3, 1915. It cost \(\$ 1,000,000\). The annual running expenses are about \(\$ 200,000\). The Museum receives no city or State aid, lts funds for running expenses and for purchases being derived entirely from private gifts and bequests. Admission is free whenever the Museum is open: 10 A . M. to 5 P . M.
week days (Nov. 1 to March 1, 4 P. M.), 1 P. M. to 5 P. M. Sundays.
The Museum possesses collections illustrating the art of Ancient Egypt, Greece, and Rome, the art of mediaeval, Renaissance and modern Europe, American art, and the art of Asia. Its coliection of Egyptian and Greek scuipture and Greek vases and terra cottas is the finest in this country; its coliection of the art of China and Japan is unrivalled; its collection of the art of India ls the only one in this country; and its collection of paintings and drawings from India is superior even to the one in the British Museum; the textiies, numbering over 7,000 pleces, are recognized as the best comprehensive representative coliection in this country; the paintings, of which over 700 are exhibited, include, besides exampies of the oid masters, a large collection of French paintings of the nineteenth century and also of early American paintings.

\section*{WORCESTER ART MUSEUM.}

\section*{(By the Director, Raymond Wyer.)}

The Worcester, Mass., Art Museum was founded and incorporated in 1896. It was a gift from the late Mr. Stephen Salisbury who left his entire estate for its maintenance and the formation of a permanent coilection. One of the significant collections of eariy Italian paintings and sculpture in the country has been assembled as wcii as important examples of painting and sculpture of other schoois and periods. Coilections of textiles, furniture, ceramics, woodwork, silver and bronzes are being made. Also of
speciai note are the Bancroft Coilection of Japanese Prints and the Goodspeed Coliection of Engravings by American Artists. Another important feature is the Educational Department, which gives courses of instruction in coior and design to school children and iectures on the same subject to adults. It has an important art library. A series of free concerts is given each year to the public as well as a number of translent exhibitions. There is a Worcester Art Museum Arts and Crafts Schooi in a separate building.

\section*{THE MUSEUMS AT HARVARD UNIVERSITY.}

The William Hayes Fogg Art Museum was founded by Mrs. Elizabeth Fogg of New York in memory of her husband, whose name it bears. Mrs. Fogg bequeathed for this purpose \(\$ 220,000\), of which \(\$ 150,000\) was expended on the fireproof building, completed In 1895, in the College Yard. The bullding is two stories high with a lecture room. Admission to the Museum is free. The hours of opening are: week-days, 9 A. M. to 5 P . M.; Sundays during the coilege year 12 M . to 5 P . M. The Museum ls closed on legal holidays and on Saturday afternoons during the summer vacation of the University.

The coliections include original works of ancient sculpture, among them a marble statue of Meleager (possibly a fourth century copy of the original by Scopas; moulds and fragments of Arretine pot-
tery; Greek vases, coins and figurines; a s ries of Gandhara sculptures; a notable collection of Romanesque sculpture, principally composed of 16 capitals representing the finest type of twelfth century French work; Orlental works of art, including Chinese, Japanese and Thibetan paintings, Persian minlatures and callig raphy, pottery, jade and bronze; textiles; a few American paintings, among them works by Sargent, Winslow Homer and Dodge Macknight; about one hundred Byzan ine. Italian, Spanish, Flemish and German paintings of the fourteenth, fifteenth and sixteenth centurles; original drawings and water color drawingis by masters of the French, Italian, Northern and Eng lish schoois; and a large collection of prlnts, chiefly the work of the German and Italian wood and metal engravers and etchers. The Museum aiso has a library and a collection of photographs and slides.

\section*{SEMITIC AND GERMANIC MUSEUMS AT HARVARD UNIVERSITY.}

The Semitlc Museum at Harvard University was founded by Jacob H. Schiff, Esq., in 1899. The objects aimed at have been to aid the regular instruction given in the departments; to furnish the means of research; to iliustrate the manners, customs and history of the Semitic peoples and thus to show, as far as may be, what the Semites have contributed to civilization. The Museum building on Divinity

\section*{PEABODY MUSEUM AT}

The Peabody Museum of American Archaeology and Ethnology of Harvard University was founded by George Peabody in 1866 . Its purpose was the forming and preserving of collectlons of antiquities and objects relating (1) to the native people of the American continent, and (2) to the varlous primitive peopies of the world in general. The collections are housed in the Peabody Museum building of five stories which forms the southern wing of the University Museum structure. The five stories have more than 53,000 square feet of floor space for exhibition purposes, and about 18,000 square feet for offices, laboratories and storage.

The collections relatlng to prehistoric American tribes have been brought together largely by explorations under the auspices of the Museuin, those reiating to Middle America belng unusually compiete. In the halls devoted to the Mayan region are grouped the reproductions " of the great stone stelae and altars which adorn the plazas and stand before the

Avenue, Cambrldge, completed \(\ln 1902\), is likewise the gift of Mr. Schiff.

The object of the Germanic Museum is to illustrate by means of plaster casts and other klnds of reproduction the outward aspect of the development of Germanic Cultire. The new Museum building, erected in 1916 at the corner of Kirkland Street and Divinity Avenue, Cambridge, is cailed, in honor of its donor, Adolphus Busch Hall.

\section*{HARVARD UNIVERSITY.}
ruined tempies of the great Maya cities. Collections relatling to historic American tribes contaln rare objects obtained by well-known early expiorers.

The materlal relating to prehistoric Europe contains collections by Gabriei de Mortiliet, Lartet and Christy, and Clement, the pioneer archaeologists of the century just past. The primitive people of Oceania are represented, also both the historlc and prehistoric tribes of Africa. The osteological coilections contain examples of skeletal remains from nearly all sections of the worid

The laboratories of the Museum are open (under proper restrictions) to ail specialists and students In anthropology. The collections are aiso made use of by many of the Institutions of higher education in Central New England, in connection with the study of the orlgin and development of design, archltecture, and the various minor arts, as weli as of mankind in general. The pubilcations of the Museum consist of papers, memoirs, annual reports and special publications.

PEABODY WUSEUM OF NATIONAL HISTORY, YARE UNIVERSITY.

The Peabody Museum of Natürai History at Yale University was founded by George Peabody in 1866. Tei years later the first wing of the museum was built, but the complete pian was never carried out, and the building was remoyed in 1917 to malse way for the Harkness Memorial Quadrangle. Since then the greater part of the collections have been in storage pending the erection of a new building, which, it is hoped; wlli be begun before the end of 1922

The museum has the following colicctions: Minëralogy, built up arourid the Gibbs collection purchased by the University as far back as 1825 and containing, besides an abundance of ninerals, one of the laigest assembiages of meteorites in the country; Zoulogy, brought together largely by Yale's distinguished naturalists, the late Professor J. D. Dana and Professors A. E. Verrill and S. I. Smlth, and including a vast amount of marine invertebrates iccumulated through co-operation with the U. \(S\). Fish Commission; Anthropoiogy, much of which was presented by the late Prof. O. C. Marsh; Invertebrate Paleontology, witi material from ali parts of tilis country and representing all geologle ages; Osteology; the gift of Prof. Marsh; and nualliy the Marsh collection of Vertebrate Paleontology, surpassed by perhaps but one other in the world, and particularly rich in type material from the western Dart of the United States.

SCHOOL OF FINE AIRTS
The School of the Fine Arts at Yale University contains the Jarves collection of Itallan art, humbering 120 paintings from the thirteenth to the sevelltaenth centuries; the Truinbill Gallory of Historical
Anerlcan Palntings; the Alden collection of Belgian wood carvings of tile seventdentl century, comprising 120 feet of wainscoting, including three confessionals, from a chapei in Glient; the Frederick Wells Williams loan collections of Chinese porcelains and bronzes, and a number of other valuable objects of art; slietches by old masters, exampies
of contemporaneous work, casts and marbles representative of various periods of ancient and Renalssance art; bronzes; and Braun autotypes and Arundel prints to the number of about four hundred. These are from time to time suppiemented by special collectlons and exhibitions.

The William A. Speck Collection of Goethe Literature, 26 Llnsiy Hail, includes many first and other important editions of Goethe's works, numerous books dealing with the Faust legend before Goethe's time, and most of the Faust dramas by other authors aiso a very fuli representation of the transiations into other languages of Goethe's Faust, a large body of commentaries, many portraits of Goetle and \(h\) is friends, inanuscript letters by and about Gocthe, views of Weimar during Gocthe's time, and an asseniblage of medais struck in his hollor.

\section*{BABYLONIAN COLLECTION}

The Babulonian Collection at Yale University consists of about 10,000 original tablets belonging to the various periods in Babylonian history, from about 4000 to 150 B. C., and includes literary texts (epics and liturgies), syllabaries or dictionaries, mathematical treatises and different kinds of exercises fron teripie schools, divination texts, legai and business transactions, administrative documents from the archives of Babyionian temples, personal and offcial letters and records of various kinds, seal cylinders, inscribed brlcks, votlve objects, relicfs, royal buid ing inscriptions, incantation bowls. etc. The original inscriptions are aligniented by the William IIayes Ward Co'lection of seal-cylinder impresslons, aud by a large number of casts from muscums in Europe and America which iliustiate the ilfe and customs of the ancient Babyionlans and Assyrlans. In addition to tie liabylonian and Assyrian material, the beginulng has been made of a collection of other Semltic monuments lucluding botil casts and originals. The Whiting Collection of Palestinian pottery and terracotla, numbering 940 pieces, acquired through the gencrosity of the iate Mrs. Francis Wayland, is also available for study.

\section*{THE LIBRARY OF CONGRESS.}

The Library of Congress was establishcd in 1800, destroyed in 1814, by the burning of the Capitol, afterward replenished by the purchase by Congress of the library of ex-President Jefferson, 6,760 volumes (cost, \(\$ 23,950\) ) ; in 1851, 35,000 volumes destroyed by fire; in 1852, partially replenished by an appropriation of \(\$ 75,000\); increased (1) by regular appropriations by Congress; (2) by deposits under the Copyright Law; (3) by gifts and exchanges; (4) by the exchanges of the Smithsonian Institution, the library of which ( 40,000 volumes) was, in 1866, deposited in the Library of Congress with the stipulation that future accessions should follow it. One hundred sets of Government publications are at the disposal of the Librarian of Congress for exehange, through the Smithsonian, with foreign Governments, and from this source are received about 12,000 volumes annually. Other special aceessions have been: The Peter Force collection (22,529 volumes, 37,000 pamphlcts), purehased 1867, eost \(\$ 100,000\); the Count de Rochambeau colleetion (manuseript) purchased 1883 , cost \(\$ 20,000\); the Toner collection (24,484 volumes, numerous pamphlets), the gift in 1882 of Dr. Joscph M. Toner; the Hubbard collection (engravings)

The collection is now the largest in the Western Hemisphere, and third in the world. It comprises over \(2,918,256\) printed books and pamphlets (including the law library, whieh, while a division of the Library of Congress, still remains at the Capitol), maps and eharts, pieces of music, and photographs, prints, engravings and lithographs numbering about two million.

The collection is rich in history, political science, in offlicial documents, National, State, and foreign, and in Americana, ineluding important files of American newspapers and original manuseripts (Colonial, Revolutionary, and formative periods). Many of the rare books and manuseripts belonging to the library are exhibited on the second floor.

Among the special book collections arc the Yudin, of Russian literature ( 80,000 volumes); the Sehiff, of Judaica (about 20,000 ); the Weber, of Indica; the Huitfeld-Kaas (Seandinavian); the John Boyd Thacher of Incunabula ( 930 titles). The Orientalia include some 5,000 volumes (faseicules) of Japanese books and about 40,000 volumes (fascicules) of Chinese. The Division of Prints includes eertain collections given or lent, besides a large mass of material recelved by copyright and some by purchase. The manuscript collections are especially noteworthy for material on American history, some of the most distinguished of which has been reeeived by transfer from the executive departments, the library being now regarded as the main custodian of the historical archive material in the possession of the Government. It has the papers of seventeen Presidents and of various American statesmen, Franklin, Morris, Hamilton, \&e.

The library is copying largely documents in foreign archive offies and other institutions of coneern to American history. It has already a large body of transeripts from such sourees. This policy of transcribing and copying, where necessary by faesimile, is applied also to maps and to musie. Through it the collection of music, in bulk one of the largest in the world, is. especially strengthened in full seores of orehestral and operatie music.

In 1897 the main collection was removed from the Capitol to the building ereeted for it under the Acts of Congress approved April 15, 1886, Oetober 2, 1888, and March 2, 1889, at a cost of \(\$ 6,347,000\) (limit by law, \(\$ 6,500,000\) ), exelusive of the land, which cost \(\$ 585,000\). The arehitects who furnished the original designs were John L. Smithmeyer and Paul J. Pelz. By the act of October 2, 1888, before
the foundations were laid, Thomas L. Casey, Chief of Engineers of the Army, was placed in eharge of the construction of the building, and the arehitectural details were worked out by Paul J. Pelz and Edward P. Casey. Upon the death of Gen. Casey, in March, 1896, the entire charge of the construction devolved upon Bernard R. Green, Gen. Casey's assistant, and under his superintendence the building was completed in February, 1897, and opened to the public November, 1897. The building oecupies three and three-quarter aeres upon a site ten acres in extent at a distance of 1,270 feet east of the Capitol, and is the largest and most magnifieent library building in the world. In the decorations some forty painters and sculptors are representedall American citizens. The floor space is 326,195 square fect, or nearly eight aeres. The book stacks, including the new stack built over the southeast interior court, contain about 100 miles of shelving, affording space for \(3,540,000\) of travel volumes and 84,000 volumes of newspapers.

The library is maintained by annual appropriations by Congress for various purposes, including the purchase of books. Total appropriation (1922) \(\$ 711,120\). For service and contingent expenses \(\$ 484,155\); purchase of books, \(\$ 98,000\); building and grounds, \$128,265.

Library Service-Library proper, 276 employees; copyright, 91 ; other, 149 ; distribution of eards, 53 ; legislative reference, 30 . Total, 450 . By virtue of the act of 1897 , employees in the library proper are appointed by the Librarian of Congress, "solely with reference to their fitness for their particular dutles." Custody and care of the building is minder the Superintendent of the Library Building and Grounds, who is also the disbursing offleer and appoints the 147 employees of his offlee.
Entitled by statute to draw books for home use are various offleials at Washington. In addition, special permits are freely issued by the Librarian to persons engaged in researeh.

Inter-Library Loans-While not a lending library but primarily a reference library, the Library of Congress maintains an inter-library loan systcm by which special service is rendered to seholarship by the loan to other libraries for the use of investigators engaged in serious research of books whicl it is not within the power or duty of the library in question to supply and which at the time are not needed in Washington.

Copyright offce-The Copyright Office is a distinct division of the Library of Congress and is located on the ground floor, south side; open 9 to 4.30 . It is under the immediate charge of the Register of Copyrights, who, by the acts of February 19, 1897, and March 4, 1909, is authorized "under the direetion and supervision of the Librarian of Congress' to perform all the duties relating to eopyrights. Copyright registration was transfcred to the Librarian of Congress by the act of July 8, 1870. Of most artieles eopyrighted two copies, and of some one cony, must be deposited in the Library of Congress to perfect eopyright.

Hours-The library building is open to the public all days in the year excepting 4th of July and Christmas. The hours are from \(9 \mathrm{~A} . \mathrm{m}\). to 10 P . M. weekdays, from 2 p. m. to 10 P. M. Sundays and Holidays and 9 A. M. to 1 P. m. on Saturdays from June 15 to September 15.
Librarians Since the Inception of the. Library-1800-1815, the Clerk of the House of Representatives (for the time being); 1815-1829, George Watterston; 1829-1861, John S. Meehan; 1851-1854; John G. Stephenson; 1864-1897 (June 30), Ainsworth R. Spofford; 1897-January 17, 1899, John Russell Young; 1899 (April 5), Herbert Putnam. Chief Assistant, Appleton P. C. Grimn; Chiey Clerk, Ailen R. Boyd; Secretary, Jessica L. Farnum.

\section*{PAN-AMERICAN UNION.}

THE Pan-Amcrican Union is the international organization and office maintained in Washington, D. C., by the twenty-one American republies, as follows: Argentina, Bolivia, Brazil, Chili, Colombia, Costa Rica. Cuba, Dominican Republic, Eeuador, Guatemala; Hayti, Honduras, Mexico, Niearagua, Panama, Paraguay, Peru, Salvador, United States, Uruguay, and Venczuela. It is devoted to the development and advanecment of commerce, friendly intereourse, and good understanding among these countries. It is supported by quotas contrlbuted by each country, based upon the population. Its affairs are administered by a DirectorGeneral and Assistant. Director, elected by and responsible to a Governing Board, which is composed of the Secretary of State of the United States and the diplomatic representatives in Washington of the other American Governments. These two
executive officers are assisted by a staff of experts, statisticians, commercial specialists, editors, translators, compilers, librarians, clerks and stenog raphers. The Union publishes a monthly bufletin in English, Spanish, and Portuguese, which is a record of. Pan-American progress. It also publishes numerous special reports and pamphlets on various subjects of practical information. Its library, the Columbus Memorial Library, contains 50,000 volumes, 25,000 photographs, 180,000 index cards, and a collection of 1,600 maps.
is housed in a building erected through the gifts of Andrew Carnegie and the contributions of the American rcpublics.

Director-reneral-Dr. L. S. Rowe; Assistani Director-Francisco J. Yanes; Counselor-Franklin Adams; Trade Adciser-W. A. Reid; Chief Statis-tician-William C. Wells; Chies Clerk-Wm. V. Griffn.

\section*{MUSEUM OF ANTHROPOLOGY, UNIYERSITY OF CALIFORNIA}

The Museum of Anthropology of the University of California was founded by Mrs. Phoebe Apperson Hearst in 1901. The colleetions gathered through her genorozity cost. more than \(\$ 1,000,000\). The Museum is temporarily loeated at Parnassus and Second Avenues. San Franelsco. It is open daily (exeept Monday) to the publie without charge.

The hours are \(10 \mathrm{~A} . \mathrm{M}\). to \(4 \mathrm{P} . \mathrm{M}\). on week days, 10 to 5 on Sundays

Although the Museum was founded in 1901 it was not jpened for public exhlbition until 1911. The collections which have been placed on view renresent the ancient cultures of the following regions: California Southwestern United States, the Great Plains, the North Pacific Coast, Peru, Oceania. Asia, Greeee, Italy and Egypt.

\section*{NAT:ONAL ACADEMY OF DESIGN.}
(Founded 1825. Headquarters, 109th Street and Amsterdam Avenue, New York.)
The National Academy of Design, and the Society of American Artists (founded 1877) were united, April 7, 1906. All mambers of the latter organization then became members of the former.

Council-Edwin H. Blashfield, President: Harry W. Watrous, Vice President: Charles C. Curran, Corresponding Secretary: Douglas Volk, Recording Secretary; Franeis C. Jones, Treasurer. W. Gran-ville-Smlth, Robert I. Ait.ken, Herbert Adams. Emil Carlsen, Charles A. Platt, Hobart Niehols.

\section*{AMERICAN ACADEMY OF ARTS AND LETTERS.}

The first seven members of the American Academy of Arts and Letters were selected by tlie Na tional Instltute of Arts and Letters from its own body in 1904 by ballot. The seven were William Dean Howells, Augustus Saint-Gaudens, Edmund Clarence Stedman, Johı La Farge, Samucl L. Clemens, John Hay and Edward MacDowell. In order to become eligible to the American Academy one must first be a member of the National Institute of Arts and Letters. This socicty was organized at
meeting of the American Social science Association in 1898. The qualificatlon for membership is stated in the constitution, "It shall be notable achievement in art, music or literature." The number in the institute is limited to 250, and the electlon is by ballot.

The American Academy of Arts and Letters numbers fifty members and the officers are: Williain Milligan Sloanc, President; Brander Matthews, Chancellor: Thomas Hastings, Treasurer; Robert Underwood Johnson, 15 West 81st St., New York City, Sccretary.

The following are the living members of the academy, as of November 7, 1922.

John Singer Sargent
Daniel Chester French James Ford Rhodes Villiam Milligan Sloane Robert Underwood Johnson
George Washington Cable Henry van Dyke William Crary Brownell Basil Lanneau Gildersleeve Woodrow Wilson Arthur TwIning Hadley Henry Cabot Lodge Edwin Howland Blashfield Thomas Hastings Brander Matthews Gllhu Vedder

George Whitefield Chadwick
George deForest Brush
William Rutherford Mead Bliss Perry
Abbott Lawrence Lowell Nicholas Murray Butler Paul Wayland Bartlett Owen Wister
Herbert Adams Augustus Thomas Timothy Cole Cass Gilbert
William Roscoe Thayer Robert Grant Frederick MacMonnles Willian Gillette

The directors of the academy are: N. M. Butler, Hamlin Garland, Cass Gilbert, Thomas Hastings, A. M. Huntington, R. U. Jolinson, Brander Matthews, W. M. Sloane, and Augustus Thomas.

In 1923 the academy wlll move into its new build- Drive, the cornerstone of which was laid by Marshal ing at 155th Street, between Broadway and Riverslde Foch in 1922.

\section*{THE FRENCH ACADEMY.}

The French Academy, founded in 1630 and incorporated in 1637 , was abolished by the Revoluton, but was revlved in 1795 as one of the sections of the Institute of France.

The Academy, when full, eonsists of 40 regular members. There are, in addition, ten members at large (from whom the regular members are selected by the Academy to fill vacancies), eight foreign menbcrs, and scventy eorresponding members.

\section*{ATTENDANCE IN HIGH SCHOOLS}

One-fourth of the high schools in the United States enroll from 2 to 27 students; another fourth, from 27 to 50 students; another fourth, from 50 to 100 students, and the last fourth, over 100 students.

Similarly, one-half of the 14,000 high schools in the country have an enrolment between 27 and 100 students. Out of every 1,000 students entering high schools, 725 stay into the second year, 525 into the third year; 449 into the fourth year; and 418 graduate.

The public high schools have greater influence in keeping the girls in school than they do In holding the boys. Of the 665,000 sccondary students enrolled in the first year, only 45.3 per cent. are boys, indicat.lng that more girls than boys enter high school. In the second year the percentage of boys is still smaller, viz., 42.7. In the third year the corresponding percentage of boys reduces to 41 and in the fourth year to 38.8.

This condition does not exist in the private high schools, where the boys constitute 45.8 per cent. of the first-year enrolment, 45.6 per cent. of the second-year enrolment, 46 per cent. of the thirdyear enrolment, and 44.6 per cent. of the fourthyear enrolment.

Of the students enrolled in a four-year high school, nearly one-half ( 47.3 per cent.) are in schools maintained longer than 180 days annually. Almost all of the other one-half of this group of students ( 48.8 per cent.) are found to be enrolled in schools running from 161 to 180 days each year, only 3.9 per cent. being enrolled in the four-year high schools having a term of 160 days or fewer.
In the thrcc-year high schools over one-thira ( 39.2 per cent.) of the students have a terin as short as 160 days. Over onc-half ( 56.6 per cent.) of the students enrolled in thesc threc-year high schools have a term of 161 to 180 days. Only a few ( 4.2 per cent.) of thesc students are cnrolled in high sehools which are in session longer than 180 days.

Financial ioss duc to irregular attendance is estinated on the basis of each State's total expenditure for publle schoois, compared with time lost, measured by vacant seats.

Enroiment (1890) \(12,722,581\); (1900) 15,503,110; (1910) 17,813,852.
Expenclitures on public schoof ilbraries in the year ended June 30, 1919, totalled \(\$ 1292,725\), of which States contributed \(\$ 1,130,054\). In New York State the expenditures were \(\$ 155,745\) by the State, and \(\$ 38,754\) from other sources. The next iargest contributor was Cailfornia, \(\$ 94,179\), and \(\$ 5,286\) from other sources

In the cases of public schools, both elementary and secondary, there is no definite information as to the actual number of "schools," but only as to the number of school buildings.

\section*{EDUCATION PROLONGS THE LIVES OF WOMEN.}
(From School Life, Published by U. S. Bureau of Education.)

College women live longer than other wonen, according to a study by Myra M. Hulst, of the American Red Cross, published in the Quarterly Publication of the American Statistical Association. Among 15,561 graduates of three woman's colleges, the death rate between the ages of 20 and 64 years is only 3.24 per 1,000 . For college women between 25 and 34 years, the death rate was 2.77 per 1,000, while for women in the general population, it was more than twice as high, namely, 6.10 per 1,000.
Such favorable figures for college graduates are not surprising when it is considered that as a rule only the physically fit continue through the four ycars to graduation. Physical and medical examinations given to all students brlng to light remediable defccts and lead to improvement. Favorable living conditions such as collcge women arc likely to encountcr, prescribed physical exercise, and gencral physical education add to the high level of health.
College women as a rule come from high-class
homes, where the environment gives them a good start in life. Judging by the names of the women considered in this study, the majority of them are from American stock. Such women, of good financial condition, well fed and clothed, and with opportunity for leisure are likely to have better health than the average woman, whose living conditions are less favorable.

Professional occupations, such as college women usually engage in, have fewer risks than the industrial and other occupations of non-college women. It was found that 58 per cent. of the college graduates had been engaged in teaching.

In this connection, a study was made of the death rate of women teachers in New York City as reported by the Clty Pension Commission. For ages between 25 and 34, the death rate was 2.98 , almost as low as that of the college women for the same ages. The death rates for teachers werc found to be the lowest existing in the New York City service.
Clearly cducation and professional life have a good effect on women's health.

ILLITERACY IN BIC UNITED STATES CITIES.
(U. S. Census, 1920 returns. Illiterates are those 10 years old and over who cannot read or write.) Note.-All the figures in the table relate to persons 10 years old or over

\footnotetext{
The pronouneed differenees between the percent-| Southern eitles. For example, in Fall River, Mass.
ages of llliteraey for the total population and for natlve whites whieh appear for many eltles are due to the large proportions of illterates among the forelgn-born whites and the Negroes, the former having a conslderable effect upon the average percentages in the Northern elties, and the latter in the

Southern eitles. For example, in Fall River, Mass.,
where the Illteraey ln the population 10 years of age and over was 11.9 per cent. for all elasses combinerl, it was only 1 per cent. for the natlve, but was 25.5 per cent. for the foreign-born whites. Again, in Birmingliam, Ala.. the pereentage of illiteraey was 8.4 for the total population, 0.7 for the native whites, and 18.4 for the Nexrocs.
}

\section*{ILLITERACY IN THE UNITED STATES If 1920.}

\section*{(U. S. Census Figures, as of Jan. 1, 1920.)}

THE percentage of illiteracy in the native white population decreased between 1910 and 1920 in all States exccpt six, in which it was very low in 1910 and remained unchanged-Idaho, Wyoming, and Washington, each with three-tenths of 1 per cent., and South Dakota, Nevada, and Oregon, each with four-tenths of 1 per cent.

For the foreign-born white population the percentage illiterate increased between 1910 and 1920 in 17 States, decreased in 29 States and the Dlstrict of Columbia, and remalned unchanged in two states.

In the case of the Negro population the percentage
illiterate decreased in the District of Columbia and in every State except four-Vermont, Rhode Island, Wyoming, and Oregon. The largest proportlonal increase, from 3.4 in 1910 to 4.7 in 1920, appears for Oregon. The largest proportional decrease is that lor New Mexico; in which State the percentage illiterate declined from 14.2 in 1910 to 4.3 in 1920, or by more than two-thirds. The explanation of this pronounced decrease is found in the fact that a large increase took place in the total Negro population of New Mexico, due in part to the presence of Negro troops in that State in 1920, and that there were few illiterates among the newcomers.

\section*{RHODES SCHOLARSHPPS.}

Two Rhodes Scholarships to the University of Oxford are assigned to each State in the Union. The scholarships are tenable for three years and have the value of \(£ 350\) a year. To be eligible a candidate must be-(a) A male citizen of the Unlted States, (b) Over 19 and not over 25 years of age, (c) Above sophomore standing in some recognized degreegranting university or collcge in the United States. Candidates may apply either from the State in which they have their ordinary private domicile, home, or residence, or from the state in which they have recelved at least two years of their coliege education.

Sciectlons are made on the basis of the candidate's record in scliool and college suppiemented by references of persons who know inim and by a personal Interview with the Commlttee of Selection. There is no written examination. Elections are made on the basis of-(1) Qualities of manhood, force of character, and leadership. (2) Literary and scholastic ability and attalnments. (3) Physlad vigor, as shown by interest in outdoor sports or in other ways. No restriction is placed on a Rhodes scholar's cinole of studies. He may read for the Oxford 13. A. in any of the Fhat JIonor Schools, lic
may enter for any one of the so-called Dipioma Courses, or, if quailfied by previous training, may be admitted to read for advanced degrees such as the B. Sc., B. Litt., B. C. L., or Ph. D.

An election is held each year in two-thirds of the States of the Union. In 1923 one scholar will be ciected in the foliowing States: Ala., Ariz., Ark. Callf., Colo., Dei., Fia., Ga., Idaho, Iowa, Kan., La., Mich., Minn., Miss., Mo., Mont., Neb., Nev., N.M., N. C., N.D., Okia., Ore., S. C., S. D., Tex., Utah, Wash., W. Va., Wis., Wyo. Appications will be due on or before Oct. 21, 1923; the elcetion wlll be heid on Dec. 1, 1923; and the Rhodes scholars so elected will enter Oxford in October, 1924. Appilcation blanks and further information may be obtained from the officers of any coliege or university in the United Statcs or from Presldent Frank Aydelotte, Ancrican Secretary to the Rliodes Trustees, Swarthmore College, Swarthmore, Pa The Secretary of the Committee of Selection for New York State is Dr. Augustus S. Downing, State Honse, Albany
The 1922 Rhodes scholar from New York is Jas. A. Ross, Jr., (Princeton University) 85 Schaeffer St., Brookiyn, N. Y.

WORKERS' COLLEGE AT KATONAH, N. Y.
(From a 1922 bulletin of the U. S. Department of Labor.)

Brookwood, the first resident college for worlkers in this country and located at Katonah, N. Y., has been in operation for some months. This experiment in adult education is being carried out under the supervision of two committees, one of which consists of the Presidents of the federations of labor of several States and representatives of several trade unions, including the teachers' union of New York City, and endeavors to enlist the co-operation of labor organizations in the work and to see that the courses offered are applicable to the needs of the labor movement.

The other committce, composed of professors from Columbia University, the University of Pennsylvanla, and Amherst College, is an advisory body which assists in so planning the courses offered as to make
them valuable to the class of students for whom they are intended.
About 20 students, 7 of whom are women, are in attendance. The students, most of whom are from positions of some sort in labor organizations, are older than those in colleges generally, the average age being 25 years. The government of the college is democratic, each member-student or teacher-having one vote in its management. All students are carrying the same work during the first year of the operation of the college, namely, history of civilization, economies, statistics, English literature, grammar for those who need it, and a course in debate and argumentation

Once a week a debate is held and the following day a period of two hours is devoted to criticism of the "effectiveness of the argument and the soundness of presentation,"

COLLEGES WITH \(\$ 1,000,000\) ENDOWMENT OR OVER.

\section*{EEGINNINGS OF FAMOUS FOREIGN UNIVERSITIES.}

The University of Oxford is said to have been founded by King Alfred in 872

The frst college of the Unlverslty of Cambridge was founded by Hugo, Bishop of Ely, in 1257.

The Unlversity of Paris was founded by King Phillp II. about 1200 .

The first universlty in the German Empire was at Prague, Bohemia, 1348.

Czar Alexander I. founded the Universities of St. Petersburg and Moscow in 1802.

The oldest Spanish unlversity is that of Saiamanca, founded in 1240.

The Unlversity of Copenhagen, Denmark, was founded in 1479

The oldest Italian universities are Bologna, founded 1200; Padua, 1222; Naples, 1224; Genoa,

1243; Perugia, 1276; Macerata, 1290. There were nine more founded between 1300 and 1550 . Italy was the greatest resort of students for the higner education in the middle ages.

Trinity College, Dublin, was incorporated by royal charter in 1591

The Unlversity of Edinburgh was founded in 1582 by a charter granted by King James VI. of Scotland. The University of Jagielle, of Cracow, Poland, where Copernicus received his education, was founded in 1364 by the Polish King Kazimiers the Great, and endowed by a later Polish King, Jagielle, in 1400.

Note-The dates of founding of the higher institutlons in the United States and Canada will be found in the tables of A merlcan colleges and universities.

\section*{INCOME AND EXPENSES OF YALE UNIVERSITY.}

Yale University has sent to its alumni the following analysis showing the sources from whlch it gets its income and the way that income is spent. The item "alumni fund" is the yearly voluntary contrlbution of its alumni, and "annuities and adjustments" covers the money used in bringing the salaries of professors up somewhere near the high cost of living

The figurcs show that the two sources of income, "tuitlon and fees" and "dormitory," which constltute the ordinary revenues of a business concern, together make up less than one-thlrd of the amount required to run the univcrsity
\begin{tabular}{|c|c|c|c|}

THE KNIGHTS OF COLUMBUS.
(By John B. Kennedy of K. of C. Headquarters.)

The Knights of Columbus-the leading Catholic laymen's organization in the worid-was founded by Rev. M. J. McGlvney in 1882 in St. Mary's parish, New Haven, Coln. From an original membership of cleven it grew from eity to city in Connecticut and then from state to state and beyond national boundaries, untii its membership is more than 800,000 , and it operates in the United States and its possessions, in Canada, Newfoundiand, Mexlco and Cuba. It has more than 2,000 counclls, many of which own club buildings and are governed by State jurisdictions, of which there are 55 , and by a Supreme Councii, composed of elected State represclitatives, while executive power is vested in a board of directors. The primary object of the Knights of Columbus is to associate Catholic men for rellgious and civic usefuiness. There are four degrees of membership, none of which has any secret or oathbound stipulation-the compctent ecclesiastical and civic authoritles being empowered to demand and receive the degree work of the order.

The Knlghts have maintained slnce their lnception an insurance feature for members. Insurance on members now in force approximates \(\$ 250,000,000\). The soivency of the order, as measured by actuarial standards, is over 126 per cent. Non-insurance members are assoclates. The order was originally made up of only insurance members. Prevlous to their emergenee into general public notice as an agency of war welfare work the Knights had done educational and soclal work. They founded the first chair of American history in this country-at the Catholle University, Washington-and they endowed the same university with \(\$ 500,000\) for fifty scholarships in perpetulty. State and locai councils aiso supported educational and sociai work. The Knights aided the victims of many catastrophes.

An important work of the Knights has been their nine-year fight agalnst extreme radicalism through the medium of public forums. Lecturers have been sent through the country to combat materiaistic Sociailism. This work has met with success and is being continued. The \(\mathbf{K}\). of C. first entered war welfare work in the Spanish-American War. When the
war with Germany started they raised \(\$ 1,500,000\) among their members and began at the cantonments at home. Later, on Gen. Pershing's invitation, the Knights went overseas and there, as well as at home, supported by a fund of \(\$ 14,000,000\) donated by people of all classes, they carried on an intensive and extensive work.

In all, the Knights received approximately \(\$ 40,000-\) 000 from the American people. With the baiance remaining at the conclusion of active war work, they financed a Nation-wide chain of employment bureaus, finding work for 500,000 former service men at a minimum wage of \(\$ 20\) per week; they awarded 416 free coliege scholarships to former service men in institutions like Yale and Georgetown, and inaugurated a Nation-wide chain of free night schools for service men and women, with nominai charges for civillans. These schools graduated over 40,000 pupils last year. There are more than 100 of them in operation teaching technicai, business and citizenship courses. The balance of the war camp fund on hand is for use in continuing the educational work in hand and in conducting hospital relief work for the ex-service men in the bublic health service hospitals, the Knights of Columbus having becn specially designated to co-operate with the Red Cross in providing for the comfort and entertainment of these men for whom the war is not yet over.

The most recent national activities of the Knights of Columbus have been the conduct of an Amerlcan history movement for the improvement of history teaching, in which the \(K\). of C. offered prizes in a monograph contest, both prizes being won by nonCatholics; the institution of the K. of C. National Correspondence School at New Haven for war veterans of America, whieh in its first year of existence enrolled 35,000 men in 30 free technical and clerical courses, and the expansion of \(\mathbf{K}\). of C. hospitalization service so that in 411 hospitais, 165 K . of C. workers, all of war experience, serve some 29,000 war veterans in the same manner in which they were served overseas.

In round figures, the Knights are spending at the rate of \(\$ 2,500,000\) per year in behalf of the American war veterans.

\section*{ELKS, BENEVOLENT AND}

Grand Lodge offcers (elected at Atlantic City, N. J., July 11, 1922)-Grand Exalted Ruler-J. Edgar Masters, Charieroi, Pa. Grand Esteemed Leading Knight-Frederick A. Morris, Mexlco, Mo. \section*{THE SALVATION ARMY.}

\section*{(Prepared by That Organization).}

\section*{National headquarters, 122 West 14th Street, New York City.}

In 1920 the United States branch of the movement underwent a thorough reorganlzation. Three territorles were created, with headquarters respectlvely in New York, Chlcago and San Franclsco. Separate editions of the War Cry were published in each territory. Commander Evangeline Bonth was, up to the tlme of golng to press, in general charge of the work in the entire country.

International officlals-Wiillam Bramweli Booth eldest son of the founder of the salvatlon Army, is General of the entire organization, the international headquarters belng in Iondon, England. Hls wife, Mrs. Bramwell Booth, has charge of the work in the British Isles. Next in rank comes Commissioner Edward J. Higgins, Chief of the Staff, who some years ago was Chief Secretary for the work in the United States of America.

\section*{DOMESTIC STATISTICS.}

incustriai homes with accommodations for 2,103 and \(1,714,505\) meais and 529,437 beds suppliea; 6 children's homes, with accommodations for 670. and 206,600 beds and 634,123 meals supplied; 12 sium posts and nurseries, with 76.615 chiddren sheltered in a year; 23 rescue homes and maternity hospitals, with accommodations for 1,709 . and 4,393 glrls and 2,491 chlidren ardmitted; Christmas dinners for 293,171 , and toys for 108,846 children; 1,383,943 persons afforded temporary relief outsitic Industrlai homes and hospltals; outsicie empioyment found for 27,310 men and 8,089 women; \(336,478 \mathrm{ibs}\). of lee and \(3,274,591 \mathrm{lbs}\). of coal distributed.

\section*{INTERNATIONAL STATISTLCS.}
(Year ending December 31, 1921.)
Countries and colonies occupled, 73; languages in whlch Gospei is preached, 46; corps and outposts, 12,211; soclal institutions, 1,286; day schools, 752 ; naval and military homes, 35 ; officers and cadets engaged ln social work, 3,697 ; persons without rank emploved wholly in S. A. work, 5,941 , iocal offcers (sentor and jumior), 74,469; bandsmen (senlor) 26,017 , bandsmen, (junior) 7,419 ; songsters, 30,943 . corps cadets, 18.846; periodicals issued, 83 ; totwl contes der lssue. 1,461.880.

\section*{YOUNG MEN'S CHRISTIAN ASSOCIATIONS OF NORTH AMERICA.}

General offices, 347 Madison Avenue, New York City. Offcers: Chairman-Alfred E. Marling. Vice Chairmen-James W. Speers, Roger H. Williams, William D. Murray, Abner Kingman. Treas-urer-B. H. Fancher. General Secretary-John R. Mrer-B. Consulting General Secretary-Richard C. Morse. The International Committee was incorporated April 16, 1883 . It is now composed of an authorized membership of 200 representative business men scattered throughout North America. It is the agent of the International Convention of Young Men's Christian Associatlons, charged with eneouraging, promoting and supervising Christian welrare work among men and boys.

The International Conmittee in its organization includes the Home Division with its five regions and eleven departments, its Foreign Division, and its continued work among soldiers in warring countrics where armies are not yet done away witll.
Forty-two State Committees and the National Council of Canada, co-operating with both the local and international work, maintain eloser relations with the local assoclations in the States and Provinces of North America. These State organizations have 196 secretaries, \(\$ 1,319,000\) of association property and promote the state-wide interests of the movement.
Under the combined co-operative interests of the General Agencies of Supervision there are (Sept. 1, 1922) 1,978 local associations and specifie organizations, 5,464 employed offcers; 95,795 committeemen, directors and volunteer leaders; 883.169 members, of which 228,860 are boys. The net property of the movement, including State work and international, is \(\$ 150,400,000\); total contributions from friends toward the operating expenditures of the movement, \(\$ 11,551,100\), and total operating expenditures of the movement, \(\$ 47,682,400\). These tigures do not include any war work data. The service of the association to men and boys includes a great variety of activities, among the more importanc of which are 69,892 socials and entertainments: 67,922 more or less permanent positions found for men: over 56,000 beds in Y dormitories used by men over
\(15,000,000\) times during the year; \(68,556 \mathrm{mcn}\) and boys in Y summer eamps; 1,679 industrial plants served physically, educationally, and otherwlse; 14.000 forelgn-born men taught to speak and write English, and 13,000 trained in citizenship; 110,639 in regular standard educatlonal classes; 303,434 men and boys in regular gymnasium classes; 201,182 enrolled in the regular Bible study classes; over 8,000,000 attending actinite religious meetings; 37,131 decisions for the Christian life, and 11,664 united with the church of their rnoice.

The foreign work of the North American associatlons has been brought more helpiuily than ever under more careful revlew. It includes work in 21 diffcrent countries where, at the expensc of the North American assoclations, secretaries from North America are allocated to aid in the development of both the national work of a country like China, as well as in the local associations of such country. In this foreign work there are 357 different associatlons with 767 employed officers, 214 of which are from America and the rest native; 15,905 members wlth correspondingly large social, physical, educational and religious activicies. Among the most notable gatherings on the forelgn field the past year was that of the Worid's Student Chrlstian Federation at Peking, attended by over 800 delegates from 32 nations. The \(\$ 4,000,000\) forelgn association building programme, whicn was interrupted by the great war, has been resumed, and, it is hoped, will soon be carried to a successful issue.

While the Armistice was slgned over 4 years ago, vet large areas overseas are stlll in war conditlons. The National War Work Council was dissolved in March, 1922, after it had passed the remaining part of lts work over to a speclal group of the International Committee. There are still a number of American workers in charge of the association welfare work among from \(1,000,000\) to \(1,500,000\) men in sucn countries as Poland, Greece, Turkey, Italy, Czecho-slovakia. The reducing process of this war work ls being made as fast as possible. Less tnan a cozen American secretaries are left in connection with the A. F. G. on the Rhine.

YOUNG MEN'S CHRISTIAN ASSOCIATIONS OF THE STATE OF NEW YORK.
The State Exccutive Committee of the Young Men's Christian Associations of the State of New York has lts general office at 2 West 45 th Street, Room 1001, New York City. Chatrman-William M. Kingsley. Treasurer-Samuel Woolverton. State Secretaries-Frank W. Pearsall and Fred I. Eldridge. This committee was incorporated under the laws of New York. April 14. 1886. Included in the regular activities the State Committee owns and
(uperates Camp Dudley at Westport-on-Lake Champlaln as a summer camp for boys. The membership in the State is 101,940, divided as follows: General, 80,507, of which 18,400 are boys; railroad, 17,031; student, 2,245 : county and small town, 1,252; colored, 766. Property holdings and funds paid in amount to \(\$ 21,296,635\). A meeting of the the state, is neld in February.

\section*{YOUNG MEN'S CHRISTIAN ASSOCIATION OF THE CITY OF NEW YORK.}

The American Child Health Association and the Natlonal Child Labor Committee are indlrectly members through their affiliation with the National Child Health Council,

\section*{YOUNC WOMEN'S CHRISTIAN ASSOCIATION OF THE U. S., OF AMERICA.} (Contributed by that organization.)

Tee purpose of the Young Women's Christian Assoclation is to advance the physical, social, intellectual and spiritual interest of young women, and to promote growth in Christian character and service, and to become a social force for the extension of the Kingdom of God. The Convention is held biennially in April. The officers of the Assoclation are: President, Mrs. Paist, of Philadelphia, Pa.; Vice-Presidents, Mrs. John Hanna, of Dallas, Texas; Mrs. C. R. Wilson. of Detroit, Mich.; Secretaries, Mrs. E. B. Kinsworthy, of Little Rock, Ark., and Miss Marjorie Collier, of Colorado Collcge

The National Board of the Young Women's Christian Associations is the Executive Committee of the organization, to which the work of the organization is intrusted during the interim of conventions. The officers of the National Board are: President, Mrs. Robert E. Speer; Chairman of the Executive Committee, Mrs. John French; Secretary, Miss Katharine Lambert; Treasurer, Mrs. Samuel J. THE Y. W. C. A. IN
There are in the United States 1,152 affliated Young Women's Christian Associations, with 280 branches. The Young Women's Christian Association of the United States has a membership of 584,000 , real property amounting to over \(\$ 25,000\),000 , and gross budgets of local Associations, approx imately, for 1921 , of \(\$ 22,000,000\), about 75 per cent. of which is met by earnings from cafeterias, boarding homes, etc. The National Board during 1921 expended upon its regular work \(\$ 2,679,245\), of which

THE Y. W. C. A. IN
It has in New York City thirteen Association residences, offering comfortable, clean and "homey" rooms at a moderate price. These have 1,114 beds and during 1921, 27,479 girls were housed; 6,186 known placements were made through the Young Women's Christian Association room registry service during the year 1921. There are eleven cafeterias and dining rooms, including those connected with the residences, which furnish wholesome inexpensive food. Young Women's Christian Association Bureaus for Employment and Vocational Advice in 1921 placed 13,070 girls in positions; 10,665 girls attended Young Women's Christian Association educational classes eovering more than forty-flve subjects as varied as stenography, Spanish

Broadwell. The General Secretary is Miss Mabel Cratty. It operates through its lieadquarters and five regional offices. The headquarters building and National Training School are located at 600 Lexington Ave. New York City. The regional offices are in New York; St. Louis, Mo.; Chicago, Ill.; Denver, Col.; San Francisco, Cal.; Atlanta, Ga.

The National Board of the Young Women's Christian Associations interests itself in the city, student, town and country Associations throughout the United States and its territories, and through its Foreign and Overseas Department. It works with other members of the World's Committee of the Young Wonien's Christian Association in carrying on Association work for the women and girls in Europe, the Near East, the Orient, and South America. Work in the Oriental countries is undertaken by the Association only upon the invitation of the Mission Boards already working in the country. At present work is being carried on under this department in fifteen countries, with a staff of 224 Secretaries.

\section*{HE UNITED STATES}
\$299,821 was for promoting work in China, Japan India and South America. The National Board has endowment yielding, approximately, \$100,000 annually and income producing features which in 1921 bronglit in \(\$ 813,524\). Contributions from Associations and individuals totalled \(\$ 1,242,872\)

Under the Continuation Committee of the National War Work Council there was still going on during 1921 certain war work of post-war significance, financed by the balance of sums originally appropriated for this work from war work funds.

\section*{NEW YORK CITY}
domestic science and costume designing; foreign-born women and girls of sixty nationalities availed themselves of the service of the baby clinics and employment departments and joined langıage classes and recreational activities of International Institutes Attendance in gymnasium classes was 31,970; total swimming pool attendance, 101,631; total attendance at religious service, \(103,931\).

Officers of the Metropolitan Board: President Mrs. William Fellowes Morgan; First Vice-President, Mrs. William W. Rossiter; Second Vice-President Mrs. Dwight Morrow; Secretary, Mrs. William Sloane Coffin; Treasurer, Mrs. William Henry Hays Assistant Treasurer, Mrs. Warren A. Ransom Chairman of Finance, Mrs. E. P. Townsend.

\section*{THE AMERICAN LEGION.}
(National Headquarters, Indianapolis, Indiana.)

The American Legion, composed of men and women who served honorably in the armed forces of the United States in the World War, was organized in Paris, France, in 1919. The 1922 convention was held at New Orleans, Oct. 16-20.

NATIONAL OFFICERS.
Commander-Alvin Owsley, Denton, Tex. Vice Commanders-Edward J. Barrett, Sheboygan, Wis; Watson B. Miller, Washington, D. C.; F. Erle Cocke, Dawson, Ga.; Robert O. Blood, Concord, N. H.; C. P. Plummer, Casper, Wyo. ChaplainFather William P. O'Connor, Cincinnati, O. Ad-jutant-Lemuel Bolles, Indianapolis, Ind. TreasurerRobert H. Tyndall, Indianapolis, Ind. Judge Advocate-Robert A. Adams, Indianapolis, Ind. Historian-Eben Putnam, Wellesley Farms, Mass, Assistant Adjutant-Russell G. Creviston, Indlanapolis, Ind.

Among the distinguished guests of the Legion at the convention were: Gen. John J. Pershing, Kenesaw Monntain Landis, Samuel Gompers, Charles Bertrand, member of the Chamber of Deputies, Parls, France, and President of the Interallied Veterans; Federation; Major J. B. Brunnell Cohen, representing the British Legion; Gen. James Dinkins, Assistant Adjutant of the United Confederate Veterans; Gen. E. K. Russ, National Vice-Commander-in-Chief of the Grand Army of the Republlc; M. Reni-Mel, France; Admiral Magruder, U. S. N. There were Legion delegates not only from every State in the Union, but from Argentina, Brazil, Great Britaln, Chile, China, Cuba, Guatemala, India, Japan, New Zealand, Porto Rico, Portuguese West Africa, Venezuela, Panama, and Mexico.

Among the resolutions adopted by the Legion in the convention was one that the American Legion thand for the carrying out of its obligations to the disabled of war and that should allother war arise "wlien the American people are aware of the extent of war profiteoring, a national determination will have developed that in any future war there shall bo a dratt not only of service men, but of the laboring
man and capitalist as well. Had there been such a draft, the fundamental basis of adjusted compensation now temporarily thwarted by executive action would never have arisen."

\section*{THE FEDERAL COUNCIL OF THE CHURCHES OF CHRIST IN, AMERICA.}

The Federal Council of the Churches of Christ in America was established in 1908 by the official action of thlrty Protestant denomlnations in the United States to represent them and act for them in matters of common interest. The bodies thus composing the Federal Council are:

Baptist Churches, North; Nationai Baptist Convention; Free Baptist Churches; Christian Church; Christian Reformed Church in North America; Churches of God in N. A. (General Eldership) ; Congregational Churches; Disciples of Christ; Friends: Evangelical Synod of N. A.; Evangelical Association; Methodist Episcopal Church; Methodist Episcopal Church, South; African M. E. Church; African M. E. Zion Church; Colored M. E. Church in Amerlca; Methodist Protestant Church; Moravian Church; Presbyterian Church in the U. S. A.; Presbyterian Church in the U.S. (South) ; Primitlve Methodist Church; Protestant Episcopal Commissions on Christian Unity and Social Service; Reformed Church ln America; Reformed Church in the U. S.; Reformed Episcopal Church; Reformed Presbyterian Church, General Synod; Seventh Day Baptist Churches; United Brethren Church; Unlted Evangelical Church; United Presbyterian Church; United Lutheran Church (consultative member).

The work of the Federal Council is carried on through several important commissions, lnterdenominational in membership, dealing with varlous fields of the churches' interest. Through the Commlssion on Evangellsm the evangelistle agencies of the varlous denominatlons co-operate in organizing united evangellstic efforts by the churches in communltles throughout the country. The Commission on the Church and Soclal Service carries on extensive educational and research work concerning the church and social questlons, particularly emphasizing better lndustrial relations and organizing conferences between churches and representatives of employers and labor to promote co-operation and a Christian spirlt ln industry. The Commlssion on Internatlonai Justlce and Goodwili ls pursuing a vlgorous programme in behaif of Christian inter-
nationalism, stressing at the present time, a campaign for the reduction of armament and better relatlons with the Orient. The Commission on Councils of Churches ls responsible for organizing and deveioping local federations or councils of churches in the larger communities, with a view of making the churches more effective forces in the community life. Among the important developments of the past year were the creation of the Commission on the Church and Race Relatlons, for, the purpose of working for co-operation between the white and the Ncgro races in securing better conditions for the Negro people; and the establishment of the Committee on Mercy and Relief, as a central agency of the churches in the relief of the Russian famine and other similar appcals. Other important Commlssions deal with Christian Education, Temperance, Relations with France and Belgium and Reiations with Religious Bodies in Europe.

The Central Office of the Council is at 105 East 22 d Street, New York City. Offices are aiso maintained in the Woodward Building, Washington, \(D\). C., and at 19 South La Salle Street, Chicago, Ill. The officers of the Councii are: President, Robert E. Speer; Treasurer, Alfred R. Kimball; General Secretaries, Charles S. Macfarland and Samuel M. Cavert. The officers and secretarles of the Commisslons are as follows: On Evangelism and Life Service, Rev. J. Ross Stevenson, Chairman; Rev. Charies L. Goodeli, Executive Secretary; on Christian Education, Rev. Wililam Adams Brown, Chalrman; on the Church and Social Service, Shelby M. Harrison, Acting Chairman; Rev. Worth M. Tippy, Executive Secretary; Rev. F. Ernest Johnson, Research Secretary; on the Church and Race Relations, John J. Eagan, Chairman, Dr. George E. Haynes and Rev. W. W. Alexander, Executive Secretaries; on Temperance, Carl E. Mililken, Chairman; on International Justice and Goodwill, Dr. John H. Finley, Chairman Rev. Sidney L. Gullck, Secretary; on Relations with France and Belgium, William Sloane Coffn, Chalrman; on Relations with Religious Bodies in Europe. Bishop James Cannon, Jr., Chairman; on Councils of Churches, Fred B. Smith,'.Chairman; Rev. Roy B. Guild, Executive Secretary.

cities named.

\section*{ROMAN CATHOLIC HIERARCHY.}

At the head of the Roman Catholic Church is the SUPREME PONTIFF PiUS XI.. Achillc Rattl, born at Desio, Italy, May 30. 1857, made Archbishop of Milan, April, 1921; Cardinal, in pectore. June 14, 1921; elected Pope. as successor of Benedict XV., Feb. 6, 1922; crowned Feb. 12, 1922. The Pontiff is, in orders, a Bishop. His ecclesiastical
title is: His Holiness the Pope: Bis'iop of Rome and Vicar of Jesus Christ: Suecessor of St. Peter, Prince of the Apostles; Supreme Pontiff of the Universal Church; Patriarch of the West: Primate of Italy: Archbishop and Metropolitan of the Roman Province; Soverelgn of the Temporal Dominions of the Holy Roman Church.

NEW RULE AS TO ELECTION OF A POPE.

The American Cardinals reached Rome too late to cast their ballots for a successor to Benedict XV . In conscquence, the new Pope, Pius XI.. has made a change in the regulations, cxtending the interval
between the death of a Pope and the election of nis successor. 80 as to give the foreign Cardinals a chance to take part.

THE COLLEGE OF CARDINALS.

Note-The Collcge of Cardinals, when complete, is made up of 70 members. of whom 6 are Cardinal-Bishops, 50 are Cardinal-Prlests, and 14 are Cardinal-Deacons. The College is the Senate of the Roman Church. They advise the Pope and
elcet his successor. Tbe Cardinal-Bishops take their titles from the Suburban Sees of Rome: Porto and Santa Ruina. Albano. Palestrina. Sabina, Frascati, and Velletri.

The United States Soldiers Home in the District of Columbia was established by an Act of Congress, approved March 3, 1851, for the relief and support of invalid and disabled soldlers of the Army

Blank applications for admission may be obtained from the Board of Commissioners, U. S. Soldiers' Home, Washington, D. C.

There were on June \(30,1922,1,016\) resident beneficiaries; 49 on outdoor relief, 45 in St. Elizabeth's Hospital; 205 on furlough; and 71 at the

Fitzsimons U. S. A. General Hospital, Denver, Col., for the treatment of tuberculosis, making a total of 1,166 .

Governor-Major Gen. Tasker H. Bliss (retired) Dep. Governor-Major Parker W. West (retired). Secretary-Treasurer-Col. Robt. H. C. Kelton (retired), U. S. A. Attending Surgeon-Col. H. P. Birmingham (retired), U. S. A. Quartermaster and Purchasing Offcer-Col. Walter C. Babcock (retired), U. S. A.

\section*{UNITED STATES COAST GUARD,}

The United States Coast Guard was created by an act of January 28, 1915, which combined the Revenue Cutter Service, organized by act of Congress approved August 4, 1790, and the Life Saving Service, which latter was originally operated under the Revenue Cutter Service, but on June 20, 1874, created a separate service under the Treasury Department.

The Coast Guard operates: (a) Twenty-seven seagoing cutters engaged in the assistance of vessels in distress, the enforcement of the navigation laws, the protection of the seal fisheries in Alaska, the destruction of derelicts, the conduct of the International Ice Observation and Ice Patrol Service off the Grand Banks of Newfoundland, and other maritime duties. (b) A number of inshore patrol and harbor tugs, inland water patrol vessels, and
launches engaged in the service of the customs. (c) 277 Coast Guard stations, of which 227 are in active commission, engaged in saving life and property along the coast, and 8 in part commission. (d) A coast patrol system guarantecing early assistance to vessels and persons in distress. (e) A communication system linking by telephone all Coast Guard stations and practically all compass stations. (f) One aviation station for the protection of life and property along the coast and at sea contiguous thereto.

The commissioned line officers of the service are appointed by the President, by and with the advice and consent of the Senate, from cadets who have completed a three-year course at the Coast Guard Academy, New London, Conn., similar to the Academy, New London, Conn., similar to the appointed similarly from those who have completed a special course of one year at the academy.

\section*{UNITED STATES STEAMBOAT INSPECTION SERVICE.}
(By George Uhler, Supervising Inspector General of that Bureau of United States Department Commerce.)

The Steamboat Inspection Service, by Act of Congress, approved Feb. 14, 1903, was transferred from the Treasury Department to the Department of Commerce. The transfer went into effect July 1, 1903. The Supervising Inspector General of the Steamboat Inspection Service, George Uhler, reported to the Secretary of Commerce for the fiscal year ended June 30, 1922:

Number of annual certificates of inspection issued to domestic steam, motor vessels and barges, 7,206; decrease from previous year, 547. Number of annual certiflcates issued to foreign steamers, \(337^{\circ}\) decrease from previous year, 5. Total number of decrease from previous year,
and foreign, 7,543 ; decrease from previous year, 552
Gross tonnage of domestic vessels, ail kinds inspected, \(10,975,357\); decrease from previous year, \(2,163,673\). Gross tonnage of foreign steamers inspected, 2,956,520; decrease from previous year, 135,451 . Total gross tonnage of domestic and foreign vessels inspected, 13,931,877; decrease from previous year, \(2,299,124\)

Number of officers' iicenses issued, 26,044 ; increase over previous year, 47. Number of new life preservers inspected, 160,894 , of which number 3,356 were rejected. Decrease in number of new life preservers inspected from previous year, 145,767 Number of marine boiler plates inspected at the inills by assistant inspectors, 2,259.

\section*{THE UNITED STATES COVERNMENT PRINTING OFFICE.}

In this establisiment practically all the printing and binding for the Government is performed, with the exception of postage stamps, stamped envelopes, paper money and bonds. The Pubilc Printer is the executive officer of the Government Printing Office, is appointed by the President, and receives a saiary of \(\$ 6,000\) a year. Dire tly, or through his principal officers, he purchases all the materials, paper and inachinery, subject to provisions of certain laws; disburses all moneys; appoints all officers and employees under civil service rules and exercises general supervision over all affairs of the office. George I. Carter of Iowa is the Public Printer.

The Government Printing Office was established in 1860, at which time Cornelius Wendell sold his printing plant to the Government. That plant has graduaily grown by additions and new buliflings, until at the present time it contains approximately 15 .acres of floor spuce and is well oquipped with
modern machinery for the rapid production of all classes of printing and binding. Congress now appropriates \(\$ 2,000,000\) as a working capital for this office and is entitied to that amount of printing. In addition, each department and independent establishment of the Government orders printing and makes payment of cost thereof to the Pubilc Printer out of appropriations under their control.

Work is performed at cost, and the output runs in value to over \(\$ 10,000,000\) a year. During onc year the compensation of employecs amounts to \(\$ 6,500\),000 , and the value of paper used to \(\$ 3,100,000\) about 80,000 different jobs are handied, ranging from envelopes and bianks to sumptuously bound volumes ln large editions; two bilition ems of type are set; 162,000 forms arc sent to press; 2,100, 000,000 chargeabic impressions are run from presses; about one bilifon postal cards are printed; 200,000,000 sheets are foided; 75,000,000 signatures are sewed, and \(33,000,000\) cosies are ruled.

Besides the 282,965 widows on the roll in 1922 there were 4,102 dependents, 2,106 minors, and 925 helpless children; of the 256,918 invalids 90 were army nurses of the Civil War. Of the total number of pensioners on June 30, 1922, there were 193,791 Civil War soldiers, as against 218,775 a year before. Of the widows 269,245 were of the Civil War as against 278,098 a year before. To pensioners in foreign countries were paid \(\$ 1,319,231.39\), as against \(\$ 1,342,022.37\) the year before. In the year ended June 30, 1922, there were 25,082 Civil War soldiers Who died, as against 24,775 in the previous year.
The largest number of Civil War soldiers on the

\section*{WORLD WAI}

World War pensions, \&c., are handled by the U. S. Veterans' Bureau, formerly the Bureau of War Risk Insurance, Treasury Dept., Washington, D. C.
The rate of pay given veterans depends upon the degree of disability and the number of dependents The following section from the War Risk Insurance Act as amended by Act of Congress, December 24, 1919, gives the rate of compensation paid for death or disability resulting from personal injury sufferea, or disease contracted in the line of duty
Section 302. That if the disability results from njury:
1. If and while the disability is rated as total and temporary, the monthly compensation shall be the ollowing amounts: \(a\). If the disabled person has neither wife nor child living, \(\$ 80 ; b\). If he has a wife and no child living, \(\$ 90 ; c\). If he has a wife and one child living \(\$ 95\); dif he has a wife and two or more children living, \(\$ 100 ; e\). If he has no wife but one child living, \$90; with \(\$ 5\) for each additional child. \(f\). If he has a motlier or father, either or both dependent on him for support, then in addition to the above amounts \(\$ 10\) for each parent so dependent.
2. If and while the disability is rated as partial and temporary, the monthly compensation shall be a percentage of the compensation that would be payable for his total and temporary disability equal to the degree of the reduction in earning capacity resulting from the disability but no compensation shall be payable for a reduction in earning capacity rated less than 10 per centum
3. If and while the disability is rated as total and permanent the rate of compensation shall be \(\$ 100\) per month: Provided, however, that the loss of ooth feet or both hands, or the sight of both eyes, or the loss of one foot and one hand, or one foot and the

pension roll, 745,822 , was in the year ended June 30 ,
1898. On June 30 , 1922, there were surviving 49 widows of the War of 1812. 73 soldiers and 1,878 widows of the War with Mexico, 3,867 soldiers and 2,748 widows of the Indian Wars, as well as 55,153 pensioners of the War with Spain.

On June 30, 1922, there were 61 World War soldiers and 29 widows and other dependents of that war on the pension roll. For all information as to pensions other than World War, apply to the Commissioner of Pensions, Washington, D. C.

Congress, in May, 1922, passed an act making pensions (except civil) payable monthly.

\section*{PENSIONS.}
sight of one eye, or one hand and the sight of one eve, or becoming helpless and permanently bedridden shall be deemed to be total permanent disability: Provided, further, that for double total permanent disability the rate of compensation shall be \(\$ 200\) per month.
4. If and while the disability is rated as partial and permanent the monthly compensation shall be a percentage of the compensation that would be payable for his total and permanent disability equal to the degree of the reduction in earning capacity resulting from the disability, but no compensation shall be payable for a reduction in earning capacity rated at less than 10 per centum.

The Veterans' Bureau, by the Act of August 9, 1921, took over from the Federal Board for Vocational Education, the work of providing for the vocational rehabilitation of disabled persons discharged from the military or naval forces, and also for their hospital care. The bureau also took over the work for veterans done by the U. S. Public Health Service.

Number of claims filed to July 1, 1922, 838,549; number of claims allowed, death, 58,875 : number of claims allowed, disability, 351,940 ; total disbursements covering claims allowed as of July 1, 1922, \(\$ 359,564,738\).

The above figures cover compensation activities of the bureau since its creation

For the fiscal year ended July 1, 1922, payments were made on 77,195 claims, of which 70,979 were disability claims and 6,216 death claims. The total disbursements for this fiscal period were \(\$ 123,494,216\).

On July 1, 1921, there were being hospitalized in all hospitals 26,869 patients of the bureau, classified as follows: tuberculosis, 10;849; neuro-psychiatric, 9,231; general medical and surgical 6.789 .

\section*{WHAT THE U. S. DOES T}

The following bulletin is sent out by the Government with premium notices to ex-service men who have retained their war risk insurance:
THE UNITED STATES VETERANS' BUREAU is: 1. Paying out over \(\$ 1,000,000\) in cash every day, including Sunday, directly into the hands of the ex-service man or his dependents.
2. Providing, without cost, hospital care and treatment to 30,000 veterans. This care includes board and lodging and represents an expenditure by the Government of \(\$ 60,000,000\) per annum.
3. Giving vocational training, without cost, to over 100,000 disabled ex-service men at an expenditure for tuition and supervision of \(\$ 30,000,000\) per annum
4. Mailing out 650,000 checks every month, representing \$42,000,000.
5. Conducting an insurance business for over 600,000 ex-service men without any cost of administration to them. Insurance in force, \(\$ 3,500,000,000\).
6. Conducting over 50,000 medical examinations every month.
7. Giving outside treatment in cases where hospitalization is not required to 20,000 ex-service men every month.
8. Receiving 1,000 new claims every day, in addition to the \(1,200,000\) already on fle, employing 4,000 ex-service men and women in carrying out the work.
9. Requiring for 1922 expenditures in behalf of the disabled ex-service man, \(\$ 510,000,000-\) more than the entire expenditure of the whole United States in 1897.
10. The United States of America is already doing more for its disabled veterans than any other country in the world, despite the fact that their losses were far heavier than ours.
11. Do these facts indicate that the disabled ex-service man is bcing neglected?
C. R. FORBES, Director

\section*{THE CIVIL SERVICE OF THE UNITED STATES.}

Classified employees upon reaching certain ages are automatically retired from the service unless certifled for continuance. The requirement age for rallway mail clerks is 62 years; for mechanics, post office clerks and carriers, 65 years, and for others 70 years. Those who have served 15 years or more are entitled to annuity based on length of service and salary recelved during the ten years preceding retirement. The minimum annuity is \(\$ 180\) and the maximum \(\$ 720\) per annum. Deduction of \(21 \% \%\) is made from salaries to provide for this annuity,

Which will be returned with \(4 \%\) interest to persons leaving the service before retirement. In case of separation by death the deduction is returned to the person's heirs. If an annultant dies before he receives annuity equal to the deductions made from his salary, with interest, the difference is pald to his heirs.

The number of positions both classified and unclassified on June 30,1922 , was 69,980 in Wasliington, and 490,883 outside Washington. This made a reduction of 356,897 since the peak of the War.

\section*{UNITED STATES COAST AND CEODETIC SURVEY.}

The Coast and Geodetic Survey of the Department of Commerce is charged with the survey of the coasts of the United States and coasts under the jurisdiction thereof, and the publication of charts covering said coasts.

The results obtained are published in annual reports and in special publications; charts upon various scales, including sailing charts, general charts of the coast, harbor charts, tide tables and current tables issued annually in advance; coast pilots with sailing directions covering the navigable waters; notices to mariners issued weekiy as a joint publication of the Coast and Geodetic Survey and the Bureau of Lighthouses, and containing current information necessary for safe navigation; magnetic charts and publications; catalogues of charts and publications and such other publications as may be required to carry out the organic law governing the survey.
\[
\text { STAT1STICS AS OF JULY, } 1922
\]

There are about 340,000 square miles of precise triangulation and 3,300 linear mlles of precise traverse completed in the United States. Nearly as much again of this precise control work remains to be done before it is brought within fifty miles of every place in the United States. This is the minimum amount required to give adequate control to iocal surveys. There is tertiary triangulation along the whole coast of the United States proper, but this needs constant revision due to changes in the shore line and to the loss of stations. The necessary triangulation in the Philippine Islands is nearly completed. Alaska, however, has only about onc-third of its coast covered by tertiary triangulation. Precise triangulation in the interior of Alaska has just been started.

About 45,000 miles of precise levels have been completed in the United States, and there are about 34,000 miles still to be done to bring the levels Within fifty miles of every place in the United States. This is considered the minimum amount necessary to give adequate control for local level lines. There were about 20,000 square miles of precise triangulation, about 400 linear miles of precise traverse and about 900 linear miles of precise levels completed during the past fiscal year.

The first magnetic survey of the United States is nearly finished. Constant revision is needed because of loss of stations from. various callses. Observations must be repeated at many stations on account of changes in value of the magnetic elements.

There remains yet to be surveyed 166,000 square miles of water area off the Atlantic and Gulf coasts, besides 5,000 square miles to be developed by dragging close to the shore and such resurveys from time to time in shallow waters as may be necessitated by changes. On the Pacific Coast 67,800 square miles have yet to be done, in addition to 1,400 square miles of dragging and repeated resurveys of shallow water subject to changes. The hydrographic survey of all Alaska is not more than 10 per cent. completed, but a large part of the most frequented waters is surveyed. In the Philippine Archlpelago the surveys are 72 per cent. completc. Around the Hawailan, Porto Rican and Virgin Islands much hydrographic surveying has been accomplished, but there yet remains about three years' work for a surveying vessel in each locality.

The foregoing statement refers to the first surveys. Resurveys will at ali times be necessary along many parts of the coasts and in harbors, due to changes that are aiways going on.

\section*{SMILE, POSTMAN! SMILE!}

Postmaster Gencrai Work, in the Daily Postal Builetin, Aprii 21, 1922, issued the following ruies to Post Office employees:
"1. Smile, use courtesy to all-equals and subordinates, as well as superiors. It rcquires the use of about thirty-six muscles to smile and of ninetyseven to frown. Why work overtime?
".2. Respect the authority of others and the personal dignity and feeiings of subordinates; we are ail human beings, not machines.
3. Criticlse constructively. Show how to improve conditions and how to correct and avoid. error.
4. To a patron accent blame for tho mistakes of the office; do not air inside differences. If you are doing your best, assume that your feliow workers are doing theirs.
"5. Don't encourage gossip, belittle or adverseiy criticise a fellow worker. Wo all have good points, and like credit for good perfermance.
6. Be generous when another' gets it 'in the neck.' Fortune's wheei is always turning and you may be on the under side some day.
"7. Don't hide behind cryptic statements and take advantage of the double meanings of words. Cultivate clearness, come clean. Let others know where you stand and what you mean. The old order of sccrecy and stealth is gone; speed, anaiysis, plain speaking and publicity scrve better.
"8. Let us have co-operation, intelligent effort, team work and understanding. The old davs where only the licads werc presumed to have Intelligence and the workers were supposed to obey orders blindly and impiicitly are gone. The executive or supervisor who can get the work out through loyalty and team work rather than direct force of authority is iy far the most valued man.
- All things whatsocver ye would that men should do unto you, do ye even so unto them.' ". .

\section*{THE UNITED STATES CENSUS.}

\section*{(From data supplied by the Bureau.)}

The Constitution requires a census of the United States decennially. The first was in 1790 under the supervision of the President; subsequent eensuses, to and lneludlng that of 1840, were under the Seeretary of State. In 1849 the census work was transferred to the newly organized Department of the Interlor, where it remained until the passage, in 1903, of the act creating the Department of Commeree and Labor, by which the Census Bureau was transferred to the new department. Meanwhile Congress, Mareh 6, 1902, had made the Census Office a permanent bureau. Since Mareh 4, 1913, when the Department of Commerce and the Department of Labor were separately organized, the Bureau of the Census has been attached to the former. The work is divlded into two branches, the decennial eensus and speclal statistical lnqulries, the latter mostly made between the decennial censuses

The Fourteenth Deeennial Census was taken as of January 1, 1920. It covers: (1) population, (2) agrieuiture (ineluding lrigation and drainage), (3) manufaetures, (4) forestry and forest products, and (5) mines, quarries, and oil and gas wells. The cost of this census is estimated at \(\$ 20,179,000\), in addition to which \(\$ 2,371,000\) will be spent in earrying on the annual Investigations of the bureau during the three-year census perlod (July 1, 1919 , to June 30,1922 ). Of the first named amount, \(\$ 12.500,000\) covers the cost of eollecting the data through approximately 87,000 . enumerators, in addition to supervisors, clerks, and special agents.

The permanent work of the bureau is provided for by the act of Congress approved Mareh 6, 1902, and amendatory and supplemental acts, and in-
elude the gathering and publishing of statistieal facts pertaining to the dependent, defective, and dcinquent elasses; wealth, public indebtedness and taxatlon; births and deaths; financial and other activities of citles; finances of States; religious bodies; marriages and births; transportation by water; electrical industries; Federal employees; eotton and tobacco stoeks, and business conditions. These inquiries are made at intervals ranging in length from ten years to two weeks. The census of manufactures, In addition to forming part of the decennlal census, is taken in each mid-decennial year: and a blennial eensus of products of manufacturing industries and a quinquennial eensus of agriculture will also be taken hereafter. Specla inqulries are made from the to time at the direction of the President, the secretary of Commeree, or Congress

The Director of the Census is appointed by the President and reeeives \(\$ 7,500\) per annum during the three-year decennial census period and \(\$ 6,000\) during the seven "intereensal" years. The Direetor is Wiliiam M. Steuart, of Miehigan; Assistant Director, Joseph A. Hili, of New Hampshlre. The permanent organization ineludes five chlef statistieians -for Populatlon, William C. Hunt; for Manufactures, Eugene F. Hartley; for Statistics of States and Cities, Starke M. Grogan; for Agriculture Cotton and Tobaceo, William L. Austin; and for Vltal Statistics, William H. Davis. The permanent cmployees of the bureau of Washington number approximately 700 , and in additlon about 700 special agents are employed intermittentiy ln the South for the colleetion of eotton statistics. The total offce force of the bureau, ineluding temporary employees, during the three-year decennlal census period reached a maximum of about 6,000.

The original forests of the United States covered about \(822,000,000\) acres and contained \(5,200,000,-\) 000,000 board feet of timbcr. There are left (June 30,1922 ) \(463,000,000\) acres of forest land, contalning \(2,215,000,000,000\) board feet. Of thls, \(137,000,000\) is \(\ln\) virgin timber, \(112,000.000\) acres is culled and second-growth timber large enough for sawing. \(133,000,000\) acres is partlally stocked wlth smaller growth, and \(81,000,000\) acres is devastated and practically waste land. The present rate of timber consumntlon is more than four times the annual growth 0 the forests. Of the standing timber, \(349,000,-\) 000.00C feet is in the New England, Mid-Atlantic,

Central and Lake States; 1,141,000,000,000 feet is in the Pacific Coast States

The National Forests include \(156,837,282\) acres (net). The annual revenue for the fiscal year endlng June 30 . 1922, was \(\$ 5,068,527\). Of thls amount \(\$ 1,646,996\) was for grazing fces pertalnlng to the fiscal year 1921 authorized by Congress to be paid subsequent to June 30, 1921. The recelpts collected in the fiscal year 1922, which properly pertained to that year, were \(\$ 3,421,531\). Cost of adminlstration averages \(\$ 4,000,000\) a year. Thlrty threc States have their own forestry departments.

The forest firc losses ln 45 States for the six-year perion, 1916-1921 Incluslve, were \(\$ 98,546,076\) This damage was occasloned by 200,096 lorest fires whlch burned over 65,172,066 acres.

\title{
Tye \(\mathfrak{A n i t e}\) States of \(\mathfrak{A m e r i c a}\).
}

\author{
(FEDERAL REPUBLIC.)
}
 The Unlted States of Amerlca, oldest republic, is bounded on the north by Canada, on the east by the Atlantic Ocean and the Gulf of Mexico, on the south by the Gulf of Mexico and Mexlco, and on the west by the Pacific Ocean. It comprises 48 States and the Federal District of Columbla. This is called for convenience in reference "Continental United States." Its non-contiguous areas are the Territories of Alaska and Hawaii; Porto Rico, the Phllippine Islands, the Virgin Islands of the United States, American Samoa, Guam, Wake and scattered islands in the Pacific; and the Panama Canal Zone, all aggrcgating 716,721 square miles, which, added to the \(3,026,789\) square miles of continental United States, give a total of \(3,743,510\) square miles.

The population of continental United. States, Census of 1920, was 105,710,620; of the non-contiguous areas (partly estimated) \(12,148,875\), the grand total being \(117,859.495\). (See pages 321 et seq. for population tables)

The general topography of continental United States is so varied, and the climate, natural resources and racial elements also, that the country may be said to be several countries articulated in one national body. In the eastern part, excepting on the south, are several mountain ranges of the Appalachian system, rising never to more than 6,000 to 7,000 feet of altitude, and ranging north and south. The Adirondacks, in northern New York State, are declared by .the United States Geologlcal Survey to have been the first land that rose from the original chaos in the western world, being, therefore, the oldest mountalns in the United States.

Sweeping westward from the eastern mountains is a vast, fertile plaln, the valley of the Mississippi Rlver, a tnousand miles wide and about as long, to where the mountaln formation again is found, the Rocky Mountain rangc, highest in North America, beyond whicli westwardy is a tableland of mean elevation of 3,000 to 5,000 feet, and still further to the westward are other mountain ranges of lesser altltudes, with a low coast range skirting the shores of the Paclice Ocean.

The United States has seven great rivers-the Hudson, enterlng the Atlantlc at the harbor of New York City in the northeastern corner of the country; the Delaware, enterlng the Atlantic through Dclaware Bay, midway down the coast; the Potomac, entering the Atlantic through Chesapeake Bay, just south from Delaveare Bay; the Mississlppi, greatest of North American rivers in its relationship to clvillzatlon, rising in Minnesota, near to Canada, entering the Gulf of Mcxico on the southern side of the country; the Ohio, flowing from the eastern mountains westwardly to join the Mississippi ln the East Central part of the country; the Missouri, Which flows from the northwestern mountalns eastwardly to the Mississippi, being confluent with that stream just north of where the Ohio joins it; the Columbia, which rises in British territory, and tlows across a vast tableland west of the Rocky Mountalns, into the Pacific Ocean one-third of the way down that coast; the Colorado, non-navigable, which rises in the State of Colorado, flows in general course soutinwestwardly through Utah and Arizona, and between Arizona and California, into the Gulf of Cailiornia, in Mexlco.

Besides these streams, there are many of considerable and navigable slze in the areas cast from the Rocky Mountains, and the great St. Lawrence River; as the outlet of the Great Lakes on the northern border between the United States and Canada, skirts the northeastern boundary of the Unlted States.

The Great Lakes, Superior, largest Inland body of fresh water in the world; Huron, Erie, Michigan. and Olitario, are a striking phase of the geolcgiral forination, ard carry iminense passenger and frejght lonnage. The Mississippi. Potomac, Delaware, Huason and Columbla Rivers are navigable for considerabie distances inland from the sea, and the

Missouri for light-draught craft quite a distance up from the Mississippi

Of the lesser rivers, the most important are the Connecticut, Susquehanna, James, Cumberland, Tennessce, Tombigbee, Warrior, Arkansas and led in the eastern half of the country, and the Sacramento on the Pacific Coast; while the Rio Grande rising in Colorado, non-navigable, save for 61 miles from its mouth, is the eastern half boundary between the United States and Mexico. (See pages 718-19.)

The largest river under the American flag is the Yukon in Alaska, which rises in small lakes in the Dominion of Canada, flows northwestwardly into Alaska, then westwardly and then southwestwardly into Norton Sound, which in turn makes into Bering Sea. It is navigable for more than 2,000 nililes inland.

The climate of the United States is of cvery gradation, from the north temperate, with rather cold winters and pleasant summers, to the sub-tropical, with every variety of flora suitable to so wide a range of latitude. Eastwardly and westwardly, even greater variation ls found. For there are regions of normal moisture precipitation in the northeast, of excessive precipitation in the southeast, of normal precipitation in the contral tableland regions, and then of varying degrees of aridity and moistness as one proceeds westwardly, until on the coast of Oregon, at Tillamook, is the heaviest average preclpitatlon in the Unlted States-120 inches a year. (See tables 76-77.)

The Southwestern United States is marked by several almost deserts, susceptible of reclamation by irrigation, some of which were the beds of great inland salt water seas, at some points the present surface elevation being lower than the surface of the ocean.

The area of contlnental United States was acquired by various purchases, trcaties and in wars, from England, France and Mexico, and the dependencies from Russla, Spaln, Panama, the former Hawaiian Government, and Denmark. (See tables following.)

The Thirteen Origlnal States included about 900,000 square mlles, and were colonies when the War of the Revolution was fought agalnst England, 1776-83.

In natural resources, the United States is one of the richest countries in the world. Its coal, oil timber and precious metais exist in vast natural stores, and practically every base mlneral known to civilization is deposited in its areas. The timber resources have been depleted seriously; but the Federal Forest Service has begun reforestation, and has matured plans to make the natural timber lands perpetual by replanting.
Improvement also of the rivers and harbors has proceeded to a large extent, although by no means as extensive as similar development in Europe. The great navigable rivers mentioned heretofore have been treated by the engincers for removal of obstructions in many places, great jetties have been built at the mouths of the Columbia and Mississlppi, large terminal facilities provided at many of the ports, and plans are working out for the perfection of ali of them according to modern standards. The most important domestic canal is the New York State Barge Canal; many others were permitted to lapse into non-use when railway transport absorbed attention so excluslvely in the last half of the last century. (See pages 721-22.) The natural conditions, however, would permit of almost illimitable canal development if more artificiai waterways are needed.

Originally an agricultural people, the presence of so vast natural stores of minerals and timbers. together with increased "pressure of population on land," has operated to induce great industrial development, until the United States is to-day one of the world's greatest merchants on the high seas, its steel, rubber goods, linber. cotton, machinery, foodstuffs and many otiter commodities going to the ends of the earti.

The increase of industrial interest has been coincidental with and in large part the cause of the very heary immlgration which came in before the present jminigration restriction law was enacted. Many came to work in the mines and factorieti and in construetion of rallways and induatrial works. Up to the iatter part of the last eentury.
the population of the United States was in a majority rural-that is, dwelt on farms or in eommunities of fewer than 2;500 inhabitants. The increase of industrial concerns has attracted so many to the towns and cities that the 1920 census indicated town dwellers as 51.4 per eent. of the whole population. (See tables following.)

The agricultural interests of the country are very large. The Census Bureau reported for 1920 that of the approximate land area of \(1,903,215,360\) acres, all farm lands contalned \(955,863,715\) acres; improved lands, \(503,073,067\) acres; or 50 per cent. of all the land in the farm lands classificatlon; that the value of all farm property was \(\$ 77,924,100,338\); of land a.lone, \(\$ 54,829,563,059\); of buildings, \(\$ 11,486,439,543\); of implements, \(\$ 3,594,772,928\); and of livestock, \(\$ 8,013,324,808\); the value of all farm crops in 1919 being \(\$ 14,755,364,894\), against \(\$ 9,523,514,211\) in 1909 , the increase having been due largely to very nuth higher prices.

On Sept. 1, 1922, the Department of Agriculturc reported that the principal erops of the country would bring to the farmers \(\$ 1,250,000,000\) more than in 1921, prices having bcen lower in 1921 than before. (See pages 274 et seq.)

The value of mining products in 1921 was given by the United States Geological Survey as \(\$ 4,056,-\) 000,000 . (Sce tables following.)

The total value of the products manufactured in the United States returned in the Census of 1919 was \(\$ 14,793,902,563\). (See tables following.)

The United States has been known as a meltingpot of the peoples of the earth, its population, at first of the ancient races such as the Aztecs, then of the American Indian, and, in the first days of settlement by white people from Europe, English predominating. From the beginning, immigratlon has been numerous, and attained a million persons i year up to the beglnnlng of the World War, Chinese and Japanese be ng rigidly restricted. (see tables on pages 354 et seq.) At the present time, other admissible aliens may come in at the rate of only 3 per cent. of their own nationallty already here as shown in the 1910 census. (See pages 200-2.)

In the industrial centres, large numbers of Austrians, Italians, Germans and not a few Britons, with very many Slavs, have settled; and in the agrlcultural sections Scandinavians are numerous in the North Central States, and Germans from the Great Lakes to the border States.

The 1920 census assigned of the total 105,710,620 of population, natlve white, \(81,108,161\); native parentage, \(58,421,957\); foreigu parentage, \(15,694,-\) 539 ; with \(6,991,665\) of mixed parentage. Those of foreign parentage and of recently immigrated forelgn blood number more than \(30,000,000\). (See tables on pages 321 et seq.)
By gradual increasc of power, as well as increase of legal authority, the President of the United States is the most potent governmental head in the world. Under the Constltution, as origlnally interpreted, the Presldent had relatively little inltlative, but received direction by the Congress in all important matters, especially when they touched forelgn affairs. In the last 50 years the balance has changed to a large degree, untll the Enecutive establishment now exerclses power little dreamed of when the Republic was established.

The army of the United States has bcen reduced by 100,000 men by recent reorganizations, leaving it, infantry, 46,423; cavalry 9,871 ; field artlliery 17, 173; coast artillery, 12,026; engineers, 5,020 ; air service, 8,500 ; signal corps, 2,181; quartcrmaster corps, 8,000 ; ordnance, 2,307 ; finance, 399 ; chemical warfare, 445 ; medical, 6,850 . Camps for the training of a citizen army for reserve are maintained in several places.

A small eontingent of the army is still in Germany, and its early withdrawal is contemplated. Surplus war materials valued at \$139,773,926 have been transferred to the Department of Agriculture for the use of the Bureau of Public Roads, including 29,325 motor vehicles.

The volume of actual circulating medlum in this country, as of Sept: 10,1922 , was \(\$ 4,392,300,000\), or \(\$ 39.93\) per caplta; the general stock of money being \(\$ 8,303,549,241\). More than a third was in gold and buliion,' \(\$ 3,858,548,202\), held in the Federal Treasury or in reserve banks. Private holders have in their possession \(\$ 416,387,032\) of gold. This gold is about one-hali the world's known store, it being estimated that since the world began there has been mined a total of \(\$ 18,000,000,000\) of gold, that \(\$ 10,000,000,000\) has been used in the arts or lost, and that \(\$ 8,000,000,000\) remains in the possession of Governments in the several countrics. (See tables.)

The money of the United States is accepted at its gold par anywhere in the world. The circulating medium varles with the needs of business, by reason of the operation of the quasi-public Federal: Reserve System, which provides a flexible method of expansion and contraction according as conditions change, and a co-ordination of the business credit of the country in a reservolr, precluding, it is held, the possibility of the former periodlc panles.

The United States, having had to conquer so large an area and bring its material resources into use, has not developed its artistic life as have some older peoples; however; lately there has beer much more attention to art, a phase being the bringing here of a vast aecumulation of art treasures, purchased by wealthy Americans, while schools of the several arts are developing rapidly. (See pages 361 et seq.)

Scenically, the United States and its non-contiguous areas possess almost every variety of landscape and mountain view, Mt. McKinley, Alaska, the highest elevation. in North America, 20,300 feet, being visible from sea level on Cook Inlet, probably the highest spot on earth to be seen from the surface of the ocean; Mt. Whitney, California, next, 14,501 feet. The scenic attractions are more and more appreciated, and slx transcontinental railway routes and the developing automoblle routes are thronged nowadays with tourlsts from all over the world. (Sce the several States and Terrltories following.)

The United States is now the second largest in merchant marlne in the world, Great Britain leading. (See United States Shipping Board -article elsewhere, also tables on pages \(716-17\).)

In naval strength it equals any. (See article on Washington Conference on Disarmament.)

The United States is not a member of the League of Nations.

The North, with 60.2 per cent. of the total population of the United States In 1920, comprises only 30.9 per cent: of the total area. The corresponding proportions for the South are far less divergent, being 31.3 per cent. for population and 29.8 per cent: for area. For the West, in which only 8.4 per cent. of the total population of the United States was
enumerated in 1920, the proportion of the total area is 39.3 per cent. The region east of the Mississippi River. with 70 per cent of the population in 1920. occupies oniy 29.1 ber :ent. of the area of the country, whereas the region west of the Mississipni. With 30 Der cent. of the population. comprises 70.9 per cent. of the arca.

TERRITORIAL EXPANSION OF THE UNITED STATES.
The area of the orlginal thirteen State: (1790) was 892,135 square miles.

Payments for above were made by the United States as follows: Louisiana purchase. \(\$ 15,440,000\); Gudsden purchase, \(\$ 10.000,000\); Aiaska, \(\$ 7,200,000\); Florida, \(\$ 5,000,000\); Hawailan Islands, publle debt assumed to the amount of \(\$ 4,000,000\); Mexican cession, \(88,250,000\).

The Treaty of Paris, of Deeember 10,1898 , termlnating the Spanisth-Ameclean War, provided for a money payment to spain (for relinqulshing claim to Porto Rico, Guam, and Philiopine Islands) of \(\$ 20,000-\) 000, and a subsequent treaty of November 7,1900 , provided for a further payment of \(\$ 100.000\) for other Phlinplne Islands.

By the lirst treaty the Phlinpine Islands were eeded to the United States, and the later treaty of

November 7, 1900, ceded certaio outlylng tsiands of the Philippines not included in tao first cession The United States did Dot acquire, by the isthmian. Canal Convention of November 181903 any title to territory in tile Requblie of Panama but merely porpetual right of occupation, use, and colltrol of and over a zone of land ten miles in width. For unls prlvilege it naid to the Repubilc of Panama the sum of \(\$ 10,000,000\), and undertook to pay the sum of \(\$ 250,000\) anuually so loug as such occupancy coll tinued, such jayments Degiuning on Jicbruary 26, 1913.

TREATY WITH COLOMIBIA.
The United States and the Colombinn Congresser ratified, in 1921, a treaty of the United states witl Colombia by which Colombia is 10 recelve \(\$ 25,000\) 000 (in yearly instamentis of \(\$ 5,000,000\) ) as comvou-
sation for the loss of terrltorial sovereignty over Panama and the Canal Zone. Ratifieations of the two countries were exchanged at IBogota, Colombla, on March 1, 1922. The first payment of \(\$ 5,000,000\) to be made six months thereafter.

For the Danish West Indles, consisting of the
lsiands of St. Croix, St. Thomas aud St. Jonn, the United States paid \(\$ 25,000,000\), and took possession on March 31, 1917. They then had 32,000 populatioll.

No moncy payments were made upon the acquisitlon of tlie other Territories mentioned in the list.

\section*{DIMENSIONS AND AREA OF THi UNITED STATES.}

THe gross area of the United States is \(3,026,789\) square miles. The land area amounts to \(2,973,774\) square miles, and the water area-cxclusive of the area in the Great Lakes, the Atlantic, the Pacific, and the Guif of Mexico, within the three-mile llmit -amounts to 53,015 square miles.

The southernmost point of the mainland is Cape Sable, Fla., whicli is in latitude \(25^{\circ} 07^{\prime}\) and longitude \(81^{\circ} 05^{\prime}\). The extreme southern point of Texas is In latitude \(25^{\circ} 50^{\prime}\), and longitude \(97^{\circ} 24^{\prime}\). Cape Sable is therefore 49 miles furthor souti than the most southern point in Texas.

A smali detached land area of northern Minnesota at longltude \(95^{\circ} 09^{\prime}\) extends northward to latitude \(49^{\circ} 23^{\prime}\).

The easternmost point of the United States is West Quoddy Head, near Eastport, Me., in longitude \(66^{\circ} 57^{\prime}\) and latitude \(44^{\circ} 49^{\prime}\); the westermmost point is Cape Alva, Wash., in latitude \(48^{\circ} 10^{\prime}\), which
extends into the Pacifie Ocean to longitude \(124^{\circ} 45^{\prime}\).
From the southernmost point in Texas due north to the forty-ninth paraltel, the boundary between the United StaLes and Canada, the distance is 1,598 mlles. From West Quoddy Head due west to the Pacific Ocean the distance is 2,807 miles. The shortest distance from the Atiantic to the Pacine across the Unlted states is between puista near Charieston, S. C,, and. San Diego, Cal., and is 2,152 miles.

The length of the Canadian boundary line from the Atlantic to the Pacific is 3,898 miles. The length of the Mexican boundary from the Gulf to the Pacifie ls 1,744 miles.

The average elevation of Delaware is only 60 feet above sca level, according to the United States Geological Survey, less than that of any other State in the Union, although its highest point, at Centreville, New Castie County, is 440 feet above sea level, higher than the highest points in Florida, Louislana and the Dlstrict of Columbia.

POSITION OF THE CENTRE OF UNITED STATES POPULATION, 1790 TO 1920.

"The centre of population," says the U. S. Census Bureau, "may be considered' us the centre of gravitiy for the population of the United states; that is to say, if the surface of the United States be regarded iss a rigid, level plane, whthout wetgit, but having the boptulation distributed thereon as at present: cieh individual inhabitant, being assumed to have the same welght as every other inmabitant, would cxert a pressure on any glven point ln the plane directly proportional to his distance from that point. The eentre of gravity for this plane, or the pivotal point on which it woutd balance, is the point relerred to by the term "centre of ropulation." That being the case, the cities of Seattie, San Fraitciseo and L.os Angeles, with a combined pomulation of \(1,398,661\),
exert a greater Influence on the location of the centre of population than the eities of Baltimore. Boston, Buffaio, Cleveland. Philadelphia and Pittsburgn, with is combined population of \(5,197,624\)."
The centre of area," or geograpilical centre, of the United States, which has nothins to do with the centre of popilation, is determined by driswing lines across the countrys greatest width and greatest, length. Ten years ago this interscetion was located in Northern Kansas, ten iniles nortn of Smitn Center, the county seat of Smitn County.

Besides the "eentre of population" and the "eentre of area," there ls stlll another definition used by the Census Bureau-the "median lines." These lines divlde the population everly north and south of a paralici of latitule and cast and west of a meridian of longitude.

\section*{COAST LINE OF THE UNITED STATES.}
(By the U. S. Coast and Geodetic Survey.)

General Coust Linc-The flgures under this headiug give the iength in statute miles of the general outliue of the seacoast. The measurements were made with a unlt measure of 30 minutes of latitude on eharts as near the seale of \(1-1,200,000\) as possible. The-shore line of bays, sounds and other bodies of water whose entranee width is greater than the unit measure is included to a point where sueh waters narrow to the width of the unit measure, and the distance aeross at such point is included. Where the entranee width of such waters is less than the unit measure, the distance across is included, but the shore line inside ls not.
Tidal Shore Line, Unit Measure 3 Statute MilesThe figures under thls heading give the length in statute miles of the shore line on tidal waters to points where such waters narrow to a width of 3 statute miles. The flgures for Louisiana do not
include the shore line of Lakes Maurepas and Pontchartrain, and the deita of the Mississipni Rlver was measured as mainland. The measurements were made on charts of 1-200,000 and 1-400,000 scale when avaliable.

Tidal Shore Line, Unit Measure 1 Statute MileThe figures under this heading give the length in statute miles of the shore line on tidal waters to points where such waters narrow to a width of one statute mile, and include the shore line of those bodies of tidal waters more than 1 mile wide whieh lie close to the main waters, even though the entrance width is less than the unit measure. The measurements were made on eharts of 1-80,000 seale for the Atlantie and Gulf coasts, on charts of 1-200,000 seale for the Paelfic eoast, and on eharts as near those scales as available for the other regions.

The Panama Canal Zone-Islands outside the 3 vautical mlle zone were not included.

LENGTHS, IN STATUTE MILES, OF GENERAL COAST LINE AND TIDAL SHORE LINE OF UNITED STATES AND OUTLYING TERRITORY.

THE CONTINENTAL DIVIDE,
THE Rocky Mountain range is known as the Continental Divide.

Triple Divide Peak-the only mountain in the United States whose drainage flows into the Atlantic and Pacific Oceans and Hudson Bay-is located in Glacier County, Glacler National Park, Montana, in Township 33 Nortn, Range 15 West. The Unlted

AND TRIPLE DIVIDE PEAK
States Geographic Board has named the small creek flowing southwest from Triple Dlvide Peak, and tributary to Nyack Creek, Pacific Creek; the small creek flowing a little north of east and tributary to Cut Bank Creek, Atlantic Crcek; and has changed the name of the creek flowing north from Norris Creek to Hudson Bay Creek.

The altitude of Triple Divide Peak is 8,001 feet.

\section*{THE CAPITOL AT WASHINGTON.}

THE Capitol is situated in latitude \(38^{\circ} 53^{\prime} 20^{\prime \prime} .4\) north and longitude \(77^{\circ} 00^{\prime} 35^{\prime \prime} .7\) west from Greetiwich. It fronts east; and stands on a plateau eighty-elght feet above the level of the Potomac. The entire length of the building from north to south is 751 feet 4 inches, and its greatest dlmension from east to west 350 feet. The area covered by the building is 153,112 square feet. The dome of the original central building was constructed of wood, covered with eopper. This was replaced in 1856 by the present structure of cast iron. It was completed in 1865 . The entire weight of iron used is \(8,909,200\) pounds. The dome is crowned by a bronze Statue of Freedom, which is 19 feet 6 inches high and welghs 14,985 pounds. It was modelled by Crawford. The lieight of the dome above the base line of the east front is 287 feet 5 inches. The height from the top of the balustrade of the bullding
is 217 feet 11 inches. The greatest diameter at the base is 135 feet 5 inches

The rotunda is 97 feet 6 inches in diameter, and lts height from the floor to the top of the canopy is 180 fcet 3 inches. The Senate Chamber is 113 fect 3 inches in length by 80 feet 3 inches in width, and 36 feet in height. The galleries will accommodate 1,000 persons. The Representatives' Hall is 139 feet in length by 93 feet in width; and 36 feet in height. The cornerstone of the north why of the original building was laid September 18 . 1793, by President Washington with Masonic ceremontes. The foundation of the centre was lald March 24, 1818. The cornerstone of the extensions was laid July 4, 1851, by President Filimore. The room now cccupied by the Supreme Court was, until 1859, occupied as the Senate Chamber. Previous to that time the court occupied the roon irmmediately beneath, now used as a law library.

\section*{ORICIN OF THE NAMES OF THE STATES AND TERRITORIES.}

Alabama-Alibama was the Indian name of a tribe in Southern Aiabama-a Mushhogean tribe of the Creek Confederacy. Ailbamu is from the Choctaw words aiba, aya muie, meaning "I open or clear the thlcket."
Alaska-From "Ai-ay-es-ka," a native Eskimo or Innuit word, meaning Great Country.
ARizona-From Ariconac, "Hew Springs." Papago name of a ranch In Sonora.
ARKANSAS-Aigonkin name of the Quapaw Indians.
California-Spanish "Calida formax," a hot furnace.
Colorado-Spanish, meaning red.
Columbia, District of-A poeticai adoption of the name of Columbus; applied to the territory in 1791 by the Federal Commissioners who laid it out.
Connecticut-Indian, "Quonecktacut," Long River or River of Pines.
Delaware-Named after Lord De La War, of England, Governor of Virginia, who entered tile Bay in 1610.
Florida-Spanish words, "Pascua Fiorida," Feast of Fiowers (Palm Sunday), on which day it is said to have been named, in 1512, by Juan Ponce de Leon.
Georgia-Named after King George II of Engiand.
Hawail-Engiish speliing of Owhyhee, where Capt. Cook was killed by the natives in 1779.
IDAHO-Indian words, "Edah hoe," Light on the Mountains.
Illinois-Indian word, by some transiated "The River, of Men. A form of the word Ininiwek, "Ilini" meant "nıan," "iw"' meant "is," and "ek," was a piural signification.
INDIANA-Named after Indians, State of Indians.
Iowa-The Ioways, or Aiaouez, or Alaouas were a Sioux tribe. The word means "sicepy ones." They calied themselves "Pahoja," gray snow.
KANSAS-Name of a tribe of the Sioux.
KENTUCKY-From Wyandot (Iroquoian) name "Ken-tah-ten," meaning to-morrow, or Land of To-morrow.
Louisiana-Nanied by the Mississippi River navigator Robert de la Salle, in 1682, after King Louls XIV of France.
Maine-From Maine, an ancient province of France, south of Normandy, owned by Queen Henrietta Maria of England, wife of King Charies.I.
Maryland-Named in honor of the foregoing. Queen Henrietta Marie.
Massachusetts-An Aigonkin Indian name from Massadchu-es-et, meaning "great-hili-smail piace," indicating a place at or about the big little hilis.
Michigan-The Mishigamaw or Mishawiguma were Indians. The word means "big iake" and was applied to Lake Michigan. "Michi" meant "great," and "gama" meant "water."
MinNesota-Sioux woris sur cloudy or smoky water.
Mississippi--Indian words "Sipu," Aigonquin word for river; "Maesl," fish-Fish-River.
Missouki-The Missouri were Sioux of that name.
Montana-Spanish for mountainous; used now by Peruvians as a name for their Andean districts.
Nebraska-An Omaha Indian name for the "wide river," Platte.
NEVADA-A Spanish word, meaning "snow ciad." New Hampshire- Named, in 1629, after the County of Hampshire, England, by the patentee, Capt. John Mason of the Plymouth Council.
New Jensey - In 1664 the Duke of Yoric, of England, granted to Lord John Berkeley and Sir George Carteret a patent or deed to the jresent boundaries to be called Neva Caesaria, or New Jersey. Caesarea, or Caesuria, was the ancient name of the Island of Jersey of which Carteret had been administrator.
NEW MEXICO-Mexico is a word derived from the Aztec word "mexitli," title of their national war god.
NEW YORK-So called in honor of the Duke of York (1664), who got the patent from his brother, King Cliarles II of England, and sent an expedition and took possesslon of New Netheriands.
Nohri Caholina-The Carollnas were originaily named, It is said, in honor of King Charies \(1 \times\).

France by Jean Ribault, whose expedition (1562) was financed by Admirai Coligny. "Carolus" Is the Latin word for Charles. In 1663, King Charies II.granted a patent to the land under the name of Carolina.
NORTH DAKOTA-"Dakota" means "ailiance of friends," and is a Sioux Indian word. Koda in Santee dlaiect and Kola in Teton dialect are the root words.
OHIO-Iroquois name, denoting great.
OKlaboma-Cnoctaw word for "red people."
Oregon-The Oregon State Librarian, Cornelia Marvin, says various origins of the name have been suggested as foliows: Origanum, a wild sage found on the coast; Orejon, or Oregones, a Spanish name for big-eared (Indian) men; Orgon, a river in Chinese Tartary; Oyer-un-gen, a Sioshone Indlan word for "piace of pienty;"' Aura agua, Spanish word meaning gentiy faliing waters: Ouragan, a French word for hurricanes; Wau-rc-gan, an Aigonkin word for "beautifui water.".
Pennsylvania--Penn-syivania, from Penn; and Syiva, Latin word for grove or woods. Groves of Penn; so called in honor of Wiliam Penn, who, in 1681, got a deed for the State from King Charies II of Engiand, in settlement of a debt which the British Government owed Penn's father. Wiillam calied the country Syivania, and the King prefixed it with "Penn.'
Philipfines-Spanish, "Islas Fiiipinas," discovered in 1521 by Mageilan, whom tile natives killed in a skirınish; named in honor of King Yhilip II of Spain by a coionizing expedition from Mexico.
Porto Rico-From the Spanish "Puerto Rico," Rich Port.
Rhode Island--"Isies of Rhodes" was the name, chosen by the Generai Court of the colony, in 1644. The name of one of the isiands had been Aquedneck. The name of Providence Plantations then graduaily lapsed.
South Carolina-(See North Caroiina).
South Dakota-(See North Dakota).
Tennessee-Cailed, from 1784 to 1788 , the State of Frankiin. "Tennessee" is an Angiicized Indian word-Ten-asse, said to mean "a curved spoon."
Texas-According to Elizabeth H. West, State Librarian at Austin, "Texas is an Indian word meaning Friends or Ailies. So iar as I know, it has not an Aztec origin. It appiled, originaliy, in the Indian usage to the indian tribes about the cariy Spanish missions around Eastern Texas; and iater to tribes ranging as far west as the Rio Grande, to designate a large number of tribes who were ordinarily ailied against the Apaches."
Utar-Named after the Utes, an Indian tribe.
Vermont-From Verd and Mont, two French words meaning Green Mountains. The name is said to have been bestowed by Samuel de Champiain when he saw from the iake, later cailed after him, green hilis to the East.
Virginia-Named in honor of Elizabeth, daughter of Henry VIII, sometimes calied by her courtiers the "Virgin Queen" of England. The name was bestowed by one of the courtiers, Sir Waiter Raieigh, who fitted out the expedition of discovery in 1584 .
Washington-Named after George Washington. When tine bill creating the Territory of Coiumbia was introduced lin the 32nd Congress, second session, the name was cinanged in the bili to Wasinington because of tile existence of the District of Columbia.

\section*{West Virginia-(See Virginia).}

Wisconsin-An Indian lame which, according to Reuben Goid Tinwaites, was originally Sijelled "Oulscousln" by the French missionaries and in old French-American documents; also was speiled "Misconsing," "Oulsconching," "Ouiskensing." The Yankee settlers speiled it "Wiskonsan," then "Wiskonsin;", but Congress changed it to "Wisconsin."
Wyoming-(By the State Historlan, Eunice \(G\) : Anderson)-What we would determine to be the most authentie publication upon the derivatives of the vaine of our State gives the following: "The word Wyoming was taken from Wyoming Valley, Pennsyivania, rendered famous from Campbell's beautiful poem, 'Gertrude of wyomlng.' The word means "mountains and valleys aterniating.' Or, as we construed it, 'Here God lins bent down the backs of His mountains for nail to inake thls habitations.' "Thls is given by Gen. Frcomall.

From time to time Congress has becn asked to adopt a nationai flower, but has taken no step to that end.

\section*{©ye States of tye \(\mathfrak{A m i o n}\).}

\section*{ALABAMA.}

Area, square miles. . . . . . . . . 51,998 . . . . . .28th in rant Population, 1920.........1,449,661.........28th in rank

Alabama, one of the States of the Oid South, is in the beart of the cotton beit, in the East South Central group, on the Gulf of Mexico, bounded on the north by Tennessee, on the east by Georgia, on the south by the Guif and Fiorida, and on the west by Mississippi.

It is ievel and largely aliuvial along the seashore and for a considerabie distance iniand, rising to hilly or low mountainous elevations in the northeast. Forests originaily covered most of the area, but have been materially reduced by non-conservation methods of iumbering. The state is well watered, river navigation being available, notably the Tombigbee and Warrior Rivers together for 400 miles iniand, and ocean carriage on the Guif.

On the Tennessee River rapids at Muscie Shoals are the nitrate fixation piants built by the Federal Government in the World War, but not carried to point of production. Henry Ford of Detroit, automobile, tractor, rallroad and steel works magnate, seeks possession of the plants for nitrate making and development of iatent water power, the contract therefor belng before the Federal Government.

Agriculture is the chief interest, although in the past thirty years the mineral industries have been wonderfully deveioped, Birmingham being known as "the Pittsburgh of the South." In 1920, 2,392,962 tons of plg iron were produced, the State ranking sixtin. Alabama, as one of the 16 cotton States, raises normaliy about one-fifteenth of the country's cotton on about one-thirteenth of the cotton land areas of the Nation. Corn, white and sweet potatoes, oats, tobacco, sugar, hay and fruits abound.

Tue Census of 1920 showed the iron and steel industries, in value of products, \(\$ 121,998,000\), was second to agricuiture, \(\$ 304,348,638\), and ahead of lumber and timber products, \(\$ 55,139,000\), yellow pine belng 91.3 per cent. of the cut, with \(1,642,588,-\) 000 board feet, the oak cut being \(61,189,000\). Gum, maple, ash, hickory, cypress and tupelo also supply iumber. Cotton milis are becoming important. Coal production is large.

Practically all of the State's foreign commerce passes through Mobile, that Gulf port having been in past years relatively unimportant, but having attained, rapidly, commercial prestige since the mineral industry development began.

Rallroad mileage in 1921 was 5,378 .
A feature of Alabama is the high proportion of Negro population. Two of each five persons are black. Alabama is intensely American, there being only about 20,000 forelgn-born. In some portions of the State. known as "the black sections," however, the Negro population is about 80 per cent. of the total. The rate of illiteracy, by the 1920 census, was 16.1 per cent. of the totai population. Of the 1,038,692 native whites, 65,394 were illiterate, or 6.3 per cent.; and of the 674,004 Negroes, 210.690 were illiterate, or 31.3 per cent. Exceilent progress, however, is making toward a higher standard, the percentage of illiterates having been reduced from 22.9 in 1910.

A famous agency for this improvement is the Tuskegee Normal and Industrial Institution, founded In 1880 by the late Dr. Booker T. Washington, \({ }^{\text {a }}\) Negro acknowledged as leader of his race. The enrolment was 1,736. The cnrolment at the University of Alabama, a State endowed and concrolled institution, at which only whites matriculate, was 1,860 , with 1,315 students in other higher educational institutions.

\section*{ARIZONA.}

Area, square miles........ 113,956...... . 5 th in rank Population, 1920..........934,162....... . 46 th in ranth
Whereas Alabama has 45 persons and Massachusetts 479 to the square mile, Arizona, a mountain State, has only 3-and of the 334, 162 of population, there are \(60 ; 325\) Mexicans, which fact, logether with the warm cllmate and the ease of life there, made Arizona one of the picturesque States in the frontier days. Although then precisely characteristic of "the West," it is now modernized, with every agency of civllization.

It is situate in southwestern United States, west from New. Mexico, east from Callfornia, and south from Utah and Coloracio, and is on the boundary between the United States and Mexico.

Arizona prides itself on being a man-made State. Vast reaches of arid and semi-arid lands. useless before irrigating water was turned on, have been made higaly productive. Agriculture has greatly increased, and new irrigation projects promise further enrichment. The topography is broken, being mountainous in portions of every section; the northern platcau is 4,000 to 7,000 feet in altitude, and the southern from 500 to 2,500 . On the broad plains and mountain sides livestock graze, and through the valieys the irrigating waters are led. Long staple cotton has been developed as a principal crop, other products being wheat, corn, barley, oats, hay potatoes and immense quantities of sub-tropical iruits. Dates thrive. Ostrich farming is a feature

Mining is extremeiy important. Copper mines in the State are among the greatest in the world, the most famous being the United Verde, owned by former United States Senator W. A. Clark, now a resident of New York. In 1919 the value was \(\$ 84.217,141\) Michigan being second. Gold, silver, lead and zinc are also produced. Manufacturing is unimportant, excepting for the large smelting interests.

Raiiroad mileage in 1921 was \(2,478\).
Apart from the generaliy picturesque character of the State, tourists are attracted by the Roosevelt Dam, supplying irrigating waters for the Salt River Valley, one of the two greatest dams in the world and the Grand Canyon of the Colorado River, one of the scenic wonders of the world, 200 miles long and averaging 12 miles wide and one mile deep.

Livestock raising lends both economic value and the element of the picturesque to life in Arizona, the industry having caused the development of many very large ranches, some of which comprise hundreds of thousands of acres, with the "cowboy" an essential factor.

On the lower areas the surface of the earth is low since they were the bed of a primal sea, in which are immense deposits of the several kinds of salts, such as potash, nitrates and others, from which in time it is expected that there will be extractions of great minerai value

Iiliteracy among the native. whites is low- 2.1 per cent., while among the foreign-born, mostiy Mexicans, it is 27.5 .

Tucson is the seat of the University of Arizona, and Fiagstaff has the Lowell Observatory. Phoenix, the capital and largest city, is the centre of the richest agricultural district, the Salt River Valley.

Arizona has a large population of Indians, 42,400 (1920), mostly Apaches, Navajos, Hopis, on reser vations, a number exceeded only in Oklahoma. They occupy \(18,653,014\) acres, valued at \(\$ 61,843\), 402 , and with an income of \(\$ 5,482,039\).

\section*{ARKANSAS.}

Area, square miles. . . . . . . . \(53,335 . .\). . . .26th in rank Population, 1920...........1, \(752,204 . . . . .25\). 25 in rank
Arkansas (pronounced Ar-kan-saw) is of the Old South, situate Inland, in the Wcst South Central group, Missouri bounding it on the north. Tennessee and Mississippi on the east, Louisiana on the south, and Oklahoma on the west, and is on the Mississippi River, down which much of its traffic flows. Its topography is mostiy levei, but in the west rise the mountainous elevations of the Ozarks.
A.sricuiture is the chief source of wealth. The 1920 census gave \(\$ 340,813,256\) as the value of ail crops; lumber and timber products are next with \(\$ 84,000,000\), and there is considerable coal, lead and manganese mining. There are important phosphate deposits. later to become very valuable for fand fertilization.

Arkansas produced one-thirteenth of the Nation's cotton on one-thirteenth of the cotton lands, bcing thus an average for per acre productivity. Its cotton mills are of growing importance.

Wheat, corn, oats, potatoes, white and sweet, hay, tobaceo and fruits are produced. Roses arc grown extensively for the making of perfumes.

The State is richly endowed with forcst wealth, every sort of tree which grows in the temperate zone abounding, with much of the rapidiy-disappearing hardwood which forms an important article of Arkansan commerce.

Ruilroad mileage in 1921 was 5,052
The Negro represents one-third of the population, with the inevitabie consequent illiteracy of 21.8 per cent. among them, that of the native-born whites being 4.5, and the average for the whole popuiation. 9.4. As \(\ln\) all Southern States, kecn effort is cxerted lo improve this matter, average illiteracy having falien from 12.6 per cent. in 1910.

Likewise, as in most of the Southern states, the

Baptist Church comes first with communicants, the Methodist being second, and Roman Catholic and Presbyterian following in that order.

The Southern custom is foilowed by providing separate schools for black and white, about 500,000 pupils attending. Besides the State University at Fayetlevilie, with 650 students, there are several church colleges with about 750 students each.

The Hot Springs, a national reservation in the western part of the State, are world famed and support thousands who attend the wants of tourists.

\section*{CALIFORNIA.}

Area, square miles . . . . . ...1;8,297. . . .. . . \(2 d\) in rank Population, 1920 . . . . . . . . \(8,426,861 . . . .{ }^{2}\). . .8th in rank
California, in the Pacific group, occupies about one-half of the Pacific coastione of the United States; is bounded on the north by Oregon, on the east by Nevada and Arizona, and on the south by Mexico. It is 1,000 miles iong. Its topography is most varied and lts climate as weli. Every phase of surface character is presented, and the geological pecuiarity of the North and South American Continents is here seen-the aged mountain ridge that runs from the Arctic Circie southward through the States into Mexico paraliei to and near the seashore. There is much pialns iand, too; and every kind of soil that marks the temperate and sub-tropicai zones, with practicaily ali climates which are found in such regions. The state has no navigabie rivers, except the lower Sacramento, but abundant. waters in smalier streams enable immense irrigation of lands otherwise virtuaiiy useiess. Californla is the leading State in irrigation, its enormous frult. garden and mucn of the grain output being attributable largely thereto.

Californians especialiy pride themselves in the climate, which has such fame as to attract vlsitors from ail corners of the earth, particulariy in the winter. For their accommodation, numerous iuxurious hoteis are maintained. Touring is so generai aiso that there are thousands of miles of excelient roads, and ownership of automobiles is so great as to give Caiifornia second place in per capita reiationship to the total number of motor cars.

Rairoad mileage in 1921 was 8,356 .
Agricuiture is enormousiy developed. There are about \(100,000,000\) acres in the State, and the farms, which inciude orchards and vineyards, take up \(29,305,667\) acres, according to the 1920 census, of whicn \(11 ; 878,339\) are improved; some highly so, the value of ail belng \(\$ 3,431,021,861\).
Literally every product of the temperate and sub-tropical. zones is grown there-ail cereais, forage crops, vegetables, fruits and nuts. Crops in 1920 were vaiued at \(\$ 589,757.377\), dairy products, \(\$ 276,424,216\), iivestock, \(\$ 204,378,445\), with other large agricultural production.

Mining interests are extensive, in gold, silver, copper, iead and quicksilver.

Tne stores of petroieum are very large; California produces about the same amount, as Texas, and is exceeded only by Oklahoma in output. The product in 1920. was 103,377,361 barrels. A peculiar sight is the oil derriciss rlsing amid the comfortabie homes of Los Angeles, and those set in the sea waters below Santa Barbara. The State produces aii the borax mined in the United States, 120,320 tons being produced in 1920.

Enormous shipping is carried on, San Francisco being the chief port, the others being Los Angeies and San Diego.

The forests, in common with all States of the Pacific group, are very extensive, comprising every variety of tree which grows north of the purely tropioal zone. Coniferous trees are most numerous. The giant redwood groves are the destlnatlon of many tourists. California no ionger is an exporter of ordinary iumber, being compelied to buy from Oregon and Washington.

It is a State of romance in history. Acquired from Mexican poiiticai controi in 1846 , gold was discovered in 1848, and in 1849 , the most remarkabie "gold rush" ever known began, it being said that the gold produced thereafter enabled the United States to withstand so weli the economic strain of the Civil War which began in 1861. The gold output in 1921 was \(\$ 15,961,300\); silver, \(\$ 3,696,708\).

Illiteracy is low-3.3 per cent. in 1920; it was 37 in 1910 . Of the \(2,075,467\) native whites, only 8,747 , or \(4-10\) ths of 1 per cent., were iiliterate, iillteracy among the forelgn-born being 10.5 . They are Orientals and Europeans, with some Mexicans.
The Japanese population in 1920 was 71,952 , an increase of 30,596 in ten ycars; and of Chinese, 28.812 , a decrease of 7,436

The State has three universities-Leland Stanford Jr., the University of Cailfornia, which matric-
uiates about 12.000 ; and the University of Southern Callfornia. There are many colleges.

One of the points of interest is the motion picture colony at Holiywood, a suburb of Los Angeies. The atmosphere is so ciear that motion pictures may be taken on about 350 days of the year, while the topography and nora afford most varled "locations." Yosendite Park (national) is a scenic wonder. The retention of the -Spanish influence in architecture, the climate and the profusion of vegetation where water flows on the lands. attract many tourists.

The United States Department of Agricuiture lately has developed cotton growing, which has produced a fibre of the quality of the finest sea island, which, in turn, has glven rlse to the cotton mill industry. Other manufacturing is extensive, the investment being about \(\$ 750,000,000\), and the output about the same.

The Roman Catholic Church Jeads all reilgious bodics, the bequeathal to iater generations of the work done by the Catholic missionaries who established a string of 26 missions a day's march apart from the Mexican ine to upper San Francisco Bay.

\section*{COLORADO.}

Area. square miles. . . . ...103.918...... .7th in rank Populdition, 1920............939,629.......933 in rank

Coiorado, one of the mountain States, is bounded on the north by Wyoming and Nebraska, on the east by Nebraska and Kansas, on the south by New Mexico. and on the west by Utah.

Its topography is varied, being piains lands in the east and south, but rising to the elevations of the Rocky Mountain range in the west, some peaks towering to an aititude of 14;000 feet. The Union Pacific crosses Marshali Pass at above 10, 846 feet, and the Denver \& Rio Grande climbs the Tennessee Pass, near Leadville, at \(10,219\).

Soils vary from arid, when non-watered, to productive. Irrigation is. extensive, and has lifted agricuiture to first place in the State, ahead of mining and livestock, which come next. The 1920 census showed ail crops valued at \(\$ 181,065,239\), even mineral production, \(\$ 51,217,038\), being behind, although the State abounds in mineral wealth, and development is rapid, with petroieum abundant and production great. Minerais produced are goid (second in output in the country), in 1921, \(\$ 7,347,800\); sliver, \(\$ 6,310,694\); coai, \(\$ 28,342.195\); copper, zlinc, lead, manganese, gypsum; and the state is first in radlum output and second in tungsten.

The western ranges abound in forage grasses, on which iarge numbers of food animals and horses live and producc vast annual wealth:

The climate is warm in summer and cold in winter, but dry, and stimulating. It is said that the sky is absoluteiy cloudless in Denver (the capital and.chief city, 5,183 feet above the sea) on 300 days of the year. These qualities have attracted many persons desiring relief from tuberculosls.

Rail way facilities are plentiful, and freight tonnage and tourist travel are heavy. The rapidly improving hlghways are covered by many trans-continental automoblie parties, which, en route, seek the local attractions of mountain and valley, chief among which are the mineral springs at Colorado Springs. and everywhere there is unusual conformation and coioration. The State has developed a wonderfui highway through the reserved State Park, which is scenic and diverse in interest. The Royal Gorge of the Arkansas. through. which the Denver \& Rio Grande runs, is justiy famed.

Railroad mileage in 1921: was 5,519.
Illiter \(u\) y is 10 w at 3.2 per cent. of the whole popuiation in 1920; native white, 1.4 per cent.; and. forelgn-born, 12.4. For a State of 939,629 popuidtion, there is unusualiy large provision for education. With 192,000 pubil schooi enroiment. in 1919, and the State University at. Boulder, University of Denver, State Agrlcultural Coilege at Fort Collins. State Teachers' College at Greeiey, the State Normal Schooi at Gunnison, and the State Schooi of Mines at Golden, which has advanced far in mineralogic science.

\section*{CONNECTICUT.}

Area, square miles. . . . . . . \(98965 . . . .46\). 46 th rank Poputation, \(1920 . . . . . . . .1,380.631\)......29th in rank

Connecticut, one of the originai Thirteen States of the Union, is situatic in New England: bounded on the south by Long Island Sound, on the east by Rhode Island, on the north by Massachusetts, and on the west by New York. It was settied early in the seventeenth century by the Dutch from Ner York, then known as New Amsterdam, and bs Puritans from Massachusetts at Hartford, in 1635.

In 1639 it adopted a written constltution, confl:meá by a charter irom King Charles II. in 1662, and replaced \(\ln 1818\) by a State constitution.

The State is now intensely inductrial. although earlier it was agricultural. The 1920 census indicated that 62.7 per cent. of the people live in towns of 10,000 or more population. and that, including smaller towns, 85 per cent. live urban lives. practically every town having industries: Connecticut presents an unusual contrast in the presence, especially in the western part. of hundred 3 of beautlful country bomes of New York and other city folk, aiongside of towns and villages in which industry flourliehes

Prcportioned to population. no State has greater industrial strength or a wider range of manufactured products.

Connecticut's suriace is broken, there being ridge after ridge. with verdant valleys between. Toward the shores of the Sound, the land is generally flat, but jt rises to abjut 2,030 feet of altitude in the northwestern parts, where the Berkshire Hills begin and extend northward into Massachusetts and Vermont. Originally, the entire State was heavily wooded with all trees known to the temperate zone, hardwood and coniferous varieties abounding. Lumbering has reduced the timber supply materially. The water supply is large for industrial uses. The Connecticut River and the Housatonic are the principal streams, their valleys immensely productive. Tobacco is a very great source of wealth, \(45,074,000\) pounds being grown nn 31,000 acres in 1921.

Besides its pro-eminence in manufacturing industry, Connecticut has in the capital, Hartford, also the insurance centre of the United States, with numerous powerful assurance companies covering every modern phase-life, fire, burglar, etc.

Its industrial output in 1920 was valued at \(\$ 1,392,-\) 432,000 , or almost exaetly \(\$ 1,000\) per capita, in which there was a net of \(\$ 706,494,000\) added to materials used by the process of manufacture, in which 292,672 persons were employed, or considerably more than 20 per cent. of the total population. It was the iarge growth of lndustrial interest that brought in many forelgners as factory and other laborers, so that, although originally intensely New England in social eomposition, its population now is largely mixed.

The range of industrial output covers brass, bronze, copper products, very many kinds of machinery, silk goods, hardware, cutlery, electrical apparatus, rubber goods, wooiens, ammunition, tires, hats, boots and shoes, steam fittings of ali kinds, typewriters, firearms, needles, pins, paper, clocks, ordnance, knlt goods, dyeing, lumber, clothing, engines and scores of other products.

Agriculturally, Connecticut has fallen off from her one-time superiority, the competition of the virgin soils of the Middle West and the Far West eausing the abandonment of many farms a generatlon ago. these farms having been taken over in rccent years for country homes. Against the large industrial output values, the 1920 census gave the value of all crops at \(\$ 44,472,644\).

In early days, shipping was important, but is to-day relatively negligible, exceptlng for coastwise water-borne traffic. The prevalence of good roads has enabled the development of many motor truck lines which haul immense quantities of goods and materials to market without utilizing the railway for any fart of the haul, while the same good roads have multiplied automobilc tourist travel untll the State accommodates very hcavy vchicular traffic. Rallroad miicage, 1921, was 1.001.
Before the influx of forelgners, illiteracy was almost nll. It is now 6.2 per cent. for the state \({ }^{*}\) \(4-10\) ths of 1 , per cent. for the native whites. and 12.8 for the foreign-born The whole of New England was shown by the 1920 census to be 4.9 per cent llitterate. and the Unlted States 6 per cent.

Yale University, at New Haven, founded in 1701, has grown to be a world-famed instltutlon with 4,000 students. Trinlty College in Hartford is the other prineipal higher institution and there are normal schools for the training of teachers at New Britain, Danbury. New Haven and Willimantlc. About 270.000 arc enrolled in the pubile scboois, or about 27 for cueh 108 of population.

\section*{DELAWARE.}

Area, square miles.............2 \(380 \ldots . . .47\). 4 in rank Population. 1929............223.003. . . . . . 47 th in rank

Delaware, one of the thirteen original States ncxt to Rhode Island the smallest lics in the South Atlantic group. bounded on the north by Pennsylvania, on the east by New Jersey, Delaware Bay, and the Atlantic Ocean on tha south by Maryland. and on the west by Maryland and Pennsylvania. It is 110
miles long . with an extrem breadth of 35 miles The land is low lying, one-twentieth being marshy It is essentially agricultural, 85 per cent., 944, 511 acre3, of the \(1,500,000\) total State acreage, being in farms, and 653.052 improved, With corn and wheat the chief products, and also much fruit and tomatoes, Delaware being the second State in tomate packing, and famuus for its peach crop. Its flat alluvial soils, practically unbroken, yielded, Census of \(1920, \$ 23,058,906\), or aimost exactly \(\$ 10\) per capita for the 223,000 of population. Oysters and fish are takeu extensively.

Relative to the size and pcpuiation, Delaware has large manufacturing interests. Wilmington, at the northern tip of the State near Philadelphia, with 110,108 persons, about one-half the populaticn, has most of the industries. Leather and knitting lead The large parent plant of the duPont powder works is in the valley of the Brandywine.

Wilmington is the chief port, ship traffic passing up the Delaware River. A Government canal connects Delaware and Chesapeake Bays. A concrete motor highway completing a trunk line through the State was built at a cost of ncarly \(\$ 4,000,000\) by Gen. T. Coleman duPont (U. S. Senator) as a gift to the State.

Railway mileage, 1921, was 335.
About 38,000 attend the public and other schoo's, and the percentage of illiteracy for the State was in the 1920 eensus, 5.9 , native white, 1.8 , and 19.1 for the Negro, who totals 15 per cent. of the whole population. Edueational progress is being made as proved by the 1910 illiteracy percentage, 8.1 reduced materially by 1920. Ability to read and write are requisites for voting.

Delaware is the only State to retain the whipping post as a punishment for criminals.

\section*{DISTRICT OF COLUMBIA.}

Area, square miles. . . . . . . . . . . . . 70. . . . . 49 th in rank Population, 1920.............437,571.......42d in rank

The District of Columbia is the seat of the Federal Government of the United States. Its area was originally 100 square miles taken from the sovereignty of Maryland and Virginia, Virginia's portion south from the Potomac being later ceded back to that State. It lies therefore on the west central edge of Maryland on the Potomac River, opposite Virginia. It is in the South Atlantic group. The Distriet is co-terminus with the City of Washington.

Almost the entire activity' is governmental, there being regularly employed therein from 100,000 to 120,000 persons. Industrial interest is mostly output for local consumption, although there has been effort by some to develop Washington the Capital City, as an economic centre. Navigation is carried on via the Potomac River, which is a branch of Chesapeake Bay. The river was naturally capable of accommodating large vessels, and has bcen improved in depth and otherwise, so that heavy war or commercial craft may pass. Washington is the chief railway stopping point en route between North and Soutn. The Union Station in Washington is said to be not only one of the most efficient in the worid for passenger transportation handling but also one of the finest architecturally ever built. Railroad mileage, 1921, was 36.

The distinctlve feature of the city municipally is the fact that the Government is by the Congress dircctly as to iegislation, and by Executive commissioners named by the President of the United States, conflrmed by the Senate. Each House of the Congress has a Committee on District of Columbia, and taxation current and for improve ments is, by and large; borne half by the Congress, half by the pcople locally.

Physically, the distinctive feature is the excellent town planning done there by Maior Plerre l'Enfant, French engineer, at the instance of George Washington. By a peculiar aecident, Washington obtained a most cxcellent physical arrangement, economic and social. Major l'Enfant, drawing on French history, laid out the city with wide diag onal avenues, traversing strcets planncd on the "gridiron' method. Major l'Enfait's idca was that, in the event of street riots, artillery could rakc the city, and plling of barricades would be difficult if the diagonals were made very widc.

The result was a bcautiful city with ideaily economic traffie outlets in all dlrections, wide where needcd, narrower where widc highways are not ncecssary. The strccts are wonderfully shaded with a luxurlant growth of trces, which have bcen brought to ingh perfcetlon by thc Unitcd States Department of Agrieuiture, and brought, as weil, from almost every country in the world.

There is gencrous provision for park spacc. There is the Mall, running from Capitoi Hill toward and
around Washington Monument In largc park spaces back of the White House and Executive Departback of the White Hollse and Executive Departplan, for which Charles Moore of Detroit was chlefly responsible), for the accommodation of a group of governmental structures on a scale apparently never before contcmplated by any other Government in the world. There are many smalier parks scattered through the city, and little strcet cross-
ing resting places. Rock Creek Park is one of the ing resting places. Rock Creek Park is one

Many wealthy Americans in late years have erected palatial dwellings in Washlngton, and there are many fine country estates nearby, with desirable suburban countres on all sides. The Census of 1920 returned 204 farms in the. district.

Educatlonaiiy, the District of Columbia is far advanced. The higher institutlons are Georgetown University (Carholic), George Washington Unlversity, the Cathollc Universlty of Amerlca, the National Methodist Universlty, Howard University for Negroes, and two normal schools for the training of teachers.

Illiteracy in the District is low at 2.8 for all, native white, \(3-10\) ths of onc per cent, Ncgro, 8.6 , Negro population belng almost exactly 25 per cent. of the total. About 6 per cent. are foreignborn.

\section*{GEORGIA.}

Area, square miles . . . . . . . . \(59,265 . . .\). . 20 th in rank Population, 1920........ .2,895,839.: .... 12th in rank

Georgia, of the South Atlantle group. which was one of the Thirteen Original States, is bounded on the north by. Tennessee, North Carolina and South Carolina, on the east by South Carolina and the Atlantic, on the south by Florida, and on the west by Alabama.

Agriculture is very important. Of the total of about \(40,000.000\) acres, \(25,000,000\) are in farms, or 62.5 per cent.; and more than \(13,000,000\) actualiy improved, or about 32 per cent.

All crops. Census of 1920 , were valued at \(\$ 540\),613,626 , of which \(\$ 69,720,000\) was for cotton in \(1,681,907\) bales from \(4,720,498\) acres, Georgla being the second cotton State, only Texas exceeding it. Crops are various-cotton, corn, oats, wheat, sugar cane; corn the most important cereal, with 69,975,000 bushals produced in 1919 :

Ten States exceed Georgia's 25;000 acres devoted to tobacco. Georgia comprehends all things grown in the temperate and sub-tropical zones, is improving its methods with enthusiasm, and livestock values are very high.

Manufacturing has, however, passed agrlculture in relative importance, the value of the industrial output, Census of 1920 , being \(\$ 693,237,000\). Cotton goods, from the lately developing mills, led with \(\$ 192,186,000\), and oil and cake from cottonsced followed with \(\$ 99,320,000\); so that, cotton and its several forms is Georgia's chief single interest. The cotton mills operate more than \(2,000,000\) spindles. The percentage of child labor, 1920, was 17.2 in Atianta.
From the extensive forested area \(\$ 25,836,000\) of umber and timber products were shipped, land fertilizers were valued at \(\$ 47,480,000\), and other industrlal concerns include car works, shipbuildindustrlal concerns include car works, shipbuildpreparations and others.

The State has important mineral resources, coal, iron, manganese, gold and silver, not yet highly developed, and fisheries of oysters and other shellfish are considerable

Transportation ls highly developed, with abundant rall llnes and large ocean shipping in and out from Savannah, chief port. A third of a blilion of dollars of exports went therefrom in 1920, vessels up to 32 feet draft being accommodated at high tide across the bar, and 26 feet at all times.

Railroad mileage, 1921 , was 7,326 .
Negro population is 42 per cent. of the total, bringing up the percentage of illiteracy for the whole State to 15.3 , that of native white being 5.4 and of Nagroes 29.1. liilteracy percentage in 1910 was 20.7. Of 2,895,832 population, there were Census of 1920, 570,000 attending schooi

Atlanta, chief city and capltal, is accounted one of the progressive cities of the South; and nationally holds high place in banking strength.

Water power abounds, and manufacturing advance has been due largely to it.

The lumber cut, mostly pine, exceeds \(500,000,000\) leet, although production, as in most of the Southern States, is due soon to diminish to negligiblc quantities for exportatlon, owling to the enormous areas of the originally large forested lands having bcen cut over.

Okefonokee Swamp, in the southeastern corner, 400,000 acres is. Ilke the Everglades of South Florida, potentialiy rich for agriculture when dralned.

\section*{FLORIDA.}

Area. squate miles .58666 2156 in rank Population, \(1920 . . . . . .998,470 . .92 d\) in rank

Florida. a South Atladtic State reputed to have been discovered by the gpaniard. Ponce de Leon in his search for the "fountain of perpetual youth," is the southeasternmosi. roint of the United. States, bounded on the north by Georgia and Alabama, on the east by rhe Atlantle Ocean, on the south by the Straits of Florida. and on the west by the Guif of Mexico.

It is one of the three or four most important. Irtut States, its cultivatcd lands producing in ail \$80,256,806 in 1919. Elorida is lowest of all Southern States in cotton production. The sub-tropical products prevaii in fruits and other land output.

A present and future source of great wcalth are the natural deposits of phosphatic rock, whence normally, pre-war, more than \(1,000,000\) tons were exported for foreign use as land fertilizer, and much was used domestically. It producec \(\$ 6,678,888\) worth in 1919. It is the world's largest phosphate measure.

Florida being of coral formation, there are no high elevations, and in the southern part are vast.awamps, the Everglades, which are being drained, providing iarge potential agricultural wealth.

Less than one per cent of the area is forested, but from it comes about. one-half the national supply of turpentine and resin, known commercially as 'naval stores.
The state is penetrated by several rivers, chief of which is the St. John, up which steamers ply for 150 miles. At the mouth lies St. Johns. said to be the oidest white settlement on the continent.

Raiiroad mileage. 1921, was 5.212.
Florida is the resort of very large numbers of winter tourists, there belng a dozen places of that character scattered along both coasts and iniand. Coastwise, the vegetation is sub-tropical and in the interior is a coniferous tree-clad; sandy region where citrus fruits have been developed highly

The celebrated resort is Palm Beach on the eust coast, to which go some of the most ardent devotees of fashion:

Three of each eight persons are Negro. The iliiteracy reported in the 1920 census was 9.6 per cent. against 13.8 in 1910, indicating remarkable rogress in popular education. Native white illiteracy. was 2.9 , and of Negroes 21.5. Public school enroiment was 196,405, and there are the John B. Stetson University of De Land. the University of Florida at Gainesville, Rolin's College at Winter Park, and the State Coilege for Women at the capital, Tallahassee.

\section*{IDAHO.}

Area, square miles . . . ..... . 88,888. ..... 12th in rank Population, 1920. . . . . . . 431,866......48d in rank

Idaho, of the mountain group, is situate astride the Rockies in the Pacific Coast region, bounded on the north by Brltish Columbia and Montana, on the east by Montana and Wyoming, on the south by Utah and Nevada, and on the west by Oregon and Washington.

Its topography, mountainous with broad level plateaus It classes as of the irrigation States agrlculturally. the lands when watere being exceedingiy productive, fruit raising having been hignly developed. Most of the plains lands which have not been reclaimed by irrigation remain unproductive, with considerable livestock interest thereon. The Rocky Mountains traverse the State, hignest elevation being Mount Hyndman, 12,078 feet, The Snake River is the chief stream, is the western boundary of the southern two-thirds of the State, and is navigable for a considerable distance above Lewiston where it makes off into the State of Washington on its way 400 miles to the Pacifie Ocean. The climate is dry and stimulating, warm in summer and cold in winter.

Idaho is undeveloped, having large minerai resources, and much land yet to be. covered with irrigation waters. The Federal Reclamation Service has already bullt several important irrigation projects, and many privato projects have been carried through.

Present mineral production is yery great; especially in the northern or "Panhandle" section, wherc the lead output is second only to that of Missouri. Zlnc production is sixth (valuc of both lead and ninc, \(1921, \$ 9,529,723\) ) finiong the States, gold
eleventh (1921, \(\$ 542.200)\) : sllver fifth (1921, \(\$ 7\). 200,319 ) ; lead (1920, \(\$ 22,292,000\) ); and copper ( 1920 , \(\$ 491,000\) ). But all the principal metals are present, and tungsten is a source of interest.
The value of the agriculturai yields. Census of 1920, was \(\$ 126,495,111\), there being thirty States that exceeded it. Of the total of \(60,000,000\) acces, there were 42,106 farms. Census of 1920 , comprising \(8.375,873\) acres, of which \(3,266.386\) were irrigated. Varied crops were raised, wheat, \(27,079,000\) bushels; oats, \(7,740,000\); barley, \(2,784,000\); potatoes, hay, all sorts of vegetables.

The livestock industry is very great. the wool clip alone in 1920 being \(21,702,000\) pounds; sheep. eatitie and horses aboundlng, cattle numbering 642,000 .

Normally, almost a billion feet of lumber are cut. The forest wealth is large. white and yellow pine, larch, white fir and cedar supply activity to many mills. It is claimed that the sawmlll at Potlach, Idaho, cutting 750,000 feet daily, is the largest ln the world. Idaho pine is famous for ship and yacht masts.

Railroad milleage, 1921, was 2,877 .
Only Iowa, with 1.1 percentage of illiteracy shows a better record than Idaho and Oregon with 1.5 each; native white, flgures of 1920 census, \(3-10\) of 1 per cent., foreign-born, 6.5. Educational institutlons show an unusually large proportion in school105,000 of the total State population of 431,866 ; or one for each four persons. Higher institutions are the Unlversity of Idaho at Moscow, the College of Idaho at Caldwell. and State normal schools at Lewiston and Albion.

A summer feature is the running of the dangerous but , icturesque Snake River in flatboats, together with the unexcelled fishing in the mountain streams, where speckled trout are taken.

\section*{ILLINOIS.}

Area, square miles . . . . . . . . \(56,665 \ldots\). . . . 23 d in rank Population, 1920.........6,485,280 . . . . . . .sd in rank

Iliinois, the third most populous State of the Union, lies in the East North Central group, its northeastern corner touching Lake Michigan, the Mississippi River flowing along its western boundary line, the Ohio River along its southern end, and is bounded on the north by Wisconsin, on the east by Indiana, on the south by Kentucky and Missouri, and on the west by Missourl and Lowa. It is intensely industrial, agricultural, mining, and water and rall transportation in interest.

Illinois is almost uniformly level, being situate in a glacial moraine, and is alluvial \(\ln\) all parts, with a climate such as prevails in the whole of the Middle West. It is so level that a railway possesses one precisely straight llne 100 miles long in which scarcely a dirt cut was necessary-a vast prairie. once largely wooded, now with but 10 per cent. of forest cover. With the exception of Iowa, no other State has so large a proportion of lands susceptible of cultivation.
r.t is provided with remarkable mileage of riverways, the Mississippi, the Ohio, and the Wabash, which skirts the southeastern corner. The Illinois River is the principal intrastate river. The artificial waterway is the important Chicago Drainage Canal, 40 miles from Chicago on Lake Michigan to Jolict on the Illinois River, a unique engineering device which supplies drainage out from the flat lake-coastal district around the city and the Chicago River, and really reverses the natural tendency to drain into Lake Michigan. Eventually, the canal will be extended by improving the Illinois River to the Mississippi. giving Chicago navigation from "the Lakes to the Gulf" of Mexico.

Trafflc on the Great Lakes to and from Chicago (population, \(1920,2,701,705\) ), which is the second most populous city in the country, is attaining immense proportions, in general cargo as well as in ore brought from the Minnesota. Wisconsin and Michigan mines to the great works of the United States Steel Corporation in Gary, Indlana, a suburb of Chicago.

Although second to Texas, which has 16,041 miles, Illinois, in 1021, with 12,188 miles of rallway has the heavlest raliway transport tonnage in the Unitcd States, Chicago being the greatest rallway centre in the world.

The industrial interest of Ilinnois far exceeds its agricuitural. The 1920 census gave the State \(\$ 864,737,833\) value of ail crops, and \(\$ 3,250,000,000\) value of manufactured products. Were the products of the Gary works inciuded, as economicaily they should be, the value wonld be vastly more; while for the same reason, the Immense Standard Oil and other steel working industries of the Fast Chlcago-Indiana, dlstrict, should be added. The
range of industrial output is great-irull and steel, the greatest meat packing works-the Union Stock-yards-in the world, machinery, electrical equipment, implements, furniture, motor cars and railway cars. woodenware, flour, woolen goods, and scores of other things. Betwecn \(\$ 2,500,000,000\) and \(\$ 3,000,000,000\) is invested in manufacturing, the products going to all parts of the world.

Everything apnertaining to the temperate zone is produced on Illinois lands-anl cereals, vegetables. fruits and livestock. The 1920 census gave Illinois's corn production as \(301,000,000\) bushels, nearly 10 per cent. of the national crop; wheat, \(65,675,000\); oats. \(123,960,000\); and immense output of other crops. The Chicago Board of Trade is the principal grain dealing exchange in the country.

Bltuminous coal underlies more than half the area of the State, Illinois ranking third in mineral output. The 1920 census assigns coal output values of \(\$ 240,000,000\), with oil and natural gas in generous measure. The other base minerals are found in that belt
The 1920 census showed \(1,116.099\) pupils and students in all educational institutions reporting, about one in each six persons. Besides a very extensive public school system, there are 29 colleges and unlversities, and five State normal schools for training of teachers. The most prominent universities are the University of Illinois at Urbana, 9,403 students; the University of Chicago (endowed for more than \(\$ 30,000,000\) by John D. Rockefeller), 9,032; Northwestern University at Evanston, 4,759; Loyola University at Chicago, 1,621; James Milliken University at Decatur, 1,538

Illinois shows 3.4 per cent. of illitcracy, Census of 1920, native white, \(8-10\) of 1 per cent., foreign-born, 11 per cent., and Negro (of whom there has been a remarkable influx induced by the late war demand for labor), 6.7 per cent. Of the \(6,485,280\) of population, Census of 1920 , native-born whites were 5,092 ,382; foreign-born, \(1,206,951\); per cent. of native, 78.5; forcign. 18.6; Negro, 2.8. Chicago is the chief Polish centre of the country, with a large percentage of Jews and all classes of immigrants.

Tourists find a wealth of art centres in Chicago, such as the Field Museum and the Chicago Museum of Art, with many art schools. Chicago is a great national convention resort; the Auditorium, seating about 8,000 , is usually the place of entertainment.
Chicago's park and boulevard system, as planned is perhaps the most ambitious ever conceived by any city in the world, with three large parks already developed, connected by a wide boulevard along the lake front cutting through the heart of the city, the whole laid out by some of the greatest city planning and landscape architects in the world.

\section*{INDIANA.}

Area, square miles . . . . . . . . . \(36,954 \ldots . .\). . 37 th in rank Population, 1920. . . . . . . .2.930,390 . . . . . .11th in rank
Indiana, in the East North Central region, touches Lake Michigan at the northwestern corner of the State and is bounded on the north by Michigan, on the east by Ohio and Kentucky, on the south by Kentucky, and on the west by Illinois. The Ohio River, important in navigation. skirts the entire southern side, and the Wabash River, also susceptible of greater navigation development, about half of the western boundary llue. There are 550 niles of riverways navigable.

In general, Indiana nccupies a fairly level tableland and was once a glaclal moraine. The climate is characteristic of the Middle West, warm in summer and rather cold in winter.

Industry, with \(\$ 1,901,846,000\) output, Census of 1920, excceds agriculture with \(\$ 497,229,719\) value of ail crops, and mining, \(\$ 59,926,558\).

Transportation is heavy, with 7,586 miles of railways. Immense tonnage moves riverwisc on the Ohio and Wabash, and also enormous tonnage cnters and leaves the Lake Michigan ports of Whiting, Standard Oil town; Indiana Harbor and Gary (United States Steel Corporation eity), In iron ore, steel products, cereais and coal. Electric interurban traffic is the heaviest in the country.

Manufacturing compreliends practically all standard products-steel, machinery, very many motor cars, tinplate, cenient, velicles, flour, glass, of reflning, meat packing, there having been in the past 20 years, as in ail Middle Western States, a vast industrial invasion to get nearer ultimate markets and obtain labor. Many Indianans (Hoosiers) divide their time between farm and factory.

The 1020 census showed the value of all crops to be \(\$ 497,229,719\), with corn leading-169,848,000 bushels-about 5 per cent. of the national crop; oats, \(45,072,000\); wheat, \(24,144,000\); and all other
temperate zone products, including fruits and livestock, generously represented.

Evansvilie, on the Ohio River, is the iargest hardwood market in the country, selling not only the heavy State cut from hardwood forcsts of vast value, which formeriy covered much of the state, but also handiing immense output from Southern forests.

Indiana ranks sixth in coal production, bituminous and cannel-a very fine fuel for flrepiaces-with \(\$ 56,026,558\), Census of 1920 . There are oil wells also, the State ranking twelfth in production. Many other basic minerals are found.

Rairoad mileage 1921, was 7,426 .
The Increase of industrial interest in tine past two decades is the feature of Indiana's later history. In that space of time, the towns along the shore of Lake Michigan liave been developed into vast beehives of industry, and Gary especialiy has be zome one of the chief steel points, increasing rapidly in population and being known also for its school system which has been copied largeiy in the East.

Coincldentally, Indiana has deveioped a remarkable school of fiction and drama writers, among them Booth Tarkington, Creorge Ade, and Meredith Nicholson. In the southern part many minerai springs are found, principally at French Lick. where famous hotcis entertain tourists from ail parts of the world, and wherc mineral waters are bottled for domestic and foreign consumption.

Indiana has four educational institutions of fame-De Pauw University at Greencastie, with 1,025 students; Indiana Univicrsity at Bloomington, 2,659; University of Notre Dame, Catholic, at South Bend, 1,123; Purdue University at Lafayette, 3,113. The public schools enroli 575,000 ptipils. illiteracy is low at 2.2 per cent., Census of 1920 ; native white, 1.3 ; forelgn-born white, 11.8 ; Negro, 9.5 ; native whites being 91.8 per cent. of the popuiation; forelgn-born, 5.9 ; Negro, 2.2 . A racial phase was the influx of many Germans at the time of the German revolutionary movements of the last century, the result being that now from Fort Wayne southward the German population is predominant in many districts numericaily and sociaily. That portion of the population has always been exceedingly thrifty and dependable economically, and has aided much in the late remarkable industrial deveiopment
In the intense industriai district aiong the lake the foreign-born population predominates, with Siavs of the several European oountries very numerous, and in the World War Indiana responded to the first call for volunteers as promptly as any State in the Union, as proved by the records in Washington

For the last four decades the centre of population of the United States has been in the southern part of Indiana, moving very slowiy west.

\section*{IOWA.}

\section*{Area, square miles}
. . 56,147 \(\qquad\) 24th in rank Poputation, 1920.

2,404,021......16th in rank
Iowa lies in the East North Central part of the Middie West, bounded on the north by Minnesota, on the east by Wisconsin and lilinois, on the south by Missourl, and on the west by Nebraska and South Dakota. The Mississippi River flows along the entire eastern boundary line, and the Missouri River aiong three-fourths of the western line.

It is very level, only one point of elevation being 745 feet above the mean. Iowa claims the largest proportion of actualiy arable lands of all States and proves it by the immense agricuiturai production, soil and cilmate combiring to glve it that prestige, the climate being Middle West characteristically.

The value of ail crops, Census of 1920, was \(\$ 890\),391,299 , ezceeded only by Texas with \(\$ 1,071,542,103\) on five times the land area of lowa. Farm property exceecis \(\$ 8,000,000,000\) in vaiue, its area being \(33,474,896\) acres of the total of \(36,000,000\) acres in the State. 14 per cent. of the corn of the country. Census of 1920, was produced in Iowa-444,190,000 bushels-wheat being low with \(10,102,000\), and potatoes high with \(4,128,000\) bushels, hay with \(4,659,000\) tons, and oats with \(187,045,705\) bushels.

Live stock interests are immense, with ail animais raised in the temperate zone abundant, and dairy and pouitry outputs ilikewise enormous.

Fruit interests are confned mostly to the smailer varieties, and garden stuff is heaviiy oultivated.

The farins number 213,439 , averaging 156.8 acres and 134 actualiy improyed. Iowa is the strongest centre of the iate agriculturai novement, which resulted in the rapid deveiopment of the American Farm Bureau Federation, the President, Jannes Riley Howard, being an Iowan, and agrarian influence dominates the State. Iowa has the largest
ratio of automobiies per capita of all states, the farmer-owned prevailing.

Transportation is highiy, deveioped, witlr railways iiteraliy ribbing the State, for vast through, as weli as immense local, tonnage. River tonnage on the Mississippi moves in vast volume, with much on the Missourl.

Railroad mileage 1921, was 9,808 . Interurban ciectric service is greatly developed.

Coal underlies about 19,000. square miies, the output, Census of 1920 , being \(6,300,000\) tons, lead being found in the northeastern part, and quarry output heavy.

Manufacturing naturally consumes mostly agricuitural products, in preparation of foodstuffs for the market-meat packing, flour, ete., with considerable development also of machlnery : making to supply the immense nearby markets. More than \(\$ 500.000 .000\) is invested in manufacturing, the output, Census of 1920 , having been \(\$ 310,750,000\).

Lowa leads ail States in literacy. Only 1.1. per cent., Census of 1920, are illiterate, the percentage of native whites being \(5-10\) of 1 per cent., of foroignbol'n white. 4.9, and of Negro, 8,1. The State has a iarge pereentage of native-born whites-89.8.

There are about 600,000 persons at schooi in Iowa, or one for each four of the population. . The public school system is highly advanced, in method and provision for the people of all cladses.

The College of Agriculture at Ames is clalmed to be the leading institution of that character in the country. It has 4,859 students, and has pursued scientific investigation along all lines that appertain to agrarian interests, with much originai research. and development of methods for crop and animai production and care.

The University of Iowa at Iowa City has 2,889 matriculated; Upper Iowa University at Fayette. 388, and Drake University at Des Molnes, the capital, 1,460.

A signal enterprise is the utilization oi vast electricai power in the Mississippi River at Keokuk, where a remarkabie dam has been thrown across the rlver.

The diffusion of prosperity is indicated, Census of 1920, by the \(\$ 391,505,000\) deposits in savings banks by 905,970 persons, averaging \(\$ 432.14\) per-account, or almost one account for each two and a haif persons.

\section*{KANSAS.}

Area, square miles. . . . . . 89, 158...... 13 tht tn tank

Kansas, a West North Central Statè, in almost the exact geographical centre of the United States. is bounded on the north by Nebraska, on the east by Missouri, on the south by Okiahoma, and on the west by Colorado. It is varied in topography, with prairies extending westward, where elevatlons of 4,000 feet are fotind. There is heavy forest cover in the eastern hail, much hardwood, black walnut abounding, Thee climate is severe in winter and warm in summer, "but constantiy modifled by the prevaient winds. The Missouri River skirts the northwestern side for 150 miles, giving navigation to St. Joseph, Atchison, Leavenworth and Kansas City, the oniy other considerabic river being the Arkansas, which flows through from Colorado. The Kaw is another river.

Railway traffle is mostiy east and west, and several of the largest systems have ilnes, with iiberal provision for branch service, to care for the heavy throlngh traffc and the iarge state production. Railroad mileage 1921, was 9,388 .

Kansas is essentially agriculturai, although natural mineral weath adds heavily to production The Census of 1920 gives \(\$ 588,923,248\) as vaiue of all crops, livestock products not inciuded.

The totai acres in the State is \(56,000,000\), of which by the 1920 census there were \(45,425,179\) in farms, with \(30,600,760\) actually improved. Corn is the chief crop-132,786,130 bushels-next to wheat, \(140,842,516\) bushels, additional production runnins the gamut of temperate zonc foodstuffs in cereals. tubers, sugar bcets and the several kinds of animal foods. Farming is narked: witin the most modern of cquipment in machinery,: Cotton and tobacco are grown to some extent, the elimate and soli being such as to enable the firther deveiopment thereof when economic conditions demand.

In the western reaches of the valiey of the Arkansas River irrigation is extensive and becoming more important ( 45,000 acres under water) as demand for land increases in the whole country. Dairy and poultry products run above \(\$ 60,000,000\) annualiy.
Kansas derives weaith from livestock husijandry second to cereai producing. The herds range in the Western and southwestern portions mostly, althongh not relatively so important as in the earlier days

Manufacturing, including smolting of ore, refining or oils, meat handling. and milling is very extensive the 1920 census assigning \(\$ 913,667,000\) as the value of the products of all industries. Siaughterlng and meat packing leads with \(\$ 427,663,000\). and flour milling comes next with \(\$ 206,881,000\) and oil refining with \(\$ 63,786,000\), while car building and repairing by the railways adds annually \(\$ 28,231,000\) and butter alone \(\$ 24,444,000\)
The coal fields underlie more than 15,000 square miles and, Census of 1920 , produced \(5,982,143\) tons, and the oil measures, which are very extensive. yieided \(38,501,000\) barrels of petroleum. There are unc, lead and salt.

Kansas has only 1.6 per cent. of illiteracy, that of the native whites being \(6-10\) of 1 per cent. of foreignborn whites, 10.5 ; and of the Negroes, 8.8 ; the Kansas colored man having advanced far along the roadway toward normal literacy. The attendance at ay educational institutions is more than 400,000 , or about one for each four persons, with 7,500 students in the six colleges.
Kansas was one of the first. States to adopt Prohibition, and a unique present feature is the State Industriai Court, which essays to prevent strikes, and which the Governor, Henry Allon, alleges is used more by laborers lnitiating cases than by employers.
The diffusion of prosperity is to be judged by the fact that agricultural, livestock, dairying, mineral and manufacturing annual production totals about \(\$ 1,700000,000\), or about \(\$ 2,180\) for each man, woman and child in the State.

\section*{KENTUCKY.}

Areáa, square miles.......... \(40,598 . . .\). . 86 th in rank Population, 1920...........2,416,630.......15th in rank
Kentucky, grouped as East South Central, a border state between the North and South, is bounded on the north by Indiana and Ohio, on the east by West Virginia and Virginia, on the south by Tennessee, and on the west by Indiana and Illinois. The Mississippi River touches the westernmost tip, and the Appalachian Mountains cross the eastern side, the Ohio River skirting the entire northern boundary. Navigable rivers flow past the State for a total distance of 813 miles. The topography is broken, with many hills dotting the tablelands, of which the famous Blue Grass region in the northern part, east from Loulsvillc, is best known and most productive.
Ag leulturally, the State is very productive; \(\$ 347,338,888\) is given by the Census of 1920 as the value of all crops, which included the highest quantity of tobacco of ail States, 467,500,000 pounds; and a most varied list of temperate zone products, shadlng off into those distinctively Southern. The corn crop in 1921 was \(82,150,000\) bushcls.

Livestock interest is important, Kentucky horses having been for long world famed, its thorougnbreds not being excelled anywhere. Other domestic animals abound, and fruits are extensive.

Coal mined in 1920 was \(27,678,572\) tons, and petroleum lifted, \(8,692,000\) barrels.

Forest wealtin is great, conifcrous and hardwood trees abounding, and normally yielding annually \(\$ 20,000,000\).

Manufacturing engages about \(\$ 200,000,000\) of capital, and outputs about \(\$ 250.000,000\) of products, and mostly uscs raw materials that come from the soils, although clothing industry is developing.

Railroad mileage, 1921, was 3,929 .
The illitcracy percentage is 8.4, that of native Whites being 7, of forelgn-born 7.3, and of Negroes 21. The State public school system enroils about 550,000 , and four universities, 5,200 .

The distinctive natural phenomenon is the 9,000 square miles in Central Kentucky which is ribbed with underground passages and caves. chief of which Is the Maminoth Cave, with its 150 miles of connecting passages.

In the old days before Prohibition, Kentucky was famed for its whiskeys, Bourbon County, at Paris, in the Binc Grass region, having lent its name to the corn liquor of that name formerly made and consumed in the Uniterl states

The Kentucky mountains, picturesque and bcautiful, have for years been the scene of leuds between families, which desccided from farher to son through gencrations, and which often broke in bioody conflicts, now happlly passing away.

\section*{LOUISIANA.}

Loulsiana, situate in the West South Central region, on the Guif of Mexico, at the mouth of the Mississipai River. is bounded on the north by

Arkansas and Mississippi, on the east by Mississippi State and the Gulf, on the south by the Gulf, and on the west by Texas. It is practicaliy ali alluvial built up from the silt brought down by the Mississippi River, which has thrust out a long point into the Gulf, as the southernmost part of the State.

There arc no hilis of consequence, and much of the lands are lower than the immediate banks of the great river, powerful levees being neccssary to protect from constant overflow. As a conscquenc of the downwash of river sedimentary matter, the lands were naturally highly enriched, and subse quent overflowing of the waters has added food values to the soils, as does the Nile in Egypt.
The western part, immediately next to Texas, shades off toward the drier character of climate and solis, the climate of Loulsiana for the greater part being rather moist and very warm in summer wlth little of winter cold. It is semi-tropical.

The Sabine River bounds the State on the west, and with the Red River and the Mississippi, Louisiana has 4,794 miles of navigable waterways, much of it being on the large bayous in the south.
The Mississippi River has always largely determined the character of New Orlcans, chief city, for there river traffic from earliest days has been extensive, and New Orleans has dominated the State economically. For some years after the Civil War of 1861-5, river traffic fell off, but is now being re vived. and is expected to grow to very heavy volume.

Railroad mileage, 1921, was 5,223 .
Agriculturally, Loulsiana is prolific-rice, cotton, sugar cane, corn, sweet potatoes, tobacco, especially fine, fruits of all sub-tropical sorts, and nuts are produced largely. The value of all crops, Census of 1920 , was \(\$ 231,506,000\). Nearly all the sugar cane and molasses produced \(\ln\) the country comes from Louisiana, the value bcing \(\$ 44,000,000,1920\) census. Cotton values the same year were \(\$ 53\), 250,000 . Livestock interests are extensive. It is second in output of lumber

Tine State ranks fifth in petroleum output, 1920 census, \(35,649,000\) barrels. Sulphur also is largely produced. There are more than 6,000 square miles water covered, suitable for the propagation of oysters; the shrimp catch is very valuable, and commercial fishing an important industry. Trappers market muskrat, opossum, raccoon, mink and other furs in great quantities.

Manifacturing industry centres mostly around the use of soil raw matcrials, the annual output belng worth about \(\$ 300,000,000\).

Foreign tradc through the port of New Orleans Is large, 1920 exports equalling \(\$ 589,409,222\), and imports \(\$ 252,313,000\), mainly of cotton and cottonseed, wheat brought down the Mississippi, fiour, rice and other products.
There were, in \(1921,355,000\) cnrolled \(\ln\) the public schools of a population of more than \(1,800,000\) divided, two-thirds white and one-third Negro. Much of the population retains the original French blood, and considerable numbers the mixture of French and Spanish, which produced the Creoles. About 6,000 attend the colleges and universities.
New Orleans, the chief city, is a welcome resort for tourists in the winter, having picturesqueness and the flavor of olden times, the annual Mardi Gras being the principal attraction. Much through passenger traffic flows tnrough New Orleans to and from the Pacific Coast, raliway and steamer facilities being well supplied.

\section*{MAINE}

Area, square miles........... \(33,040 \ldots . . .38 \mathrm{ch}\) in rank Population, 1920............768,014...... . 35 th in rank

Maine. in New England, northcasternmost State, is bounded on the north by Quebec, Canada, on the east by .New Brunswick, Canada, and the Atlantic Ocean, on the south by the Atlantic, and on the west by New Hampshire and Quebec.

It is naturally heavily wooded, mostly with coniferous trces, is of broken topography, rising to mountainous clevations in the northwest, Mount Katahdin. 5,268 fect, the highest, and slopes in broken form toward the coast, which is rugged, tortuous, pleturesque and indented with many harbors, with many islands adjacent, and has very extensive naturai water power sites, already somewhat developed, but assuring great industrial capacity in the future

Its waters abound in fish, its forests in whld animais, and it has a climate rather intenseiy cold in winter, but beneficent in summer. It has more than 1,600 lakes. several more than 100 milies long. The coastline is 278 miles long.

Agriculture, lumbering, manufacturing, quarrying and fisheries are thic clifef industries.

Of the \(20,000,000\) total land acres, about onethird la farming area, of whleh about two-thirds is improved. Potatoes form the leading crop, the 1920 census showing \(25,531,000\) bushels worth \(\$ 52,339,000\). Hay is a large crop, and all vegetables and considerable small fruits are produced. The and considerable smal fruits are prodit 1920 census, was \(\$ 100,152,324\). Value of all crops, 1920 census, was \(\$ 100,152,324\).
Livestock and dairy produets add to the weath, the milk production coming in part to supply New York City.

In granlte output it ranks thilrd, Vermont and Massachusetts exceeding; it is flrst in feldspar, and produces many other of the cruder mlnerals for bullding.

Lumber is the principal manufacturing product, the cut, Census of 1920 , being \(650,000,000\) feet, white pine, spruce for wood pulp, hemlock, balsam, birch, cedar, oak, maple; beeeh, ash, and basswood or linden. The paper pulp milis produce \(\$ 70,000\),000 annually, and along the rivers are many water power motived textlle, tanning, olleloth, boots and shoes, canning, flour and machinery works. The total value of the manufacturing output, 1920 , was \(\$ 465,822,000\), paper and wood pulpleading with \(\$ 93,917,000\), cotton goods next with \(\$ 56,564,000\). boots and shoes, \(\$ 48,689,000\) woolen goods, \(\$ 42\),442,000 , lumber, \(\$ 28,515,000\), etc.

Transport by water ls mostly coastwlse, although there is some forelgn. The rallroad mileage, 1921, was 2,295

Maine ls distinctively a pleasure resort, summer bringing many thousands of tourists and residents for the season, and the fall many hunters. Luxurlous hotelg are maintalned, and there are many private lodges and summer nomes, while many artists go to palnt the beautles of the Maine landscape and coastline

Portland, the chicf port, has a large steamer tourist traffic, as well as extensive freight tonnage by water and by rall.

Illiteracy percentage is 3.3, that of native whltes 1.6. and of foreign-born 11.1. Publle schools enroll about 170,000 , and higher educatlonal institutions rank well, with Bowdoln, at Brunswick, among the country's best.

\section*{MARYLAND.}

Area, square miles . . . . . . . . .12,327. . . . . \(415 t\) in rank Populntion, 1920........... i,449,661........28th in rank

Maryland, a South Atlantle border State between the North and South, is bounded on the north by Pennsylvania, on the east by Delaware and the Atlantic Ocean. on the south and west by Virginia and West Virginia. It is penetrated.from the south by Chesapeake Bay, a wide arm of the Atlantic, and an important channel of water-borne commerce which has made Baltlmore a great seaport. The Potomac River flows along the western boundary Hne, also important in commeree. The topography: is yaried, low and flat in the portions toward the ocean, and rising to mountainılevels ln the western sections, Great Backbone Mountain, 3,400 feet, the highest. The state is distinctly separated by the bay into Feastern and Western shore parts, each having somewhat of soclal and lndustrlal indlviduallity The climate is warm, with mild, humid winters.

The Census of 1920 showed \(\$ 109,683,574\) as the value of the crops, principally corn, tobacco, wheat, oats, hay, fruits of all kinds grown in the soutn temperate zone, vegetables being produced hcavily for the markets of the larger cities as far north as New York. Products are varied and profitable on account of the proximity of big city markets.
Mlining is principally of coal, about \(3,600,000\) tons being the normal output.

Manutacturing output, Census of 1920, was valued at \(\$ 873,945,000\), and lan the gamut of almost all classes. Shipbuilding led with \(860,844,000\), followed by cothing, \(\$ 60,414.000\), slaughterlug and meat packing, \(841,433,000\) and the iron and teel Lndustry, \(\$ 19,884,000\), which is fast growing to great importance. The census reports showed 60 classifications with more than \(\$ 1,000,000\) of output cach. which afford proftable diversification in industry and employment for a versatile worling tolk
Transiportation 1s highly developed, water and rall. Rallroad mileage, 1921, was 1.436. Baltimore is one of the country's prinelpa! ports, and is growing In lmportance much fester than the Nation's whole volume increases. Water tramic coastwise is very heavy, and several substantial steamer Ines also ply between Baltlmore and foreign ports. Much of tho product of the South comes through Baltlmore, and that port gets large share of the tonnage of the North and West.

The population is 17.9 per cent. Negro, is 5.0 percentage of illiteracy for the whole stateatages The swiftness with which educational advshowil for the masses is sweeplng away llliteracy is 7.2 in by the figure of 5.6 for 1920 , compared with, and 1910. In the schools were more than \(250,00 \mathrm{Hop}-\) the higher institutions are celabratcd. Johns any kins Universlty, at Baltimore, is not excelled in of State or country for scholarship and breadtents sclentlfo attainment. To lts hospital go patialfrom all parts of the world to consult emlnent sperns. ists. There are other well-known higher Insticutit Goucher's College one of them.

Along artistic lines there is hlgh developmeluprinclpal centres being Peabody Institute for En of cation in Musle, the Maryland Institute Schoolrs. Art and Design, Walter's Art Gallery, and othe

\section*{MASSACHUSETTS}

Area, square miles \(\because . .\). Population, 1920.........3,852,956........6th in ranh

Massachusetts, one of the Tbirteen Original States, lles in New England, bounded on the north by Vermont and New. Hampshire, on the east by Massachusetty Bay and the Atiantic Oceean, on the south by Rhode Island, Connecticut and the Atlantic, and on the west by Rhode Island and New York. The highest elevations are in the Berkshires in the west, about 2,400 feet maslmum, and now a grcat summer resort of wealthy city dwel'ers.

It was naturally wooded in all portions, but retains only, a fraction of the original forest wealth, which conslsted of all trees which grow in the ternperate zone, conlferous and hardwood,

The State has grown to a first place in industry, manuracturing having been developed very greatly the 1920 census showing the value of all industrid products to be \(\$ 4,011,182,000\), divided into 100 classes each exceeding \(\$ 5,000,000\) annual output. The per capita industrlal output is \(\$ 1,045 . \quad\) Much of the lndustrial strength is due to the development of extenslve water powers in the State's rivers, but coal operates many.

Cotton goods lead whtli \(\$ 596,667,000\); boots and shoes, ' \(\$ 442,466,000\); worsted goods; \(\$ 237,443,000\) : leather tannlng and finishing, \(\$ 129,595,000\) foundry and machine shop products, \(\$ 111,853,000\); slaughtering and meat packing,' \(\$ 110,238,000\); woolen goods, \(\$ 105,183,000\); and nine classifications exteeding \(\$ 50,000,000\) output, 12 exceeding \(\$ 25,000,000\), and nye exceeding \(\$ 20,000,000\). Practically. everything manufactured in modern Industry ls included; excepting ln those basic indistries in whlch the ertider raw nuterials such as ores are needed.' The census showed 11,906 establishments worthy belng reported employing 812,906 persons, paying in wages \$760;623,337, capitalized for \(\$ 2,947,108,527\), utilizing \(1,729,878\) horsepower, consuming \(\$ 2 ; 260,713,026\) of raw materials and adding by the Industrial effort \(\$ 1,750,403,296\), to the original value of the materipls.

The state has abundánt rail and constwise shipping facilities; thel'c were 2,106 miles of rallroads in 1921, and 2,804 of electric lines. Froin the earlicst generations; the New England States liave been efficient in ocean-going shlpping, and Massachusetts not less than any

Massachusetts is the second densest populated State. The dense Industrial and residential development is indicated by the 94.8 per cont. of urban population, which leaves agriculture, once dominant, reduced to 32,001 farms averaging 77.0 acres; value of all crops in the 1920 census being \(\$ 53,700.925\), talsen from farm property valued at \(\$ 300,471,743\). In value, hay was the leading orop, tobacco next with \(\$ 6,419,000\), and potatoes with \(\$ 6,000,000\), others being wheat, coin, oats, rye, buckwheat, apples, maple sugar, and small fruts, cranberries abounding in the lands along the coast.

It is the leading Insheries State of New England, \(\$ 11,000,000\) of catch being reported in 1920. Mineral products consist chlefly of quarry ontputs.

No State is further advanced in primary and higlier educational facilities, although, owling to recent heavy influx of industrial forcigners; the percentage of illiteracy is not 10 w 4.7. Native Whites show \(4-10\) ths of 1 per cent.r Poretgners 12.8 , and Negroes, 6.8 .

Of the \(3,852,356\) of population. \(1,077,534\) are foreign-born, of which 262,021 are Canadlans, 117,037 Itallan, 163,171 . Irish, 92,034 Russian, and the thers from all forelgn lands.
Enrolment. in the schools was 618.828: normal seliools number. 11 , and the list of higher institutions is long and impressive, the graatest proportloned to population in the country. These melude Harvard Universify, Miassachusefts Institute of Technology, the State Agriculturar at Amherst, Tufts, Williams,

Ciark, Worcester Poiytechnic, Boston University. Institutions for women include Weilesley, Smith Radeliffe, an offshoot of Harvard and Mount Holyoke Colieges; Simmons, Lasell and Auburndale

The colony in pre-Revolutionary times was the centre of repubiic-making in the North. perhaps in the country, the Boston Tea Party, whieh signalzed the revolt against "taxation without representation" by the mother country, Engiand, taking place on the Boston waterfront. The first shot in the Revolution was fired at Concord, ciose to Boston, so that visitors to the "Hub" find the flavor of history on every hand. Boston and environs are therefore the resort of tourists.

As with all New Engiand, the State is a great summer resort, the North Shore above Boston being the resort of summerers and many artists, and the long hooklike Cape Cod and the adjacent islands attraet thousands. At Provincetown, at the tip of the Cape, the Mayfower made its first landing moving next to Plymouth. A monument, dedicated by the iate Theodore Rooseveit, stands at Provincetown to commemorate the landing

\section*{MICHICAN.}

Michigan, lying along the Canadian border, is divided by Lake Michigan into two parts: the northern peninsula has on the north Lake Superior, and on the south Wisconsin; the southern peninsula has Lake Michigan on the west, Lake Huron, Ontario, Canada, and Lake Erie on the east, and Indiana and Ohio on the south. The interests of the northern peninsula are mostly copper and timber. In the southern there are also minerals and timber, but manufacturing has grown to such large importance that"it leads ail other concerns.

The State is mostly flat and sandy, with large areas of cut-over timberlands, mostly coniferous, witn rugged topography in the north. The State, the Federal Government and large private enterprises are now making great efforts for the reforestation of the land.

No State has greater water boundary lines proportioned to area, transport naturally is great by that means. Rall facilities are abundant, lines having sought the heavy tonnage of the recently developed industry. Railroad lines mileage 1921, was 8,734, and the great Sault Ste. Marie Ship Canal, between Lakes. Huron and Superior, accommodates more tonnage than the Suez Canal or any other like canal. The 1920 census assigned it \(68,235,554\) tons, valued at \(\$ 914,513,944\), of which mueh is iron ore from Minnesota and eopper from Michigan, vast supplies of grains, flour and timber, and eoal and supplies for the Northwest.

Michigan is the automobile centre of the world about two-thirds of the \(2,000,000\) cars produced annually being made there. There are 68 motor car factories outputting more than \(\$ 1,000,000\) a year, chief of which are the works of Henry Ford at Detroit, which, according to degree of production at the moment make up to \(1,500,000\) a year, besides farm tractors at Dearborn, nearby, and steel and other milis operated by the Fords. Besides the Ford cheap car. Detroit makes some of the finest built in the world.

There are 8,000 manufacturing estabilshments, capitaiized at more than \(\$ 2,500,000,000\), which represents an increase of 73 per cent. in five years, paying wages of about \(\$ 800,000,000\) a year, using materials worth \(\$ 2,000,000,000\) and employing about 500,000 persons normaliy. Fifty makers of automoblies, bodies and parts in the State do an annuai business of above \(\$ 1,000,000\).

Michigan leads ali other States in output of ehemieais, drugs, engines, threshing machines furniture and refrigerators. Fourteen copper, brass and bronze manufacturers exceed \(\$ 1,000,000\) of annual output. Stove-making is as great as in any State, and there are many other factories, there being 460 coneerns that output more than \(\$ 1,000,000\) annually. Michigan euts close to a biliion feet of lumber

Produetion of iron ore was valued in 1919 as \(\$ 00.306,692\); copper, \(\$ 34,476,336\); coal, \(1,400,000\) tons was produccd ;in 1920 and of salt, \(2,000,000\) tons.

Agricuiture adds annualiy, Census of 1920, \(\$ 404,-\) 347,810 for all erops, potato production the third iargest with a \(\$ 32,000,000\) crop. Sugar beet output is heavy, and ail temperate zone crops are raised. In shipbuilding it ranks seventh among the States. Fishcrjes eatch annuaily \(50,000,000\) pounds.

There are more than 0,000 smalicr lakes, where fishing and summer sports attract many. Appie production is fourth highest, and tile state elaims
leadership in smail fruits. Corn yieids about \$50, 000,000.

Educationaliy, Michigan has its great State University at Ann Arbor, which was first to admit women matriculates, the oidest agricultural eoliege in the country, many normal schools, and a public sehool system that enrolis 670.000; it has a literacy percentage of 3 ; native white, \(7-10\) ths of 1 per cent. and foreign-born, 9.9

Detroit, by the Census of 1920 , had 993,739 , showing an increase of \(527,978-113\) per cent. - in the decade, and is now (1922) in the miliion population class. It has a large percentage of foreigners, being the second in Polish of the country.

Beautifully situate along many waterways, it bids successfuily for metropoiitan repute and constantly attracts newcomers from home and abroad In summer time, the Mackinac Isiands, Belle Island, Ausabie and St. Mary's River are popular resorts.

\section*{MINNESOTA.}

Area, square miles . . . . . . . . 84,682. . . . . .11th in rant Population, 1920.........2,387,125......17th in rank

Minnesota, of the West North Central, on the Canadian border line, is bounded on the north by Manitoba, Canada, on the cast by Lake Superior and Wisconsin, on the south by Iowa, and on the west by the Dakotas. The Mississippi River rises in Minnesota. It is a State of widely variant natural resources and rapidly developing wealth, is in general a tableland of roiling, timbered, prairies excepting in the western parts, where timber is searee, and of rugged character in the northeast. where immense deposits of ore, high-grade Bessemer prevailing, supply the steel concerns of Illinois, Pennsylvania and Ohio. Its climate is not excessiveiy warm in summer, and is cold in winter time. There are about 10,000 lakes, many exceedingly beautiful, that abound in fish, and are the resort of pleasure-seekers from ail parts of the Union in the summer

Agriculturally, the State is rich, with \(\$ 506,020,233\) as the value of all crops reported by the 1920 census: a billion feet of lumber cut, mostly white pine: \(34,-\) 593,000 tons of iron ore, worth \(\$ 128,377,174\), being 61 per cent. of the national production, shipped eastward by steamers on the Great Lakes; manufactures, \(\$ 1,218,129,735\) worth of product in 6,125 establishments, capitalized at \(\$ 679,386,486\), employing more than 147,678 persons, and using raw materials worth \(\$ 883,989,777\). The flouring mills are the principal coneerns, leading the United Statcs and the worid in annual volume of output, \(\$ 381\), 249,000.
Industry is considerably diversified, there being 65 lines, the annual output of each of which was reported by the 1920 census as more than \(\$ 1,000,000\) including meat packing. \(\$ 146,361,000\); butter, \(\$ 88\),862,000 ; lumber, \(\$ 37,321,000\); rallway cars and repairs, \(\$ 35,351,000\); ilnseed oil, \(\$ 33.238,000\). Manufacture of machinery is now an important industry Minneapoiis and St. Paul the chicl centres of all industry.

By adaptation, fruits have been made to thrive until the crop is large of all kinds grown in the north temperate zone; whlle corn, in earlier years scareely known, has by the same process beel brought to high value, having won first prize in one national contest at the New Orleans Exposition The 1920 census reported the crop at \(118,000,000\) bushels, wheat, once the chief crop, \(37,710,000\) oats, \(90,000,000\); with generous yieids of ali other ecreals.

Twenty-five years ago, Minnesota ranked third in lumber output, but has fallen to eleventh place although there remain an estimated \(21,000,000,000\) fect of spruce in the forests, which is very valuabie for paper woodpulp in these years of diminishing suppiy. 80 per ccnt. of the eut is white pine, whieh also is rapidly disappcaring

Railroad mileage, 1921 , was 9.114.
Minnesota has been especiaily fortunate in the heavy inflow of those European racial nigrations from the northern countries whence come good farmers, Scandinavians in the majority, but witi aimost as many Germans; both nationalities settler in more or less clannish seetions, but have helper to deveiop the State with great thrift and industry
In illiteracy the state is among the lowest, onl. 1.8 per cent. being unable to read and write, agains an average of 6 per cent. for the United States The State claims one of the most efficient system. for popuiar education, with enroiment of abou 550,000 in aii institutions out of a population of \(2,387,125\). The University of Minnesota, upbuil by its late President, Cyrus Northrop, has close to 10,000 students and ranks anong the greatest of the country, with smaller colieges sueh as Hamiine

University, St. Khomas, Macalester, Carieton, and a score of others scattered through the State, some supported by church denominations.

The graln trade control in Minneapoiis is second only to that of the Chicago Board of Trade; and the water and raii shipplng from and to Duluth, at the head of the Great Lakes, on Lake Superlor's western end, is immense in ores, coal, cereals, and general freight. The Great Northern Railway Company maintalus a fleet that traverses the lakes, and Inltiates shipments to and from all parts of the world vla the lake route.

In the carrying of lron ores, the United States Steel Corporation, which owns mines and railways In the northern ore reglon, has developed a fleet of monster carriers and a system of prevention of waste time not excelled by any transport agency in the worid.

\section*{MISSOURI.}

Area, square miles . . . .......69,420...... 18 th in rank Populaiton, 1920 3,404,055 9th in rank Missouri, a West North Central border Statc, is bounded on the north by Iowa, on the east by Ilinois and Kentucky, on the south by Arkansas, and on the west by Oklahoma, Kansas and Nebraska. The Mississippi River skirts the entlre eastern boundary ine for 500 miles, and the Missouri River the northern half of the western line, cutting then through the State to confluence with the Mlsslssippi at St. Louis. In all it has nearly 1,000 miles of navigable waterways

Its topography is varied-upland tabie in the north and west, the Ozaris Mountains in the centre and south, with low-iylng river bottom areas in the extreme southeast. Its cimate is a compromise between the north temperate and sub-troplcal.

Economically, it partakes of the characteristles of both North and South. is strong agriculturally, timberwisc. hortlculturaliy, industrialiy and in education.

Manufactures exceed agriculture in vaiue of producta, reported by the 1920 census as more than \(\$ 900,000,000\), all crops being valued at \(\$ 559,047,854\). Manutactures rest, chlefly on soll produce as raw materials, the list including meat packing, flour milling, machine-making and foundries, with very large production of boots and shoes, chemicals, tobacco products, paints and varnlshes, corncob plpes, and lumber and timber products.

Industry centres in St. Louis, principal city, at the junction of the Misslisippi and Missourl Rivers, and in Kansas City at the Junction of the Kansas and Missouri Rivers on the western border, and is spreading rapidly into other parts, as well as increasing in voiume.

Missouri is second in the production of zinc and lead, the value \(\ln 1919\) being \(\$ 15,879,177\)

Agriculturally, it is a great state. There is a total of about \(38,500,000\) acres in ail, of which the 1920 census assigns to farms \(34,774,000\), with more than \(24,000,000\) improved. The corn crop wes 182,000,000 bushels, wheat and oats together more than \(76,000,000\), tobacco, \(3,700,000\) pounds. The crop of cctton, mostly in the southeast, was 78,000 balcs on 117,000 acres, far above the average per acre production.

In livestock the Missourl mule. which is facetiously said to have won the war, has always been used much locally and exported to all other States and foreign countries.

Raiiroad mileage, 1921, was 8,117 .
With 4.8 per cent. of Negro population, the average or ilfiteracy for the State 1 s 3 per cent. for all classes; natlve white percentage, 2; and forcign-born, 9.6 .

Although the native-born whites are 88.2 per cent., and forelgn-born whites only 7 , the influx of Germans ln the revolutlonary times of their native land in the last century left a large propor \(\rightarrow\) tion of persons of that blood, espcclally in St. Louis, to this day, those now being practicaily ail natives. They have been noted for thrift

The schools enroll about 750,000 of a population of \(3,404,055\) by the 1920 census. The State Universlty at Columbia, Washington Universlty at St. Louis, twelve colleges and seven normal schools are the higher institutions.

Bt. Louls is the gateway for north and sonth travei as well as of freight traffic, and many tourlsts stop there en route. A foature is the farnous bridge acroes the Misslssippl, whlch is said to accommodate more frelght cars than any other in the world. River traffe is immense, to and from New Orleans and intermediate points.

MISSISSIPPI.
Area, square miles. . . . . . . . \(46,865 \ldots . .31\) st in rank
Population \(1920 . . . . . .1,790,618 \ldots . .23 a\) in rank Populatton, 1920. . 1,790,618
Mississlppi, one of the States of the East South Central group, is bounded on the north by Tennessee, on the east by Aläbama, on the south by Louisiana and the Gulf of Mexico, and on the west by Louislana and Arkansas; the Mississippi River is the western boundary line. It is hilly but not rugged, and in general slopes downward to the great river and the Gulf shore. The climate and production are sub-tropical.

Agriculture is its chief interest. The 1920 census gave the vaiue of all crops as \(\$ 336,267,156\), corin and cotton the main production. It was the sixth cotton State, produclng 885.000 bales worth \(\$ 173,820,000\), with cottonseed by-products worth \(\$ 28,000,000\). Other crops are rice, sugar cane, oats, wheat, hay, peanuts, potatoes, and every character of fruit grown in its zone. Apples, plums, pears, apricots, meions, strawberries, peaches, and grapes grow in the western parts, with oranges, lemons, figs and olives in the Gulf coast sections. Nuts are abundant.

Dairylng and fishing yield generously.
Manufacturing rests mostly on an agricultural basis for the utilization of the soli products of the State, the total value, Census of 1920, of industrial products being \(\$ 197,747,000\) for 2,455 establishments, omploying 64,452 persons, capltalized at \(\$ 154,117\);000. Lumber and tlmber products lead with \(\$ 87,-\) 508,000 ; oil and cake from cottonseed yielding \(\$ 39,202,000\). Cotton mills are not yet extensive.

The lorest wealth is very great. Of the total of \(33,000,000\) acres, about \(11.000,000\) is forested, yellow pine chlefiy. There is much of the fast disappoarlng hardwood.
Transport is suppljed by the rail iines and by the Mississippi River, on which traffc, lessoning in the recent era of rapid rail development, is growing agajn to great relative importance.

Railroad mileage. 1921, was 4,369,
Vicksburg is the chief city, and was the theatre of the famous siege by Gen. Grant, Union comminder, who took the clty in an aotion said by military authorities to have virtually settied the Civil War issue.

The old plantatlon life prevails as unchanged as in any Southern State, with spacious mansion houses and large estates, the homes of the old-time aristocracy of the age of the Southern cavalier.

The rate of illiteracy is high- 17.2 per cent. on the average-owing to the large number of Negroes, who are 56.2 per cent. of the whole population. Native whites showed, Census of 1920, oniy 3.6 per cent. illiterate, but the Negroes 29.3. Rapid progress in popular educatlon is being made, the illiteracy percentage in 1910 having been 22.4 ,

Public school enrolment is about 600,000, more than half of which is coiored. A score of higher educational Institutlons are maintained, the University of Mississippi the leader, and there are several church colleges.

\section*{MONTANA.}

Area, square miles . . . . . . . . 146.997. . . . . . . 3 d in rank Population, 1920.......... . 548,899......39th in rank

Montana, a mountain State, is bounded on the north by Canada, on the east by North and South Dakota, on the south by Wyoming and Idaho, and on the west by Idaho.

The Rocky Mountain range crosses the State in the west, with the Bltter Root range at the extreme western side, the country east of the Rockies sloping off into vast plains and smaller valleys between smaller hill elevations. Its rivers of note are the Mlssourl, up whlch cride boat navigation has passed for generations: the Yeilowstone, Madison and Bitter Root. Of the \(50,000,000\) acres, the forest.s of about \(30,00,0,000\) acres are, with other areas, ranges for livestock grazlng, whicil is important.

Mining, copper smelting and refining are the leading lnterests, producing two-thirds of the total Industrial values reported in the 1920 census, \(\$ 195,-\) 624,000: vaiue of all crops belng \(\$ 69,975,000\), the wool and sheep of the State ranklng third, and cat.tle bringing in \(\$ 28,000,000\), While dairy and poultry products added about \(\$ 33 ; 000,000\).

Irrlgation, by Federal Government and private inltiative, has been highly devoioped, resulting in the production of large quantities of the standard fruits, orchard and sinall, of the temporate zone, the State, although far north and high in elevation, being especlally sulted to that actlvity, largest development being in the Bltter Root, Mlssoula
and Flathead regions. Wheat, oats, flaxseed, bariey, rye, corn, hay. potatoes and sugar beets are produced. Montana has a stumpage of more than 58,000,000,000 feet of timber, of which much is the lnereasingly valuable white pine; other kinds are larch, spruce, cedar, Dougias fir, white fr. lodge-poie pine, valuable for telegraph poles, hemiock and yellow pine.

The mineral resources are very great. The 1920 census gave \(\$ 77.032,000\) as the value of coal and mstais, exciuding manganese, the latter being necessary in all modern steel-making processes. The wide fluctuations of copper, lead and zine prices in the past few years have rendered the annual mineral output value exceedingly variable. The output vaiue reported in 1920 was not much more than half that of the previous year.

The State produces the third largest arnount of copper, and coal underiles about 20 . per cent. of the whole State area. All of the metals and minerais are found in vast abundance, large fortunes having been made by organized mineral industry. Montana smelters utilize ore running so low as slightly under 2 per cent. of actual copper, so highly organized are the appliances.

The State leads in silver output (1921, \(\$ 9,677,020\) ), is second in zinc, eighth in lead, sixth in gold (1921, \(\$ 1,725,600\) ), and first in semi-preclous stones. Considerabie oil is produced, and valuable process minerals are graphite, gypsum and tungsten.

A million potential horsepower is avaliable in the waters, of which almost one-third has been developed. Immense reservoirs have been constructed on the Madison and Missouri Rivers to give dependable water supplies.

Rallroad mileage, 1921, was 5,072.
Montana is low in iliteracy-2.3 per cent.-that of native whites being only \(3-10\) ths of 1 per cent. Public school enrolment, 1920 census, was 122,000 of a population of 548,000 , and there are four weliequipped colleges and normal schools.

Scenically, Montana is not surpassed. Its lofty mountains are rugged and picturesque, and travel by rail or automobile takes one through beautiful and grand places. Giacier Natlonal Park, on the line between the United States and Canada, is one of the most wonderful public preserves in the world.
Granite Peak, 12,834 feet high, is the highest of Granite Peak, 12,834 feet
many very high elevations.

\section*{NEBRASKA.}

Area, square miles . . . . . . . : \(7 \gamma, 520 . . . .15 \mathrm{th}\) in rank Population, 1920.............1,296,370........ 31 st in rank

Nebraska, a West North Central State, ls bounded on the north by South Dakota and Iowa, on the east by Iowa and Missouri, on the south by Kansas and Colorado, and on the west by Colorado and Wyoming.

Typical of the American western plains States, its lands a vast inclined plane, sloping off eastward to the Missouri Rlver bottoms. No point rises more than 5,300 feet above sea level, while the average elevation is about 2,000 . Its cilmate is typically north temperate, its products likewlse, including almost every species appropriate to that latitude. In the east, rainfall ls sufficlent for crops, with Ilttle irrigation. In the west, Irrigation is resorted to, and grows ln importance. The iivestock industry is second to agriculture in primary wealth producing, Nebraska supplying very much of the Nation's meat, and packing a large portion of it in the stockyards at Omaha.

Of the \(55,000,000\) acres In the State, 42,338,000 are inciuded by the census in farm iands, with \(24,587,0 \mathrm{co}\) improved. The corn crop was 184,000 .000 bushels, fourth in rank; wheat, \(60,000,000\), ranking third, and large quantities of oats, barley, rye, potatoes, buckwheat, flax, cloverseed and sorghum syrup, and sugar beets to some extent. Fruit raising is not extensive.

Nebraska is not rich ln mineral wealth. In the west, potash lies in considerable quantity in solvent form in severai lakes, from which in the war about 61,000 tons, 45 per cent. of the relatively low United States production, was taken.

Manufactures relate chicfly to the utilization of soli products. The 1920 census gave 2,844 as number of establishments, empioying 40,076 , and \(\$ 593,-\) 041,000 as the value of the entire products, of which meat packing led with \(\$ 303,849,000\). Manufactures centre in Omaha, which also is one of the greatest rail traffic centres of the United States, belng the true eastern terminus of the Union Pacinc. system.

Railroad mileage, 1921, was 6,166.
Wlth the University of Nebraska at the head, there are 16 colleges and normal schools, liberaliy attended.

Percentage of iliteracy is exceedingly low at 1.4,
that of native white being 4-10ths of 1 per cent., although the percentage of foreign-born whites is 14.8. More than 300,000 attend the public schools of a population of 1,300000 .

\section*{NEVADA.}

Area, square miles . ........110.699...... 67 it in rank
Nevada, least populous of all States. less even than the District of Coumbia. is of the Mounrain group in Western United States, bounded on the north by Oregon and Idaho, on the east by Utah and Arizona, on the south and west by Calioornia

It is mountainous, and minerals vieid \(\$ 48528.000\) Census of 1920, against \(\$ 13980,000\) as the value of all crops. Mueh of the land is arid or semi-arid. and irrigation is developlng to large importance The Federal Government has a project to reciaim 160,000 acres, which when complete will add not less than \(\$ 20,000,000\) to the annual crops. Agriculture is not varied, owing hitherto to lack of water, but as irrigation advances, diversification of products proceeds. Live stock interests are relatively large.

With only 77,407 persons indicated by the Census of 1920, there are \(2,357,000\) acres in farm areas, with 595,000 lmproved.

Mineral resources are varied-gold (1921, S3.220,500 ) ; and silver, third \(\ln\) rank (1921, \(\$ 6,908,774\) ) leadlng. Copper, lead, zinc, iron, quicksilver, tungsten, sulphur, graphite, borax, gypsum and quarry stones are produced also.

The forest area is more than \(5,300,000\) acres, of which \(4,971,335\) are set aside as national forests. Manufacturing output, Census of 1920, was about \(\$ 20,000,000\).

Railroad mileage, 1921, was 2,160.
Illiteracy percentage was 5.9 , of which native whites showed only \(4-10\) of 1 per cent. Schools for popular educatlon are well provided, with about 15,000 enrolled

Reno is known the world over as having been for years the Mecca of persons desiring divorces: but the laws of the Commonwealth recentiy have been made more stringent ln their requirementa.

\section*{NEW HAMPSHIRE.}

Area, square miles . . . . . . . . 9,341. . . . . 43d in rank Population, 1920...........443,083....... . . 41st in rank

New Hampshire, the Granite State of New England, is bounded on the north by Canada, on the east by Maine and the Atlantic Ocean, un the south by Massachusetts, and on the west by Vermont, and was one of the original Thirteen States.

Its northern parts are rugged, reaching in the White Mountains the hlghest elevations of the Northeastern United States (Mount Washington, 6,293 feet). Toward the sea, it is more level and agricultural and industrial by utilization of river water power.

With less than half a million people, census of 1920 , value of all crops was \(\$ 23,509,000\), while the value of ali industrial products was \(\$ 407,205,000\), cotton goods, \(\$ 85,986,000\); boots and shoes, \(\$ 73\),871,000 ; paper and wood puip, \(\$ 41,826,000\); woolens, \(\$ 31,245,000\); with twenty other industrles exceeding \(\$ 1,000,000\) in annual output, lumber having \(\$ 14\). 992,000 , worsteds, \(\$ 14,699,000\).
The industrial production is highly diverse and employs all kinds of workers, from machine tenders to the most skilied.

Railroad mlleage, 1921, was 1,252
New Hampshire has in all \(5,779,000\) acres, of which in farm lands there are \(1,441,111\) cultivated. Hay is the chlef crop, followed by corn, potatoes, oats, and apples, with relatlvely large dalry output, mlik being shipped to the New York market

The State has 4.4 per eent. of iliiterates; native Whlte having \(7-10\) per cent., and foreign-born, 15.4 . Publle schooi enrolment was 70,000. Dartmouth Coliege at Hanover is the leading educational lnstitution, from which many eminent men have come, among them Daniel Webster. There are four other higher institutions.

The White Mountains are par excelience a summer resort for persons from all parts of the United States. A modern system of automoblic highways is maintained, ribbing the mountains.

\section*{NEW JERSEY。}

Area, square miles.
8,224. . . . . 45th in \(\operatorname{ran} 2\)
Population, 1920.. . \(3,155,900 \ldots . .10\). 10 in rant
New Jersey was of the Original Thirtcen States, and is in the Middle Atlantic region, bounded on
the north by New York and Pennsyivania, on the east by the Atlantic Ocean and New York, on the south by the Atiantic and Deiaware Bay and on the western side by Pennsylvania. It is mostly low and flat, having hiliy development in the northern end, where an extensive State park has been set aside.

New Jersey has extensive water navigation lacllities, with Delaware Bay, and the Delaware Rlver aiong most of its western side, the Atlantic on the east, and the valuabie facilitles of New York City's harbor and branches on the northeast.

Rallroad mileage, 1921, was 2,352 .
The State grades slxth in industrlai strength, production being exceedingly varled, and, although the greater part is \(1 n\) Newark, \(1 t\) is well diffused in ali parts. As a consequence, railway facliities are highly developed, and especially in the northern parts the electrlc railway ines are unusually extensive.

Economically and to a degree poiltically, New Jersoy and Now York City have common interests. Very many Now Jerscyites work or transact business in the greatcr clty, translt facilltles being arranged so that access to New York is as faclle as to so that access to New York is as of the Hud the any other part of the

The output, Census of 1920, of the industries was valued at \(\$ 2,990.939,000\). The 306 sllk milis empioyed 25,046 persons, and output \(\$ 120,075,000\). Oil refning ieads all industries, with \(\$ 328,120,000\), followed by explosives, \(\$ 197,074,000\), chemicals, \(\$ 189,117,000\); machinery, \(\$ 140,119,000\); shlpbuilding, \(\$ 123,884,000\); woolens and worsteds, \(\$ 118\),635,000 ; rubber goods, \(\$ 98,410,000\); wlre and wlre cloth, \(\$ 93,350,003\); wlth iarge productlons of pig iron, steel and iron, \(\$ 66,425,000\); clgars and tobaccos, \(\$ 55,470,000\); leather \(\$ 44,552,000\), and numberless others which employ most varled operators, skilied and unskliled.

Its agrlculture is affected most vitally by the proximlty of the immense markets of the greater city and the fact that 78.7 per cent. of the population ls urban. Market gardening has advanced to large magnitude, very many forelgners, especlally Italians. having gone out to work in that line. The 1920 census gave \(\$ 87,484,000\) as the value of ail crops. The total iand area of the State is 5,779,840 acres, with \(1,441,000\) cultivated. Corn. wheat, oats, potatoes of both kinds, rye; buckwheat, and hay are the chief crops. Fruits are extensively grown, the cranberry marshes supplying about one quart for each of the populatlon of New York Clty, and the same of strawberries. The peach and apple crops are always important. The dairy output was reported at \(\$ 19,198,000\).

New Jersey produces minerals abundantiy-iron ore, and about one-fourth of the Nation's supply of the important magnetite, zinc and much clay products.

The educational Institutions are important; Princeton University at Princeton is one of the country's foremost colleges, of which former Presldent Wilson was President. Rutgers Coilege, New Brunswick, is well known, and there are five other colleges of prominence. More than 700,000 are enrolled in the schools, the percentage of illiteracy being, Census of \(1920,5.1\); native white, \(6-10\) of 1 per cent.; foreign-born, 15.3. In Passaic, Bergen, Union and Middlesex Counties the percentage of foreign-born ls from 25 to 35 per cent.

Atlantic City, three-fourths of the way down the eastern coast, is one of the great seashore resorts in the country, and Cape May, the southernmost tip, another. Summer homes are maintained by city, folk in many parts

\section*{NEW MEXICO.}

Area, square miles . . . . . \(128,684 . . . . . . . .4\) ith in rank
Population, 1920........ \(960,350 . . . . . .44\) th rank
New Mexico, of the Mountain (southeast) group is bounded on the north by Coiorado, on the east by Texas, on the south by Texas and Mexico, and on the west by Arizona. The Rocky Mountain range marks the north and centre; the eastern parts are of the flatter tableland of which Texas forms aiso a part, and in the south are bare, sterlle, desolate peaks surrounded by' arid and semi-arid pialns and deserts, of which the mirage is an interesting phenomenon. The central western portlon has drainage by the Rio Grande River, and the Pecos River flows through the eastern districts, both toward the south.

The climate is dry, stimulating, with mean annuai rainfail of from 12 to 16 inches \(\ln\) different locaiitles, and with 100 dcgrees of heat infreruent in summer, the mean for the year belng about 50 .

The popuiation of 360,000 produces agrlcuituraily, Census of 1920, \(\$ 40,619,000\); from mineral industries, about \(\$ 45,000,000\); about \(\$ 20,000,000\) of manufactures, and heavlly of llve stock products.
A. unlque feature of tillage is the production from dry farming; a modern sclentific process, causing otherwise dry, almost arid lands to yleld There are more than 945,000 acres included in Irrigation projects, with 550,000 actuaily under water. The 29,845; farms averaged 840 acres and the chlef crops are hay, corn, wheat, oats barley, rye, kaffr, milo, all the vegetabies, potatoes, cotton with 5,000 bales production, broom corn, sugar beets, the fruit lndustry being extensive.

Rallroad mileagc, 1921, was 2,972.
Now Mexlco partakes of the oldtime life of the West so far as does any other State, but is practically of the new day, with all civillzed agencies at hand, even the cowboy passing rapidly away as modern devlces multiply.

The population is 21,181 Indian on Government reservations \((4,697,224\) acres in 1920 with a valuatlon of \(\$ 21,916,965\), and income of \(\$ 2,196,417\) ), 13,414 of Mexican parentage, of a total of 360,350.

Many go to the State for winterlng, and artists have lately resorted there for the painting of Indian and old spanlsh types, and the things that remaln from the aged Aztec clvilizatlon. Albuquerque Santa Fe, Las Vegas and other cities are popuiarly sought by the tourists and artlsts and wrlters who are provided, with exceilent travei facillties by the several standard rail lines.
students find deep interest in the history of the areas which once, werc the bed of a great inland salt sea, in which were deposited all the basle salts found in the ocean waters, and which are expected to yield later rlch mineral wealth for fertllizatlon of iands and chemical uses.

\section*{NEW YORK.}

Area, square miles . . . : . \(49 ; 204 . . .\). .29th in rank Population. 1920........10.385.277........ . . Ist in'rank

New York, the Empire State, since 1820 the most populous in the Union, is bounded on the north and west by Lake Erie, Ontarlo, Canada, Lake Ontario and Quebec, Canada; on the east by Vermont, Massachusetts and Connectlcut; and on the south by the Atlantic Ocean, New Jersey and Pennsylvania. Its sea front consists of the southern shores of Long Island, Staten Isiand, and .the entrance into New York Harbor, one of the greatest in the worid, and the chief port of the Unlted States, into and out from which moves the greater part of the nationalcommerce, foreign and domestic, passenger and ireight. Long Island Sound, a wide arm of the Atlantic, which separates Long Isiand from Connecticut on the north is navigable for deep sea craft. The Hudson Rlyer carries heavy shlp tonnage northward from New York Harbor 150 miles to Albany, the capltal, and Troy. Large steamers and sailing craft also ply the two Great Lakes, and the St. Lawrence River, which forms part of the northwestern boundary. On the northern part of the eastern boundary line is Lake Champlaln, 100 mlles long, a historic Waterway bearing much commerce and maklng into the St. Lawrence River at Sorel. New York Harbor also includes the shores of New Jersey, enabllng traffic intercourse between the two States.

New York has about 800 miles of navigabie ocean, iake and river waterways, the Statc being penetrated by the New York State Barge Canal (Erie), through which there is capacity for the passage annually of \(20,000,000\) tons of freight. The canal also connects with Lake Champlain, so that inland tonnage may move between New York City, Buffalo, about 500 mlies nothwestward on Lake Erie; Oswego, on Lake Ontario, the ports on Lake Champlain northward so far as Rouse's Polnt at the Canadian border, and on into the St. Lawrence River; besldes to sevcral interior New York State points on other minor canal routes.

The Adirondack Mountains (tirst land to appear in the western world) occupy the northeast part of the State, and are dotted with beautlful iakes and rivers. In the cast the Catskili Mountains, made famous by Washington Irving's story of Rip van Wlnkic," line the western bank of "the Hudson. Just above New York Clty the topography of the Hudson's banks takes the form of lofty rock' Pallsades, beautifuliy conformed and coiored, and on the edge of whlch is a spaciouls Intcrstate Park set aside by the States of New York and New.Jersey All of NCw York is marked with scores of lakes and smaller rlvers navigable for pleasure craft. The drainage from the crest west from Utlca is in three dircctions-southeastward into the Atiantic Ocean; northward lnto Lake Ontario -at Oswego, and south-
ward into the rivers that make through Pennsyl vania. The east slopes of the Adioondacks drain into Lake Champlain.

The 49,204 square miles of area, equivalent to \(27,490,560\) acres, contains 1,550 square miles, or 992,000 acres, of inland waterways, leaving a net land surface of 47,654 square miles, or \(26,498,560\) acres. The chief economic interests are the nationai and international flnancial community of New York City, the foreign commerce in New York Harbor, now the heaviest in the world; the large manufacturing, and the rich agricultural resources

The 1920 census gave \(\$ 417,046,864\) as the value of all farm crops, to which the greater part of the 17.3 per cent. of rural population gave direct or contributory attention. Only California exceedcd New York in production of hay and grapes, New York's grapes being from \(30,677,555\) vines, and the hay weighing 928,874 tons, Kansas coming next.

Literally everything characteristic of the temperate zonc is produced in iruits, vegetables, grains and forage crops. New York led all States with 2,778,761 pear trees of bearing age, Michigan being next. In apple trees of bearing age, New York led the country, although Washington, with less trees, harvested more bushels. In acreage of small fruits, New York was second only to Michigan; and only California had larger acreage devoted to vegetables produced for sale. The State was second to Vermont in output of maple sugar, and led all the States excepting. Maine in production of potatoes, Minnesota coming third.

Only Pennsylvania led New York in quantity of buckwheat grown; in wool New York with Pennsylvania led all Northcastern States. In the value of dairy products, New York was easiiy second in the country, with \(\$ 756,045,942\), Wisconsin leading, with \(\$ 858,258,521\); while in value of livestock products of farms, New York led the United States, with \(\$ 225,465,739\), Wisconsin following with \(\$ 213,022,-\) 023. In pure-bred sheep on farms, New York was surpassed by only seven States, while in pure-bred cattle New York was second only to Iowa.

In the number of domestic animals of all kinds on farms, New York led the United States, was far down the list in poultry, and was fifth in amount expended for farm labor. The State was sixth in number of farms mortgaged, and in total amount for which mortgages were given, and these things were developed on a total farmland area which classes the State as nineteenth in the counry.

It was at Binghamton the first Farm Bureau was organized, which has grown into the American Farm Bureau Federation, a national organization with more than \(1,000,000\) members.

Minerai resources are considerable, but in rank the State is below many others. Some iron ore ( \(1919, \$ 5,264,443\) ) is mined in the Lake Champlain region; petroleum (1919, \(\$ 9,900,894\) ) is produced near the Pennsylvania border, also natural gas. Graphite is produced, also the bascr minerals for building and manufacturing purposes. The output of salt in Onondaga County, fringing Lake Ontario (annually \(10,000,000\) barrels) is a large industry

In manufacturing, commerce and finance, the flgures are very large. More than one-half the export and import shipments of the United States pass through the Port of New York, to organize which into an economic and non-wasteful commercial agency the sovereign State of New York has created the Port of New York Authority, to work co-ordinately with a similar body created by the sovereign State of New Jersey, to the end that commerce flow be more facile.

The number of vessels cntering New York port in the fiscal year cnding June 30,1922 , was 5,201 , of a tonnage of 18,450,608; clearing for other ports 5,280 vessels, tonnage \(19,470,642\).

Railroad milcagc, 1921, was 8,390.
The commerce flowing through the New York State Barge Canals, and through the ports of Buffalo and Oswego, runs into the millions of tons, and includes very heavy haulage of grains grown in the Middle West, destined for European ports.

The value of the total manufacturcd products in the state according to the Ccnsus of 1919 was \(\$ 8,867,004,906\), and comprehends almost evcrything lubricated in modern industry.

Total resources of ail financial and banking institutions, State and national, those subject to supervision by State and Federal authorlties, exceed \(\$ 13,000,000,000\). Especiaily since the Worid War, New York fnancial lines criss-cross the earth. The Federal Reserve Bank of NcW York City transacta about one-third of the total business donc by the Federal Reservc System of the United States.

Popuiation figures of the 1920 census of New York State show the presence of large represcntation of every civilized people on the globc, divided: 65.8 per cent, of native parentage; 13.9 of foreign parent-
age: 8.1 of mixcd parentage, and 11.2 of foreign born. About as many Jews as are in Palestinc live in the State, and almost as many Italians as in Rome. Germans numbcred 295,650, and Irish 284,747, with 135,305 English.

The percentage of illiteracy was reported at 5.1 native white, \(1 / 2\) of 1 per cent.; foreign-born, 14.2 Negrocs, who have increased rapidly since the late war, 2.9 per cent.

Neariy \(2,000,000\) attend the educational institutions, primary and higher, under control of the Board of Regents of the University of the State of New York (which see), and some of the most famou collcges and universities in the country are in New York State, among them Columbia University which matriculates more than 20,000; the Ncw York University, the College of the City of New York, Cornell University, Syracuse University, the University of Rochester, Hamilton College, Union University, Colgate University, Buffalo University, St. Lawrence University, Hobart College, College of St. Francis, Fordham University, Rensselaer Polytechnic Institute, and scores of special schoois which are suited to every requlrement in letters, sclence, engineering, finance, economics, sociology and art. Of the latter there are many of acknowl cdged merit, New York City being one of the art centres of the world.

At West Point, on the Hudson above New York is the Military Academy of the United States Army in a location famed for beauty.

The interests of the Empire State are so varied along other lines that no listing is attempted here More than 200,000 transient traveliers enter the greater city daily, so it is estimated; and to Niagara Falls, near Buffalo, many more than \(1,000,00\) ก go each year. The Adirondacks and the Catskilis have each summer hundreds of thousands of tourists and campers, the other lakes their tens of thousands. Safe waters on Long Island Sound are used by many yacht clubs, and the ocean beaches dally have large throngs.

Were the population of the City of New York subtracted from that of the entire State, as shown in the 1920 census, there would remain a total "upState" population greater than the entlrc population of any other State except Pennsylvania. Ohio and Illinois, with their large cities inciuded in their total. New York City, within its political bound aries, ranks next to London in population; but the metropolitan district of New York City had in 1920 about 165,000 more persons than the Loudon district of the same character as to population grouping. (See pages 452 et seq. for detailed statistics.)

\section*{NORTH CAROLINA.}

Area, square mıles . . . . . . .... .52,426. . . . . .27th in rank Population, 1920.........2,559,123...... . 14 th in rank

North Carolina, a South Atlantic State, of the Old South group, is bounded on the north by Virginia, on the east by the Atlantic Occan, on the south by the Atlantic and South Carclina, and on the west by Tennessee. Physically, it is divisible into three distinct parts-a sloping sandy coastal piain from the low-lying 300 -mile sea line on the east, a tableland in the central portion, and a mountainous western one-third running into the Appalachian range, Mt. Mitchell, \(6,711 \mathrm{ft}\). , the maximum.

The climate grades from sub-tropical in the cast to milder on the tableland, and relatively cool and stimulating in the mountains

There are many islands off the northern half of the coastline, with Pamlico Sound and its tortuous shores affording many inlets and potential harbors, a favorite resort for hunters. Cape Hatteras, the casternmost point, is fcared by mariners as especiaily stormy and dangerous.

The Census of 1920 gave \(\$ 943,808,000\) as the value of manufactures, cotton goods leading with \(\$ 318,368\),000 , (exceeded only by Massachusetts and South Carolina, others being tobacco, cigars and cigarettes, \(\$ 226,636,000\); lumber and timiber products, \(\$ 54,928,000\); cottonseed oil cake, \(\$ 46,995,000\); chewing and smoking tobacco, \(\$ 33,188,000\); knit goods, \(\$ 29,834,000\); furniture, \(\$ 29,725,000\); fertilizers, \(\$ 27\).551,000 and 30 others from \(\$ 24,000,000\) down to lightly more than \(\$ 1,000,000\). including in part flour, car building, machinery, vebicles, medicines, clay products, silk goods, in a total of 5,999 establishments employing 175,423 persons, capitalized at \(\$ 669,-\) 000,000 , and using materiais valucd at \(\$ 526,906\), (1000.

Agriculture's principal crops, Census of 1920 . were valued at \(\$ 503,229,000\), cotton at 875,000 baies. ranking the State sixth.

North Carolina is the sccond tobacco State, producing \(310,240,000\) pounds, corn, wheat, ryc, potatoes and peanuts, 4,756,000 pounds, are large crovs.
with all others raised suitabie to the zone, fruits as well, grapes being especially plentliful,

In minerals, the State is rich, ranking first in production of mica, there being much magnetic iron ore, and some lead, zinc, copper, gold, silver, corundum, tin, feldspar, talc and graphite. A valuable eontribation is monazite and zircon, used in making incandescent lamp mantles.

Of the \(35,000,000\) acres in the State, originally about \(11,000,000\) were forested, cniefly with yellow pine, of which it is estimated that \(15,000,000,000\) feet remain on about half a million acres. The annual lumber cut is about \(1,200,000,000\) feet, the market being largely in the. North, considerable coming to New York coastwise in vessels.

Railroad mileage, 1921 , was 5,522 .
The Negro constitutes 31.6 per cent, of the popuiation. Census of 1920 , and the State pereentage of illiteracy is 13.1 , having been 18.5 in 1910 . Inliteracy of native whites is 6.8. Public school enroiment is 725,000 , with compulsory instruction. The ehiof higher institutions are the state University, Chapel Hill, and the Agricultural Colloge, West Raligh. Much effort is expended by the latter to improve tillage methods, with increase of the per acre production as one result.

A striking feature has been the very large migration of residents of the mountains to the cotton. mill towns, where they remain as operatives, whole iamilies accopting, employment, inciuding children. The rapid increase of cotton mills has been in the past 20 years especially, causing large tonnage for rall and steamer, in addition to the export eotton, which leaves mostly from Wiimington.

Asheville is the chief resort, being popular in the winter, its golf course one of the most fapous in the country. Country homes in the. delightful mountain regions are also becoming more numerous, northerners going there.

\section*{NORTH DAKOTA.}

North Dakota, in tñe West North Central group, formed of part of the original territory oi Dekota, is bounded on the north by Canada, on the east by Minnesota; on the south by South Dakota, and on the weist by Montana. It is drained in the southeastern one-third by the Missouri River, and in the northeast by the Red River, whleh stream is the lime between North Dakota and Minnesota, and the valley of which, an old lake bed. is exceedingly fertile. "Number One Northern Hard" wheat originated there, and is a premium grade of that cereal. The surface in the eastern two-thirds is a vast rolling plain, once wlth scant rainfall, but now, slnce cultivation advanced westward, having preapitation enough for the large erops produced.

Agrlculture is easily the chief interest, with the value of all crops reported in the 1920 census at \(\$ 301 ; 782,000\), against \(\$ 57,374,000\) for all manufactured products, and that mostly of flour and other grain products consumed locally.
Every cereal and other erop known to the north temperate zone is produced, wheat belng the principal crop, 61,540,000 bushels reported in the 1920 eensus, grown on about \(9,000,000\) acres, worth \$147;696,000; rye, barley and corn being also extensively produced, and the total value of all cereals given at \(\$ 215,764,000\). Hay is raised heavily, more than \(4,000,000\) tons, worth \(\$ 56,000,000\). On 650,000 acres, \(2,972,000\) bushels of flaxseed were ralsed, highest production in the country, value being \(\$ 13\),000,000:

Mnch of the grain and practically all of the forage erops are for local feedlng to livestock, that industry bing very Important. More than 2,300,000 domestle animals were reported by the 1920 census, with' more than \(40,000,000\) acres of land for grazing in the State.

A vast proportion of the western part is underlaln by brown or low-grade coal, which is produced not extensively and only for local domestic consumption, the State depending on the mines of other States for supply.

Railroad mileage, 1921, was 5,311 ,
North Dakota, with total population of 646,872, Census of 1920, had 131,690 or 27.1: per cent. of foreign-born: whites: The pereentage of iliteracy is yery low at 2.1 , native white, 4-10ths of 1 per cent., foreıgn-born white, 5.6 , Foreign-born whites in order of numbers were Norwegian, Canadlan, Russian and German.

North Dakota has been the theatre of several udvanced social and economic experiments, the State, under the leadersnip of the Non-Partisan League, cntering basic..business; enterprises including bank-
ing, against which some court decisions have milltated.

The recreation for outsiders is the big hunting in the west and on the prairles for game birds, the pralrie chlcken predominant, and the lakés and rlvers abounding in geese arid duicks.

\section*{OHIO.}

Area, square miles. ......... 41,040, .... . 35 th in rank Population, \(1920 . . . . . .5, \dot{7} 69,394 . . . .\). . \(4 t h\) in rank

Ohio, an East North Central State, is bounded on the north by Mlehigan and Lake Erie, on the east by Pennsylyania and West Virginia, on the south by West Virginia anc Kentucky, and on the west by. Indiana. It has no eonsiderable elevations, being hlghest in the centre, and sloping in each direction to the lake on the north and to the Ohlo River, a great traffic route, on the southern boundary line. Its climate is eharacterlstic of the north temparate zone, with abundant rainfall.

Onio has navlgable waterways for the 430 miles of the Ohlo, the 230 miles of lake frontage, and 100 miles up the Muskingum River in the southeast. It sonds much tonnage down the Ohio. Rail transport is very heary in ali directlions. Railroad mileage, 1921, พas 9,001 .

Manufacturing, mining and oil are the chief interests. The value of a products exceeds \$2,250,000,000 , from 16,000 estabilishments, employlng more than \(1,000,000\) persons, and representing investment of about \({ }^{2} 2,000,000,000\). The Iron and steel ore and reduction and machinery industries lead all others, with \(29,649,245\) tons of ore received at the Lake Erle port of Cleveland, heaviest handler of ore in the world. Cleveiand, Foungstown, Canton, Steubenvlle and Midaletown are the ptincipal ifon and steel working polnts. Manufacturing is very extensive in other lines. Of the 264 industries classifled by the Federal Census, Ohio has considerable production in all but 46 , ranking frist n 18 of them.
Alron is 'the worid subber centre, turning out in 1920 tires worth \(\$ 345,812,000\). Fourteen rubber companies there employ 72,397 persons, 1920 census: and pay salaries totalling \(\$ 142,33 \cap 000\). The product goes to every country on the g' ode, as does the machlnery made in the State.

The State ranks fourth in mineral wealth extracted, \(45,000,000\) tons of bltuminous having been lifted in 1920 by 50,000 miners who received more than \(\$ 48,-\) 000,000 in wages. Cleveland alone shipped also 22,900,000 tons of conl in 1920.

Oil production is very great, especially in the Lima district, the total value in 1919 being \(\$ 45,483,525\).

The pottery interest used \(1,811,000\) tons of clay, and has developed large factory production.

The output of automobiles in the Toledo and Cleveland districcs is second only to that of Detroit, mostly of medium or higher grades.

But the agricultural wealth also is great, :value of all crops and livestock sold being as reported in the 1920 census \(\$ 904 ; 400,000\), which was exceeded by oniy four other : States. Princlpal crops are cereale, -hay, potatoes, tobacco, vegetables, sugar beets, and all produets of the zone. Corn totalled \(149,844,000\) busnels, oats, 46,000,000; hay, 7,600,000 tons; tobacco, 64,420,000 pounds; and canning of iruits and vegetables was extensive, the fruits being tnose of the north temperate zone, the 1920 report showing the value of the output more than \(\$ 19,000,000\).

Much hign-bred livestock is raised, and the meat packing industry is hignly developed.

Its mineral wealth includes coal, iron, glass sand, clays, salt, petroleum, natural gas, limestone, sandstone, gypsum, mineral waters, some potash and pyrite.
standard railway and electric lins total 13,364 miles and include ail companies operating - in the Middle West.
iliteracy is low at \(2: 8\) per cent.; native wbite, \(9-10 t h s\) of 1 per cent., foreign-born, 12.6 , and Negro, 8.1, Foreign-born number 12.5 per cent. of the population, and are in the industrial centres chiefly, althougn, throughout the agrictultural districs the German native-born element is numerous, having come when the - revolutionary movement brohe in Germany in the last century

The State has very many institutions of higher education, the Onio Státe Uhiversity at Columbus, the canita, leading witn 5,165 students, others being Clicinnati University, 3,006; Western Reserve University at Cleveland, 1,990; Ohio Wesleyan University at Delaware, \(1,255^{\circ}\), Oberlln at Oberlin. 1,178; and eight others with about 4,000 attendance. Publio school enrolment is more that \(1,000,000\). Ohio is distinguished anoong the States for the tenseness of its political life. It is regarded as a
politically pivotal State, and is the home of President Harding, whose ncwspaper is at Marlon. It has given the United States five Presidents, all native born, whlie two others elected as residents of other States, were born in Ohlo.

\section*{OKLAHOMA.}

Area, square miles . . . . . . . \(70,057 . . . .17\). 17 in rank Population, 1920.........2,028,283.......21st in rank

Okiahoma, in the West South Centrai group origlnally set apart for Indlan reservatlons, and formerly known as Indian Territory, is bounded on the north by Kansas, on the east by Arkansas and Mlssouri, on the south by Texas, and on the west by Texas, a smali panhandle strip to the northwest also touching New Mexico. It was the home of these Indian tribes-Cherokees, Creeks, Choctaws, Chlckasaws and Seminoles, whose descendants remain as a large part of the present population, numbering 119,255 in 1920 , holding \(19,551,890\) acres with a valuation of \(\$ 320,496,333\) and an income of \(\$ 39.393,608\).

Oklahoma ls mostly a vast plain of roliing, fertlle prairies, rising in the west to maxlmum elevations of 4,000 feet, one being 4,700 feet, with mountains in the south central and southwestern portions. It has a falr share of forested area, yellow pine predominatlng, with about \(200,000,000\) feet the normal annual cut, and \(4,800,000,000\) feet of tlmber standlng. It has a healthiful climate, rather warm in summer, with good preclpitation for watering the large areas of agrlcuitural lands, that wlth llvestock and immense oii production being the main interests.

The 1920 census gave \(\$ 522,565,000\) as the value of ail crops, cotton, \(1,006,242\) bales ranking the State fourth; corn, \(74,000,000\) bushels; wheat \(52,640,000\); oats, \(49,500,000\); and heavy production of other cereals and the basic vegetabies with all fruits of the temperate zone abounding.
Dry farming is practised extensively in the western portlons, and production of cotton ls close to half a bale to the acre, much higher than the average.

Including the reflning of oll, Oklahoma's industrial output, Census of 1920 , was valued at \(\$ 401,363,000\). Refining led wlth \(\$ 150,673,000\), flours comlng next with \(\$ 40,844,000\). Industry comprehends smelting and refining zlnc the product being \(\$ 19,518,000\), oil cake making, \(\$ 18,907,000\); loundry and machine shop output, \(\$ 13,510,000\); and 25 other lines with more than \(\$ 500,000\) annual output.

The number of establishments was 2,445 , employing 38,314 persons, wlth more than \(\$ 250,000.000\) capital.

It is only 18 years since oil was discovered in Oklahoma, yet it has risen to the flrst rank as a producer. The 1920 figures on production were \(105,725,000\) barrels. Much of the oll land ls owned by persons formeriy in moderate circumstances, Indians among them. suddeniy madc rlch by royaities on oll lifted on their lands leased to operating companies. The oii measures are of a klnd with those of Texas, as to geological character and abundance, there being considerable litigation between the two States as to title to certain very valuable oll territory.

Rallroad mileage, 1921, was 6,572.
The percentage of lllteracy is 3.8 ; native whites 2.3; Negroes, \(12.4 ;\) and forcign-born whltes, 14 ; Negroes being sbout 10 per cont. of the whole.

The pubilic school enrolment is about 600,000 with several promising higher institutlons with large attendance.

Apart from the romance of the Indlan days und the "cowboy," Okiahoma went lnto history is the theatre of the most exciting "Sooner" rush for new lands ever staged in the United States, when more than 25 yeara ago, the Federal Government, after taking large areas from the indians by trcaty, tirew them open for settlement, and thousands camped on the boundary line for weeks, rushing across the border when the inoment came for admission. The scttlement and development into an organized community were remarkably rapid, until now the state has ali that appertains to modern life.

\section*{ORECON.}

Area, square miles . . . . . . . . 96,699...... . 9 th in rank Population, 1920...........783,989...... 34 th in rank

Oregon, of the Pacific (northwest) group, is bounded on the north by Washington, on the east by Idaho, on the south by Cailfornia and Nevada and on the west by the Pacille Ocean.

It has every character of climatc and soll and broduction known to the temperate zone, the lands
ranging from the heavily vegetated coast areas ranging from the heaviny vegetated is abundant, to the large stretches of semi-arid lands of the southeastern parts, with a touch here and there of almost dcsert, aithough negligibie \(\ln\) extent.

The coast climate is salutary, never very cold, and seldom very hot. That of the eastern portion, cast from the Cascade Mountains, is drier and often coldcr

It has very important navigation facilitiesthe Columbla River flowing into the Paclic with a width at the mouth of up to 14 miles, the river carrying tonnage along the whole of the 400 mlles of its seaward course from the Idaho ilne; and the Snake, running along the northern half of the eastern boundary, aiready conveylng much .traffic and being susceptlble of greater development.

Into Oregon pour the products of "The Inland Empire," a region comprislng 250,000 square mlles In Eastern Oregon, Eastern Washlngton, and Northern Idaho, the Coiumbia being the waterway outlet, and the rallways following the water grades from the Eniplre through the Columbia River Gorge to Portland, the "Rose City," which is actually on the Willamette Rlver, ten miles from the Columbia, but economically on the Columbia. Portland has very heavy foreign commerce.

The products of that Inland Empire are most varled, as are those of Oregon whlch are very large frult production, immense salmon fisheries, most extensive cereal productlon, and timber from forests that are the most extensive of any American State, it belng estimated that the standing timber is \(500,-\) \(000,000,000\) board feet.
The part of Oregon west from the Cascade Mountain range, which has peak elevations up to 12,000 feet, is slashed north and south by the Coast Range, a very aged rldge now eroded to lower levels. The whole of the western one-third of the State has abundant rainfall, although not so much nor so constantly as many believe, the average precipitation at Portland being about that of Chicago or New York. There are such forests as may be found in few parts of the world, immense numbers of trees attaining 20 feet in diameter, whlle there are vast stretches in whlch the lumbermen have taken only trees not less than eight feet in dlameter, and regarded it as cut-over land. The chief varletles are Douglas and white fr, spruce, hemlock, cedar, and larch, west of the Cascades, with yellow plne in the eastern Blue Mountalns, another range. Oregon has almost one-half the more than one trillion fect of timber standing in the three Coast States, Oregon, Washington, and California. Some of the trees are more than 300 feet high. In the southwest are found lorests of the redwoods, with at least 20 other varleties of tlmber in abundance, some of it excellent for furniture manufacture, which is a considerable industry. The cut of tlmber is the third in the Unlted States, Washington and Loulsiana exceedlng. The lumber is shlpped to ail foreign lumber-buying lands, more than a blliion feet comes by the Panama Canal to the Atlantic Coast, and much is dlstributed by rail to the Middle West.

The iruit industry is among the most important In the country. Especlally ln apples the world calls for Oregon products, and the varieties of fruit grown include also peaches, pears, prunesranked the best known-apricots, plums, and ali the smail kinds. Hood River, Medford, The Dalles and other towns are the centres of hlghly developed fruit raislng.

In agriculture, development has been rapid, there belng about \(1,000,000\) acres under water. and more than 2,000,000 included in irrigation projects, Federal and private. The lands not needing irrlgation, which are very extensive, produce richly. The 1920 census asslgned \(\$ 131,884,000\) as the value of ail crops; wheat, about \(20,000,000\) bushels. more than \(2,100,000\) tons of alfalfa; hops 4.788000 pounds; and more than \(8,000,000\) busheis of oats.

In livestock the State is productive. The wool olip was \(16,000,000\) pounds, and \(\$ 17,000.000\) was reailzed from dairy products. The Coast States arc cspccially flne for dalrying.
Although undcveloped as yet, therc are all the basic minerals in Oregon. Gold, siiver and copper are mined, with also stores of lcad, oii, quicksilver, chromic iron ore, platinum, and all the clays.

The valuc of the products of manufactures in the 1920 census was \(\$ 366,783,000\), lumber leading with \(\$ 85,348,000\), flour foliowing with \(\$ 42,550,000\) other Industrics being shlpbuilding, meat packing, canning, there being 20 others with more than \(\$ 1,000,000\) annual output.

The salmon fisheries contring in Astoria, at the mouth of the Columbia, are among the world's third greatest, the pack in 1920 bcing 481,545 cases,

Raliroad milleage, 1921, was 3305
In llliteracy Oregon ranks with Iow a and Idaho as the bighest in the country the percentage belng 15 , that of native-born \(4-10\) ths of 1 per cent. There are several colleges, the State Unlversity at Eugene the celebrated Agricultural College at Corvallis, Reed Institute at Portland and others.
rhe coast resorts are much patronlzed, and Portiand with mlld cllmate. i: also the summer home of many from surrounding regions

Oregon initlated the national movement for direct primarles the initiative and referendum, and the recall and adocted Prohibltion Independentiy of the national amendment.
its great. Columbia Highway. unexcelled for scenc beauty running up the river from Portland Mt Hood and other lofty mountalns, and the unique Crater Lake, are points of tourlst interest.

Each Oct sber a grea! cowboy roundup is held at Pendiaton Eastern Oragon, to which thousande of visitor: go

The mountalne in all parts of the state are summer camping grounds. Klamath River in Southern Oregon li sald to yield the largest trout in the world: and half a dozen Indian reservations are favorlte resorts of tourlsts. writers and artists.

\section*{PENNSYLVANIA.}

\section*{Area, square miles . . . . . . . 45 .126. . . . . . 22 an in rant} Populalion. 1920. . . . . . .8.720,017....... . \(2 d\) in rank

Pennsylvania, of the Middle Atlantic group is bounded on the north by Lake Erie and New York. on the cast by New York and New Jersey on the south by Delaware. Maryland and West Virginia. and on the west by Ohio and Lake Erie.

It is of varied topography. Hke most Atlantic States having leveller lands to the east, apd rising to higher altltudes to the westward. The Appalachlan range traversos the central part from northeast to southwest. a higher mountrin region being in the extreme west, and another lower plane running down to the shores of Lake Erle. It has rivers important in navigation-the Ohio. the Susquehanua, the Delaware, the Allegheny and the Monongahela

Viewed by and large. Pennsylvanla may be sald to lead all States in mineral and industrial production Its mineral riches are very great. The 1920 census reported anthracite coal output at 86200,090 tons bitumlnous, \(145,300,000\) tons: worth together about \(\$ 900000,000\). The coke output alone was \(\$ 160357.000\) The natural wealth in iron ore, oil (value in 1919 \(\$ 66,271,961\) ), ance leading the United States, and the quarries is large.

The State has builr its industries largely on these basic elnments. It produced nearly half the steel of the country shipping it to all parts of the world. Its production in pig iron in 1920 was \(13,983,134\) gross tons Pittsburgh is the centre of the greatest metai production ever attained in one locality. Its supplies of iron ore come mostly from Mlnnesota, and its operations have made more millionaires than any other single industrial centre in the country It was there that, the late Andrew Carnegie buile up his cortune. developing new steel making processes. The perfected tonnage from plitsburgh is the heavjest excenting at New York and Chicago. Elcctrical goods and equipment is made in Pittsourgh in large quantity

The State leads all Midwest States in cotton goods. is second In silk and wool goods, ranks first in leather output, glazed kid the most important. The censur reports more than 20,000 lndustrlal establishments employing 1523,000 ; paying \(\$ 1\),864.000 .000 in wages \(\$ 312000,000\) in salarles; using \(\$ 5.475000 .000\) of capltal and making more than \(\$ 8.500000 .000\) of producta

The principal port is Philadelohia, which receives and send to all world ports. It was the capltal of the United States. 1790 to 1800 . The great Baidwin Locomotivt. Works is located there, and also extensivr electrical equipment manufacturlng

Scranton is the greatest hard coal centre of the country and makes much steel.

Erie on Lake Erie is the lake port.
Rallroad mlleage, 1921, was 11,550 .
Pennsylvania produced, Census of 1920 more than \(\$ 500.000 .000\) of crops, the reglon around Reading, Lancaster and York, witb Engllsh names is the seat of the famous German (Pennsylvanla Dutch) agricultural development not perhaps equalled ln any other section of the Unlted States.

Production is varled in all parts of the State the cereals, forage crops, frults, and all that the temperate zone ralses. The crops are spread evenly through the whole list, with large diverslfication and conscquent steadiness of prospcrity. Tobacco raised was \(57,900.000\) poundṣ. 1920 census.

In educational facilitles the state ranks high. The princlpal hlgber educational institutions are the University of Pennsylvania at Phlladelphia, the Pennsylvanla State College. the University of Pittsburgh, and the Carnegle Institute of Technology at Pittsburgh, Lafayettc College, Lehigh University at Bethlehem, Temple University, Bucknell University, Dickinson College, Alleghany College, Duquesne College, Grove City College. Pennsylvania College, and Swarthmore College there being three colleges for women at Bryn Mawr. Pittsburgh and Chambersburg, Bryn Mawr having been distinguished especially.

Publle school enrolment exceeds 1.600,000, and the rate of illiteracy is 4.6 per cent.; natlve whlte, \(8-10\) of 1 per cent.; ioreign-born, 18.9; Negro. 61. Of the cotal of \(8,720,017\) persons, the native whlte population is 80.8 per cent, forelgn. 18.8 . In the industrial districte reside the bulk of the forelgners, the Census of 1920 , showing in all \(1,387,850\), of which 120,194 were German 90.666 Irlsh, 122,755 Anstrian. 222.764 Jtalian, 161,124 Russian, 171,380 Hungarian. the slavic strain being numerous. The urban population is 63.3 per cent.

In the past there have been bltter industrial conflicts. Which happily have subsided to a large degree The present ers sees industry, mining and agricuiture the three interests, with lumbering ldtely reduced to unimportance, although once a leading activity

Under Gifford Pinchot. iormerly Chief Forester of the Unlted States, serving as State Trorestor for several years, a great reforesting movement has begun.

The Pennsylvanla State Pol'ce. serving mostly the rural districts, have become an establislmeni of social import.

The moututains are popular for summer resorting. with many fine country, seats developed by the wealthy from old farm estates.

RHODE ISLAND.
Area, square miles............248..... 48 . 8 th in rank
Population \(1920 \ldots . . . . .604,397 \ldots . .8\) in rank Population 1920..........604.397.... .98th in rank

Rhode Island, smallest of States, of the Orlglnal Thirteen, and in New England, is bounded on the nortly and east by Massachusetts, on the south by the Atlantic Ocean and on the west by Connectlcut. Only 1,060 square miles of it is land. With 566.4 per square mile, it is the most densely populated State, exceeds all others in the per caplta industrlal output; it is 97.5 per cent. urban, and exerts influence out of all proportion to sizc and numbers.

The 1920 census gave these figures. Number of manufacturlng establishments, 2.466 , employing 156.012 persons, paying \(\$ 168,500,358\) in wages and salaries using \(\$ 415,989,203\) of materlais, and producing \(\$ 747,323,000\) in all, or \(\$ 1,245\) for each man. woman and chlld in the State, using \(\$ 594,337,448\) of capltal. It ranks flith in the making of cotton textiles, third in woolens, sixth in silk, has a large list of other industrial actlvitles, mostly calling for rather skilled operatives.

The first cotton spinning works of thls country were established in Pawtucket In the eighteenth century, and since then Rhode Island has carrled on large textile industry.
Jewelry, rubber goods, electrlcal equipment, hoslery, knlt goads, and many other llnes are pro duced. Providence, Woonsocket, and Pawtucket are the chief centres of industry

Although so small in all ways, yet the agrlcultural output by the 2.5 per cent of rural population Census of 1920 , was \(\$ 5,340,378\), and lncluded about evcrything produced in the temperate zone.

A large traffic coastwlse and forelgn passes through Provldence, as well as heavy passcnger travel, rall and water. Railroad mlleage, 1921, was 211.

Newport, on Narragansett Bay; has been for dccades the most famous of America's watering places. Palatlal summer homes were bullt by the socially prominent of the past one or two generations, embellished by every art of archltect and landscarie gardener. A prlvate bathing bcach for the socially elect is a feature.
On the western side of Narragansett Bay, Narragansett Pler is a popular summer resort, wlth large hotels and broad beach.

The state enjoys extenslve educational facilitles with Brown University and the State Normal School at Providence as the best known. Publlc school enrolment is 95.000

The percentage of llliteracy is 6.5 natlve white, 7-10ths of 1 per cent. : forelgn-born, 16.5. Foreignborn are 28.7 per cent, of the population, numberIng 173,499-English. 25,782; Scotch, 22.253; Canadlan, 36,400 ; Italjan, 32,241 .

\section*{SOUTH CAROLINA.}

Area, square miles . . . . . \(\therefore .36989 . .\). . . 39 th in rank Population, 1920.........1,683.724........26th in rank

South Carolina, in the South Atlantic group, of the Original Thirteen States, is bounded on the north by North Carolina, on the southeast by the Atlantic Ocean, on the southwest by Georgla. Its topography is, like that of North Carollna, mountainous, 4,000 feet the maximum, in the western part, a plateau in the central strip, and low-lying and sandy toward the 200 -mlle seafront.

The cllmate westward ls comparatively cool, in the central part medium, and nearer the coast subtropleal and humid.

The coast is indented wlth several harbors, Charleston having the most lmportant one, and being a prominent coastwise and foreign shipping port, cotton a principal outgo to Europe,

Agriculture easily leads in production, with \(\$ 437,121,000\) as the value of all crops, Census of 1920: cotton with \(2,631,718\) bales ranking the State fifth. Ot the 193,000 farms, Negroes cultivated more than half, and owned very many. The sea island cotton grown there is the finest grade produced in the country

All of the cereals, peanuts, tobacco, in which it ranks fifth, sugar cane and all the vegetables are produced in profuslon. Fruits are abundant, of temperate zone and sub-tropical varleties.

Livestock of higher breeds is an increasingly valuable adiunct.

Naturally, about half the area was forested, yellow pine predominating with much hardwood, but the lumbering has been so extensive that the forested area is reduced to about 1,\(000 ; 000\) acres, and the cut is diminlshing rapidiy. About 14,000 ,000,000 feet of pine remains standing.

In cotton mill spindles, \(4,974,460\), the state is second only to Massachusetts. Much of the labor in these mills is supplled by mountain families who were induced to migrate to the lower levels by the higher incomes offered, the industrlal development having been peculiar to the Southern cotton-mlll States in the building of towns owned entirely by the companles. Much child labor is employed.

Railroad mlleage, 1921, was \(3,814\).
About 400,000 are enrolled in the public schools, 200000 being colored, who form 55.2 per cont. of the population, the State percentage of illiteracy being 18.1, against 25.7 in 1910. That of native Whites is 6.5 , of foreign-born whitc, 6.2 , and of Negro, 29.3.

The Unversity of South Carolina at Columbia is the leading hlgher educational institution, Clemson Agricultural College being next. Clemson in 1898 opened the first textile school in the United States, which has achieved much in training technical mill workers and foremen.

\section*{SOUTH DAKOTA.}

Area, square miles
77,615 1.4th in rank Popillation, 1920..........636,547...... . 87 th in rank

South Dakota, West North Central, lower portion of the former Terfitory of Dakota, is bounded on the north by North Dakota, on the east by Minnesota and Iowa, on the south by Nebraska, and on the west by Wyoming and Montana. Its climate is that of the temperate zonc northern latitudes, cold ln winter and pleasant in summer. Before cultivation of the soll was extensive, it lacked rainfall; but precipitation swept westward as tillage advanced, until it now has normally abundant watering

Its hlghest elevations are in the Black Hills in the southwest, the remainder of the State being a vast rolling prairie, falling off to lower levels in the northeast, which drains into the Mlssissippl River and into the Red River of the North. The major part of the State is drained by the Missouli River, which cleaves the State through the centre north and south, There are several minor drainage basins, fceding the larger rlvers, with a succession of fertile valleys highiy productive, and a fair area of forests, ycliow pine, spruce, and others, \(1,100,000\) acres being under forest cover.

About 120,000 acres are irrigatcd, with about 200,000 acres normally in the irrigable scctions.

It is claimed that more than 90 ver cent: of the total area is arable. Of the \(50,000,000\) total acreage, \(34,500,000\) is in farmlands, with about 10,000,000 improved, farms numbering, Census of 1920 , 74,564 , crops being valued at \(\$ 321,202,000\).

Corn leads with \(91,200,000\) busheis; whent, 30 , 175,000; oats, \(53,650,000\); barley, \(19,250,000\), and
all the other cereals. Only the hardier fruits are grown.

The Census of 1920 shows livestock shipped valued at \(\$ 154,631,000\); dairy, iruit, poultry and other things, \(\$ 50,000,000\); the total revenues from all sources of wealth produced being \(\$ 400,000,000\), or about \(\$ 600\) per capita.

Mineral wealth ls practlcally all in the Black Hills, where gold mined ranks the State fourth (value in 1921, \(\$ 6,523,000\) ). Silver, lead, and basic mineral also abound. There is coal in the northwestern parts, not yet accessible to transport.

Railroad molleage, 1921 , was 4,276 .
The 1920 census reports manufactures to be mostly of soil products, valued at \(\$ 62,420,000\), and population 84 per cent, rural, 100.628 forelgn-born of the total of 636.547 , of which 16,000 were Nor wegian, and 15,000 German.

Illiteracy is 1.7 per cent.; native white, \(4-10\) ths of 1 per cent. About 100,000 attend the schools.

A feature is the large area In Indian reservationsthe Rosebud, Cheyenne River, Pine Ridge, and the Lower Brule. The Indians numbered in 1920 , 23,010; they engage in agriculture and livestock husbandry, occupy \(6,685,734\) acres, valued at \(\$ 63,265,900\). and have an income of \(\$ 4,331,940\).

\section*{TENNESSEE.}

Area, square miles . . . . . . . . 42,022
Papulation 1920.........8,887885..... . 84 th in rank
Tennessee, In the East South Central group, bounded on the north by Kentucky and Virginia, on the east by North Carolina, on the south by Mississlppi, Alabama, Georgia and North Carolina, and on the west by Arkansas and Missouri

The eastern parts are in the Great Emoky Mountains, the surface sloping toward the west, first to an elevated tableland, then to the bottoms of the Mississippi River, which skirts the western border It has the Tennessee River, which sweeps into Alabama from the northeast and returns to Tennessee at the northwest corner.

The forests cover about 30,000 square miles, and yield half a billion feet of lumber-oak, yellow pine, gum, yellow poplar, hemlock and chestnut

The 1920 census showed \(\$ 318,285,000\) as the value of all crops, which include all things grown in the temperate zone, shading off to the almost subtropical in the south. Eight other States exceed its 264,562 bales of cotton produced; its tobacco crop was 112,367,000 pounds, and all cereals and vegetables were grown.

Coal productlón was given at \(6,026,000\) tons; and there are stores of iron ore, 450,000 tons, with 380 , 000 tons of pig iron; copper, \(15,629,454\) pounds; zinc, oil, and manganese

The census figures on industry show 4,589 manufacturing establishments, employing 113,360 persons, engaging \(\$ 410,203,000\) of capital, and producing \(\$ 556,253,162\) in all. The census analysis indicates a rather broad basis laid for fluture development of industry the list reveallng 56 lines with more than \(\$ 1,000,000\) annual product. Flour leads with \(\$ 51,913,000\), and cottonseed and lumber have thelr usually large proportions as in all Southern States; but considerable beginnings have been made in the manufacture of dyestuffs, leather tanning iron and steel firnaces, woolen goods, vehieles bedding, implements, and cotton goods, product of which was \(\$ 22,461,000\).

Railroad mlleage, 1921 , was 4,078 .
Tennessee is almost wholly American in popula-tion-foreign-born whites being 7-10ths of 1 pel cent. Negroes are 19.3, and the percentage of illiteracy is 10.3 for the State; natlve white, 7.3 Negro, 22.4

Attending school were 630,000 persons. The main higher educational institutions are the Unj versity of Chattanooga, University of Tennessee at Knoxvillc, Fisk University at Nashville, Vanderbilt University at Nashvilie, Cumberland University at Lebanon and the University of the South at Sewanee

The Tennessee Mountains, like those of Kentucky are beautiful, delightful summer resorts. Lookont Mountain, scenc of a celebroted battle in the Civil War, is the object of chief interest in Nashville.

\section*{TEXAS.}

Area, squaro miles.
and Mexico, and on the west by Mexico and New Mexico. It is the largest State, embracing nearly 8 per cent. of the area of the whole country, and is about 800 miles long by about the same wide.

In the western part it is mountainous, the "Staked Plains" lying in the northwest, a great prairie in the central portion, and a lower lying region nearer to the Gulf. Western Texas is mostly without forestation, but in the east naturally there was a large wooded area, nearly \(8,000,000\) acres. materially reduced by extensive lumbering, the normal annual cut being more than \(1,250,000,000\) feet, mostly yellow pine.

In all lines Texas produces heavily. It is easily the first cotton State, the 1920 census rcturning 11,522,537 acres devoted to its culture, \(2,971,757\) bales the output. Rice was grown on 164,481 acres, yielding \(5,306,369\) bushels \({ }^{-} 122,170\) tons of sorghum came from 35,589 acres; 49,093 acrcs of vegetables were raised, 6,139 acres of small fruits, sugar cane, tobacco, most of the cereals, potatoes, the foragc foods, and a large variety of other soil products.
The census reports Texas the only State in which the total of all crops exceeds a billion dollars\(\$ 1.071 .542,103\),-the total return from crops. fruits, livestock. lumber and oil and other minerals being more than \(\$ 1,500,000,000\).

The farmland arca was 113,580,000 acres, in 436,033 separate farms, of which \(33,700,000\) were improved acres, the value of all farm property being more than \(\$ 4,400,000,000\). There are about 2,000 ,000 acres irrigable, and nearly 600,000 acres actually irrigated.

The corn crop was \(156,920,000\) bushels, and there was large production of wheat, oats, etc. Potatoes, white and sweet, yielded \(11,500,000\) bushels, and so on through the whole list.

The fruit production ranges from the varieties which are grown in the temperate zone to the semitropical kinds, and the pecan nut is a large crop.

The \(12,000,000\) domestic animals bring immense sums annually, the wool clip alone being from 15,000,000 to \(20,000.000\) pounds, with very heavy returns from cattie, horses, pigs and sheep, which range on the vast mid-western prairies, some of the ranches being of several hundred thousand acres. It leads the country in the cattle breeding industry.

The mincral resources of Texas are not yet defined. Development has wrought to yields of about 40,000 ,000 barrels of petroleum, according to the market demands (value of product in \(1919 \$ 143,337,362\) ), and refining has become an important interest. Oil is found all the way from the northwest to the southeast on the Gult the field there being somewhat concurrent with that of Mexico. In the north and northwest, the formation runs with that of Okla homa and Kansas, in all sections the content being rich.

More than \(2.000,000\) tons of coal were mined, and asphalt and pottery clay were important products, as also all the base minerals, silver, lead, quicksilver and copper being naturally present and somewhat developed as to production.

In the northwest the bed of a lormer inland salt sea contains the salts that appear in all sea waters and the Univeristy of Texas at Austin and the United States Geoiogical Survey have announced the discovery of potash, the work of proving the extent thereof being now in progress. The announcement in 1921 caused the usual rush of prospectors and speculators. with boom times resultant.

The 1920 census gave \(\$ 999995,796\) as the total value of all industrial products, there being 5.724 establishments. employing 130,911 persons, paying \(\$ 145,907,000\) in wages and salaries, and using \(\$ 701,-\) 170,000 of materials, with \(\$ 585,776.000\) of capital invested.

The three principal manufacturing industries were petroleum refining, \(\$ 241,757,000\); meat packing, \(\$ 125.192,000\) cottonseed oil and cake, \(\$ 102,122,000\) Flouring mills brought in \(\$ 73,064,000\), lumbering. \(\$ 47.884,000\) : with 60 other industrics which totalled cach more than \(\$ 500.000\) of annual products. Cotton goods manufacture is not proportioned to the immensity of the cotton growing, the amount reported being \(\$ 13,920.000\).

Texas leads in railroad mileage, having 16,125 miles in 1921. Houston being the most important rallway centre, claiming 17 different lines. Transport is heavy to Gaiveston, the largest seaport of Texas, on the Gulf 50 miles from Houston, and to New Orlcans. with large tourist travel to and from the Pacific Coast.

Pubic school enrolment is about 1.125 .000 for a population of \(4,663,228\) reported in the 1920 census. The University of Texas at Austin is well known. and has authority in many lincs of research. especially in geology. There are a dozen other well established higher institutions.

The percentage of iliiteracy was reportcd at 8.3; native whitc. 3 : Negro, 17.8 : foreign-born white,
33.8. The 249,652 Mexicans are the largest body of foreigners, communication across the international boundary line bcing in peace time constant and extensive.

Texas is a strange mixture of the old West and the progressive new South, the cowboy remaining in the western parts, and the eastern cities taking on modernities, with steady tendency toward the upbuilding of industry.

In the recent troubles with Mexico, there has been much disturbance on the border, but normally now Mexico is a source of wealth and prosperity to Tcxas. Galveston, the chief port, is expected to develop much vaster commerce than its already large tonuage. Galveston has a wonderful concrete seawali as protection against the fearful tidal wave and hurricane which swept it more than 20 years ago, practicaily destroying the city.

In late years, an automobile route has been popularized through Texas to the Pacific Coast, and elforts are making to improve the roads, not yet very facile for motor car passage.

In San Antonio, close to the border, the Alamo, a fortress defended to the death by the Texas patriots, is the chief point of interest to tourists, and in various places the visitor is shown battlefields on which the Lone Star State won freedom from Mexico.

\section*{UTAH.}

Area, square miles.. . . . . ...:84,990...... . 10 th in rank Population, 1920...........449,996....... 40 th in rank

Utah, of the Mountain group of the Far West, is bounded on the north by Idaho and Wyoming, on the east by Colorado, on the south by Arizona, and on the west by Nevada. It has several mountain ranges, which attain up to 12,000 feet elevation (the highest peak, Kings Mountain, 13,498 feet), the greater part of the State being a plateau 6,000 feet above sea level. The rivers are useful only for irrigation, more than \(1,300,000\) acres being under water. The Great Salt Lake, salt being 20 per cent. of the fluid content, is in the northwest part, aititude 4,218 feet, and has no known outlet. The climate is dry, stimulating and wholesome, warm in summer, rather cold in winter, and the sky so clear that no cloud specks it on 300 days a year.

The value of all crops in the Census of 1920 was \(\$ 57,890,000\), of which hay and forage led, with \(\$ 24,583,000\), mostly alfalfa. All the temperate zone cereals are produced. Emphasis is placed on forage crops.

The fruit production ranges from temperate to sub-tropical zone varieties, which latter grow in the southern tier of counties.

The wool clip in the 1920 census was 11,690,239 pounds.

Mineral resources are most varied, including gold, silver, lead, manganese, copper, gypsum, petroleum, sulphur, zinc, salt and coal, the State ranking third in copper. The total value of mineral output given in 1920 was \(\$ 45,169,328\). Coal was mined, 5,800 ,000 tons.

Production of uranium and vanadium, especially valuable, is the second in the Union.

Semi-precious stones are taken in large quantities, and a high grade of marble and onyx for building is quarrled

The manufactures consist mostly of smelting and refining of lead and copper, and the making of beet sugar, sugar beets being raiscd worth \(\$ 10,048,611\), for 930,427 tons. Manufactures are mostiy in Salt Lake City and Ogden. The number of establishments was given as 1,159 , capital, \(\$ 143,366,000\), Wages paid \(\$ 21,396,000\), and value of all products, \(\$ 156,804,000\), for a population of 449,396 , of which 48 per cent. was urban.

Railroad milcage, 1921, Was 2,161.
Illiteracy is low, at 1.9 per cent.; native white three-tenths of 1 per cent.; foreign-born 6.3 . there being 56,455 of foreign birth, Engiish most numerous. About 100,000 attend the schools, and higher educational institutions are becoming numerous and well established.

The distinguishing feature is the Mormon Church, the Lattcr Day Saints, as they call themseives, numbering three-fourths of all church membership. The Mormons camc originally to Utah from the Midwest, being driven out by persecution, and journeyed to the territory when it was aimost completely a wilderness, subduing it and building a social formation based on the domination of the Mormon Apostles and Bishops, with close interrelationship between church and government, the tithing system being adopted.

Salt Lake City, the capital. has several celebrated structures buit by the church, among them the great Tabernacle and the Temple.

The "Great American Descrt" lies in the northwestern corner of Utah, reaching over into Nevada.

\section*{VERMONT.}

Area, square miles . . . . . . . . . .9,564. . . . . . 42d. in rank Population, 1920..........352.428....... 45 th in Tank

Vermont, " a New England State, is bounded on the north by Canada, on the east by New Hampshlre, on the south by Massachusetts," and on the west by New York. Lake Champlain, more than 100 miles long, marks the western boundary line. The Green and Latonlc Mountains cross the State The climate like its topograpby is rugged and characteristic of the north.

The -1920 census gives \(\$ 47,999,600\) as the value of all crops, and \(\$ 168,159,000\) as the value of all manufactures. Vermont has the largest value of dairy products per capita in the Union, the value being returned as \(\$ 27,152,954\), and it leads all States in the production of maple sugar. Agricultural production takes a wide range, ineluding even tobacco, and covers all the cereals sultable to the zone, with considerable fruits, apples predominating

Known as "The Green Mountain State," its ehief mineral wealth is in its quarries, leading all states in output of granite (value, \(1919, \$ 3,563,734\) ), marble (yalué, \(1919, \$ 2,108,872\) ), asbestos and tale, its granites and marbles having gained Nation-wide markets, some of the most celebrated buildings having been erected with tiem.

Railroad mileage, 1921 , was \(1,076\).
Vermont is a popuiar resort in the summertime for persons from all. Eastern elties, the mountain seenery being beautiful, and a system of roads being now in process of building uo to modern standards. The shores ol̂' Lake. Onamplain, for 100 miles, afford excellent boating, and the area of the State teems with historie interest, having been the theatre of many battles in the former wars.

The llliteracy percentage is 3; native white 1.5, and foreign-born'11.3. Of the total population of 352,428 reported in the 1920 census, foreign-born numbered 44,526; Canadians, 24,868.

The University of Vermont and Middlebury College :are the leading institutions of learning.

Vermont was the ilrst State admitted after the adoption of the Federal Constitution.

\section*{VIRCINIA.}

Area, square mules . . . . . . . . 42,627. . . . . . 39 in in rant Population, 1920 . . . ......2,\$09,187.......20th in rank

Virginla, one of the South Atlantle, and one of the Thirteen Original States, is bounded on the north by West Virginia and Maryland, on the east by Maryland and the Atlantic Ocean, on the south by North Carolina, and on the west by West VIrginla and Kentucky. Part of its original territory was taken in 1863, during the Civll War, to form West Virglnia." On Its eastern side, the great waterway, Chesapeake Bay, cleaves the State, cutting off a small portion between which and the maln portion is the entrance past the Capes to the bay, and there are many rivers which fow into the bay, with navigation up the James, the York, thie Rappaliannock and the Potomac.

The topography is varied, beginning with the low lying lands along the coast, known as Tidewater Virginia, rising to an extensive tableland in the central part, and finding mountain elevations up to 5,700 feet in the west. In the northwestern corner is the rich Shenandoall Valley. The Potomac River bounds the State on the north, making off from the bay. The mountans are the Alleghanles, the Shenandoahs and the Blue Ridge. The cllmate Is as varied as the topography, characteristic in each portion; cool in the higher elevations and rather warm in the lower,

Fundamentally, Virgi'nia is agricultural, its mantifactiring being based on utilization of the soil products and some of the minerals, with which the State is weil endowed.

Rallroad mileage in 1921 was 4,703.
The 1920 census gives \(\$ 292,824,260\) as the value of all crops, Virginia being the third state in tobacco production, with \(102,301,226\) pounds, the culture of the plant haying been first done by whites at Jamestown 300 years ago. The temperate zone grains, vegetables and fruits are grown in profuslon. whe corn crop was reported as \(44,800,000\) bushes, in the Union.

Livestock husbandry has been in late years emphasized espectaily, effort being exerted to bring in pure blood strains. Much of the progress in thls fine is due to the incoming of nany Northerners, who have taken over rural estates. to obtam. the social
advantage of the delightful country life of the Old Dominion State, which was of the flower of the old time era of the cavaliers.

The manufactures have an ouput running at more than \(\$ 300,000,000\), and are growing in 1mportance. Cotton goods especially are becoming great in volume, the mills having about 600,000 spindles, Virginia using much more raw cotton than it pro duces. The lumber cut averages about \(800,000,000\) feet, and is unusuaily varied, including yellow pine, oak, gum, hemlock, cypress, chestnut. yellow poplar cedar, tupelo, basswood, hickory, and walnut

The tobacco and cigarette factorles send their finlshed product acrosg the earth, besldes whieh large quantities of tobacco are sent to Fngland and other European countrles for manufacture there Into cigarettes, eigars and smoking tobscco.

Manufacturing also comprehends extensive canning of fruits and vegetables, leather, coke, sawmill machinery, woodenware, plg Iron; clothlng, implements, silk and knit goods.

Mineral output includes coal, the State ranking ninth; with \(9,500,000\) tons; Iron ore output, these figures from the 1920 census, being \(32 \mathrm{C}, 000\) tons. With ail the basic crude minerals also produced including large suppiles of bullding minerals, and witin salt, copper, lead and zine produced. The mineral output averages about \(\$ 50,000,000\) for 35 kinds mined.

In Hampton Roads the Unlted Statea maintalns a great navy yard, as the princlpal rendczvous of the navy, utilizing the James River as a chief anchorage.

In Newport News, on the James Rlver, an extensive shipbuilding plant constructs vessels of many types, Including warships of heaviest tonnage.

Norfolk has large shipping interests, and is one of the principal centres for the manufacture and distribution of land fertilizers.

Fortress Monroe, on the penlnsula between the James River and Chesapeake Bay, has strong modern fortifications, commanding all adjacent waters.

Near the fortress, large hotels, maintained for many years on Government-owned lands, have been mined for instant blowing up in the event of war to remove obstruction to the range of the big guns

The illiteracy percentage is 11.2 . Census of 1920 ; native white, 5.9 ; foreign-born, 7.1 ; and Negro 23.5. The Negro constitutes 29.9 per cent. of the population, having fallen from 32.6 per cent. in 1910. As to illiteracy, no State offers a wider range of gradations, the older famllies showing very low percentage, and the mountain regions very high

In nigher educational institutions, Virginia ranks among the foremost States, having such well-known establishments as the Universlity of Virglnia, founded by Thomas. Jefferson, at Charlottesville, from which many men famous in history have been graduated; Wastington and Lee University at Lexington; William and Mary College, the oldest in the United States, at Wililam, iburg; Virglnia Polytechnic at Blacksburg; Virginla Military Institute at Lexington; Hampden-Sidney College at Hampden-Sidney, and Hampton Normal School at Hampton. the first well developed school for Negroes establlshed in the South. More than 500,000 attend the public sohools.

The "Old Dominion," first in population of the States until 1820, prides itself on its. Revolutlonary heroes, its five Federai Presidents, and its social prestige. It was the theatre of the decisive campaign in whieh the Civil War ended with the sirrender at Appomattox of General Lee, head of the Confederate armies.

\section*{WASHINCTON.}

Area, square mites. . . . . . . 69, 127. . . . 19th in rank Population, 1920........ 1,356,621 . . . . . 30 th in rank

Washington, of the Pactic (Northwest) group, is bounded on the north by British Columbia, on the east by Idaho, on the south by Oregon, and on the west by the Pacific Ocean. It has the Columbla River as southern boundary line for 300 miles from the west, and many streams of importance, mostly for irrigation uses, with the Snake RIver In Its eastern reaches. In the northwestern third of the State the great Puget sound, with tortious shores and innumerable harbors. on which Seattle, Tacoma Everett, Olympia and other important cities are situate, in. not excelled as a commerclal terminus for fali and water

The Cascade Mountains cut the western .third from the State's area, with the usuai lower mountali range nearer to the ocean shores. A dozon peaks fnoweapped, rise in the west. Mt. Ralnler or M1 Tacoma (according to which elty you may be is
at the moment) is a beautiful attraction with its 14,408 feet of height, now a natlonal park, and the Olympic range in the northwest is surpassingly beautlful.

Standing timber is about \(330,000,000,000\) feet; Douglas frr, yellow pine, white pine, spruce, larch,
cedar and other trees abound. Normally, the State cuts more than \(4,000,000,000\) fect, leading all the States, and shipping the product all over the world, much coming to the North Atlantic States via the Panama Canal, and going by rall to the Central West, while Washington shingles are used throughout the whole northern half of the country.

The trees are magnificent, like those of Oregon, and with that State Washington leads all others in amount of timber remalning.

Agriculture is developing rapidly. All crops reported in the 1920 census were valued at \(\$ 227,-\) 212,000 , and included all the cereals, vcgetables, forage crops, and the fruit production is famous, the irrigated sections all the way from the south to the very border of Canada being prolific and yielding products demanded in all Eastern fruit markets Every variety known to the temperate zone is produced; the fruit and nut crop, 1920 census, was worth \(\$ 51,662,000\), apples alone belng worth \(\$ 38\),823,000.

The geology is the same as that of Oregon-arid and semi-arid lands in the east, interspersed with fertile portions, and in the west much rainfall with resultant profusion of vegetation.

East of the Cascades most of the wheat is grown, the crop being \(41,837,000\) bushels, with many shcep, cattle and horses. "Horse Heaven" is located on the banks of the Columbia in Eastern Washington. The wool clip runs above \(5,000,000\) pounds. The livestock interest is mostly in the east, where the great ranges are, with mild winters in the valleys, with winter grazing.

The 1920 tigures on manufactures showed 4,918 establishments, employing 150,479 persons, with \(\$ 574,235,000\) of capital, outputting \(\$ 809,622,000\) oi products, lumber and timber leading with \(\$ 220\),flour milling shipbuilding next wlth \(\$ 140,980,000\), flour milling with \(\$ 81,141,000\), and meat packing with \(\$ 34,398,000\); wooden shipbuilding and boat building yielding \(\$ 25,539,000\). Forty-five other lines had more than \(\$ 900,000\) of annual production.

All the basic minerals are present, coal being produced in considerable quantity (value 1919 , \(\$ 10,737,656\) ) and gold, silver, lead and zinc also.

Shipping is very extensive from Puget Sound ports to the Orient, and coastwise via the Panama Canal, and the bulk of the shipping to and from Alaska is handled on Puget Sound, which, in the years of the great Klondike goldfields rush, made of Seattle and Tacoma scenes of feverish activity. The salmon fisherles of the Washington sea waters are very extensive.

Railroad mlleage, 1921, was 5,587 .
In llliteracy, the State has a pcrcentage of 1.7; native whitc, 3 -10ths of 1 per cent.; forelgn-born, 4.7. Foreign-born number 250,055 , being 18.4 per cent. of the population, of which Japanese and Chinese are numerous.

About 300,000 attend the public schools, and the State University at Seattle, with several well established colleges, provide ample higher educational facilities.

The shores of Puget Sound are very popular as summer resorts, with many hotels and cottage colonies, while steamer tourist travel to and from Alaska is extensive.

\section*{WEST VIRGINIA.}
 Population, 1920.

West Virginia, of the South Atlantic group, was set off from the original State of Virginia. It is bounded on the north by Ohio and Pennsylvania, on the east by Pennsylvania, Maryland and Virginia, on the south by Virglnia and Kentucky, and on the west by Kentucky and Ohio.

It is essentially mountainous, the Appalachlan range having several spurs therein. Its western parts drain into the Ohio River, and its eastern portions down the Potomac River to the Atlantic Ocean. *The mountains are in the east. The climate is moderate, and between the north and south extremes.

Mining is the leading activity, the State ranking second in the production of coal, with 75,500,000 tons as the production reported ln the 1920 census. Some of the finest steaming coal in the world is produced, especially the Pocanontas. It ranks first in output of natural gas, gaining about \(\$ 40,-\) 000.000 annually therefrom. In petroleum output
it ranks cighth. All of the base minerals are present in abundant supply, and the total mineral output runs above \(\$ 200,000,000\). It is in West Virginla that for years industrial disturbances have upset production and affected political and social conditions, belng now the subject of Federal inquiry that final settlement may be effected amicably to both sides.

West Virginia produces more hardwood than any other State, excepting Arkansas, and has vast timber wealth, including yellow poplar, birch, ash, oak, spruce, hemlock and walnut.

Its agriculture is not so important, total value of all crops reported in the 1920 census being \(\$ 96,-\) 537,000 , the leading crops being corn, hay, tobacco, potatoes, and fruits of all kinds suitable to the zonc.

Its transport by water is abundantly served with the Ohio River on the west. Rallroad mlleage, 1921, was 3,996 .

Its illiteracy percentage is 6.4 ; natlve white, 4.6 ; Negro, 15.3 ; and forelgn-born, \(24 .^{\circ}\) Negroes are 5.9 per cent. of the population, and foreign-born 4.2 . Public school enrolment was reported at 360,000 , and there are many colleges, cnurch denominational schools being numerous; industrial schools also.

In recent years many Northerners have gone to the State to take country homes in the mountains. White Sulphur Sprlngs in the eastern part is one of the most cclebrated pleasure resorts, popular soclally, and with a famous goll course on which some of the greatest golfers have played.

\section*{WISCONSIN.}

Wisconsin, of the East North Central group, is bounded on the north by Lakes Superior and Michigan, on the east by Michigan and Lake Michigan, on the south by Illinois and Iowa, and on the west by Iowa and Minnesota. The Mississlppi River forms the southern half of the western boundary line. It has the characteristlc cllmate of the northern tler of States, cold in winter and pleasant in summer, dry and stimulating.

The value of the total manufactured product at about \(\$ 1,000,000,000\) exceeds that of all crops reported in the 1920 census at \(\$ 445,347,868\), although its agricultural activities are vitally important and thorough, a large proportion of forelgners from thrifty countries having attained high grade tillagc. The mineral production also is large.

Railroad mileage, 1921, was \(7,554\).
Everything grown in the north temperate zone is produced, in grains, vegetables and fruits, agriculture being especially well diversified-corn, wheat, rye, barley, hay, flaxseed, potatoes, sugar bects, with conslderable quantities of tobacco for clgar wrappers, hops, peas, sorghum and maple syrup. More peas are canned than in any other State, and more hemp raised. The grape production is very large, and the output also of cranberries, apples, cherrics and plums.
Manufactures include the most lumber cut in the Great Lakes region. The State has the most creameries of any State, refines much beet sugar, makes much woodwork and implement products, considerable pig iron output, ranles fifth in zlnc production, fourth in iron ore output, the valuable hematite kind ciliefly, and the fisheries on the lakes are highly productive, the whiteflsh veing highly valued.

The story of Wisconsin forests, as of all of the Lake States, is tragic. Naturally, almost the entlre State was covered with pine, hemlock, and the invaluable hardwoods. Lumbering proceeded without regard to conservation, until more than 8,000 000,000 feet were cut annually; production on account of the exhaustion of the supply then falling off, until the 1920 census reported the cut as 1,275,000,000 feet, with an estimated stand remalning of about \(2,500,000,000\) fcet. There are therefore enormous areas of now useless cut-over forest lands, with comparatively scattered timber tracts left

Superior, at the head of Lake Superior, opposite Duluth, is the main terminus of the Great Northern Railway, and has great ore, lumber, wheat and coal durkage, with considerable manufacturing of iron products.

Of the \(2,632,067\) population shown by the 1920 census, the number of foreign-born was 460,128 , or 17.5 per cent., Germans numbering 151,250.

The percentage of llliteracy was 2.4, agalnst 3.2 in 1910. The native white illiteracy in 1920 was 7-10ths of 1 per cent. ; foreign-born, 8.4; Negro, 4.1.

The University of Wisconsin at Madlson is especlally far advanced in sociologic research, domestlc science and the practical arts. The 1920 matricula-
lon was 10,155 , including the summer school; and correspondence course is conducted by which 15,554 persons are instructed. There are besides many colleges and smaller schools.

Wisconsin has been and is the scene of Intense polltical battles and advanced social experiments, of which Robert Marion La Follette has been the leader, as Governor and United States Senator. It has a large percentage of foreign-born and foreignxtracted population, with numbers of Socialists.
The Great Lake shores contain many pleasure resorts, while the smaller lakes of the state are also popular with summerers, fishing belng prime, and hunting ln the fall.

\section*{WYOMINC:}

Area, square miles . . . . . . . .97,914. . . . . . \(8 t h\) in rank Population, 1920. . . . . . . . 194,402 . . . . . 48th in rank

Wyomlng, a Mountain Group State, is bounded on the north by Montana, on the cast by North Dakota and Nebraska, on the south by Colorado and Utah; and on the west by Utah, Idaho and Montana. It is a lofty region, its mean elevation about 6,000 feet-a broad plateau traversed by the Rocky Mountains, highest polnt of which is Mt. Gannett, 13,785 feet. 'Topography is varied.

Its waters flow in all directions, drainage by the Green River to the southwest, by the Yellowstone and Snake Rlvers to the northwest, by the Big Horn to the north, and by the North Platte, Sweetwater and Laramie Rivers to the southeast, none of them navlgable. Theriver waters are however valuable for irrigation; more than \(1 ; 200,000\) acres belng actually under irrigation, and an area of nearly 2,700,000 acres being included In irrigation projects which are under cónstruction.

The climate is that of the rarefied air of high elevations, and is salutary, with severe wlnters and pleasant summers, molsture precipitation being low at about \(12 \cdot\) Inches mean annually.

With less than 200,000 populatlon reported in the 1920 census more than \(\$ 50,000,000\) was assigned as the value of all crops, hay the leader, mostly alfalfa, and corn, potatoes, oats, wheat, rye and barley also produced.

Stock raising ls the most lmportant lndustry, slieep husbandry being the second 1 ln rank in the United States, the wool clip reported at 33,000,000 pounds.

Mineral resources are extenslve, coal production, 1920, 8,928,000 tons; copper of considerable quantity, and petroleum high with \(16,500,000\) barrels. Petroleum stores are known to be very great. Gold, sllver, iron ore, platinum ore and all the base mlnerals abound, with vast development assured for the future.

Manufactures are practically all for home consumption.

Railroad mileage, 1921, was 1,931.
The 1920 census reported the percentage of illiteracy as 2.1 ; native white, \(3-10\) ths of 1 per cent; forelgn-born, 9. There were 25,255 foreign-born, mostly from Europe.

The 1920 sehool enrolment was 47,553. The Unlverslty of Wyomlng at Laramle had 913 students.

The Yellowstone Natlonal Park in the northwest corner is one of the world's most famous resorts for the tourist; its giant geysers, waterfalls and hlgh coloration of the rugged gnarled rocks attract heavy travel from ali parts of the country and from foreign lands.

The ranch.life retains much of the old time flavor of the West, and many Easterners go there to enjoy it. The anvual cowboy roundup at Cheyennc at tracts many.

\section*{ALASKA, TERRITORY OF}

AREA, 590,884 square miles (including the Aleutian Islands).
POPULATION, Census of 1920, \(54,899 \quad(27,883\) whites 26,421 Indians and Eskimos).
CAPITAL, Juneau, population, 1920, 3,058.
Governor, Seott C. Bone, 1921-24, appointed June, 1921.

Consuls maintalned at Juneau by Norway; at Nome by Ruswia (Consul General) and Sweden; at Skagway by Great Britain.
Alaska occuples the northwestern part of the North Amerlcan continent. It is bounded on the north by the Aretic Occan, on the west by the Aletic and Bering Sea, on the south by the Nortli Pacific Ocean and on the east by Canada. From tlie south-
western corner the Aleutian Islands stretch out westward 1,200 miles to longitude \(172^{\circ} \mathrm{E}\), Cape Wrangell, facing Siberia. Bering Strait, 54 miles wide, separates the mainland of Alaska from Asia. The "Panhandle". runs southeast 600 miles along the Pacific to Dixon Inlet, and includes all the islands, the boundary wlth Canada along the mountain crests being fixed by arbitration in 1903, international survey completed, 1913.

Alaska, then sparsely colonized by Russian trappers and Indian traders, was bought from Russia by Secretary W. H. Seward, by the treaty of March 30, 1867, for \(\$ 7,200,000\). It was made a Territory by the act of Aug. 24, 1012, which gave it a Legislature elected by direct vote and a Governor, appointed for four years by the President. Congress reserves the right to legislation on certain subjects.

Alaska ls mountainous wlth hlgh plateaus: the coast range extends through the southern part, the chief peaks being Mt. St. Elias (alt. \(18,024 \mathrm{ft}\).), Mt. Wrangell ( \(14,005 \mathrm{ft}\).) and further inland M.t. McKinley ( \(20,300 \mathrm{ft}\).), the highest peak on the North Anerican continent. There are more than a dozen actlve volcanoes, notably Mt. Katmai now wlth the "Valloy of 10,000 smokes" a national monument. Mt. Katmai which had been dormant, suddenly blew the top of its head off June 6, 1912-one of the greatest eruptions in hlstory. The noountains and the Sitka distrlct are densely timbered, malnly coniferous, but the islands are treeless. The most notable glaclers are the Muir, Malaspina and Seward. The Yukon is the chief river, 2,000 miles long, navigable for about 1,800 miles. The length of the coast line is about 4,750 miles, including islands 26,364 miles. There are many excellent harbors. one Dutch Harbor, Unalaska Island, being of great naval importance.

There is great diversity in climate. In the interlor a temperature of \(60^{\circ}\) below zero.in winter is not unusual, with a temperature of \(90^{\circ}\) in the Summer, but on the coast owing to the Japanese current the thermometer rarely falls below zero in the winter with a maximum of about \(80^{\circ}\) in the summer. Rain there is abundant. All the hardier vegetables and the cereals, except corn, thrive during the short summer with its long hours of sunlight. Of the \(378,165,760\) acres the census of 1920 reported 90,652 in 364 farms, 5,836 acres only being under cultivation.
Reindeer were introduced from Lapland and from Siberia to ingure the support of the Eskimos by the Government, which brought in 1,200 head between 1892 and 1902. These increased under careful handling to 22,107 in 1910, 92,933 in 1920 (valued at \(\$ 2,238,562\) ) and (estimated) 216,000 in 1922 . Some reindeer meat has been successfully exported. Fur farming also is on the increase, espccially of foxes, the export of fox skins in 1919 being about \(\$ 800,000\) The kllfing of seals on the Pribilof. Islands having been brought under control in 1910 . and pelagic sealing prohibited by treaty in 1911, the seal herds have increased from 215,000 to 524,000 in 1919: 1919-20, 30, 198 dressed sealskins, valued at \(\$ 1,509,-\) 600, were shipped to the United States. The shipment for \(1920-21\) was 24,889 , valued at \(\$ 995,660\), and for \(1921-22,26,293\), valued at \(\$ 1,005,175\).

Fishing is an important industry; in 1920, 788 vessels were engaged in it; 27,482 persons were employed, \(\$ 70,986,221\) capital was invested and the value of the products was \(\$ 41,492,124\). The salmon pack weighed 211,004,976 pounds, valued at \(\$ 37,050,212\).

Since the discovery of gold at Juneau In 1880 (the great Klondike rush through Skagway into Canadian territory and the Upper Yukon began in 1896) up to January, 1921, Alaska has produced \(\$ 320,000,000\) of gold, nearly two-thlids of it from placer mines. Copper \((\$ 127,000,000)\) and other metals produced bring the total yield up to \(\$ 460\),000,000 . The U. S. Geological Survey estimates the value of the placer gold reserve to be at least \(\$ 360,000,000\), this \(1 n\) addition to gold in veins that could not be esthmated. There are large coal deposits, which are not yet fully developed. The coal by U.S. Navy has been found equal in steaming value to Pocahontas coal.

Congress ln 1914 authorized tho bullding of a railroad not to exceed 1,000 miles in length. The llne is \(1 n\) operatlon from Seward to Fairbanks, 467 miles; with spurs to conl mlues that brings the total up to 541 miles. The cost at wartime prices exceeded \(\$ 52,300,000\). The rest of the system it is expected wlli be finished in 1923.
Mercliandlse passing through the port of Juneau to and from foreign countries was:

Alaska's commerce with the United States for
the last three Dscal years, ending June 30, was:

\section*{HAWAII, TERRITORY OF}

AREA. 6.449 square miles (Hawali, 4,016 square miles: Oahu, 598: Maui, 728; Kauai, 547: Molokal: 261: Lanai. 140; Niihau. 73; Kahoolawe, 44, Molokini, 2.7).
POPULATION, Census of 1920, 255.912.
CAPITAL. Honolulu, population, 83,327: other city, Hilo 10,431.
Governor, Waliacc R. Farrington (1921-24) assumed offlce, July 5, 1921.
Consuls are maintained at Honolulu by Belgium, Brazll, Chili, China, Denmark. France. Great Britain. Italy, Japan (Consul General), Mexico (vacant), The Netherlands, Norway, Panama, Peru, Portugal, Russia, Spain (vacant), and Sweden (vacant).
The Hawailan Islands-the crossroads of the Pacific-are twenty in number of which nine are inhablted. lylng in the North Pacific Ocean in longitude \(154^{\circ} 40^{\prime}-160^{\circ} 130^{\circ}\) west, latitude \(12^{\circ} 16^{\prime}\) \(18^{\circ} 55^{\prime}\) north, and more than 2,000 miles from the nearest mainland. The group extends for 390 miles from northwest to southeast. San Franciseo ls distant 2.089 mlles: Panama. 4.640; Auckland, N. Z., 3,800; Manila, 4,350; Hongkong, 4.950; and Yokohama, 3,440.

The lslands are mountainous and voleanic in origin, flled with extinct craters, Haleakala on Maui being the largest ln the world. On the island of Hawali is Mauna Kea (altitude 13,823 feet) quiescent, and Mauna Loa (altitude 13,765 feet) actlve. Sixteen miles east of the latter is the largest aetive volcano ln the worid, Kilauea (altltude 4,400 feet) whth its "pit of eternal fire." The last eruption was \(\ln\) Mareh, 1921, and the island is searred with many vast lava flows.

The islands are clothed with luxuriant tropical vegetation; wlth abundant rainfall and cooled by the prevailing northeast trade winds the climate ls perpetual summer without enervatlng heat. The higher elevations of the mountains are covered wlth forests. and 820,000 acres are set apart as a forest reserve. The soil is very fertile and all tropical and sub-tropical fruits and vegetables are grown. The farms number (1920) 5,284 , valued at \(\$ 151,-\) 129,085 , wlth \(2,702,245\) acres, of which 435,242 were improved and 599,531 in woodlands. Of the 5,284 farmers 892 were white ( 627 owners) 679 Hawailan ( 546 owners), 3,098 Japanese ( 188 owners, 11 managers, and 2,899 tenants), and 560 Chinese ( 56 owners, 7 managers, and 497 tenants). In 1919 \(29,571,845\) pounds of rice were produced and 19,883,650 pounds of eoffee; 86 farms reported (1920) 1,407 breadirult trees that produced a crop of 101,268 breadfrult. Banana eultivation has been pushed, 160,953 bunches being produced in 1919.
The largest industry of the islands is the growing of sugar eane and the production of raw sugar. The value of the sugar produced ln 1919 was \(\$ 80\).236,000 , from 123,165 aeres. The yield per acre is larger than any other country; about five tons of sugar per aere on an average; irrlgated land ylelding 70 per cent. more than unlrrigated. The employees on the sugar plantations, about 45,000 in number, of many nationallties, receive house fuel, water and medical attendance free and are paid a basic monthly wage and a bonus, whleh varies with the price of sugar. In 1920 the minimum basic wage was \(\$ 20\) and the bonus extraordlnarily large, was 276 per cent. of the wage. For 1921 the bonus was \(\$ 30\). Much welfare work is done.

The second largest Industry is the growing and canning of pineapples. The product increased 1.094 per cent. ln the 1909-1919 decade and In \(1920143.473,536\) two-pound cans valued at approximately \(\$ 31,000,000\) were produced. About 46,000 acres are under cultivation.

Hawail exported to the United States in 1921 raw sugar valued at \(\$ 46,693,305\) and canned pineapple. \(\$ 19,905,416\). Imports from the Unlted States were chleffy lron and steel manufactures, mineral oil, brcadstuffs, meat and dairy produets, lumber, textiles. etc., fertilizers, automoblles, rubber goods, leather and paper.

Honolulu, on the Isiand of Oahu, is the capital and chlef commercial city and port of the islands. It has a fine natural harbor which needs improvement and development. Its needs have been neglected by Congress which alone can appropriate the money for them. The customs recelpts Federal ineome and other taxes paid to Washington by the Territory amount to about \(\$ 25000,000\) yearly. The Federal Government maintains a large army post on the islands with quarters for a division of 30,000 men at Schofield Barracks and the subsidiary forts. The Navy Department. has a large base at Pearl Harbor with drydock. opened Aug. 31 1919. There are also a large aviation fleld and a powerful radio station.

Hawali has an excellent system of roads, and in Honolulu much concrete construction is used. The islands have approximately 350 miles of steam rallroads besides about 625 milics on the sugar plantations. In the fiseal year 1920-21. 1.001 ships with a tonnage of \(6,008,689\) entered the ports of the isiands.

The natlve population of Hawail at the time of the diseovery has been estimated at about 200,000 . With clvilization it has dwindied and the race seems destined to disappear through intermarriage with other stocks rather than by deaths. Of the total population of 255,912 reported by the Census of 1920, there were, Hawalians, 23.723; part-Hawaian, 18.027; Portuguese, 27,002; Porto Rican, 5,602: Spanish, 2430 : other Caucasian, mostly American, 19.708: Japanese, 109,274; Chinese, 23,507; Fllipino 21.031; Korean, 4.950; Negro, 308.

Hawali came under the influcnce of American missionaries in 1820, and a large proportion of the natives embraced the Christian faith. The lmpetus given to education was great, and elementary edueation has always been free. The language in general use In the schools is English. The Japanese have many so-called Buddhist schools, which their children attend in addition to the Ameriean schools. The sehool plants, both public and private, are ot very high order. The University of Hawail is State supported. The Bishop Museum at Honolulu is a selentifie instltution of the first order devoted espeeially to the preservation of the life of the native Hawailans and to the study of the ethnology of Polynesia.

Pan-Pacifle conferences on vital matters have been promoted during the last three years with great success; and the islands are yearly welcoming increasing numbers of tourists, bcing well favored with steamship communieation.

The Hawalian Islands were discovered by Capt Cook in 1778, and there he met his death on his second vislt in 1779 . King Kamehameha brought the islands under one rule in 1791. The rule of his dynasty, which became a constitutional monarehy in 1840, ended when a revolutlon drove Queen Liliuokalanl from the throne in 1893. An attempt to secure annexation to the United States failing, a republie was proclaimed, July 4, 1894 . On the outbreak of the Spanish-American War Hawaii was annexed to the United States by a joint resolutlon of Congress, July 7, 1898, and created a Territory by the act of April 30. 1900.

The chlef executlve offlcer of the Terrltory of Hawail is the Governor, who is appolnted by the President wlth the approval of the Senate for a four-year term, and who must be a resident of the islands in order to bc eligible for appointment The Territorlal Seeretary is appointed in the same manner, but the heads of the Terrltorial departments are appointed by the Governor, with the approval of the Territorial Senate.

The Legislature of Hawail consists of the Senate of 15 members, elected for four-year terms; and the House of Representatives, of 30 members, elected for two-year terms. The Delegate to Congress is elected every two years, and has floor privileges in the House, but no vote.

The judielary consists of a Supreme Court, four Circuit Courts and numerous Distrlet Courts. The Justices of the Supreme Court and Circuit Courts are appointed by the President, with the approval of the United States Senate.

Hawail's commerce with the United States is as follows:
\begin{tabular}{|c|c|c|}
\hline FISCAL YEAR. & \[
\begin{aligned}
& \text { Exports, } \\
& \text { to U. S. }
\end{aligned}
\] & Imports. From U.S. \\
\hline 1919-20. & \$142,246,003 & \$59,261,621 \\
\hline 1920-21 & 127,692,879 & 77,324,114 \\
\hline 1921-22. & 68,335,073 & 51,581,621 \\
\hline
\end{tabular}

The revenue of the Territory is derived from real and personal taxation, etc. For the fiscal year \(1920-21\) the receipts were \(\$ 9,553,450\), expenditures, \(\$ 8,338,041\), with a cash surplus of \(\$ 4,392,557\).

\section*{}

\section*{THE PHILIPPINE ISLANDS.}

AREA. 114,400 square miles.
POPOLATION, Census of 1918, 10.350,730.
CAPITAL, Manila, (Luzon), pop. 1918, 283,613 (summer eapitai Baguio, pop. 5,462) other eities, Cabu, pop. 65,300; Aibay (Luzon), pop. 53,105; Iloilo, (Panay), pop. 47.808; Batangas (Luzon), pop. 41,182; Ormoe (Leyte), pop. 38,247; Laoag (Ilocos Norte), 38,294; Baybay (Leyte), pop. 36,934.
Governor General, Major Gen. Leonard Wood, appointed February, 1921; assumed office Oct. 5 , 1921; resigned, to take effeet Jan. 1, 1923.
Consuls General maintained at Manila by China, Great Britain, Japan, Mexico, The Netheriands and Spain. Consuls maintained at Manila by Argentina, Belgium, Brazii, Chile, Denmark, Franee, Italy, Liberia, Mexico (vacant), Nicaragua, Norway, Peru, Portugai, Russia, Sweden and Switzeriand; 'at Cebu and at Iloilo by Great Britain, The Netherlands, Norway and Spain.
The Philippine Isiands, the iargest isiand group in the Malay Archipelago, were discovered by Mageilan in 1521 and conquered by Spain in 1542; they were ceded to the United States by the treaty of Paris (Dec. 10. 1898) foilowing the Spanish Ameriean War. Admiral Dewey had destroyed the Spanish fieet in Manila Bay, May 1, 1898, and Major Gen. Wesley Merritt had captured the City of Manila on Aug. 13, 1898.
The land area of the isiands lies between \(21^{\circ} 10^{\prime}\) and \(0^{\circ} 40^{\prime}\) north latitude and between \(116^{\circ} 40^{\prime}\) and \(126^{\circ} 34^{\prime}\). east iongitude. There are 7,083 islands extending 1,152 statute milies from north to south and 682 miles from east to west. Of this number 462 have an area of 1 square mile or over; 2,441 are named and 4,642 unnamed. The largest, Luzon, contains 40,814 square miles, and Mindanao, the next. 36,906 . Panay has 4,448 , Cebu, 1,695; Palawan, 4,500; Mindoro, 3,794: Bohol, 1,534; Masbate, 1,255 Between and about lie the other groups including the Sulu or Jolo Islands in the south, the Babuyanes and Batanes in the north, the Catanduanes in the east, Cuiion in the west. Population by the Census of 1918 was \(10,350,730\), of which all but about 62,000 were Filipinos. There were 5,776 Amerleans, 43,802 Chinese, 7,806 Japanese, 3,945 Spanish. 1,148 Britons, 286 Germans, 182 French. 125 Swiss. In Manila in 1918 there were 3,124 Americans.

The archipelago has a coast line of 11,444 statute miles which exceeds that of the entire United States. There are 21 fine harbors and 8 landiocked straits, the prineipal being Manila, Subic, Batangas, Tayabas and Hondagua. Ingan, Iiliana, Nasipit, Sibuguey, Sarangani Bays: the Gulis of Lingayen, Ragay, Lagonoy and Davao. and the San Bernardino, San Juanico. Surigao and Basilan. Straits and the Verde Passage. Manila Bay, with an area of 770 square miles, and a circumferenee of 120 , is the finest in the entire Far East It is a roadstead in ali parts of which vessels can anchor, but a breakwater has been coustructed for vessels to shelter behind in bad weather. Manila, Cebu, Iloilo, Zamboanga, and Jolo are the ports of entry.
The extensive mountain system of the Philippines beiongs to the succession of voleanic ranges or the Pacific system of the worid's surface. There are 20 more or less active volcanoes. Mount Apo (Apo means master), 9,610 feet, in Mindanao; Mayan Volcano, 7.943 feet, in Albay; Taal, 984 feet in Batangas: Canlaon, 7,995 feet, in Negros; Banajao, or Majayjay. 7,144 feet, are the most famous of these. Other high mountains are Pulog, 9.580 feet. Haicon, 8.481 feet; Malingdang, 8,560 feet: Santo Tomas, 7,400 feet.

Neariy all the principal isiands have important river systems. In Luzon are the Rio Grande de river systems. In Luzon are the R1o Grande de milies of territory, the Rio Grande de Pampanga. ctuptying into Manila Bay through a dozen mouths; the Agno, the Abra. Bued, and the more familiar Pasig. The Rio Grande de Mindanao, 330 miles long, is the largest in the islands, and the Agusan, also in Mindanao, the third in size. Mindoro has 60 rivers and Samar 26.

November, December, January and February are the temperate months. The mean average temperature at this season is about \(77^{\circ}\) to \(79^{\circ}\) Fahrenheit. In April, May and June. the hot months, the mean average is between \(83^{\circ}\) and \(84^{\circ}\). In the other months it is about \(80^{\circ}\). The nights are seidom unpleasantly hot even in the hot season, and a temperature of \(100^{\circ}\) is a rarity in Manila. The mountain regions of the porth are cool as Septem-
bcr in the temperate zone. There are two seasons, the rainy and the dry. The rains are heaviest in July, August and September; lightest in February and March. The lowest average rainfali for the last tweive years for the whole arehipelago was 60.73 inches in the dricst region, the highest 125.68 in the wettest. Maniia's average was 75.46.
The preamble of the Jones Act, passed by the United Statcs Congress and approved Aug. 29, 1916, deelared that "it has always bcen the purpose of the peopie of the United States to withdraw their soverelgnty over the Philippine Isiands and to recognize their independence as soon as a stable government can be estabiished therein." On assuming office in March, 1921, President Harding sent Major Gen. Leonard Wood, and W. Cameron Forbes, (Governor General 1909-13) to the Philippines to make a compiete survey of conditions. In their report they recommended among other things "that the present general status of the Philippine Islands eontinue until the peopie have had time to absorb and thoroughly master the powers already in their hands" and "that under no circumstances should the Amerlean Government permitto be estabilshed in the Philippine Isiands a situation which would leave the United States in a position of responsibility without authority.

The Jones Act of 1916 aboiished the Philippine Commission under which the islands had been governed under the act of Juiy 1, 1902 . It substituted as the Upper House of the Legislature a Senate eomposed of 24 members, and instead of the Assembly, a Housn of Representatives of 91 members, eiected trieniially. The Governor-General, who remains as the head of the Islands, is appointed by the President. All the Cabinet heads, except Education, are Filipinos. Senators are elected for six years.
The Philippine Archipelago is divided into 48 provinces, 11 special provinces and 2 chartered eities. The chief executive of a regular provinee is the Provincial Governor, who is an elective offieiai. He, together with two other elective members, form the provincial board which constitutes the legisiative branch of the provincial government. In the special provinces, with the exception of Mindoro, Paiawan and Batanes, the Provincial Governors are appointed officials.
Of the 24 Senators only two-those from the Tweifth District, whieh is composed of the Mountain Province, the City of Baguio, the Province of Nueva Vizcaya and the Department of Mindanao and Sulu-are appointed by the Governor General; all the others are elected by popular vote: as are also the 91 Representatives, excepting the nine who represent the Mountain Province, the Province of Nueva Vizcaya and the Department of Mindanao and Sulu.

Filipinos have been admitted to the civil service in increasing numbers. On July 1, 1920, there were 20 Americans and 30 Filipinos acting as ehiefs or assistant ehiefs, and 760 Amerieans and . 12,074 Fiipinos connected with the Government.
The government of the towns is practically autonomous, the offieials being elceted by the qualified voters of the municipality and serving for three years. The officials consist of a President, Vice President, and Counciliors, the latter varying in number according to population. Local municipal government has been instituted in about 873 municipaities and 312 municipal distriets.
The administration of justice in the Philippines is intrusted to the Supreme Courts, the Court of First Instance, the Municipal Court of the City of Manila and the Courts of the Justices of the Peaee.
There are 99 school districts in the islands. Among the special Government insticutions are the Normal Schooi, the Schooi of Arts and Trades, the Nautical School, and tile Centrai Luzon Agricultural School. There are provinciai trade schools and ships. In 1919, in the public schools, there were scholars as foiliows: 'Primary, 347,839 maies, 253,501 females; intermediate, 55.082 males, 27,935 femaies; secondary, 12,025 males, 3,042 females. There are 300 private schools with 38,500 pupils. The State supportcd University of the Phllippines in 1921-22 had 4,718 students and the Dominican University of Santo Tomas (founded 1611) 701. The dominant reiigion is Roman Catholic.
The 1919 crop values of the islands were: Rice, \(\$ 94,300,000\); cocoanuts and products of. \(\$ 37,200,000\) sugar and products of, \(\$ 37,200.000\); pabaca (bemp), \(\$ 32,500,000\) corn and products of, \(\$ 18,800,000\) tobacco leaf, \(\$ 8,700,000\); other and totai, \(\$ 230,800\), 000. Fruits and vegetables are not included in the above. Cocoanuts and tobacco are valuabie products. In 1918 there were 603,000 cattle and

1,271,000 water buffalo (carabno). Vlrgln forests cover 40,000 square miles. There are \(73,000,000\) acres of publie lands.

Under the act of 1919 any citizen of the Philippine tslands or of the United States over the age of is years, or the head of a faniliy who does not own more than 50 deres of land \(\ln\) the Pinilippines may enter \& homestead of not exceeding 59 acres of agrieultural land of the publie domain. Total homestead fee, \(\$ 10\), Ariy citizen of lawful age of the Philippine Islands or of the United States, and any corporation or association of whel at least 61 per centum of the eapltal stock of of any interest in said capital stoek belongs wholly to citizens of the Phillppine lslands or of the United States, may purehase any traet of publie agricultiural land of not to exeeed 247 aeres in the case of an individual and 2,530 acres as a corporation or asfociation

During 1921,871 foreign vessels with a tonnage of \(2,646,455\) entered the ports of the islands.

There were, in 1921,778 miles of rallroads, and 6,200 miles of publie roads. The Manila Rallroad Company lias been taken over from the British owners by the Government and the line of the Philippine Railioad Conipany ls about to be taken over. Bilver, lead, zine, eopper, iron, eoal, petroleum, asbestos and manganese are mined, as well as elay, marble, salt, etc. The islands are riell in mineral resources, but these are as yet undeveloded. The production exceeds \(\$ 3,000,000\) a year.

According to Dr. Merton Miller, former Chef Ethnologist, Philippine Bureau of Seiences from the extreme nortbern end of the arehipelago to its southernmost limits, with the exeeption of the few seattered Negritos, the people of the Phillippines, pagan, Moro and Christian, are one raeially. There is some reason for believing that they migrated into the Islands at two different times. But in all probability they eamo from the same general region and have a common aneestry. There are many different languages or dialects in the Philippines, but ail are elosely reiated to one another, the pronunclation and mode of speech vary but little from one seetion of the Phillppines to another. and the majority of the words are eommon to two or more of the Philippine languages. These languages. whether spoken by pagan, Moro or Christian, belong
to the great Maiayo-Polynesian famlly, branches to the great Matayo-Polynesian famlly, branches of whieh are found in Sumatra; the Hawailan Islands. Madagascar and on many other islands between. The early immigrants into the Philippines
were the Indonesians and the Malays and the blend of these two races oharacterizes the people of the Philipplnes to-day. This admixture of the Indonesians and the Malays has become so thorougl that it is difficult to distinguish one group from another.

\section*{PORTO RICO.}

ATREA, 3,453 square miles
POPULATION, Census of 1920, 1,299,809.
CAPITAL, San Juan, popnlatlon 70,707 ; other cities, Ponce, 41,561; Mayaguez, 19,069.
Governor, E، Mont Riley.
Consuls maintained at San Juan by Argentina Belgium, Brazii, Chill, Colombia, Cuba, Denmark, Dominican Republic (C. G.), Franoe, Great Britain, Guatemala, Haiti, Honduras, Italy, Mexico (vacant), The Netlierlands, Norway, Panama, Peru, Portugal, Spain, Sweden, Uruguay and Venczuela.
Porto Rieo is the fourth largest of the Greater Antilles, with the Atiantie Ooean on the north and the Carsbean Sea on the south. Santo Domingo is about 45 miles to the west, and St. Thomas 40 miles to the east. The island of Culebra, population 839, and Viequez, population 11,651 , to the east, form part of the territory, It is 95 nites long (from east to west) and 35 miles wide, with a eoust line of about 345 miles. The best harborts are at San̆ Juan and Ponee. Through the middle of the 1sland, from east to west, runs a range of mountains with an altitude oi 1,500 to 3,750 feet, enitivable to the summits. The soil is extremely fertile and largely under eultivation. The lower lands to the north are well watered, but irrigation is needed in the south; an extensive system has been eonstructed by south; an extensive system hovernment. Sugar, pineapples, oranges, grapefruit, tobaceo and eoffec are the chief exports. Sugar production under modern methods inereased from 35,000 tonk in 1899 to 490,000 tons in 1921. Stoek raising is an important Industry. Valuable salt deposits are worked. Mineral produetion is under-develojed. The elimate is the most healthful of the Western Hemisphere in the tropies

Porto Rieo was diseovered and named by Columbus in 1493 , Ponee de Leon eonquered it for Spain in 1509-11. It was eonquered by Major Gen. Miles in the Spanish-Amerlcan War and eeded to the Unlted States by the Treaty of Paris, Dee. 10,

The years 1898 and 1899 are catendar; 1900 eovers January 1 to June 30,1901 , and succeeding yours are nscal. Imworts trom the United states 1 It 1899 included coln bind bullon.
1898. It is administered under the Foraker Act, Aprii 12, 1900, as amended July 15, 1909, and as extensively altered by the Jones Act, March 2, 1917, which extended American citizenship to ali Porto Ricans, and granted manhood suffrage. The Governor is appointed by the President. The Legisla-ture-a Senate of 19 members and a House of Representatives of 39 -is elected for four years by direct vote. The Commissioner of Education, the Attorney General and the United States Judge are appointed by the President, and the five Supreme Court Justices and minor Judges by the Governor. The Governor appoints the executive leaders of the departments of Justice, Finance, Interior, Agriculture, Labor, and Health, subject to the approval of the insular Senate. The six heads of departments form the executive council. The island elects a resident Commissioner at Washington with a voice but no vote in the House of Representatives, for a term of four years.

The distribution of the population according to color in the Census of 1920 Was: . White, 948,709 ; black, 49,246 ; mulatto, 301,816 ; all others, 38 . Education has been compulsory and free since 1899 . when the percentage of illiteracy was 83 ; in 1920 it was 55 . The Roman Catholic religion is dominant.
A commission from the Rockefeller Foundation reported that 90 per cent. of the people of the island were infected with uncinariasis (hookworm). The insular Commissioner of Health, himself a Porto Rican, wrote in 1920: "More than 70 per cent. of our population are in the country, badly housed and fed, ili in health, and ignorant of the first principles of hygiene." A great improvement, however, has been made in economic and social conditions during the last decade.
In \(1920-21\) there entered the ports 1,986 American and foreign vessels, tonnage \(5,347,723\). The island has 339 miles of railroads.

\section*{VIRGIN ISLANDS OF THE U. \(S\).}

AREA, 132 square miles.
POPULATION, (Census 1917), 26,051.
CAPITAL, Charlotte Amalie (Isl. of St. Thomas). population, 7,747.
Governor, Capt. Sumner E. W. Kittelle, U. S. N. Secretary, Lt. C C. Timmons, U. S. N.
Consuls maintained at St. Thomas by Belgium, Brazil, Colombia, Cuba, Denmark (vacant), Dominican Republic, France, Great Britain, Guatemala, Haiti (C. G.), Italy, Mexico, The Netherlands, Nicaragua, Norway (vacant), Panama, Peru, Portugal, Spain, Sweden, Uruguay and Venezuela.
The Virgin Islands of the United States, formerly the Danish West Indies, were bought for \(\$ 25,000,000\) by the United States from Denmark in a treaty proclaimed Jan. 25, 1917. The group consists of three islands, St. Thomas, population Census of 1917, 10,191; St. Croix, 14,901 and St. John, 959. with about 50 smaller ones, mostly unnamed, and uninhabited; and lies about 60 miles due east of Porto Rico. The language is English.

They are administered by the Navy Department under the organic act of Congress approved March 3, 1917. The Governor is appointed by the President of the United States. The Danish code of laws, dated April 6, 1906. remains in force so far as compatible. Six appointed heads of departments -Health, Judiciary, Public Works, Education, Supply, Police and Fire,-with naval aides make up the Governor's Cabinet. The islands comprise two municipalities, that of St . Thomas and St. John, with a legislative council of 11 members elected by popular vote and 4 appointed by the Governor: and that of St. Croix with a membership of 13 and 5 respectively. The municipal franchise extend to males of unblemished character, 25 years old, resident on the islands for 5 years and possessed of an income of 1.500 francs a year. The estimated revenue for the fiscal year ending June 30, 1921, was \(1.409,868\) francs. derived from customs. income tax and local taxes. The annual deficit in the operation of the government is made up by Congressional appropriation. Agriculture and cattle raising are the chief industries, and the islands produce the finest bay oil and bay rum in the world, exporting in 1919 about 60,000 gallons.
Cbarlotte Amalie has one of the finest harbors in the West Indies and is an important coaling and oit fueling station. The Naval Station St. Thomas has a powerful radio equipment. Education is compulsory.
The commerce of the Virgil: Islands with the

United States for the fiscal years ending June 30 . 1921 and 1922 was:

\section*{AMERICAN SAMOA.}

AREA, 57.9 square miles.
POPULATION, 1920, 8,324, including 266 Americans of the U. S. Naval Service.
CAPITAL, Pago Pago (Isl. of Tutulia), population, 8,056.
Governor, Capt. Edwin T. Pollock, U. S. N.
America Samoa, composed of the islands of Tutuila, Aunun, Ofu, Olosenga and Tau, and the uninhabited coral atoll of Rose Island, became a possession of the United States by virtue of the tripartite treaty with Great Britain and Germany in November, 1899, accepted by the United States, Feb. 13, 1900. The census of January, 1920, gives it a native population of 8,068 . Pago Pago is the most valuable harbor in the South Pacific and possibly in the entire Pacific Ocean. It was ceded in 1872 by the native king to the United States for a naval and coaling station. For 1920 the exports were valued at \(\$ 98,213\) and the imports amounted to \(\$ 235,293\). American Samoa is extremely valuable in its relation to the expansion of American trade in the Pacific.

American Samoa is 4,160 miles from San Francisco, 2,263 miles from Hawaii, 1,580 miles from Auckland, 2,354 miles from Sydney and 4,200 miles from Maniia. The natives can all read and write and are all Christians of different denominations. They are of the highest type of the Polynesian race and are greatly on the increase due to the laws forbidding forelgners buying their land.

Under the tripartite treaty of 1899, the United States owns Tutuila and the other isiands of the Samoan group east of 171 degrees of longitude west of Greenwich. The Samoan Islands west of that meridian belonged to Germany until the World War. Under the 1919 peace treaty they were taken over by Great Britain and are administered by New Zealand.

The commandant of the United States Naval Station at Pago Pago is also the Governor of Amer-
ican Samoa. He is appointed by the President. There is a naval radio station on the island of Tutuila.

All of the land on the islands is privately owned. Under the Amelican Commandant-Governor there is a native Governor in each of the three political divisions. The native Governors appoint the County Chiefs, who appoint the Village Chiefs. American Samoa has an area of 57.9 square miles. The chiel product of the soil is cocoanut (the dried kernel is called copra). Other fruits are grown, but not exported.

\section*{CUAM.}

AREA, about 210 square miles.
POPULATION, \(1920,14,246\), of which 13,698 were natives.
CAPITAL, Agana; population est. 9,000 .
Governor, Capt. I. C. Wettengel, U. S. N.
The Island of Guam, the largest of the Marianas, was ceded to the United States by Spain by Articie 2 of the Treaty of Paris, Dec. 10, 1898. It lies between latitudes \(13^{\circ} 13^{\prime}\) and \(13^{\circ} 39^{\prime}\) north and iongitudes \(144^{\circ} 37^{\prime}\) and \(144^{\circ} 58^{\prime}\) east. It is 32 milies long and 4 to 10 miles wide. Distance from Manila, 1,506 miles; from San Francisco, 5,044 miles. The inhabitants cali themselves Chamorros, but the present generation are a mixed race with the Malay strain predomirnating. Their language, a Poiyneslan tongue, is also called Chamorro. About 10 per cent. speak English. Instruction in the English language is compulsory in the public schoois. The northern haif of the island is a plateau from 400 to 600 feet in height and is, except wherc cleared for cultivation. wooded. The southern half is broken by hills from 1,200 to 1,300 feet high.

The total population, July 1, 1918, excluslve of officers and enlisted men of the navy and Marine Corps and their families was 14,344 of whom 14,124 were ciassed as "natives." Of the foreign-born population only 69 were Americans. Death rate per
thousand was 17.6 ; birth rate, 47.2. Guam is under the Navy Department, as a naval station. The Governor is a naval officer, designated by the President. A. marine barracks, naval hospital and station ship are maintained. The Commercial Pacific Cable Company has a cable station in Guam, and cables from Manila, Yokohama, Midway and Yap Isiands arc landed here. There is a powerful Government radlo station here. The port of entry is Apra, which is closed to foreign vessels, except by permit from the United States Government. Apra is comnoodious, but unimproved.

\section*{WAKE AND THE MIDWAY ISLANDS.}

The Unitcd States flag was hoisted over Wake Island on July 4, 1898, by Gen. F. V. Greene, commanding Second Detachment Philippine expedition. It is a small island in the direct route from Hawaii to Hongkong, about 2,000 miles from the flrst and 3,000 miles from the second

The Midway Islands, awned by the United States, are a group in the North Pacific, northwest of the Hawaiian Islands. A relay cable station of the Commercial Cabie Co. Is established there.

\section*{VACANT PUBLIC LANDS IN THE UNITED STATES.}
(As of July 1, 1922 ; official data.)

THit lands in the original tairteen States, Connecticut, Delaware, Georgia, Maryland, Massaehusetts, North Carolina, New Hampshire, New Jerscy, New York, Pennsylvatia; Rhode Island, Southi Carolina, and Virginia, aiso in Texas, never formed a part of the public domain; thelr disposition is governed by the rstate laws and information concerning same should be sought from the State authorities.

There are no public lands In the states of Ken-
tucky and Tennessee and none is known to this offce remaining undisposed of in the States of Illinois, Indiana, Iown, Missouri, and Ohio.

The unappropriated lands iń Alaska are not included herein. The total area of Alaskí is 378,-- 165,760 acres, of which about \(25,754,000\) acres are reserved. Approximately 1,552,128 acres have been surveved under the rectangulár systém. 120,708,187 acres thereof are reserved for forestry purposes.

VACANT PUBLIC LANDS, AS OF JULY 1, 1922.

Cash receipts of the General Land Office during the fiscal year efided June 30, 1922:" Disposal of public lands, \(\$ 2,377,382.26\); sales of Indian lands 4545,711.91; power permits; \(\$ 11,8^{\prime \prime} 71.28:\) coal leases, \(\$ 7,831.72\); recelpts under mineral leasing act, publio lands, \(\$ 6,374,143,52\); receipts under mineral leasing act, naval petroleum reserve lands, \(\$ 2,425,324,65\); depredations on public lands, \$11,998.71; miscellaneous, \(\$ 30,431.59\)

Area of public and Indian lands originally entered during the fiscal year \(1922,10,367,153.15\) acres. Area of lands patented, \(12,904,821.57\) acrés.

The total number of elitries, acres sold and
amount received therefor under the Timber and Stone Acts of June 3, 1878 and August 4,1892 , Were from June 3, 1878 to June 30, 1922: Entrles, 105,711; acres, \(13,668,307.16\); amount, \$34,852,144.29.

Under the provlsions of the act of March 8, 1922, entitled "An act to provide for agricultural entrles on coal lands in Alaska," upon the unreserved. unwithdrawin publle lands in Alaska, homestead claims may be initiated by actual settlers on public lands which are known to contain workable coal, oil or gas deposits, or which may be, in fact, valuable for the coal, oil or gas contained therein:

\section*{UNITED STATES RECLAMATION SERVICE.}
(lrom data furnished by the Service; as of July 1, 1921.)

DIRECTOR; Arthur P. Davis, Interior Department Building, Ninetecnth and F., N. W., Washington, D. C. Employees: Washington office, 75; fleld, 3,000 to 5,000 . Expenditure per year, about \(\$ 10,000,000\).

The Reclamation Service was organized as a bureau of the interior Department, under the Reclamation Act of June 17, 1902. It is cngaged in the investigation, construction, and operation of lrigation works in the 17 arid and semi-arid States of the far West. Twenty-five primary projects comprising \(2,825,000\) acres and three Indian projects comprislng 384,000 acres are under construetlon or operatlon, and the major works aid in serving an additional \(1,100,000\) acfes undor private canals that generally get stored watet from the Government reservoirs. The funds for this work have come chicfly from the sale of public lands, from repayments by the water userg, and more recontly from oil-leasing and other mineral operations, and the money expended is returned to the fund by graduated payments of settlers, usually in twenty annual instalments without interest, in accordatice with the Reclamation"Extenision Act. of August 13, 1914.

The service has built aboti 13,600 miles of canals, ditches, and dralns (lnclailing 117,000 candis structures), lnvolving "the excavation of \(200,000,000\) cubic yards of materials. In connection with this Work thero have becn constrifeted 100 storago and diverslon dams with an aggregate volume of \(14,500, *\) 000 cubic yards, including Arrowrock Datn (349 fret high), Idaho, on the Bolsc River and the Elephant Butce Dam ( 306 feet high1), New Mexied, on the Rio Grande. The Servleo has huilt 101 tumnels, 1,000 miles of road, 83 milles of rallroad, 3,280 milles
of telephone line, a dozen power plants, and 840 miles of transmission lines. It is mining coal, and has manufactured \(1,676.000\) barrels of cement and sand cement. The net construction cost as of June 30 , 1922, was \(\$ 135,000,000\).

Over 450,000 persons are living on the 33,000 farms irrigated by the Eervice and in the project towns and cities. Of the \(2,825,000\) acres above referred to, water was furnished in 1921 to \(1,227,500\) acres, and of this area \(1,157,900\) acres were harvested in 1921, producing orops worth nearly \$50,000,000 , or an average of about \(\$ 43\) per acre. The additional \(19 n d s\) using stored water yielded crops worth \(\$ 45,000,000\) more.

Public land farm unlts on the several projects are opened for settlement from time to time as canals are extended to make irrigation water available. Under present law, soldiers of the Wofld War have a preference right to enter these farms, and at recent openings such soldiers have taken all units.

Information in regard to farms divallable for settlement may be obtaned by adaressing Director, U. S. Reclamation Service, Department of the Interior, Washingion, I, C.

The Service issues the "Reclamation Record," an illustrated monthly publication, containing artloles of interest to irrigation farmers ind. engineers. An annual report is also issued.

An engincerling library of about 5,000 manuserint and printed volumes on the subject of irrigation is mantained in the Washington office of the Service. This library contains deserlptions of the construction and operatlon of the projects, with numerous photographs and maps, plarls, specincations, cost dafa, and results of original experimental investigations, and is avallablo for consultation by thoso interested.

\section*{New キort State Statistits.}

The Almanac presents, in the following pages, tables and otber detalled data relating to the state of New York

\section*{ALTITUDES OF PLACES IN NEW YORK STATE.}

NEW YORK STATE MOUNTAIN PEAKS.
(C.-Catskills; A.-Adirondacks.)

\section*{OOPULATION AND AREA OF NEW YORK STATE COUNTIES}
(In computing the increase from 1890 to 1900 for certaln countles the population of Indian reservations in 1900 has been deducted from the total population of the county in order to make it comparable with the total fol 1890, which does not include the population of Indian reservations. The deduction thus made for the several counties are as follows: Cat, taraugus, 1,982; Chautauqua, 31; Erie, 1,305; Franklin 1.253: Genesee, 346 Niáara, \(337^{\circ}\) Onondaga, 530. )

The canals we:e madc frce in 1882. Flgures for 1919 and thereafter are on an officially revised system of tabulation by the State.

Values were estlmated by the State \(\ln 1919\) and 1920 , but were not recorded in 1921 .

\section*{THE NEW YORK STATE CANAL SYSTEM.}
(Communlcated by Charles L. Cadle, Superlntendent of Public Works.)
THe canal system of the State consists of the where the Niagara River is entered and followed to Erlc Canal; the Champlain Canal; the Oswego Canal; the Cayuga-Seneca Canal; Cayuga Lake Inlet, at Ithaca; the Black Rlver Canal; the Glens Fails Feeder, and the lakes, reservoirs, feeders, harbor basins and terminal docks connected therewith. The Shinnecock-Peconie Canal, located in the County of Suffolk, on Long Island, connecting tine waters of Shinnecock and Peconic Bays, is offlcially a part of the eanal system.

What is commonly known as the Barge Canal includes the improved Erie, Champlaln, Oswego and Cayuga-Seneca Canals. These waterways were cnlarged and constructed under bond lssues approved by the people in 1903, 1909, and 1915. They took the place of the old canals which had been in exlstence since 1825. The bond issue for the constructjon of terminal docks and the providing of frelght handing machinery was approved in 1911.

\section*{THE MAIN WATERWAY.}

The Erie Barge Canal is the maln waterway and extends across the state from Troy to Buffalo. Offlelally, the route commences at Congress Street, Troy, and follows the llne of the Hudson River to Waterford, where the westward turn is madc. From Waterford the llne of the Mohawk River, canallzed, is generally followed to a point beyond Little Fails. Westcrly from thls point the new channel follows the route of the old canal in part, but passes the northerly outsklrts of the Clty of Utlca on a new linc; thence to the south of Rome and then into and across Onclda Lake. Passlng out of Onelda Lake Sencan Rlver the usith the Seneca Rlver to and through tine Clyde River to a point east of Lyons; tiocnce following the old canal, decpencd und enlarged, to a point beyoud Pittsford. Here the channel ieaves the oid route, crossing tile Genesee River about a mile south of Rochcster onl a yool created jy tine construction of a dam, joining the ilne of the old cinnal a few miles westeriy, and continuing tinence in the former channei, docpened and wldened, to and through Tonawanda Crcek,

Lake Erie, at Buffalo
The Champlain Barge Canal commences in the Hudson River, at Waterford, where the improved Erie Canal starts westward, and follows generally the channel of the Hudson River, canalized, as far northward as Fort Edward, where a ncw route has been established to Whitehall on the inlet of Lake Champlain.

The Oswego Barge Canal branches northerly from the Erie Barge Canal at Thrce River Point and follows generally the llne of the Oswego River, canallzed, to Lake Ontario, at Oswego

The Cayuga-Seneca Barge Canal extends in a southerly direction from the Erie Barge Canal at a point near Montezuma. The Cayuga branch follows the valley of tne Seneca River to Cayuga Lake; thence through Cayuga Lake to the Cayuga Lake Inlet at Ithaea. The Seneca branch follows the Seneca Rlver in a westerly direction from the Cayuga branch near the foot of Cayuga Lake, and connects with Seneea Lake near Geneva; thence through Seneea Lake to Watkins, with an extension to Montour Falls.

WIDTH VARIES.
The width of the Barge Canal channel varies according to the section traversed. Through canalized rivers and lakes, the channel is at least 200 feet wide. Through rock cuts and land lines, a minimum bottom width of 94 feet has been provlded and through earth sections the minimum width of the bottom of the channel is 75 feet. The locks of the Barge Canal are unlform In size. The inside dlmensions of the lock clambers are 310 feet in length and 45 feet \(\ln\) width and are capable of passlng a barge 300 feet long and, say, 43 leet widc. A depth of water of 12 fect over the miter sills has been provided. Clearance under fixed bridges spanning the cliannel is \(151 / 2\) feet at hlgh watcr.

LENGTII IN MILES.
Erle Barge Canal (Waterford to Tonawanda) 339: Oswego Barge Canal (from Lake Ontarlo to Threc I!ver Point), 24: Cayuga-Seneca Barge Canal (from Junetion with the Erie Barge Canal to

Ithaca and Watkins, including Cayuga and Sencea Lakes), 92; Champlain Barge Canal, 60; canal harbors at Utica, Syracuse and Rochester, 10. Totai canal mileage, 525.
NATURAL WATER COURSES CANALIZED USED AS PART OF THE SYSTEM.
Hudson River. (between Troy and Fort Edward), 37; Mohawk River, 112; Oswego, Oneida and Seneca Rivers for their entire iength, 99; Oneida Lake, 21; Cayuga Lake, 38; Seneca Lake, 35; Ciyde River, 19; Tonawanda River, 11; Syracuse Harbor, Onondaga Lake outlet, 7; Rochester Harbor, Genesee River, 2; Utica Harbor and a short section of the Mohawk River, 1. Total mileage in canallzed rlvers and lakes, 382 .

Practicaily ail the municipalities along the line of the Barge Canal system have been provided with docirs and warehousc equipment. In the city of New York, there are eight terminals equipped with modern warehouses and frelght handiing machinery situated as foilows:

At Piers 5 and 6, East River, and at the foot of West 53rd Street, on the Hudson River, in the Borough of Manhattan; at Motthaven (138th Street, East River) in the Borough of the Bronx; on the East River at the foot of North Jane Street, Long Isiand City, at Flushing and at the foot of Broadway, Hailett's Cove, In the Borough of Queens and at the foot of Coiumbla Street, Gowanus Bay, at Dupont Street, Greenpoint, ln the Borough of Brookiyn.

\section*{GRAIN ELEVATORS.}

A grain elevator of \(2,000,000\) bushel capacity providing every modern faciiity for the handling of grain transported by canal, is being erected by the, State at the Gowanus Bay Terminal, in the Borough of Brookiyn. Its compietion is expected in June, 1922. It wili be operated under the direction of the State Superintendent of Public Works.

The bullding of a similar structure was begun by
the State at Oswego on Lake Ontario and the foundation work has been completed. The erection of the superstructure has not as yet been authorized.

\section*{COST OF BARGE CANAL IMPROVEMENT UP TO OCTOBER, 1921.}

Bond issue of 1903 for improvement of Erie, Oswego and Champlain Canals, \(\$ 101,000,000\); Supplemental bond issue of \(1915,, \$ 27,000,000\); Miscellaneous appropriations, \(\$ 5,338,794\); Bond issue of 1909 for improvement of Cayuga and Seneca Canai, \(\$ 7,000,000\); Additional approprlations in 1918 \(\$ 350,000\); Misceiianeous appropriations, \(\$ 1,071,858\); Bond issue of 1911 for constructing terminais and providing freight handling facilities, \(\$ 19,800,000\); Miscellaneous appropriations, \(\$ 2,838,122\); Appropriations for grain elevators at Brooklyn and. Oswego, \(\$ 2,725,000\). Totai, \(\$ 167,123,774\).

The portions of the former canal system which have been retained in connection with the operation of the Barge Canal include the following:

The Giens Faiis feeder, extending west and north to Giens Fails, a distance of 12 milies, and connecting with the Champiain Barge. Canal at Fort Edward; and the Biack River Canal, running northerly from its junction with the Erie Barge Canai at Rome to Cartliage, aithough it is not navigable beyond Lyons Falls, The use of these two channels is limited to smaii type barges only.

OWNED BY THE STATE.
The canais above descrlbed are owned by the State of New York and are under the:jurlsdiction of the Superintendent of Public Works for management, maintenance, repalr and operation. 'Navlgation is free, no tolls whatever being charged. The main office of the Superintendent of Pubiic Works is in the Capitol at Albany. Branch offices are maintained by the department at Pier 6, East River, New York City, and in the cities of 'Schenectady, Syracuse, Rochester and Buffalo.

\section*{LAKES IN NEW YORK STATE.}

THE great northern lakes, viz.: Ontario, Eris and Champlain, are partly in this State. Lake George, south of Lake Champlain, communicates with it by a short outlet. It is 37 miles long, and from one to three broad, and embosoms more than 200 isiets. Its waters are so clear and transparent that the bottom is visible at almost any deptin; and on each side it is skirted with mountains, abounding in romantic scenery. The Adirondacks
contain more than 100 scenic. lakes. There are numerous small lakes in the western part of the State which discharge their waters into Lake Ontario, either directly or indirectiy through the Genesee, Seneca and Oswego Rivers, and being connected by canals and raiiroads, afford facilities tó transportation. Three of the laikes have southern drainage; Otsego and Canaderaga into Susquehanna and Chautauqua though only seven miles from Lake Erie, eventualiy into the Gulf of Mexico. These, with their extent, \&e., are as foliows:
\begin{tabular}{|c|c|c|c|c|c|c|c|c|}

\end{tabular}

According to the Ice Trade Journal, about \(24,000,000\) tons of naturai lce and \(29,000,000\) tons of artificlal ice are cut, made, and used each year in the United States.

Daily Gapacity of Artificial Ice Plants in New York Gity. Manhattan, 5,800 tons; Bronx, 2,300 tons; Brookiyn, 5,700 tons; Queens, 1,900 tons; Richmond, 300 tons; totai for city, 15,900 tons.

\section*{THE ALLEGANY STATE PARK.}

\section*{(By the N. Y. State Coiicge of Forestry, Syracuse.)}

THE Allegany Statc Park, which was authorized by the 1921 Legislature, and will cover 65,000 acres, is located in Cattaraugus County. It occupies practlcaliy all the land inclosed within the semlcircle described by the bend of the Alieghany Rlver as it reaches into New York State. This tract is to be forever reserved for the use of aii the people, but is not to constitute part of the Forest Preserve. Thus the free use of the park ls permitted for betterment purposes and recreatlonal management by the park commissioners. This is in accordance with scientific park management and in keeping with the pian of the New York State College of Forestry for the management of all State parks.
The park will be patrolied by protectors, who wili exercise ail the powers of constabies of towns in the enforcement of laws and reguiations.

The commission wiil have jower to beautify the reserve, improve its accessibiiity and provide means for the general enjoyment of visitors and campers who come into the region. Under the law the commissioners wlll possess the authority to dam up streams and create lakes if such action is thought advantageous. They would have the rlght to plant trces. and apply utilization measures wherever there were opportunitics for such proftabie and beneficlai empioyment of the forests. They may propagate fish and game and trees and set aside tracts for that purpose.

Plenty of wiid game, such as ruffed grouse, squirrels, rabbits, (and frequentiy biack bear), is found in the section. Aiong the river bottoms woodcock arc plentiful in season. The country is weli supplied with irout brooks. The fish life of this reglon has suffercd less than that of the wild game, due to the fact that the State has kept whe streams weil stocked.

THE NEW YORK STATE FOREST PRESERVE.
(Specially prepared for The Almanac by the State Conservation Commission.)

New York State's great Forest Preserve was established by aet of the Legislature in 1885 . It ineludes iarge areas in the two great forested sections of the State, the Adirondaek and Catskili Mountains. Article 7, Seetion 7, of the State Constitution, adopted in 1894, assured its integrity for ail time. It provided that "The iands of the State, now owned or hereafter acquired, constituting the Forest Preserve as now fixed by law, shail be forever kept as wild forest land. They shall not be leased, soid or exchanged, or be taken by any corporation, pubiic or private, nor shall the timber thereon be soid, removed or destroyed. But the Legisiature may by general laws provide for the use of not exceeding three per centum of such lands for the construetion and maintenance of reservoirs for munieipal water suppiy, for the eanais of the State, and to reguiate a flow of streams. Such reservoirs shail be constructed, owned and controlied by the State; but such work shall not be undertaken untii after the boundaries and highfiow lines thereof shali have been accurately surveyed and fixed, and after public notice, hearing and determination that such iands are required for sueh public use. The expense of any such improvements shaii be apportioned on the publie and private property and municipaiities benefited to the extent of the benefits received."

Sinee the estabiishment of the Forest Preserve, the State of New York has spent \(\$ 5,830,800\) in the acquisition of land for its extension. In addition large areas of other iand have been acquired by tax sales, with the result that January 1, 1922, the area of the Forest Preserve in both the Adirondack and Catskiil Mountains aggregated 1,992,516 acres.

Jurisdiction over the Forest Preserve is exercised by the Conservation Commission, which has charge, besides, of the State Reservation at Saratoga Springs, the St. Lawrence Reservation, the Cuba Reservation, the State owned islands in Lake George, and the John Brown Farm in the Town of North Elba, Essex County. Besides administrative control over this property, the commission also has entire eharge of the fighting of forest fires upon both public and privately owned land in the iarge forested regions.

For the prompt detection of forest fires, fifty-five observation stations are maintained upon mountain tops throughout the Adirondacks and Catskiils and in the forested regions of Long Isiand. All of these stations are connected by teiephone lines with the ranger headquarters. Observers are on duty at these stations throughout the entire dry season from spring untii fail. A force of sixty-five forest rangers and five district rangers is also maintained.

Tile work of reforestation of State land and the raising of trees for the reforestation of private land is also conducted by the commission. For this purpose six nurseries are maintained, having a total capacity of 30,000,000 trees and an annual production of \(10,000,000\). Approximateiy 5,000 acres of

State land are reforested each year. Trees are sold to private iandowners at the eost of production, to municipailties at 50 eents per thousand, and are furnished to State institutions without charge.

The seetions of the Adirondack and Catskill Mountains upon which it is most important for the State to insure the maintenance of a continuous forest cover have been defined by iaw and are known as the Adirondaek and Catskiii Parks. They are bounded by a line ealled the blue line. Within these parks approximately one-half of the land is still privately owned. Part of the land of the Forest Preserve lies outside of the park lines, and thus the park iines, which run through both State and private iand, are simply lines to designate the most vitai sections of the mountain regions. Extensive lumbering operations upon much of the land within the park ines are endangering the water sheds, and this led to a referendum vote in 1916 for the authorization of a bond issue of \(\$ 7,500,000\) for purchase of additional land to be added to the Forest Preserve. The proposition passed by a large majority, and the Conservation Commission is now engaged upon the expenditure of this sum.

It is conservatively estimated that tine Forest Preserve is now worth, if it should be piaced on the market, more than \(\$ 40,000,000\), showing an increase in value of 800 per eent. over its cost to the State.

Investigations made by the Conservation Commission indicate that investment in hoteis, boarding houses and other facilities for the care of summer visitors in tile Forest Preserve regions, the amount of money annualiy expended in earing for these people, the money spent by vacationists, and the number of persons actually engaged in the business of caring for persons actually engaged in the business of caring for ures for the lumber industry, thus indieating that the chief business in the Forest Preserve regions has now come to be that of caring for vacationists.

Under a careful system of game protection the fauna native to the woods is preserved, and in many respects is increasing. Chief among the large animals are deer and bears. Beaver, which had become extinct, were reintroduced to the Adirondacks in 1905, and have since spread over every section of the woods. They have also been introduced in the Catskills and are becoming more abundant there. In 1915, through eo-operation with the Benevoient and Protective Order of Elks, a carload of eik from Yellowstone Park was iiberated in the Adirondacks. Among other common animais, many of which furnish a iarge amount of fur, shouid be mentioned the fox, mink, otter, marten, weasei, fisher, coon, and muskrat.

The lakes and streams which are annually stocked by the Conservation Commission, contain brook trout, lake trout, rainbow trout, brown trout, largemouth and smalimouti black bass, great northern pike, pickerei, perch, bullheads, and many of the eoarser fishes.

\section*{THE PALISADES INTERSTATE PARK.}

The Palisades Interstate Park comprises 36,000 aeres ( 1,000 acres in the State of New Jersey and 35,000 aeres in New York State). The park embraees the Palisades eliffs and runs for tweive miles on the west bank of the Hudson River from Fort Lee, N. J., to Paiisades, N. Y. The Harriman Park, which is the highlands region of the Palisades system, runs from Bear Mountain, N. Y., five miles south of West Point, for fifteen miles to Tuxedo, N. Y. The Commission aiso owns the State Rifle
Range at Blauvelt, N. Y., and the Hook Mountain quarries. In the creation of the Pallsades Park, the State of New York has appropriated in money and iands \(\$ 5,963,525\). New Jersey has appropriated \(\$ 727,984\), inciuding \(\$ 500,000\) for the Henry Hudson Drive. In addition, the Commission has received priva te eontributions of \(\$ 4,735,144\) in eash, and iands valued at \(\$ 1,692,765\). Ail these contributions and appropriations, together with value of land donations, aggregate \(\$ 13,119,419\).

In the Palisades section of the park the Commission maintains paviiions for pienic parties, bath houses and beaehes; motor boat basin for smaii pieasure eraft; week-elld eamps for working boys; hundreds of individual camps are estabiished here under permit. In the Harriman Park and Bear Mountain seetion of the Pailsades system there is maintained by the Commission the Bear Mountaln Inn, whicil is a restaurant, built by private funds and operated by the Commissioners for tile saie of food at reasolable prices; a iawn piateau for bisebail, tennis, running meets, and other organized athietic sports; a large grove on the side of Hessian Lake for pienic parties, benches and tables being seattered
though this area, and swings for the chiidren; the free use of rowboats is permitted for a limited period on Hessian Lake; sightseeing automobiies take visitors in to the park which plunges into the woodiand for fifteen miles; parking piaces for automobiies have been deveioped, seven lakes have been either entirely made or artificiaily enlarged.

The Commission maintains the largest civil encampment in the worid. In 1921 over 52,000 individuals, mostly tenement children and mothers, averaged eight eonsecutive days' vaeation each Camps for working giris are maintained at cost. During the summer over \(1,780,000\) visitors were at Bear Mountain, neariy \(1,000,000\) of whom came by automobile. Nearly 260,000 peopie were carried in the Commission automobiies. . Over \(1,300,000\) peothe Commission automobises. Over \(1,300,000\) peo-
pie visited the Paisades section of the park. No eoncessions are iet in the Palisades Park. This park is under the jurisdietion of a Joint Commission, appointed by the Governors of New York and New Jersey.

George W. Perkins was the President of the New York Commission for neariy twenty years untll his death in 1920. The officers of the Commission are New York State-J. Du Pratt Winite, President; Franklin W. Hopirins, Vice President; Geo. W. Perkins, Jr., Secretary; Edward L. Partridge, Treasurer New Jersey-Richard V. Lindaburv, President Edward L. Partridge, Vice-President; Geo. W. Perkins, Jr., Secretary; Frederick C. Sutro, Treasurer.

The first five-milie section of the Henry Hudison Drive, paid for by the State of New Jersev at a cost of \(\$ 443,107\), was opened Oct. 29,1921 . It cxtends from Englewood to the toi) of the Hudson cliffs, overlooking Alpine.

\section*{GEOLOGICAL HISTORY OF NEW YORK STATE.}
(By John M. Clarke, Director of the State Museum.)

THE geological history of New York can be traced back to the Precambrian era, the oldest recognizable in the rocks of the earth. These earliest rocks, the Grenville metamorphosed sediments (gnelsses, marble, etc.) are, however, not the oldest which ever existed in the State. The Grenville rocks are exposed in the Adirondacks and the Hudson Highlands. They prove that In Grenville time, Northern, Eastern, and probably Southwestern New York was under the sea. After the depositlon of the Grenville sedlments igneous actlvity took place on a large scale and huge masses of molten rock (granite, anorthoslte, babbrosynite) were pushed into the sediments from below. Some tlme after the whole Adirondack region was subjected to enormous pressure and intensely folded, and then the great mass of Grenville sediments was upraised well above the sea.

\section*{IN CAMBRIAN TIMES.}

At the beginning of Cambrian time, when organic life becomes first recognizable in the State, only the eastern margin was submerged, but toward the end (Potsdam time) the sea covered the whole region except the central and northwestern Adirondacks. At the close of Cambrian time Northern New York was, however, above sea level. In the long Ordovician perlod, during which the Beekmantown, Chazy, Black River Iimestones, and the Utica, Frankfort and Lorralne shajes and sandstones were deposited, the State was most of the time submerged under the Ordovician sea, except for the Adirondack island. Toward the end of that period, however, the Green and Taconic Mountains arose along the eastern border of the State and practically all of Northern, Central, Eastern and Northeastern New York became dry land. In the following Silurian period were deposited the Medina and Oneida sandstone and conglomerate, the Clinton shalc, sandstone, limestone and iron ore, the Rochester shale, the Lockport and Guelph dolomites, the Salina shales, salt
and waterllne, etc. During the early part of this period the sea had spread over only Central and Western New York, while durlng the late Silurian it had extended over practlcally all the state west and east of the Adirondack region. The strata of the next, or Devonian era, comprise the whole Catskil and southwestern plateau provinces and cover more than a third of the State. These rocks abound in fossils and show that the sea continued to cover at least the southern half of the State. The sea of the Carboniferous period hardly came over the boundary of the State from Pennsylvania. At the end of Palaeozoic time New York, except for a small area at the mouth of the Hudson, was raised during the Appalachian revolution well above the sea, never to be invaded again until the end of the glacial period. During the long Mesozoic perlod NTew York was dry land; in Triassicic time considerable volcanic activity prevailed in Southeastern New York, when sheets of lava (the trap of the Palisades) were forced Into nonmarine Triassic beds. During the next or Jurassic perlod the State was above the sea and actively eroded, but in the following Cretaceous perlod Staten and Long Islands dlsappeared under the sea. At the end of this period the State, which had been eroded nearly to a plain, was upllfted \(2,000-3,000\) feet. After this time in the Tertiary period the present drainage and relief of the State were developed In lts major features. Finally came the glacial perios. which enrlched the State with thousands of lakes and waterfalls. It ended with the Champlain subsldence, during which the sea came for the last tlme into New York, namely, into the Champlaln Basin and the Hudson Valley. A recent elevatlon has agaln drained these regions.

THE HUDSON AN ANCIENT RIVER.
The Hudson River Is one of the most ancient rivers of the continent and flows over rocks which have been frequently and heavlly faulted. The fault blocks seem to have reached their equilibrium but, if subjected to new strains, may settle down to new adjustments and cause earthquake disturbances.

NEW YORK STATE MUSEUM.
(Prepared by the Museum for The Almanac.)

The tltle, New York State Muscum, is the statutory name of a sclentific research organization. Historically it is the outcome of the great Natural History Survey of the State of New York organized in 1836. The nucleus of these now extensive collcctlons are the scientific materials brought together during the existence of that survey. Under the present statute the "New York State Museum" includes the work of the State Geologist and his associates, who together form the Geological Survey of the State of New York; that of the State Botanist and his staff; of the State Entomologist and his staff; the Zoologist and the Archaeologist. The museum collections, as such, originate partly from tho materials acquired for the researches of these officials and partly from special addltions made to exemplify the resources of the state of New York. The State Museum ls likewise known as the Department of Sclence of the University of the State of New York, and as such, is under the administrative control of that university. The collections of the museum are arranged on a floor space of about 100,000 square feet on the upper floors of the State Education Building at Albany. These collections form what has been planned and worked out as an essentially State or provincial museum exhiblting the natural resources of animal and plant life, the mineral wealth, geological history, and aboriginal culture of New York State. It has not planned to receive, nor does it espesially welcome, material from outslde the State, unless this is adaptod to jlluminate the scientific problems of the State itself. The collections are open free on every week day, 9 A. M. to 5 P. M., and on Sundays, Octoler 1 to May 1,2 to 5 P. M. The Leglslature grants \(\$ 55,000\) a year for maintenance.

\section*{MINERAL AND FOSSIL COLLECTIONS.}

Hall of Minerals-The general collection of about 5,000 speclmens is supplemented by a very extensive and complete collection of minerals from New York State, probably the best in exlstence. There are probahly in this hall about 14,000 specimens on exhibitlon

Hall of Geology - The collections here illustrate the rock structure and the inlneral wealth of the stiate, especlally the appllcatlon of minerals, ores and rocks to commerce and the industrial arts.

Hall of Fossils-This hall includes vertebrates and invertebrates and the long continued researches of the Geological Survey have made the collection of invertebrate fossils, and tue corresponding classification of the rocks of New York the standard of comparison for the world. The use of restorations of extinct animal life, with relief maps, reconstructions, \&c., has helped to visualize the appearance of these.

Hall of Zoology-The animal life of New York is exhibited in this hall, the larger mammals in habltat groups and the smaller mammals, birds, fishes, reptiles and mollusks in extenslve serles of , wellmounted specimens. The collectlon of blrds' eggs is one of the largest In America. Thls section also contains a representative gathering of insects, arranged to Illustrate their economic relatlons to agrlculture and forestry. The sectlon of Botany maintajns an herbarium of upward of 100,000 specimens of New York plants.
Halls of Archaeology and Ethnology-These contain six large groups representing the customs and habits of the Iroquois Indians in their natural state, before the advent of the white man. These figures have beer cast from the best avallable representatives among the surviving Iroquois and mounted amid actual accessories and agalnst palnted backgrounds. Tney depict, the hunt, warfare, council ceremony, industrles and agriculture of the New York aborigines. The collections of relics of Indlan life in New York are the most extensive in exlstence, and these collections, with the groups referred to, fill the mezzanlne floors.

\section*{GENERAL ACTIVITIES}

Publications-The museum issues general and special publications on the natural resources of the State, In the form of bulletins, memoirs and annual reports. These now number 350 and each can be obtained on payment of a small fee.
The museum owns three parcels of real estate, presented by cltizens for preserving their geological Interest: 1-The Clark Reservation near Syracuse, a tract of 104 acres characterized by its extraordinaly display of abandoned cataracts and gorges produced by the flow of the post-giacial waters; 2 - Stark's Knob Rescrvatlon, or Volcano, near Schuylervlle 3 --The Lester Park, or Cryptozoon Ledge in tac town of Greenfield, west of Saratoga Surings.

\section*{UNIVERSITY OF THE STATE OF NEW YORK.}

\section*{AND STATE DEPARTMENT OF EDUCATION.}

\section*{(Contributed by the Department.)}

The :ist of Regents is on page 484. They elect the President of the Universtyy and State Commissioner of Education-Frank P. Graves; Assistant Commissioner for Higher Education and Director of Professional Education-Augustus S. Downing: Assistant Commissioner for Secondary Educatior-Charles F. Wheelock; Assistant Commissioner for Elementary Education-George M. Wiley; Director State Library-James I. Wyer, jr.; Director of Sctence and State Museum-John M. Clarke; Chiefs and Directors of Divisions: Administration-Hiram C. Case: Vocational and Extension Education-Lewis A. Wilson; Archives and History-James Sullivan; Atten-danco-James D. Sullivan; Library Extension-William R. Watson; Examinations and InspectionAvery W. Skinner; School Buildings and GroundsFrank H. Wood; Law-Frank B. Gilbert: Library School-Edna M. Sanderson; School LibrariesSherman Williams; Visual Instruction-Alfred w Abrams; Finance-Clark W. Halliday; and Secretary to the President of the University-Mrs. N. Frances Steers.

The educational system of the Statc of New York is under the control of the Board of Regents, consisting of twelve members, one from each of the nine judiclal districts of the State and three others at large. each member being elected for a term of twelve years at a joint session of the two Houses of the Legislature held in the second week of February of each year.

In its origin and history it is unique. By a law of 1784, following Ideas enunciated by Diderot, a French encyclopaedist, a corporation entitled the University of the State of New York, governed by a Board of Regents, was established to supervise and control collegiate and academic instruction, with the power to grant charters to institutions engaged in such work. Under the impetus given by the members of the Board of Regents a state superintendency for common schools, subsequently known as the State Department of Education, with control over education below collegiate and academic grades, was established by law in 1812 . These two agencies for educational control continued as separate institutions until 1904 when they were combined and continued under the control of the Board of Regents which had become a constitutional body under the name of the University of the State of New York
in accordance with Article 9, Section 2 of the Constitution of 1894.

The powers exercised by the Board of Regents may be increased, modifled or diminished by the Legislature, but the number of its nembers may not be reduced below nine nor may the Legislature fail to provide for the maintenance and support of the system of free schools wherein all of the children of the State may be educated (Article 9, Section 1). Under legislative enactment the Board of Regents is the embodiment of the educational agencies of the commonwealth. Its province is the entire range of education. It embraces the membership and the work of the public schools, academies, colleges, professional, technical and normal schools, universities, libraries, museums and learned \(80^{\circ}\) cleties. It provides opportunity for co-operation and understanding among its members while diminishing or adjudicating occasions of friction and conflict, adapts educational policy to varying needs, and indicates and provides a continuity of training. It accumulates books and manuscripts, supervises the public archives, collects valuable natural objects, and may carry on educational historical and scientific rescarch work directly on behalf of the State; grants all educational charters in the State, confers honorary degrees, conducts examinations, and awards certificates, diplomas and degrees; admits to certain professions and occupations. and regulates the certification of public accountants and nurses. It apportions State educational funds. It fosters all forms of cultural work, such as is rendered by libraries and local associations of an educational and historical character, distributes printed matter, circulates library books and lantern slides, encourages civic improvement work; in fact, does everything it can to stimulate the intellectual life of the people. It meets monthly and has an annual convocation for the consideration of important educational matters.

Though it does not exercise a complete monopoly of education, for private institutions exist subject to no public authority, which do good work, it is the policy of the State to bring all chartered educational institutions into the university and, while allowing them virtually complete self-government in internal administration, to hold them accountable for the proper performance of their duties. These chartered institutions are subject to the inspection of the Regents, who may require annual reports of them.

\section*{ILLITERACY, NEW YORK STATE.}

According to the census of 1920 there were, then, 425,022 illiterate persons 10 years of age and over in the State of New York, "iliiterate" meaning unable to write. Of this number 16,150 were native whites of native parentage, 12,256 were of foreign or mixed parentage, and 389,603 were of forcign birth. The number of iiiiterate Negroes was 5,032 . In the totai
population 10 years of age and over the percentage of illiteracy was 5.1, which showed a diminution sinee 1910 , when it was 5.5 .
There is less illiteracy in the rural districts of the State than in the cities, the percentage being 2.9 for the rural popuiation and 5.5 for the urban.

Ry counties the percentage of illiteracy ranges from 8.4 in Clinton County to 0.7 in Allegany County.

ILLITERACY IN NEW YORK STATE CITIES OF 25.000 OR OVER POPULATION, 1920.
\begin{tabular}{|c|c|c|c|c|c|c|c|}

\hline Kingston & & 2.1 & & Schenectady & 3,549 & 5.0 & 3,350 \\
\hline Mount Vernon & 1,564 & 4.5 & 1,488 & Syracuse. & 5,607 & 4.0 & 5,158 \\
\hline New Rochelle & 1,171 & 4.0 & 1,016 & Troy... & 1,611 & 2.6 & 1,413 \\
\hline New York & 281,121 & 6.2 & 270,788 & Utica. & 4,832 & 6.4 & 4,627 \\
\hline Bronx. & 26,202 & 4.5 & 25,620 & Watertown & 756 & 2.9 & 568 \\
\hline - Brookiyn... & 98,038
140,810 & 6.1
7.5 & 94,737
135,358 & Yonkers. & 4,309 & 5.5 & 4,162 \\
\hline
\end{tabular}

The percentage of iiiiteracy in the totai population of New York City 10 years of age and over is 6.2 , which shows a slight decrease since 1910, when it was 6.7. For the native white the percentage is 0.3 , for the foreign-born white, 13.8 , and for the Negro, 2.1!

That the younger generation in the City of New York is much less illiterate than the older is indicated by the fact that whiie 6.5 per cent. of the maies and 9.4 per cent. of the females 21 years of age and over are iliiterate, the pereentage of illiteracy in the popuiation 16 to 20 years of age is but 1.0 .

\section*{NEW YORK STATE PRISON CENSUS, 1922-1917.}

Aceording to returns reeeived by the U. S. Bureau of the Census, the number of persons confined in prisons, jails, and poiice stations in the State of New York on Juiy 1, 1922, was 15,451 , as compared with 17,494 on July 1, 1917. These figures inciude persons awaiting hearing or triai and those held as witnesses, as well as prisoners serving sentence.

Of the total for \(1922,7,956\) were reported for 11 State institutions, 1,870 for 64 county jails, 5,077 for 162 cities, and 548 for 9 other institutions.

The returns were obtained in response to a circuiar of inquiry which the Bureau of the Census mailed to the various institutions, as a preliminary to the complete decenniai census of prisoners, which will be taken in 1923.

NEW YORK STATE PRISON CENSUS.

The 1922 total number of institutions is, exciusive of 4 county and 100 city institutions reporting no prisoners, and 9 city institutions for which no reports were received.
"Other" in the above table includes the House of the Good Shepherd at Albany, Asylum of Our

Lady of Refuge and Ingleside Home at Buffaio House of the Good Shepherd at Brooklyn, House of the Good Shepherd, the Salvation Army Rescue Home, House of Mercy, and House of the Holy Family at New York, and Mount Magdalen Sehool of Industry at Troy.

\section*{NEW YORK STATE INSTITUTIONS FOR THE DEAF AND DUMB．}

The several institutions for the deaf and dumb receive \(\$ 325\) a year per capita from the State for such pupils，between the ages of twelve and twenty－ five years，as may receive appointments from the Commissioner of Education．Pupils between five and twelve years of age are received as county pupils at the annual charge to counties of \(\$ 300\) ，upon the order of an overseer of the poor or a county super－ visor．As a rule the grounds and buildings of these institutions belong exclusively to private eorpora－ tions，who appoint the superintendent or principal． N．Y．Instit．for the Instruct．of the Deaf and Dumb（opened May 20，1818），New York．

\section*{ILLITERACY AS A CAUSE OF-ACCIDENTS.}

\section*{(From a bulletin of the New York State Dcpartment of Education.)}

Not only is there luss in production because of the low wage carning power of the illiterate forejgner, but there is a tremendous loss in accidents and casual \({ }^{-}\) ties among the foreigners engaged in dangerous occupations.

Marian K. Clark, of the New York State Industrial Commission, estimates that one-half of the accidents in factories, with a resultant loss of \(\$ 50,-\) 000 per day to industries, are due to ignorance of the language.

There are 800,000 factory workers in New York State who cannot speak English. In 1916, \$11,500.000 was paid out in that State in accordance with the Workmen's Compensation Law, an amount which would be increased to \(\$ 35,000,000\) if to it were added loss of wages, labor turnover, doctors' bills, and administration of the law.

Statistics of the United States Bureau of Labor show that the rate of accidents in the iron and steel industry during a period of eight years was highest among the non-English-speaking workers and showed little decrease from year to year. The Ford Motor Co. officials state that accidents have fallen off 54 per cent. since their school was started in 1914.

In mining, the mosit hazardous occupation in this country, lack of ability to read the English language is a tremendous handicap.

In 1919 the Director of the Bureall of Mines stated that 465,000 men in the mining industry eame from non-English-speaking races, and that many of them were illiterate. FIe states that if these men were taught to read and write English it would be a tremendous economic factor in tie in-
dustry through a reduction in the casuaity list. He says:
"This is a plain business proposition to prevent the death of at least 1,000 miners each year and to prevent the injury of more than 150,000 miners each year. Thousands of illiterate foreigners, many of them unable even to read or write their native language, are poured into the great American mining machine cach year and with most disastrous results.
"The mines that employ numbers of foreigners generally have the precautionary rules printed in the different languages; but if the foreigner cannot even read his own language, these safety guides are of no value to him.
"The best estimates from a number of the larger mining States are to the effect that the non-Englishspeaking foreigners suffer twice the fatalities that the English-speaking miners do. This means an excess of 930 non-English-speaking foreigners killed each year, and I may say unnecessarily.
"If the average state compensation is \(\$ 3,000\) Which is a fair figure, the total economic loss each year to the country through the excess of deaths of non-English-speaking miners alone amounts to \(\$ 2,790,000\). On the same basis it is estimated that the excess of non-Englisli-speaking miners injured each year amounts to \(69,750 \mathrm{men}\). \(I\) his is a loss in wages alonc of \(\$ 1,743,750\).
"Taking the excess of deaths and injuries together due to non-English-speaking foreigners, the economic loss each year reaches \(\$ 4,533,750\). This is entirely aside from the other cosis to the iudustry in production lost."

\section*{CHIEF NEW YORK STATE LEGISLATION OF 1922.}

Architects-They must pay a yeariy registration fee of \(\$ 2\) to the State Board of Examiners.

Automobile (Highway Law) AmendmentsFleeing an Accident-Makes it a misdemeanor for an operator of a motor vehicle who has damaged another vehicie or injured a person to leave the place of the accident or injury without giving his name and address and license number to the person damaged or injured, as well as to a police officer if one is in the vicinity; if not, then the operator must report the facts to the nearest police station or judicial officer; also requires pollce officers and judiciai officers who receive reports of motor vehicle accidents to make a memorandum of the facts reported, and of such additional facts as may come to their knowicdge, and promptly deliver the same to a Rolice Justice or other Magistrate.
(Seriai Numbers on Autos, Removing, etc.) Another amendment makes it a felony, instcad of a misdemeanor, for any person wilfully to remove, deface, cover, alter or destroy the manufacturers serial number or any other distinguishing number or identification mark on any motor vehicle or on any mechanical device; or for any person knowingly to buy, seli, receive, dispose of conceal, or have in his possession any motor vehicle or mechanicai device from which any identification number or mark has been removed, altered, or destroyed.

Bail Bondsmen-Amends the code of criminal procedure, by requiring bondsmen in criminal cases to be licensed by the State Superintendent of Insurance. Bonding corporations must procure a separate license for each officer and empioyee authorized to execute such bonds. Limits the premium to 3 per cent. of the bond. Defines a professional bondsman as any person, firm or corporation executing within one month criminal bail bonds in more than two cases not arising out of the same transaction.

Bankruptcy Discharges-Amends the Debtor and Creditor Law in reiation to discharge of bankrupt from judgment. Approved March 7, 1922; effcctivs immediately.

Section 150 is amended by providing that at any time after the expiration of one year from the date a bankrupt is discharged from his debts under the Federal Bankruptcy Act, an application may be made by the bankrupt, his receiver, trustee or any other interested person or corporation to the court in which a judgment was rendered against him for an order directing the judgment to be cancclied and discharged of record; but such order shall not affect a judgment lien upon real property owned by the bankrupt more than four months prior to being adjudged a bankrupt.

Bonus Act-Creates the New York Veterans' Reilef Commission, consisting of the Adjutant General, the Comptroller, and the Attorney General, and authorizes the appointment of a deputy commissioner in each Assembly district. Appropriates \(\$ 1,000,000\) and provides for a maximum allowance of \(\$ 250\) to each sick or disabled ex-service man residing in the State on Aprii 12, 1922 , whose sickness or disability was incurred in, or resulted from, his military or naval service between April 6 , 1917, and November 11, 1918. Veterans without dependents are to recelve \(\$ 30\) per month; with dependents, \(\$ 45\) per month. Veterans reguiarly receiving aid from the United States Government equal to that provided in this Act are not to receive State aid. Applications for relief are to be filed with deputy commissioners in the Assembly district where veteran resides. In addition to supplying proofs as to service, every applicant for relief must furnish proof that he has been out of regular employment for fourteen days preceding date of application.

Budget, County and City-N. Y. City Charter, effective February 28, 1922. Makes all county expenses a general charge upon the city as a whole,
instead of upon each county separately. Permits merging tax levy of each county with that of the boroughs, thereby providing a flat rate for ali the boroughs.

Charity Frauds-Amends the Banking Law by requiring banks, savings banks', and trust companies to fur ish, upon request, to locai offciais charged With the administration of laws rolating to the poor, information as to whether o not an applicant for relief; or the husband or wif of such applicant, has funds, securities of other personal property, on deposit or in the custody of such banks or trust companies.

Courts; Children's-Outside of Greater New York, under the new law signed by Gov. Millcr; April 10, 1922 , the. County Judge will act as the Judge of the newly created court in each county in which the Board of Supervisors certify that he is abie to discharge the duties of the office. Otherwise a children's court. Judge will be elected in each county.

Extra Courts-A new law provides for two extra Criminal Parts of the Supreme Court in New York City, and also two additional parts of General Sessions; aiso six additional assistants to the District Attorney.

Commuters' Tickets-They must not be loaned by the owner or purchaser, and must not be bought at less than the schedule of rates fled and published.

C inditional Sales-Amends Personal Property Law; deflles conditions; prohibits removais or sale by buyer without notice; makes unlawfui the concealment or removai of goods; requires original contract of sale or copy thereof to be fled with city clerk, and the refling of contracts when goods are removed from the original filing district; and makes buyer liable for loss and injury after the delivery of the goods.

Congressionail Reapportionment-Provides for new boundary lines for the \(11 \mathrm{th}, 12 \mathrm{th}, 13 \mathrm{th}\), and 14th Congressionai Districts, in New York City. They cover all Manhattan south of 14 th Street.

Contracts, Awarding of-Amends the New York City Charter by permitting the award of a contract in cases where an appropriation is insufficient at the time bids are opened, provided an additional appropriation sufficient to make up the amount required, to equai the amount bid, is secured before an award is made.

Corporations-In effcet March 29, 1922. Amends the Stock Corporation Law by requiring all stock corporations organized plior to January 1, 1898, and other than those paying a franchise tax subsequent to January 1, 1919, except banking, insurance, transportation, and railroad corporations, to file with the Secretary of State before December 31, 1922, a report showing the corporation in existence. A list of corporations failing so to report is to be transmitted to the Governor before December 31, 1923, who by proclamation shait declare such corporations dissolved and their charters forfeited. The names of corporations so dissolved are to be reserved for a period of three months following publication of the Governor's proclamation, and during such period no corporation shall be formed under a name the same as any name so reserved or so neariy resembling it as to be calculated to deceive, nor shall any foreign corporation, within such period, be authorized to do business in this State under a name the same as any name so reserved or so nearly resembling it as to be calculated to deceive.

Within three months from date of publication of the Governor's proclamation, a corporation whose name appears therein may, upon payment of a \(\$ 25\) fee, file a certificate of continuance with the secretary of State and secure the restoration of its corporate powers, rights, etc.

Other amendments to the Stock Corporation Law provide for issuance of stock without voting power; providing also that every stock corporation incorporated in this State shali pay an o ganization tax of one-twentieth of one pe: cent upon the amount of the par value of all the shares with a par value which it is authorized to issue and a tax of five cents on each share without par value, and a like tax upon any subsequent increase thereof.

Divorce-By an amendment to the Marriage Law, signed by Governor Miller and in effect March 25, 1922, absence for five years is made a ground of divorce in this State. The amendment is as follows: "Dissolution of Marriage on Ground of Absence - A party to a marriage may present to the Supreme Court a duiy verified petition showing that the husband or wife of such party has absented himself or herself for five successive years then last past without being known to such party to be living during that time; that such party believes such husband or wife to be dead; and that a diligent search has becn made to discover evidence showing that such husband or wife is living, and no such evidence has been found. The court shail thereupon by order require notice of the presentation and object of such petition to be published in the same manner as required for the publication of a summons in an action in the Supreme Court where service of such summons is made by publication; such notice shali be directed to the husband or wife who has so absented himseif or herself and shall state the time and place of the hearing upon such petition, which time shall be not less than twenty days after the completion of the publication of such notice; and if the court, after the flling of proof of the proper publication of said noticc and after a hearing and proot taken, is satisfled of the truth of all the allegations contained in the petition, it may make an order dissolving such marriage.

Draft Dodgers-Violators of the war-time se-lective-drast act arc prohibited from hoiding pubiic office in New York Statc.

Elections-The Attorney General is given practicaliy all of the powers ol the defunct State Suder-
intendent of Elections, including employing deputies to entorce the Election Law.

In New York City the functions of the former State Superintendent of Elections are exercised by the Board of Elections and the police. Throughout the rest of the State police officials and Sheriffs act.

Farm Loan Bonds-They are made a legal investment for savings banks and trust companies.

Firemen, Two-Platoon-Provides ior a twopiatoon system in the New York City, Buffalo, and Rochester Fire Departments.
Food, Official Grades for-Amends the Farms and Markets Law, effective April 1, 1922, by empowering the Commissioner of Farms and Markets to establish official grades for foods and farm products, prescribe the use of such grades, and provide for the marking, packing and shipping of foods and farm products so graded; aiso to inspect and determine the grade and condition of farm products both at shippirg points and receiving centres, and provides for the issuance of certificates as to the grade of such products.

Food Samples-Whenever the Commissioner of Farms and Markets shall examine or inspect any product manufactured or offered for sale and shall take a sample of such product, he shall also take a duplicate sample thereof and shall tender, and if accepted deliver, such duplicate sample to the person having custody of such product when such sample is taken.

Gowanus Bay District (Brooklyn) Improve-ment-Authorizes the Board of Estimate to lay out upon the map or plan of the Borough of Brooklyn, and open and improve streets within the territory bounded by the not therly line of 26 th Strect, the easterly side of 3rd Avenue, the southeriy line of 39 th Street and the bulkhead line along Gowanus Bay and New York Bay, in the manner provided in the Charter, without obtaining the consent of adjacent owners.

Harlem River-A ppropriates \(\$ 1,500,000\) to buy Johnson's Iron Works site and cede it to the United States, so that the latter can remove the bend in the river between the North River and Broadway.

\section*{Housing Laws for New York City-One} amendment permits (under the Insurance Law) life insurance companies to invest 10 per cent of their assets in new housing for the public at \(\$ 9\) or less a month a room. This the companies may do until March 1, 1924-and so long thereafter as the emergency continue:.

Another amendment extends to February 15, 1924, the appiication of certain acts of 1920 and 1921, relating to defenses in actions based upon unjust, unreasonable and oppressive agreements for rent os premises occupied for dwelling purposes.

Another amendment requires a landloid to give 30.days' notice of an inc. ease in rent, and providing that the value of real property shall be presumed to be the assessed value for the purpose of determining the fair and reasonabie rent or rental value.

Another extends to April 1, 1923, the time within which the construction of partially tax-exempt dwellings may be begun.

A special act forbids hoisting of lumber or timber on outside of buildings under construction.

Ice Cream, Cream, Milk-An amendment to the Food Law prohibits the sale of any substance in imitation or semblance of cream or milk, and the sale of any product as and for "ice cream" which does not contain at least 8 per cent. of milk fat and at ieast 18 per cent. of milk fat and milk sollds not fat combined, except that when the ingredients of ice cream shali include eggs, iruit, fruit juices, cake, contections, cocoa, chocolate or nuts, sucli reduction in the percentages of milk fat and milk solids not fat as may be due to the addition of such ingredients shall be permitted or approved, provided the product sinall contain at least \(61 / 2\) per cent. of milk fat and at least 15 per cent. of milk fat and millk solids combined.
Also repeals Section 53 , effective July 1, 1922, which requires that certified milk must be sold in conformity witil regulations prescribed by, and bear the certiflcation of, a milk commission appointed by a county medicai society.

Income Tax-Amends the Tax Law in relation to estates and trusts by providing that if the distribution of income is in the discretion of the fiduciary, the tax is to be imposed as provided, without deduction of amount of income paid or credited to beneficlary; provides also that a trust created by an empioyer as a part of a stock bonus or proflt-sinaring plan for the exclusive benefit of some or ali of his employees, to which contributions are made by such employer, or employees, or both, for the purpose of distributing to such employees the earnings and princlpal of the fund accumulated by the trust in accordance with such plan, shali not be taxable, but any amount actually distributed or made available to any distributee shali be taxable to hin in tile year
in which so distributed or made avaiiable to the extent that it exceeds the amount paid in by him.
Amends the Tax Law by striking out the provisions requiring income tax returns and inventories, when used, to conform to forms and methods prescribed by the United States Internal Revenue Commissioner, and providing that inventories shaii be made upon a basis to be prescribed ly the Tax Commission; also that returns shall show such facts as may be deemed necessary by the commission.

Insane, State Hospital for-New buildings and grounds will be at Creedmoor, Queens Borough, L. I. The present plant, at Kings Park, L. I.. Will mental diseases. The new plant will be known as the Brooklyn State Hospita, Creedmoor Division.

Insurance Companies-Grants to mutual fire insurance companies the rights and privileges of stock insurance companies. Another amendment prohibits mutual fire insurance companies from converting themselves into stock companies.

Still another amendment gives State Supcrintendent of Insurance control of rate-making associations, and regulation of fire insurance rates.

Interest Rate-Amends the Banking Law by providing that investment companies organized under New York State law may charge 6 per cent interest on ioans or discounts. The exaction of a greater rate of interest forfeits the entire interest.

Investment Securities-Amends the Banking Law, permitting investment companies to purchase, invest in, hold and sell stocks of any corporation engaged in business of the same general character as such investment company, or engaged in business incidental to the business conducted by such investment company, to an amount in any one such corporation not in excess of 10 per cent. of the capital of such investment company and to an amount in all such corporations not in excess of 30 per cent. of the capital of such investment company; provided that the purchasing and holding of such stock is duly authorized by a resolution of the board of directors of such investment company

Knox Headquarters-Permits New York State to accept as a gift from the Knox Headquarters to accept as a gift from the knox Headquarters County where stands the mansion occupied at times during the Revolutionary War by Major Gen. Nathaniel Greene, Major Gen. Henry Knox and Major Gen. Horatio Gates as their headquarters.

Marriage-(see Divorce.)
Milk (see also Ice Cream, and Cream)-Defines (Farms and Markets Law) "skimmed milk" to mean milk from which part or a 1 of the cream has been removed but is otherwise unadulterated except as to excess of water or fluids and deficiency in milk fat or milk solids, provided it contains at least \(8 \frac{1}{2}\) per cont. of milk solids.

Permits the sale of puie skim cheese made from milk unadulterated except by skimming.

Prohibits the manufacture and sale of any condensed, evaporated, concentrated, powdered, dried or desiccated milk, cream or skim milk to which have been aaded, mixed, blended or compounded any fats or oils other than milk fat; and providing that after October 1, 1922, condensed or evaporated skimmed milk must be sold in containers or packages of not less than 10 pounds each and distinctly labeled either "Condensed, Skimmed Milk" or "Evanorated Skimmed Milk.'

Oleomargarine-Defines the terms "oleomargarine" or "butterine" to mean "any oleaginous substance" manufactured for sale as a substitute for and to take the place of, butter, not made exclusively of pure milk or cream; prohibits the saie, as a product of the dairy, of any imitation butter; requircs the name and address of the manufacturer to be plainly printed on cartons or wrappers together with the word "Olcomargarine;" strikes out the provisions that packages must be sealed; and requires that where any device or brand is imprinted upon any brick or portion of the substance itself the word "Oieomargarine" must also be iegibiy. indented thereon.

Passenger Motor Vehicles, Indemnity Bonds -Amends the Highway Law by requiring the owners of motor vehicles, transporting passengers for hire in cities of the frst ciass, to fle with the State Tax Commission an indemnity bond or insurance policy in the sum of \(\$ 2,500\) for each such vehicle operated conditioned for the payment of any judgment recovered for death or for injury to persons or property caused in the operation or the defective construction of such motor vehicles. Violation is made a misdemeanor.

Pensions-More than 50,000 county and clty employees throughout tile State, except those already receiving pensions, may join the state employees' retlrement system under the Draper bill, signed by the Governor April 12,1922 . In explaining tic new law, State Controiler Wendell said:
"Some of the benefits are: Supcrannuation retirement at 60 years, with allowances proportionate to time servpd equal to one-seventieth of average salary for last five years for each year served; physical disability retirement at any age after fifteen years' servicc, allowances not less than one-fourth of ayerage salary for the last five years, greater length of service producing increased amount; discontinued service aliowance obtainable after twenty years' service where leaving public offce through no fault of employee.'

Police Captains in New York City-They are to be selected from lieutenants who have served at least one year.

Push-Cart Pedlers-Amends Farms and Markets Law, authorizing the Commissioner of Public Markets to appoint supcrvisors to supervise the sale of market produce from push carts and other vehicles in open-air markets; aiso requircs push-cart vendors to secure permits to conduct business in open-air markets, the fee therefor not to exceed \(\$ 1\) per wcek per vehicle.

Put-and-Take Tops-Prohibits the sale of all gambling devices, including put-and-take tops.

Real Estate Brokers and Salesmen's Licenses -Amends the Real Property Law; provides that, on and after October 1, 1922, real estate brokers and salesmen in NCW Yoik City and in adjoining counties must be licensed by the State Tax Commission. In cities of the first class the annual license fee for real estate brokers is \(\$ 25\); salesmen. \(\$ 5\); second-class cities, brokers, \(\$ 15\); salesmen, \(\$ 3\); in all other places, brokers, \(\$ 10\); salesmen, \(\$ 2\).

Rcceivers, referees, and fiduciaries are exempt from the requirements of this bill.

Rent Laws-(see Housing Laws).
Resident, the Term Defined-Amends the definition of "resident" in Section 350 of the Tax Law by including any person domiciled in the State and any other person who maintains a permanent place of abode within the State and spends in the aggregate more than seven months of the taxable year within the State; also adds ncw Section \(367-\mathrm{a}\). providing that a taxpayer who changes his status from that of a resident to a non-resident, or vice versa, must file two rcturns, one as a resident and the other as a non-resident; and provides that the exemptions granted by Section 362 shail be divided ratabiy between the two returns so iled, according to time

Savings Banks-They may make loans on pass books of depositors.

Short Weight-Amends Farms and Markets Law as follows: When commodities are sold or offered for sale in containers whose sizes are not otherwise provided by statute, the net quantity of the contents of each container shall be plainly and conspicuously marked, branded or otherwise indicated on the outside or top thereof or on a label or a tag attached thereto in terms of weight, measure or numcrical count; provided, however, that reasonable variations shall be permitted.

Soldiers' Bonus-(see Bonus.)
Spite Fences-Amends Real Property Law by providing that whenever the owner or lessce of land shall erect or shall have erected thereon any fence or structure in the nature of a fence which shall excecd 10 feet in ieight, to exclude the owner or occupant of a structurc adjoining land from the enjoyment of light or air, the owner or occupant who shall thereby be deprived of light or air shall be who shall thereby be deprived of light or air shall be to have such fence or structure adjudged a private nuisance. If it shali be so adjudged its continued maintenance may be enjoined. This section shall apply to all such existing fences or structures but shall not apply to any action now pending nor shall it preclude the owner or iessee of land from hereafter improving the same by the erection of any structure thereon in good faith.

Standards, Bureau of-The Board of Estimate and Control shall create a bureau of standards and appoint a director thereof and such assistants as may be needed to perform the duties imposed by this section. It shall be the duty of such bureau to establish standards and standard specifications for ali materials, supplies and equipment purchased \(0^{-}\) contracted for by or under the jurisdiction of the superintendent of purchase. In its work it shall advise, consult, and co-operate with the head of each State department, board, commission and office and with the superintendent of purchase. Ail such standards and standard specifications shall be submitted to and approved by the incad of each department, commission, boaid or office requiring such matcrials, supplies or equipment, except in case ot disagrcement, when the airection of the board shall prevail. Committers of officers and employces of the state shall be selected or appointed by the director of this bureau, to aid in formulating standards and standard specifications and to recommend them for consideration by the bureau.

State Printing-Transfers powers of the State Printer to the Board of Estimate and Control.

Stock Transfer Tax-One amendment strikes out the provisions exempting laundering and mining corporations from payment of the annual franchise tax on capital stock empioyed within the State, as provided in Section 182; also provides that corporations subject to the \(41 / 2\) per cent. franchise tax under Article \(9-a\) shall be exempt from the tax imposed by Section 182.

Another amendment provides that the tax of two cents on each \(\$ 100\) of face value shall apply to all saies, or agrecments to sell, or memoranda of sales and all deliveries or transfers of shares or certificates of stock, or certlftcates of rights to stock, or certificates of deposit representing taxable certiffcates, in any domestic or foreigh association, company or corporation, or certincates of interest in business conducted by a trustee.

Tax Rate, New York City-(see Budget, County and City).

Temple to the Arts-Authorizes New York City to acquire, by gift, purchase or condemna tion, a site in Manhattan for a building to be used for the advancement of education in music, drama, and other arts.

Theatre Construction-Amends the Labor Law, effective April 1, 1922. Defines a "place of public assembly" to mean a place maintained, rented or leased for pecuniary gain where one hundred or more persons may assemble for amusement or recreation.

Adds new Article 17, providing that all such places must be constructed, equipped and maintained in conformity with rules prescribed by the Industrial Board, which rules are to constitute the "State Standard Building Code," and are to supersede any special law or locai ordinance inconsistent therewith and may be limited in their application to certain classes of buildings or to the conditions under which they are operated, and some or ail of such rules may apply only to buildings or places to be constructed maintained or conducted in the future. In New York City these rules are enforced by the Building Departinent.

Ticket Speculators-Amends the General Business Law by adding new Articie 10-B, effective Aprii 12, 1922, requiring all persons engaged in selling tickets of admission to theatres, places of amusement or other piaces where public exhibitions, games, contests or performances are held, to be licensed by the State Comptroller, to fle a \(\$ 1,000\) bond, and to pay an annuai license fee of \(\$ 100\); also prohibiting licensees from selling such tickets at a price in excess of fifty cents in advance of the price printed on the ticket; and requiring that the admission price in every case shall be printed on the face of such tickets. Violation is made a misdemeanor.

Transit Law in New York City-The amendments penalize a company that does not join the reorganized transit system by limiting it for all time to a 5-cent farc; give the Transit Commission jurisdiction over lines that are parties to a lease where the lease is abrogated, and ailow the commission to substitute itself for the city's representatives on the Board of Control during the first year tiat the reorganized transit system is operated

Usury-(see Interest Rate).
Voters' Literacy Test-The new law authorizes the Secretary of State to have a serics of cards. printed, each card to contain a 100 -word excerpt from the State Constitution. New voters must be able to read one of these cards and to write ten words in English.

Voting Machines-Amends the Election Law by making the adoption of voting machines mandatory in cities of the first class, and requiring that 15 per cent of the polling places in New York City be equipped therewith for use in the general election of 1922; an additional 40 per cent. in 1923 ; and all polling places so equipped by 1924. If the Board of Elections fails to adopt; provide and install the requisite machines the Secretary of State is empowered to contract therefor and determine as to the polling places in which they shall be used.

Water Power-Embodies a plan for the power development by the State of the surpius watcrs of the barge canal and sale of the surplus power to the highest bldder. There is an appropriation of \(\$ 1,000,000\) for the initial development of Crescent Dam and Visscher's Ferry, where 10,000 horsepower is available. These two dams were finished in 1915 and 1913 respectively. The project is under the Superintendent of Pubiic Works.

Women in Night Work-A 1922 amendment to the State Labor Law allows women proofrcaders and machine typescttcrs on newspapers to work at night.

Workmen's Compensation Amendments(see Workmen's Compersation Laws elsewhere in The Almanac).
